5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy makes mainly neutral effects as there is no direct reference to tackling inequalities and the elimination of discrimination in the policy.	Potential link to other initiatives which seek to integrate communities	Make reference in the policy to tackling inequalities	Partially	No amendments have been made to the policy text to address mitigation comments in relation to tackling inequalities. However, this is covered by corresponding thematic policy GM E1 covers inclusive and sustainable development. However, it is considered that the policy could be strengthened further by more explicit reference to tacking inequality.	o	o	o	Policy GM- P2 is focused on employment sites and premises but has no specific reference to opportunities for tackling inequalities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for tackling inequalities remains neutral.	It is considered that the policy could be strengthened further by more explicit reference to tacking inequality.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				Any new development as part of the employment premise should try to link to existing communities where appropriate	Y	Policy text has changed in to reference employment land be well connected	o	o	o	Policy GM- P2 is focused on economic sites and premises. Policy text has been amended to ensure employment opportunities are well connected following the IA mitigation.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				Any new employment development should consider accessibility in design (e.g. for disabled and elderly people)	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing accessibility in employment spaces	o/-	o/-	o/-	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to opportunities for accessible design. As such, the scoring has been changed and the potential impacts of the policy on opportunities for accessible design remains neutral to negative.	The policy could be further strengthened through reference to accessibility standards within employment spaces
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	?	?	?	I	P	GM	Receptors: built environment, air quality Affected groups: various	The policy makes mainly uncertain effects There is the potential for new employment development to integrate new green space for employees to utilise	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	?	?	?	I	P	GM/W				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	?	?	?	I	P	GM/L				If greenspace is lost make sure there is adequate replacement and ensure that the design of new employment premise considers the integration of green space	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces. However, this topic is covered in corresponding thematic policies GM G2 and Strat-13 which covers green infrastructure networks and GM G6 which covers urban green spaces	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to opportunities for new and existing green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces remains uncertain.	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/ no effect against this objective and assessment criteria anticipated	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy	No explicit mention of how development might support education and training, although some links between development (and future occupiers) may be established over time	Improved skill levels of the workforce	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

8	Support improved educational attainment and skill levels for all	Improve educational and skill levels of the population of working age?	?	?	?	I	P	Local / GM	Affected groups: various / all			The policy should future employment sites with a need for training e.g. requiring apprenticeships	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and links to enhancing skill levels. However, this topic is covered in corresponding thematic policy GM E5 which covers skills,	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to education facilities and training. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education facilities and training remains uncertain.	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	?/+	?/+	?/+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy makes mainly uncertain or positive effects The policy is focused on the retainment/ creation of employment premise but does not make specific reference to transport. It is likely that the employment sites have the potential to be well connected to existing transport infrastructure	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	The policy should make explicit reference to locating new employment premise close to existing transport infrastructure, especially linking to sustainable modes of transport	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing employment opportunities close to existing infrastructure and sustainable modes of transport. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?/+	?/+	?/+	Policy GM- P2 is focused on employment sites and premises but has no specific reference to locating employment opportunities close to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for employment opportunities close to transport infrastructure remains uncertain.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	?/+	?/+	?/+	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing employment opportunities close to existing infrastructure and sustainable modes of transport. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?/+	?/+	?/+	Policy GM- P2 is focused on employment sites and premises but has no specific reference to locating employment opportunities close to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for employment opportunities close to transport infrastructure remains uncertain.	None Identified
		Support the use of sustainable and active modes of transport?	?/+	?/+	?/+	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing employment opportunities close to existing infrastructure and sustainable modes of transport. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?/+	?/+	?/+	Policy GM- P2 is focused on employment sites and premises but has no specific reference to locating employment opportunities close to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for employment opportunities close to transport infrastructure remains uncertain.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	?	?	?	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Potential for air quality effects from new employment land uses.	Increased trips by private motor vehicle will worsen the air quality over time	Stress importance of new public transport, active transport connection and travel plans for new strategic locations. Ensure industrial uses in appropriate locations away from residential areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable and active travel modes and appropriate locations for industrial uses. However, this topic is covered by corresponding thematic policy GM Strat 14 which covers the GM transport network	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to air quality, sustainable travel or appropriate locations for industry. As such, the scoring has not been changed and the potential impacts of the policy on opportunities remains uncertain.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	?	?	?	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Impacts are mainly uncertain Effects will depend on the local environment where the proposed employment sites are located.	Impact on the biodiversity assets may occur in combination with other developments	Opportunities for green space creation should be explored. As should opportunities for linking existing spaces and ecological networks. Access to any new green space should be open, thus increasing provision (assuming no green space is taken) in local areas, benefiting existing and future communities.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces and ecological networks. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to opportunities for new and existing green spaces and ecological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains uncertain.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?	?	?	D	P	Local / GM / Wider				Supporting studies for new development to include appraisal of impact on sites where necessary	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing appraising wildlife and geological sites including habitats and species. However, this topic is covered in corresponding thematic policy GM G9 which covers biodiversity and geodiversity	?	?	?	Policy GM- P1 is focused on employment sites and premises but has no specific reference to appraising wildlife and geological sites including habitats and species. As such, the scoring has not been changed and the potential impacts of the policy on appraising wildlife and geological sites including habitats and species remains uncertain.	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	?	?	D	P	Local / GM				Larger, strategic sites should contribute to creation of new multifunctional green infrastructure within the sites themselves (perhaps in any "buffer" zones between housing and employment), but also attempt to connect to existing sites through green and blue corridors. New sites should be accessible to existing communities as well as proposed future residents.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains uncertain.	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	?	?	?	D	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains uncertain.	None Identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	n/a	Neutral/no effect against this objective and assessment criteria anticipated	n/a	Urban heat island mitigation should be encouraged in new developments. Including (but has not limited to): energy efficient design, building orientation, shading, albedo, fenestration, insulation, green roofs/walls, passive ventilation, and mechanical ventilation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing urban heat island mitigation measures. However, this topic is covered by corresponding thematic policy GM S1 and 2 which covers sustainable development and carbon and energy	o	o	o	Policy GM- P2 is focused on employment premises and sites but has no specific reference to urban heat island mitigation. As such, the scoring has not been changed and the potential impacts of the policy on urban heat island mitigation remains uncertain.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+/?	+/?	+/?	D	P	L/GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	New development represents an opportunity to improve flood risk problems in an areas through the implementation of sustainable techniques, including GI	Increased risk of flooding as more development comes forward	Policy should reinforce existing guidance and best practice. Policy should link to other agendas, such as those relating to green infrastructure (and the consideration of multifunctional "green space" and ecosystem services), ecology, recreation and health.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered by other corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM- P2 is focused on employment premises and sites but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains uncertain.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered by other corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM- P2 is focused on employment premises and sites but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains uncertain.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered by other corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM- P2 is focused on employment premises and sites but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains uncertain.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered by other corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM- P2 is focused on employment premises and sites but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains uncertain.	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+/?	+/?	D	P	GM/W	Receptors: water courses, ground water, water supplies Affected groups: Various	New development represents an opportunity to improve water resources and water quality in areas where there are currently problems.	The quality and availability of water resources may be reduced	Policy should reinforce existing guidance and best practice in new development, and also seek to bring about improvements in the conurbations surface water network, linking to other agendas (e.g. those set out against objective 13)	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	o	+/?	+/?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains uncertain.	None Identified
		Promote management practices that will protect water features from pollution?	+/?	+/?	+/?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	+/?	+/?	+/?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains uncertain.	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	-	-	-	D	P	W				Policy should encourage design in new developments which encourages sustainable water use. This should include housing and employment.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	-	-	-	Policy GM- P2 is focused on employment sites and premises but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains uncertain.	None Identified
		Encourage reduction in energy use and increased energy efficiency?	o	?	?	D	P	GM / W	Receptors: climate Affected groups: Various	New development will require energy, and result in increased energy use. This policy makes explicit reference to maximising existing transport infrastructure, including rail and water	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	Policy should refer to sustainable design and cross refer to the carbon policy. There should also encourage sustainable design, making reference to building fabric (e.g. insulation) and technologies. This should cut across this policy, carbon emissions, design and GI.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable design. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	?	?	Policy GM- P1 is focused on employment sites and premises but has no specific reference to sustainable design is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on sustainable design remains uncertain.	None Identified

15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	+/?	+/?	D	P	GM / W				Policy should encourage the development of low carbon facilities to decouple economic activity with carbon emissions. This should focus on aspects such as energy generation, transport and buildings. Policy should also ensure integration of low carbon/renewable technology in conventional developments.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing low carbon and renewable energy. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	+/?	+/?	Policy GM- P2 is focused on employment sites and premises and references low carbon and renewable energy economic opportunities but has not amended the text following the 2019 mitigation. As such, the scoring has not been changed and the potential impacts of the policy on low carbon and renewable energy remains uncertain.	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	+/?	+/?	D	P	GM / W				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green house gas emissions. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	+/?	+/?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to green house gas emissions is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains uncertain.	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	?	?	?	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The policy makes no reference to protection of landscape, townscape or heritage assets. The developments talked about have potential to affect local landscape, townscape and specific views. This will be assessed in detail as part of any development (e.g. through LVIA, as part of planning and/or EIA).	Landscape quality is reduced and character is lost from various assets until it is diminished	Link to design policies	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	?	?	?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	?	?	?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	++	++	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy makes mostly positive effects The policy makes reference to increasing the delivery of previously- developed sites to minimise the need for Green Belt release. Although it is acknowledged in the policy that some Green Belt release will be required	Loss of greenfield land	Ensure the policy makes specific reference to prioritising brownfield sites	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising brownfield land. However, this topic is covered by corresponding thematic policy GM S1 which covers sustainable development	+	++	++	Policy GM- P2 is focused on employment sites and premises but has no specific reference to brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains positive.	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	?	?	?	D	P	W				Ensure that the best and most versatile agricultural land is protected from Green Belt release	Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting the most versatile agricultural land. However, this topic is covered by corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM- P2 is focused on employment sites and premises but has no specific reference to protecting versatile agricultural land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on agricultural land remains uncertain.	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	++	++	D	P	Local / GM				Ensure that the reuse of land and buildings is prioritised over Green Belt sites	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising brownfield land over Green Belt sites. However, this topic is covered by corresponding thematic policy GM S1 which covers sustainable development	+	++	++	Policy GM- P2 is focused on employment sites and premises but has no specific reference to brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains positive.	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	++	++	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to supporting the use of PDL. However, this topic is covered by corresponding thematic policy GM S1 which covers sustainable development	+	++	++	Policy GM- P1 is focused on employment sites and premises but has no specific reference to previously development land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains positive.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	?	?	?	D	P	Local/ GM	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	uncertain effect	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	?	?	?	D	p	Local/ GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	?	?	?	D	P	Local/ GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM P3 - Office Development

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of new scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	?/-	?/-	?/-	I	P	GM	Receptors: housing market, local population where sites come forwards Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Predominantly neutral/ no effects identified The policy states that conversion of offices into housing should be restricted which may have a negative impact on the delivery of housing	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			?/-	?/-	?/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	++	I	P	L/GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	+	++	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy is focused on the provision of office space in Greater Manchester which will increase and expand the employment offer. No direct links to education and training The policy highlights four areas which are thoughts to be well connected through public transport	Could have cumulative socio- economic and environmental effects with other local development schemes.	Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	+	++	D	P	GM				Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	+	++	D	p	Local/GM/Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy is focused on the provision of office space in Greater Manchester in four key locations and the policy mentions that this will be linked to taking advantage of the extensive international and local public transport connections including HS2 and the Northern Powerhouse Rail links. This however does not benefit smaller areas	Could have cumulative socio- economic and environmental effects with other local development schemes.	Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	+	++	D	P	Local/GM/Wider				Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	+	++	D	P	Local/GM/Wider				Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	Development near to deprived areas is not a guarantee that there will be a positive impact. Policy should consider how to ensure economic benefits flow to into the local area. This will only be achieved by developers and the districts/GMCA working together to investigate how local businesses and residents can apply for employment during the construction and the subsequent end use.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing economic benefits being brought into the local area and reducing deprivation. This topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive. However, this Policy or Policy GM E1 could be further strengthened through more explicit reference to reducing deprivation.	o	o	o	Policy GM- P3 is focused on office development but has no specific reference to reducing the proportion of people in deprivation and bringing economic benefits into the local area. As such, the scoring has not been changed and the potential impacts of the policy on reducing deprivation remains neutral.	This Policy or Policy GM E1 could be further strengthened through more explicit reference to reducing deprivation.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing economic benefits being brought into the local area and reducing poverty. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- P3 is focused on office development but has no specific reference to reducing the proportion of people in deprivation and bringing economic benefits into the local area. As such, the scoring has not been changed and the potential impacts of the policy on reducing deprivation remains neutral.	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Predominantly neutral effects It is assumed that new office space will be brought forwards to provide opportunity for all and in line with legislation which addresses equality of access and avoids discrimination	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				Link to social inclusion policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the social inclusion policy. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive.	o/-	o/-	o/-	Policy GM- P3 is focused on office development but has no specific reference to social inclusion. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for social inclusion remains neutral. However, there is no specific reference to opportunities for accessible design. As such, the scoring has therefore been changed and the potential impacts of the policy on opportunities for accessible design remains neutral to negative.	The policy could be further strengthened through reference to accessibility standards within employment spaces
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o/??	I	P	GM				Link to social inclusion policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the social inclusion policy. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive.	o	o	o/?	Policy GM- P3 is focused on office development but has no specific reference to social inclusion. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for social inclusion remains neutral.	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	+/?	+/?	+/?	I	P	GM	n/a	No explicit mention of how development might support education and training, although some links between development (and future occupiers) may be established over time	Capacity issues if new facilities are not developed at the same rate as new residential developments	Policy should seek to maximise education and skills potential from new development. The GMSF should encourage the linking together of new development and training (e.g. requiring apprenticeships for strategic development, larger scale developments and/or those which have some public funding). Major infrastructure and employment/housing site investment should seek to upskill the local workforce to ensure the right mix of skills is available into the future	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and links to growth industries. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	+/?	+/?	+/?	Policy GM- P3 is focused on office development but has no specific reference to education facilities and links to growth industries. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education facilities and links to growth industries remains unknown.	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and links to enhancing skill levels. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	o	o	o	Policy GM- P3 is focused on office development but has no specific reference to education facilities and links to growth industries. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education facilities and links to growth industries remains unknown.	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	+	++	D	P	Local / GM/ Wider	Receptors: GM population, transport network Affected groups: Various	The policy is focused on the provision of office space in Greater Manchester in four key locations and the policy mentions that this will be linked to taking advantage of the extensive international and local public transport connections including HS2 and the Northern Powerhouse Rail links. There is an aim to connect spaces within other polices and therefore the locations of office employment should assist with promoting sustainable methods	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	This is generally covered in policy, but more emphasis could be placed on walking and cycling as methods to access office space	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policy GM N3 and N5 which cover public transport and active travel	o	+	++	Policy GM- P3 is focused on office development but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	+	++	D	P	Local / GM/ Wider				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policy GM N3 and N5 which cover public transport and active travel	o	+	++	Policy GM- P3 is focused on office development but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None Identified
		Support the use of sustainable and active modes of transport?	o	+	++	D	P	Local / GM/ Wider				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policy GM N3 and N5 which cover public transport and active travel	o	+	++	Policy GM- P3 is focused on office development but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	-/+/?	-/+/?	-/+/?	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	There is a potential for negative air quality effects from new trips to new offices. The policy mentions delivery of offices in four key locations in Greater Manchester which are all well serviced by public transport networks to mitigate these impacts.	Increased trips by private motor vehicle will worsen the air quality over time	Stress importance of new public transport, active transport connection and travel plans for new strategic locations.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable and active travel modes. However, this topic is covered in corresponding thematic policy GM Strat 14 which covers the GM transport network	-/+/?	-/+/?	-/+/?	Policy GM- P3 is focused on office development but has no specific reference to sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities remains unknown.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/+/?	-/+/?	-/+/?	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Effects will depend on the local environment where the sites are located. These are predominantly built up areas, however this still brings potential impact on ecological resources. Individual site policies and appraisals will pick up the site specific details	Impact on the biodiversity assets may occur in combination with other developments	Opportunities for green space creation should be explored in new development. As should opportunities for linking existing spaces and ecological networks.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces and ecological networks. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	-/+/?	-/+/?	-/+/?	Policy GM- P3 is focused on office development but has no specific reference to opportunities for new and existing green spaces and ecological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains unknown.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				Supporting studies for new development to include appraisal of impact on sites where necessary.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing appraising wildlife and geological sites including habitats and species. However, this topic is covered in corresponding thematic policy GM G10 which covers biodiversity and geodiversity	o	o	o	Policy GM- P3 is focused on office development but has no specific reference to appraising wildlife and geological sites including habitats and species. As such, the scoring has not been changed and the potential impacts of the policy on appraising wildlife and geological sites including habitats and species remains unknown.	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	-/+/?	-/+/?	-/+/?	D	P	Local / GM				Larger, strategic sites should contribute to creation of new multifunctional green infrastructure within the sites themselves (perhaps in any "buffer" zones between housing and employment), but also attempt to connect to existing sites through green and blue corridors. New sites should be accessible to existing communities as well as proposed future residents.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	-/+/?	-/+/?	-/+/?	Policy GM- P3 is focused on office development but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	-/+/?	-/+/?	-/+/?	D	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure	-/+/?	-/+/?	-/+/?	Policy GM- P3 is focused on office development but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None Identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	n/a	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	-/?	-/?	D	P	W	Receptors: Climate Affected groups: all	New development will require energy, and result in increased energy use. The GMSF contains policy relevant to this objective which should help mitigate effects.	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified			o	-/?	-/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	n/a	The policy makes no reference to protection of landscape, townscape or heritage assets. The developments talked about have potential to affect local landscape, townscape and specific views. This will be assessed in detail as part of any development (e.g. through LVIA, as part of planning and/or EIA). The GMSF contains policy on design. This mentions: distinctive identity of places and historic context. As such, development brought forward in line with this policy ought to contribute positively to this objective. There is no mention of open spaces or public realm.	Landscape and heritage receptors may be eroded incrementally as development comes forward.	Link to design policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	o	o	o	Policy GM-P3 is focused on office development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	o	o	o	Policy GM-P3 is focused on office development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	o	o	o	Policy GM-P3 is focused on office development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	?	?	?	D	P	Local/GM	Receptors: existing buildings Affected groups: None identified	The policy does not refer to the preferred locations of office space, e.g. greenfield or brownfield, and this would be useful to provide a more general explanation of the approach that will be taken. The policy refers to the reuse of existing office buildings will be encouraged	Less need to new buildings as more office space is reused	Provide further details on the types of land that will be prioritised for development as office space	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising different types of land for development. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-P3 is focused on office development but has no specific reference to the types of land which will be prioritised for development. As such, the scoring has not been changed and the potential impacts of the policy remains unknown.	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting the most versatile agricultural land. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	o	o	o	Policy GM-P3 is focused on office development but has no specific reference to protecting versatile agricultural land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on agricultural land remains unknown.	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	+	+	D	P	Local / GM				Included in the policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	?	?	?	D	P	Local/GM				As above			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	+	+	D	P	Local/ GM	Receptors: existing physical infrastructure Affected groups: None identified	The policy discussed the potential for refurbishment of existing office accommodation being encouraged suggesting a commitment to supporting the reuse of buildings	Less need to new buildings as more office space is reused	None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

P4 - Industrial and Warehousing Development

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any <u>specific sensitive receptors</u> where they have been identified	Potential cumulative effects	Mitigation / policy input	2020

1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	+/?	+/?	D	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	policy states that poor quality existing employment areas can be brought forward as housing, as new sites replace them.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	P	GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	+	++	++	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy makes reference to providing new industrial and warehousing floorspace, including existing and new employment land sites and premise. In addition, the policy makes reference to realising the potential of the transport infrastructure to support the employment uses.	Could have cumulative effects with other local development schemes.	None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				GMSF should encourage the linking together of new development and training (e.g. requiring apprenticeships for strategic development, larger scale developments and/or those which have some public funding). Infrastructure investment should seek to up-skill the local workforce to ensure the right mix of skills is available into the future.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and links to enhancing skill levels. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge.	o	o	o	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to upskilling and training opportunities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for upskilling and training opportunities neutral.	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	D	P	GM				Make more specific reference to sustainable modes of transport instead of focusing mainly on road infrastructure	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	+	++	++	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	+/?	+/?	I	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy makes reference to realising the potential of the transport infrastructure such as the motorway network and the reduction of HGV trips. As such, this is likely to lead to improvements in transport connectivity	Could have cumulative effects with other local development schemes.	The policy does not make specific reference to public transport, public transport and the use of cycling in particular should be actively promoted	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	o	+	+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Improve transport connectivity?	o	+/?	+/?	I	P	GM				As above	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	o	+	+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	+/?	+/?	I	P	GM				Large scale developments offer opportunities to improve the utilities and the digital network. Equally, these types of improvements will contribute to the success of the sites. This should be explicit in the policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the digital connectivity and utilities infrastructure. However, this topic is covered in corresponding thematic policies GM N2 and N4 which cover digital connectivity and utility provision	o	+/?	+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to digital or utility infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for digital infrastructure remains unknown.	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	+	+	I	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	The policy makes reference to delivering more balance growth across the sub-region and tackling deprivation	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programs)	None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	+	+	I	P	Local / GM				None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy makes reference to balancing growth across the sub-region but there is no specific reference to discrimination and access.	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+/?	+/?	+/?	I	P	L/GM				Any new infrastructure development as part of employment land should try to link to existing communities (where appropriate).	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing to linking employment land to existing communities. However, this topic is covered in corresponding thematic policy GM E1 ensuring development is connected across GM and beyond by transport and digital infrastructure	+/?	+/?	+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to linking employment land to existing communities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for accessible design remains unknown.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	?	?	?	I	P	L/GM				Where new provision of employment land and supporting infrastructure comes about, accessibility should be considered (e.g. for disabled and elderly people) in design.	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing accessibility in employment spaces	?/-	?/-	?/-	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to opportunities for accessible design. As such, the scoring has been changed and the potential impacts of the policy on opportunities for accessible design remains unknown to negative.	The policy should include reference to accessibility standards within employment spaces
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+/?	+/?	+/?	I	P	L/GM				None identified			+/?	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	-/?	-/?	-/?	I	P	GM	Receptors: built environment, air quality Affected groups: various	Potential for air quality effects from new industrial and warehousing land use (including freight and other associated trips). New development may affect existing green space used by local communities (formal or informal).	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Ensure that industrial use is an appropriate distance from residential development. Stress importance of new public transport, active transport connections and travels plans for larger developments	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	-/+	-/+	-/+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Reduce health inequalities within GM and with the rest of England?	-/?	-/?	-/?	I	P	GM/W				As above	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	-/+	-/+	-/+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Promote access to green space?	?	?	?	I	P	GM				If green space is lots make sure that there is an adequate replacement	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces	?/+	?/+	?/+	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to opportunities for new and existing green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces remains unknown.	None Identified

7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	n/a	Neutral/no effect against this objective and assessment criteria anticipated	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	No explicit mention of how development might support education and training, although some links between development (and future occupiers) may be established over time	Improved skill levels of the workforce	Policy should seek to maximise education and skills potential from new development. The GMSF should encourage the linking together of new development and training (e.g. requiring apprenticeships for strategic development, larger scale developments and/or those which have some public funding). Major infrastructure and employment/housing site investment should seek to up-skill the local workforce to ensure the right mix of skills is available into the future.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education opportunities. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	o	o	o	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to maximising education and skills, linking new development to training opportunities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education opportunities remains unknown.	None Identified
		Improve educational and skill levels of the population of working age?	?	?	?	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education opportunities. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	?	?	?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to improving education and skill levels. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education opportunities remains unknown.	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	?/+	?/+	?/+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy makes reference to realising the potential of the transport infrastructure such as the motorway network and the reduction of HGV trips. However, the policy does not make reference to sustainable modes of transport	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Needs to explicitly reference use of sustainable modes of transport.	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	+	+	+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	?/+	?/+	?/+	D	P	Local / GM				As above.	Y	Policy text has changed in to reference the promotion and support of sustainable travel modes	+	+	+	Policy GM- P4 is focused on industry and warehousing development. Policy text has been amended to support sustainable travel modes following the IA mitigation.	None Identified
		Support the use of sustainable and active modes of transport?	?/+	?/+	?/+	D	P	Local / GM				Needs to explicitly reference use of sustainable modes of transport.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?/+	?/+	?/+	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to opportunities for sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel remains unknown.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	-/+/?	-/+/?	-/+/?	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Potential for air quality effects from new industrial and warehousing land use (including freight and other associated trips). Policy states that Greater Manchester's central position in the North of England provides an opportunity to support environmental objectives by reducing the number of HGV journeys	Increased trips by private motor vehicle will worsen the air quality over time	Stress importance of new public transport, active transport connection and travel plans for new strategic locations. Ensure industrial uses in appropriate locations away from residential areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable and active travel modes. However, this topic is covered in corresponding thematic policy GM Strat 14 which covers the GM transport network	-/+/?	-/+/?	-/+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities remains unknown.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/+/?	-/+/?	-/+/?	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Effects will depend on the local environment where the sites are located. Individual site policies and appraisals will pick up the site specific details.	Impact on the biodiversity assets may occur in combination with other developments	Opportunities for green space creation should be explored. As should opportunities for linking Existing spaces and ecological networks. Access to any new green space should be open, thus Increasing provision (assuming no green space is taken) in local areas, benefiting existing and future communities.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces and ecological networks. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	-/+/?	-/+/?	-/+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to opportunities for new and existing green spaces and ecological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains unknown.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-/+/?	-/+/?	-/+/?	D	P	Local / GM / Wider				Supporting studies for new development to include appraisal of impact on sites where necessary	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing appraising wildlife and geological sites including habitats and species. However, this topic is covered in corresponding thematic policy GM G9 which covers biodiversity and geodiversity	-/+/?	-/+/?	-/+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to appraising wildlife and geological sites including habitats and species. As such, the scoring has not been changed and the potential impacts of the policy on appraising wildlife and geological sites including habitats and species remains unknown.	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	-/+/?	-/+/?	-/+/?	D	P	Local / GM				Larger, strategic sites should contribute to creation of new multifunctional green infrastructure within the sites themselves (perhaps in any "buffer" zones between housing and employment), but also attempt to connect to existing sites through green and blue corridors. New sites should be accessible to existing communities as well as proposed future residents.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	-/+/?	-/+/?	-/+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None Identified

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	-/+/?	-/+/?	-/+/?	D	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	-/+/?	-/+/?	-/+/?	Policy GM- P4 is focused on industry and warehousing development but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	n/a	Neutral/no effect against this objective and assessment criteria anticipated	n/a	Urban heat island mitigation should be encouraged in new developments. Including (but not limited to): energy efficient design, building orientation, shading, albedo, fenestration, insulation, green roofs/walls, passive ventilation, and mechanical ventilation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing urban heat island mitigation measures. However, this is covered in corresponding thematic policy GM S1 and 2 which covers sustainable development and carbon and energy	o	o	o	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to urban heat island mitigation. As such, the scoring has not been changed and the potential impacts of the policy on urban heat island mitigation remains unknown.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+/?	+/?	+/?	D	P	L/GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	New development represents an opportunity to improve flood risk problems in an areas through the implementation of sustainable techniques, including GI	Increased risk of flooding as more development comes forward	Policy should reinforce existing guidance and best practice. Policy should link to other agendas, such as those relating to green infrastructure (and the consideration of multifunctional "green space" and ecosystem services), ecology, recreation and health.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains unknown.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains unknown.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains unknown.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+/?	+/?	+/?	D	P	L/GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM-Strat 13 which covers green infrastructure and GM S5 which covers flood risk and the water environment.	+/?	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to flood risk and green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure remains unknown.	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+/?	+/?	D	P	GM/W	Receptors: water courses, ground water, water supplies Affected groups: Various	New development represents an opportunity to improve water resources and water quality in areas where there are currently problems.	The quality and availability of water resources may be reduced	Policy should reinforce existing guidance and best practice in new development, and also seek to bring about improvements in the conurbations surface water network, linking to other agendas (e.g. those set out against objective 13)	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	o	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains unknown.	None Identified
		Promote management practices that will protect water features from pollution?		+/?	+/?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	o	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains unknown.	None Identified

		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	-	-	-	D	P	W				Policy should encourage design in new developments which encourages sustainable water use. This should include housing and employment.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	-	-	-	Policy GM-P4 is focused on industry and warehousing development but no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains unknown.	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	?	?	D	P	GM / W	Receptors: climate Affected groups: Various	New development will require energy, and result in increased energy use. This policy makes explicit reference to maximising existing transport infrastructure, including rail and water	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	Policy should refer to sustainable design and cross refer to the carbon policy. There should also encourage sustainable design, making reference to building fabric (e.g. insulation) and technologies. This should cut across this policy, carbon emissions, design and GI.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable design. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to sustainable design is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on sustainable design remains unknown.	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	+/?	+/?	D	P	GM / W				Policy should encourage the development of low carbon facilities to decouple economic activity with carbon emissions. This should focus on aspects such as energy generation, transport and buildings. Policy should also ensure integration of low carbon/renewable technology in conventional developments.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing low carbon and renewable energy. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to low carbon and renewable energy economic opportunities. As such, the scoring has not been changed and the potential impacts of the policy on low carbon and renewable energy remains unknown.	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	+/?	+/?	D	P	GM / W				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green house gas emissions. However, this topic is covered in corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	o	+/?	+/?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to green house gas emissions is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains unknown.	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	?	?	?	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The policy makes no reference to protection of landscape, townscape or heritage assets. The developments talked about have potential to affect local landscape, townscape and specific views. This will be assessed in detail as part of any development (e.g. through LVIA, as part of planning and/or EIA).	Landscape quality is reduced and character is lost from various assets until it is diminished	Link to design policies	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	?	?	?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	?	?	?	D	P	L				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to design policies. This is covered in thematic policy E1 which covers principles for creating sustainable places	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to design policies is mentioned. As such, the scoring has not been changed and the potential impacts of the policy linking to design policies remains uncertain.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	?	?	?	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy specifies the quantum of greenfield and brownfield land expected to be developed on and it is roughly 50/50. As such, the policy supports some development of brownfield land but also the release of greenbelt land	Loss of greenfield land	Ensure brownfield land is prioritised before Green Belt	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising different types of land for development. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to the types of land which will be prioritised for development. As such, the scoring has not been changed and the potential impacts of the policy remains unknown.	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	?	?	?	D	P	W				Ensure that best and most versatile agricultural land is protected from Green Belt release	Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting the most versatile agricultural land. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to protecting versatile agricultural land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on agricultural land remains unknown.	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	?	?	?	D	P	Local / GM				Ensure the reuse of land and buildings is prioritised before Green Belt sites	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising brownfield land over Green Belt sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains unknown.	None Identified

		Support reductions in land contamination through the remediation and reuse of previously developed land?	?	?	?	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to prioritising brownfield land over Green Belt sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-P4 is focused on industry and warehousing development but has no specific reference to brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains unknown.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	?	?	?	D	P	Local/ GM	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Unknown effect	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	?	?	?	D	p	Local/ GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	?	?	?	D	P	Local/ GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

Homes for Greater Manchester

GM H1 - Scale, Distribution and Phasing of New Housing Development

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	? / -	? / -	D	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy sets out a specific housing target based on the calculation of housing needed which also takes into account existing levels of affordability. The background text reads that affordable housing is needed in GM and will be supplied but this is covered in more detail in a later policy. The policy mentions how new housing will be focused in areas with central locations and good connections to main concentrations of employment. An indirect effect of building large housing developments includes the provision of green spaces.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			++	? / -	? / -	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	O	O	D	P	GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	? / +	? / +	? / +	I	P	GM				None identified			? / +	? / +	? / +	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	O	O	O	D	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	? / +	? / +	? / +	I	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	Extra housing will assist in attracting and retaining skilled workers. However, employment land must be made available to accommodate for this. Manchester and Salford will be the focus of the highest levels of new housing due to their central location and access to transport and employment land.	Could have cumulative socio-economic and environmental effects with other local development schemes.	Link to provision of employment as there is further development creating a more viable economy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing employment opportunities. However, this topic is covered in corresponding thematic policies GM P1 which covers GM's economic growth	? / +	? / +	? / +	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to employment opportunities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for employment opportunities remains uncertain.	None identified
		Support education and training to provide a suitable labour force for future growth?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	?	?	I	P	GM				None identified			O	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	?	?	I	P	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	If additional transport infrastructure is built to accompany the housing, then this would have long term benefits. However, if the transport infrastructure can't accommodate for the increased population/spatial distribution then this would have an negative effect with increased congestion.	Could have cumulative socio-economic and environmental effects with other local development schemes.	Policy should refer to the infrastructure that will be provided as a result of the additional dwellings	Y	Policy text has changed in to reference that the necessary infrastructure and amenities will be provided to support the new homes being built	O	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing. Policy text has been amended to ensure the necessary infrastructure and amenities will be provided to support the new homes following the IA mitigation.	None identified
		Improve transport connectivity?	?	?	?	D	P	Wider				As above	Y	Policy text has changed in to reference that the necessary infrastructure and amenities will b provided support the new homes being built	O	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing. Policy text has been amended to ensure the necessary infrastructure and amenities will be provided to support the new homes following the IA mitigation.	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider				As above	Y	Policy text has changed in to reference that the necessary infrastructure and amenities will b provided support the new homes being built	O	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing. Policy text has been amended to ensure the necessary infrastructure and amenities will be provided to support the new homes following the IA mitigation.	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	O	O	I	P	Local	Receptors: GM population Affected groups: Lower socio-economic groups.	Not mentioned in policy	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	O	O	I	P	GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	O	O	I	P	GM	Receptors: housing market, first time buyers. Affected groups: various, depending on locality	The supporting text states that housing will be focused in the northern and central districts of GM, and in particular Salford and Manchester and does not reference other areas.	Potential link to other initiatives which seek to integrate communities	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	O	O	I	P	GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	O	O	I	P	GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	-	-	-	D	P	GM				This policy could be improved by allocating employment land in other areas so housing developments can be built outside of the central/northern areas of GM and referencing this directly in the policy.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to utilising employment land for residential development. However, this topic is covered in corresponding thematic policies GM G1 which cover sustainable development	-	-	-	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to utilising employment land for residential development. As such, the scoring has not been changed and the potential impacts of the policy remains negative.	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	O	O	O	I	P	GM	Receptors: Affected groups:	Not mentioned in policy	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	O	O	O	I	P	Local				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	O	O	D	P	GM	Receptors: GM population Affected groups: all groups will be affected by this	Not mentioned in policy	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	O	O	O	D	P	Local				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	O	O	D	P	Local				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	O	O	I	P	Local	Receptors: GM population Affected groups: all groups will be affected by this	Not mentioned in policy	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	O	O	O	I	P	GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	+	+	I	P	GM	Receptors: GM population, transport network Affected groups: Various	The increase in housing is designed to attract and retain skilled workers. The associated infrastructure and Masterplanning mentioned in the supporting text will include efficient design and suitable transport infrastructure. Long-term benefits of this policy will include the reduction in air pollution as people rely less on motor vehicles and utilise sustainable transport.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Provide sustainable transport that is well connected to employment, leisure and housing sites.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	+	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to sustainable transport. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for local travel movements and patterns of movement remains positive.	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+	+	+	I	P	Wider/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

		Support the use of sustainable and active modes of transport?	+	+	+	I	P	Wider/GM				The GMSF should encourage development of a strategic cycle network. Making walking a feasible option for short trip should be encourages through co-location.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	+	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to active transport such as a cycle network. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for local travel movements and patterns of movement remains positive.	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	O	O	o	I	P	Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Increased provision of housing, new masterplans and infrastructure will factor in sustainable modes of transport. This will have a positive effect long-term as people will rely less on motor vehicles and more on public/sustainable transport, thus reducing carbon emissions.	Less motor vehicles and more use of increasingly connected sustainable modes of transport, will ultimately reduce greenhouse emissions long-term.	Should explicitly mention the sustainable transport provisions which will be made to improve transport networks to new housing.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to sustainable transport. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for local travel movements and patterns of movement remains neutral.	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	O	O	O	I	P	Wider	Receptors: communities, green infrastructure and the environment. Affected groups: all people, and those in deprived areas.	Access to green infrastructure will be provided through the suitable design of housing sites. This will benefit the local community short term, providing a place for recreation and tranquility where communities can socialise. Long-term, the provision of green spaces will improve the health of residents by providing places for outdoor activity. Has the potential to positively impact deprived communities, providing tranquil green spaces and benefiting health long-term.	Benefit the health of local communities through access to open, green spaces.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+	+	+	D	P	Local / GM				Provide detail on the green spaces which will be factored into masterplans and housing sites. Focus on providing attractive green spaces in deprived areas, to enhance the local area and encourage healthy activities.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	+	+	+	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green infrastructure remains positive.	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	O	O	I	P	GM	Receptors: Communities, various aspects of the built and natural environment Affected groups: various / all	Not mentioned in policy	N/A	None identified		Whilst recommendations not previously made, with the greater emphasis on climate change, it is considered the policy could specifically reference climate change.	O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	This policy could be further strengthened through specific reference to climate change in this policy or relevant thematic policy in the Sustainability and Resilience Chapter.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	O	O	D	P	Local	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Not mentioned in policy	Increased risk of flooding	Policy should reinforce existing guidance and best practice. Policy should link to other agendas, such as those relating to green infrastructure (and the consideration of multifunctional "green space" and ecosystem services), ecology, recreation and health.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk impacts at the design stage of development. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk remains neutral.	None identified
		Ensure adequate measures are in place to manage existing flood risk?	O	O	O	D	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk impacts at the design stage of development. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk remains neutral.	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	O	O	O	I	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk impacts at the design stage of development. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk remains neutral.	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	O	O	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood risk impacts at the design stage of development. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk remains neutral.	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	I	P	N/A	Receptors: water courses, ground water, water supplies Affected groups: Various	Not mentioned in policy	The quality and availability of water resources may be reduced	Policy should reinforce existing guidance and best practice in new development, and also seek to bring about improvements in the conurbations surface water network, linking to other agendas (e.g. those set out against objective 13)	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains neutral.	None identified
		Promote management practices that will protect water features from pollution?	O	O	O	I	P	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains neutral.	None identified

		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	I	P	N/A				Policy should encourage design in new developments which encourages sustainable water use. This should include housing and employment. Include in design guide recommendation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to water resource management is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains neutral.	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	O	O	N/A	N/A	N/A	Receptors: None identified Affected groups: Various	Not mentioned in policy		Policy should encourage design in new developments which encourages sustainable energy use. This should cover building fabric (e.g. insulation) and technologies. Include in design guide recommendation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing energy efficiency. However, this topic is covered by corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to energy is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on energy efficiency remains neutral.	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	O	O	N/A	N/A	N/A				Policy should encourage the development of low carbon facilities to decouple economic activity with carbon emissions. This should focus on aspects such as energy generation, transport and buildings. Policy should also ensure integration of low carbon/renewable technology in conventional developments. Include in design guide recommendation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing low carbon and renewable energy. However, this topic is covered by corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing and references low carbon and renewable energy economic opportunities but has not amended the text following the 2019 mitigation. As such, the scoring has not been changed and the potential impacts of the policy on low carbon and renewable energy remains neutral.	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	O	O	N/A	N/A	N/A				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green house gas emissions. However, this topic is covered by corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to green house gas emissions is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains neutral.	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	O	O	N/A	N/A	N/A	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Not mentioned in policy	Landscape quality is reduced and character is lost from various assets until it is diminished	In enacting SO1 through policy, key landscape/townscape/heritage assets should be listed for protection. This may include some views to/from of key assets. Policy should also seek to improve areas where public realm (etc.) requires improvement, recognising the multiple-benefits associated with such improvements (recreation/health, social interaction, crime reduction, ecology, heritage etc.). Policy should recognised the importance of "networks" as well as individual sites/spaces, linking blue/green corridors to maximise various benefits (e.g. ecology benefits, recreation, sustainable transport potential and social cohesion). Include in design guide recommendation.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to key landscape, townscape and heritage assessments, improving public realm and recognising networks. However, these topics are covered in corresponding thematic policies GM Strat - 13 and GM G2 cover green infrastructure, GM E2 cover heritage matters and GM E1 covers creating sustainable places	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to key landscape, townscape and heritage assessments, improving public realm and recognising networks is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on landscape, townscape and heritage, public realm and networks remains neutral.	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	O	O	O	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to key landscape, townscape and heritage assessments, improving public realm and recognising networks. However, this topics are covered in corresponding thematic policies GM Strat - 13 and GM G2 cover green infrastructure, GM E2 cover heritage matters and GM E1 covers creating sustainable places	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to key landscape, townscape and heritage assessments, improving public realm and recognising networks is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains neutral.	None identified
		Respect, maintain and strengthen local character and distinctiveness?	O	O	O	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to key landscape, townscape and heritage assessments, improving public realm and recognising networks. However, this topics are covered in corresponding thematic policies GM Strat - 13 and GM G2 cover green infrastructure, GM E2 cover heritage matters and GM E1 covers creating sustainable places	O	O	O	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to key landscape, townscape and heritage assessments, improving public realm and recognising networks is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains neutral.	None identified
		Support the development of previously developed land and other sustainable locations?	?	?	?	N/A	N/A	N/A	Receptors: greenfield and brownfield land Affected groups: Non identified	Not mentioned in policy	Loss of greenfield land	Explore opportunities for how development of new greenfield sites could contribute to / enable the development of derelict land / sites elsewhere in the conurbation (e.g. through contributions / hypothecated tax regime etc.)	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development following the development of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to enabling or contributing to the development of brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains uncertain.	None identified

17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Protect the best and most versatile agricultural land / soil resources from inappropriate development?	?	?	?	N/A	N/A	N/A				Draft policy which ensures development of BAMV agricultural land is not promoted	Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting the BAMV agricultural land. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-H1 is focused on housing scale, distribution and phasing but no specific reference to protecting BAMV agricultural land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on agricultural land remains uncertain.	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	?	?	?	N/A	N/A	N/A				Explore opportunities for how development of new greenfield sites could contribute to / enable the development of derelict land / sites elsewhere in the conurbation (e.g. through contributions / hypothecated tax regime etc.)	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development following the development of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to enabling or contributing to the development of brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains uncertain.	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	?	?	?	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development following the development of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	?	?	?	Policy GM-H1 is focused on housing scale, distribution and phasing but has no specific reference to enabling or contributing to the development of brownfield land is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land remains uncertain.	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	O	O	N/A	N/A	N/A	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Not mentioned in policy	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	O	O	O	N/A	N/A	N/A				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	O	O	O	N/A	N/A	N/A				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM H2 - Affordability of New Housing

			Assessment										2020						
Ref	Objective	Assessment criteria….will the GMSF	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	++	++	D	P	GM	Receptors: transport network, road network, road users, utility network/customers, built environment, green spaces Affected groups: all	Policy mentions significantly increasing the supply of affordable housing. The policy details the aim to secure more public funding for the provision of affordable housing and has specific targets for the amount of affordable homes needed.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces. Improved inequalities in the provision of housing in areas of lower economic growth.	None Identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	+	++	++	D	P	GM				The location of affordable housing is important to ensure it is accessible to employment, retail, leisure and community facilities. On larger sites, it is important that the affordable housing is provided across the site to prevent clustering.	Y	Policy text has changed in to reference that affordable housing will be delivered to avoid clusters of tenure	++	++	++	Policy GM-H2 is focused on affordable housing delivery. Policy text has been amended to ensure housing tenures are not clustered within new development sites.	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	?	?	?	I	P	GM				None Identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	?	?	?	I	P	GM				None Identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	O	O	I	P	GM	Receptors: GM population Affected groups: All	Neutral/no effect against this objective and assessment criteria anticipated.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	The location of affordable housing is important to ensure it is accessible to employment, retail, leisure and community facilities.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered in corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for the location of affordable housing delivery. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
		Support education and training to provide a suitable labour force for future growth?	O	O	O	I	P	GM					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered in corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for the location of affordable housing delivery. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	O	O	I	P	GM					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered in corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for the location of affordable housing delivery. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all (emphasis on elderly/disabled who are less mobile).	The supporting text mentions providing more housing in Manchester and Salford due to their central location and connections to transport, services and employment. However, it does not detail the additional transport infrastructure needed in other areas which don't already benefit from connectivity.	Positive impacts for Salford and Manchester but potential negative impacts for areas not well connected	Ensure additional transport infrastructure/networks are provided where additional housing is located. This is covered by the Connected GM chapter.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing infrastructure where additional housing is located. However, this topic is covered in corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
		Improve transport connectivity?	?	?	?	D	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing infrastructure where additional housing is located. However, this topic is covered in corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing infrastructure where additional housing is located. However, this topic is covered in corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
4		Reduce the proportion of people living in deprivation?	?	+	+	D	P	GM	Receptors: GM population Affected groups: Lower socio-economic groups and deprived areas.	This policy has the potential to reduce barriers to housing domain in the IMD through the provision of additional housing, especially in areas with lower economic growth. It also	Reduced housing inequalities and a better IMD for 'barriers to housing' domain	Provide community services and facilities along with educational and training services to reduce deprivation long term. On larger sites, it is important that the affordable housing is provided across the site to prevent clustering to allow better social inclusion.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing community services and facilities being provided with new housing schemes. However, this topic is covered in corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	?	+	+	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for the provision of community and educational facilities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for community and educational facilities positive.	None identified

4	Reduce levels of deprivation and disparity	Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	?	?	?	I	P	GM		could help the proportion of people living in deprivation by providing more affordable housing to suit their needs.		Focus on providing accessible, high quality green spaces and access to green transport (bike schemes) and active transport in deprived areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces and supporting active travel. However, these topics are covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel and GM-Strat 13, G2 and G6 which cover green infrastructure	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to sustainable transport and green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable transport and green spaces opportunities remains unknown.	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: various, depending on locality	This policy states that the need for affordable housing was taken into consideration when calculating the housing requirement for GM. Ensuring the provision of affordable housing takes into account the needs of different socio-economic groups across GM. The policy also tailors the amount of housing supplied in different areas around GM.	Reduced inequalities	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	I	P	GM							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+	+	+	D	P	GM							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	O	O	O	N/A	N/A	N/A	Receptors: built environment, air quality, green spaces and cycling Affected groups: various	There is no mention of green space or how new housing developments will be designed. However, assuming this is covered in a later policy- the provision of new housing should incorporate green space which will promote active and healthier lifestyles.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Provide sufficient community services to accommodate for the increased population. Also ensure high quality green spaces are provided in deprived areas, especially those with low health IMD deciles.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
		Reduce health inequalities within GM and with the rest of England?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
		Promote access to green space?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: all groups	The policy doesn't cover this- assuming other policies will, since the provision of key services to accompany housing developments is necessary.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided. However, this policy could reduce inequalities	The location of affordable housing is important to ensure it is accessible to employment, retail, leisure and community facilities. On larger sites, it is important that the affordable housing is provided across the site to prevent clustering.	Partially	Policy text has changed in to reference that affordable housing will be delivered to avoid clusters of tenure. However, no amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O/+	O/+	O/+	Policy GM-H2 is focused on affordable housing delivery. Policy text has been amended to ensure housing tenures are not clustered within new development sites.	None identified
		Ensure sufficient access to educational facilities for all children?	O	O	O	N/A	N/A	N/A					Partially	Policy text has changed in to reference that affordable housing will be delivered to avoid clusters of tenure. However, no amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O/+	O/+	O/+	Policy GM-H2 is focused on affordable housing delivery. Policy text has been amended to ensure housing tenures are not clustered within new development sites.	None identified

		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	O	O	N/A	N/A	N/A					Partially	Policy text has changed in to reference that affordable housing will be delivered to avoid clusters of tenure. However, no amendments have been made to the policy text to address mitigation comments in relation to referencing affordable housing and its location to employment, retail, leisure and community facilities. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O/+	O/+	O/+	Policy GM-H2 is focused on affordable housing delivery. Policy text has been amended to ensure housing tenures are not clustered within new development sites.	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	O	O	I	P	GM	Receptors: GM population Affected groups: all groups	There is no mention of improving local education facilities but this should be covered in a later policy.	Reduced inequalities and improved skill set of working population. This will lead to wider economic growth.	In order to accommodate for the increasing population, more school places will need to be provided, as well as training/educational facilities for the local population in order to provide GM with a skilled work force.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and improving skills. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to education facilities and improving skills. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education facilities and improving skills remains neutral.	None identified
		Improve educational and skill levels of the population of working age?	O	O	O	I	P	GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education facilities and links to enhancing skill levels. However, this topic is covered in corresponding thematic policy GM E5 which covers skills, education and knowledge	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to education facilities and improving skills. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for education facilities and improving skills remains neutral.	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	?	?	?	I	P	Wider	Receptors: GM population, transport network Affected groups: Various	Transport is not mentioned in the policy, however supplying more housing across GM could indirectly put a strain on the transport infrastructure across the region.	An increasing population could put strain on the transport services unless they are improved.	Improve transport networks and infrastructure to accommodate for the additional population residing in the new housing developments.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	?	?	?	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Support the use of sustainable and active modes of transport?	?	?	?	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered by corresponding thematic policies GM N3 and N5 which cover public transport and active travel	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	O	O	O	I	P	Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated.	Increased trips by private motor vehicle will worsen the air quality over time. Or if a better network of sustainable transport is provided, air quality could be improved long-term.	Improve public transport networks to accommodate for the increasing population and ensure this provision is affordable to encourage use and reduce air pollution long term.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable and active travel modes. However, this topic is covered by corresponding thematic policy GM Strat 14 which covers the GM transport network	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities remains neutral.	None identified
11	Conserve and enhance biodiversity, green infrastructure and	Provide opportunities to enhance new and existing wildlife and geological sites?	O	O	O	?	?	?	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The building works associated with creating new housing sites could negatively impact geological sites, habitats and wildlife. However, the protection of these areas could be ensured by a later policy. This policy could impact green spaces and the tranquillity of areas if specific green infrastructure is not provided alongside the housing developments. However, if	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Describe how housing will be placed in appropriate locations, away from areas where there are protected species, habitats etc. Mention how housing sites will incorporate green infrastructure for recreation, amenity and tranquillity.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces and ecological networks. However, this topic is covered by corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to opportunities for new and existing green spaces and ecological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains unknown.	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?	?	?	D	T	Local					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing appraising wildlife and geological sites including habitats and species. However, this topic is covered by corresponding thematic policy GM G10 which covers biodiversity and geodiversity	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to appraising wildlife and geological sites including habitats and species. As such, the scoring has not been changed and the potential impacts of the policy on appraising wildlife and geological sites including habitats and species remains unknown.	None identified

	geodiversity assets	Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	O	O	O	?	?	?		opportunities for recreation, amenity and tranquillity are provided alongside the housing then this policy will enhance local areas long-term.			Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered by corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	O	O	O	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?	?	?	D	P	Local					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered by corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	?	?	?	Policy GM-H2 is focused on affordable housing delivery but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains unknown.	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	O	O	?	?	?	Receptors: Communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated.	Buildings which aren't equipped to deal with the effects of climate change could be susceptible to damage and loss.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	?	?	?	I	P	GM	Receptors: Communities, built environment, wider economy Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	?	None Identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	?	?	?	I	P	GM							?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	?	?	?	I	P	GM							?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	?	?	?	Receptors: Environmental Affected Groups: Non Identified	Neutral/no effect against this objective and assessment criteria anticipated.	?	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	O	O	?	?	?	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	?	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	O	O	?	?	?	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	?	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	O	O	O	?	?	?	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	?	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	O	O	?	?	?	Receptors: Environment, Built Environment Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	?	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	O	O	O	?	?	?				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM H3 -Type, Size and Design of New Housing Part 1 of 2 (Previously SOC 5 and SOC 6 and are now merged, this assessment is based on SOC 5 mitigation and scoring)

Ref	Objective	Assessment criteria….will the GMSF	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Majority of effects are: direct (D) or	Majority of effects are: Temporary (T) or	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020 Has 2019 mitigation been addressed? 1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	++	++	D	P	GM	Receptors: transport network, road network, road users, utility network/customers, built environment, green spaces, employment. Affected groups: all	This policy mentions the delivery of a wide range of housing value and tenures across GM. Build to rent schemes will incorporate appropriate levels of affordable housing and private rent. The policy also aims to work with the GMCA to ensure fairer rents and security of tenures.	Improved levels of economic growth with the retention of skilled workers. Reductions of inequalities in terms of access to housing.	None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	+	++	++	D	P	GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	?/ - / +	?/ - / +	?/ - / +	I	P	GM				None identified			?/ - / +	?/ - / +	?/ - / +	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	?	?	?	I	P	GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	O	O	n/a	n/a	GM	Receptors: GM population Affected groups: All	The policy is focused on housing and does not make reference to employment.	Potential for cumulative socio-economic effects with other local development schemes	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	O	O	O	n/a	n/a	GM							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	O	O	n/a	n/a	GM							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all (emphasis on elderly/disabled who are less mobile).	The policy has uncertain effects as there is no reference to transport infrastructure, however the policy is focused on new housing development.	N/A	None Identified.			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	?	?	?	D	P	Wider							?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider							?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+	+	+	D	P	Local / GM	Receptors: GM population Affected groups: Lower socio-economic groups and deprived areas.	This policy has the potential to reduce barriers to housing domain in the IMD through the provision of a mixture of housing types and tenures. The policy addresses the need to tackle poor quality housing, affordable and fairer rents and greater security of tenure. This will benefit a wide range of people across GM and help to tackle housing inequalities.	Reduced housing inequalities and a better IMD for 'barriers to housing' domain	Provide community services and facilities along with educational and training services to reduce deprivation long term.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing community services and education facilities being provided. However, this topic is covered in corresponding thematic policies GM E1 covering sustainable places and the need for developments to be well connected to services and facilities and GM E5 covering skills, education and knowledge	+	+	+	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the provision of community and educational facilities/services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for community and educational facilities remains positive.	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	++	++	D	P	GM				Focus on providing more green spaces (of good design quality) and access to free or low-cost green transport (bike schemes) in deprived areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces and supporting active travel. However, these topics are covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel and GM-Strat 13, G2 and G6 which cover green infrastructure	+	++	++	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable transport and green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable transport and green spaces opportunities remains positive.	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	+	+	D	P	Local	Receptors: GM population Affected groups: various, depending on locality	The policy states that communities will benefit by becoming mixed and inclusive which will directly foster good relations between different people. As housing becomes diversified and mixed across different areas, existing and new infrastructure will become equally accessible for different groups. The specific needs of different areas are addressed by this policy in the supporting text.	Reduced inequalities	Covered in policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	D	P	GM				Covered in policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	GM				Covered in policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	++	++	++	D	P	GM				Covered in policy.			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	O	O	O	n/a	n/a	n/a	Receptors: built environment, air quality, green spaces and cycling Affected groups: various	Neutral effect against this policy.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Provide sufficient community services to accommodate for the increased population. Also ensure high quality green spaces are provided in deprived areas, especially those with low health IMD deciles.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
		Reduce health inequalities within GM and with the rest of England?	O	O	O	n/a	n/a	n/a					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
		Promote access to green space?	O	O	O	n/a	n/a	n/a					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient community services and green spaces. However, these topics are covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces and community services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces and community services remains neutral.	None identified
		Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	O	O	n/a	n/a	n/a	Receptors: GM population		Socio-economic groups will be spread out across GM				O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

7	Ensure access to and provision of appropriate social infrastructure	Ensure sufficient access to educational facilities for all children?	O	O	O	n/a	n/a	n/a	Affected groups: all groups	Neutral effect against this policy.	through the provision of affordable and mixed housing. This means reduced health and education inequalities, with the improved access to key facilities.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	O	O	n/a	n/a	n/a	Receptors: GM population	Neutral effect against this policy.	Reduced inequalities and improved skill set of working population. This will lead to wider economic growth.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	O	O	O	n/a	n/a	n/a	Affected groups: all groups			None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	?/ - / +	?/ - / +	?/ - / +	I	P	Wider	Receptors: GM population, transport network Affected groups: Various	The policy has uncertain effects as there is no reference to sustainable transport, however the policy is focused on new housing development and therefore there are likely to be links.	An increasing population could put strain on the transport services unless they are improved.	Improve transport networks and infrastructure to accommodate for the additional population residing in the new housing developments. This will be covered through Connected GM.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?/ - / +	?/ - / +	?/ - / +	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	?/ - / +	?/ - / +	?/ - / +	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?/ - / +	?/ - / +	?/ - / +	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Support the use of sustainable and active modes of transport?	?/ - / +	?/ - / +	?/ - / +	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?/ - / +	?/ - / +	?/ - / +	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	O	O	O	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated.	Increased trips by private motor vehicle will worsen the air quality over time. Or if a better network of sustainable transport is provided, air quality could be improved long-term.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	O	O	O	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The building works associated with creating new housing sites could negatively impact geological sites, habitats and wildlife. However, the protection of these areas could be ensured by a later policy. This policy could impact green spaces and the tranquility of areas if specific green infrastructure is not provided alongside the housing developments. However, if opportunities for recreation, amenity and tranquillity are provided alongside the housing then this policy will enhance local areas long-term.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Describe how housing will be placed in appropriate locations, away from areas where there are protected species, habitats etc. Mention how housing sites will incorporate green infrastructure for recreation, amenity and tranquillity.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces, ecological and geological networks. However, this topic is covered by corresponding thematic policies GM G2 and Strat-13 which covers green infrastructure networks and G10 which covers biodiversity and geodiversity	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for new and existing green spaces, ecological and geological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains neutral.	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	O	O	O	n/a	n/a	n/a					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces, ecological and geological networks. However, this topic is covered by corresponding thematic policies GM G2 and Strat-13 which covers green infrastructure networks and G10 which covers biodiversity and geodiversity	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for new and existing green spaces, ecological and geological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains neutral.	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	O	O	O	n/a	n/a	n/a					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces, ecological and geological networks. However, this topic is covered by corresponding thematic policies GM G2 and Strat-13 which covers green infrastructure networks and G10 which covers biodiversity and geodiversity	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for new and existing green spaces, ecological and geological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains neutral.	None identified

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O	O	O	n/a	n/a	n/a					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces, ecological and geological networks. However, this topic is covered by corresponding thematic policies GM G2 and Strat-13 which covers green infrastructure networks and G10 which covers biodiversity and geodiversity	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for new and existing green spaces, ecological and geological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains neutral.	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	O	O	n/a	n/a	n/a	Receptors: Communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated.	Buildings which aren't equipped to deal with the effects of climate change could be susceptible to damage and loss.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	O	O	n/a	n/a	n/a	Receptors: Communities, built environment, wider economy Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	n/a	n/a	n/a	Receptors: Environmental Affected Groups: Non Identified	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	O	O	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	N/A				O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	O	O	n/a	n/a	n/a				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	O	O	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	N/A				O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	O	O	O	n/a	n/a	n/a				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	O	O	O	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	N/A				O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	O	O	n/a	n/a	n/a	Receptors: Environment, Built Environment Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	O	O	O	n/a	n/a	n/a							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM H3 -Type, Size and Design of New Housing Part 2 of 2 (Previously SOC 5 and SOC 6 and are now merged, this assessment is based on SOC 6 mitigation and scoring)

(Yes/Partially/No)	2020 Commentary on changes made since 2019	2020 Assessment ST (0-4 years)	2020 Assessment MT (5-9 years)	2020 Assessment LT (10+ years)	2020 Summary of new scoring	2020 Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	O	O	N/A	N/A	N/A	Receptors: transport network, road network, road users, utility network/customers, built environment, green spaces, employment. Affected groups: all	This policy states the need for developments to incorporate a range of dwelling types and sizes to meet local needs. It details the specific estimated demand of dwelling types across GM. Private outdoor space will be provided individual to each home and/or provided communally and accessibly.	Improved levels of economic growth with the retention of skilled workers. Reductions of inequalities in terms of access to housing.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	+	++	++	D	P	GM				None Identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	? / - / +	? / - / +	? / - / +	D	P	GM				This could be made more explicit within the policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sufficient private outdoor space. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities. Whilst it references access to green space it does not specifically reference private or communal outside space.	? / - / +	? / - / +	? / - / +	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the sufficient provision of private outdoor space. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of outdoor space remains uncertain.	It is considered that the policy could be strengthened by referencing private spaces.
		Support improvements in the energy efficiency and resilience of the housing stock?	?	?	?	I	P	GM				None Identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: All	There is no mention of how employment land will be provided or distributed to keep up with the varied housing described in this policy. Changing demographics across areas in GM could demand more varied employment opportunities in local areas.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided. Varied jobs and employment opportunities may need to be provided in order to keep up with this.	Employment land and education services will need to be integrated into new housing accommodate for changing demographic of areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing integrating residential development with employment and education services. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 on type, size and design of new housing. However, there is no reference to integrating residential development with employment and education services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
		Support education and training to provide a suitable labour force for future growth?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing integrating residential development with employment and education services. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 on type, size and design of new housing. However, there is no reference to integrating residential development with employment and education services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing integrating residential development with employment and education services. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 on type, size and design of new housing. However, there is no reference to integrating residential development with employment and education services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the location of affordable housing remains neutral.	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	?	?	I	P	Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all (emphasis on elderly/disabled who are less mobile).	There is no mention of how transport infrastructure will be developed in this policy. However, with an increasing population distributed across the areas mentioned, there could be increased use and strain on local transport facilities.	An increasing population across GM will increase the demand on transport infrastructure.	Transport networks will need to be extended to new housing areas in order to keep up with the increasing population in local areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?	?	?	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to transport networks. As such, the scoring has not been changed and the potential impacts of the policy on transport network remains the same.	None identified
		Improve transport connectivity?	?	?	?	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?	?	?	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to transport networks. As such, the scoring has not been changed and the potential impacts of the policy on transport network remains the same.	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	?	?	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?	?	?	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to transport networks. As such, the scoring has not been changed and the potential impacts of the policy on transport network remains the same.	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: Lower socio-economic groups and deprived areas.	Providing a mixture of new types and sizes of housing will reduce the 'barriers to housing' decile included in the IMD.	Reduced housing inequalities and a better IMD for 'barriers to housing' domain	Provide community services and facilities along with educational and training services to reduce deprivation long term.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing community services and education facilities being provided. However, this topic is covered in corresponding thematic policies GM E1 covering sustainable places and the need for developments to be well connected to services and facilities and GM E5 covering skills, education and	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the provision of community and educational facilities/services. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for community and educational facilities remains neutral.	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	++	++	I	P	GM				Focus on providing more green spaces (of good design quality) and access to free or low-cost green transport (bike schemes) in deprived areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces and supporting active travel. However, these topics are covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel and GM-Strat 13, G2 and G6 which cover green infrastructure	+	++	++	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable transport and green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable transport and green spaces opportunities remains positive.	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	+	+	I	P	Local	Receptors: GM population Affected groups: various, depending on locality	This policy considers the various needs across GM in terms of housing size and type. It encourages inclusive communities that mix and have access to communal green spaces for socialising and activity. The policy is inclusive of various socio-economic groups as different sized properties meet different needs. Specialist housing for older households and vulnerable people will be provided to ensure appropriate facilities are available for different groups. Housing will be built to the 'accessible and adaptable' standard in Part M4(2) of the Building Regulations, which will benefit those with protected characteristics.	Reduced inequalities for those with protected characteristics. Enhance community relations through the provision of communal open spaces.	None Identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	I	P	GM				None Identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	GM				None Identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+	+	+	I	P	GM				None Identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	I	P	GM	Receptors: built environment, air quality, green spaces and cycling Affected groups: various	This policy states that green spaces will be provided either within or in close proximity to all new housing types. As mentioned in the supporting text, having access to green spaces will encourage activity and support healthier lifestyles. Health inequalities will be reduced across GM as all types and sizes of housing will be provided with access to green spaces.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	The supporting text references green space benefits, which reference could be made to in the policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces benefits. However, this topic is covered by corresponding thematic policies GM G2, G6 and Strat-13 which covers green infrastructure and urban green space provision	o	o	o	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces within the policy text. As such, the scoring has been updated and the potential impacts of the policy on opportunities for the provision of green spaces is now neutral.	None identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces benefits. However, this topic is covered by corresponding thematic policies GM G2, G6 and Strat-13 which covers green infrastructure and urban green space provision	o	o	o	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces within the policy text. As such, the scoring has been updated and the potential impacts of the policy on opportunities for the provision of green spaces is now neutral.	None identified
		Promote access to green space?	+	++	++	D	P	GM				None Identified	n/a	No amendments have been made to the policy text to address mitigation comments in relation to referencing green spaces benefits. However, this topic is covered by corresponding thematic policies GM G2, G6 and Strat-13 which covers green infrastructure and urban green space provision	o	o	o	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for provision of green spaces within the policy text. As such, the scoring has been updated and the potential impacts of the policy on opportunities for the provision of green spaces is now neutral.	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: all groups	Neutral/no effect against this objective and assessment criteria anticipated.	As families become more distributed across GM, there may be a strain on services for children.	Ensure key services for children such as schools and community facilities are equally distributed across all areas in GM.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to delivering key services and facilities. However, this topic is covered in corresponding thematic policies GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the provision of key services and facilities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for key facilities remains neutral.	None identified
		Ensure sufficient access to educational facilities for all children?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to delivering key services and facilities. However, this topic is covered in corresponding thematic policies GM E1 covering sustainable places and the need for developments to be well connected to services and facilities and GM E5 covering skills, education and knowledge	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the provision of key services and facilities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for key facilities remains neutral.	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to delivering key services and facilities. However, this topic is covered in corresponding thematic policies GM E1 covering sustainable places and the need for developments to be well connected to services and facilities	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to opportunities for the provision of key services and facilities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for key facilities remains neutral.	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: all groups	Neutral/no effect against this objective and assessment criteria anticipated.	Reduced inequalities and improved skill set of working population. This will lead to wider economic growth.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	O	O	O	N/A	N/A	N/A	Receptors: GM population, transport network Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	An increasing population could put strain on the transport services unless they are improved.	Improve transport networks and infrastructure to accommodate for the additional population residing in the new housing developments.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
		Support the use of sustainable and active modes of transport?	O	O	O	N/A	N/A	N/A					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	O	O	O	I	P	Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated.	Increased trips by private motor vehicle will worsen the air quality over time. Or if a better network of sustainable transport is provided, air quality could be improved long-term.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	O	O	O	N/A	N/A	N/A	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	O	O	N/A	N/A	N/A	Receptors: Communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated.	Buildings which aren't equipped to deal with the effects of climate change could be susceptible to damage and loss.	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	O	O	N/A	N/A	N/A	Receptors: Communities, built environment, wider economy Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	N/A	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	N/A	N/A	N/A	Receptors: Environmental Affected Groups: Non Identified	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	O	O	N/A	N/A	N/A	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	O	O	N/A	N/A	N/A	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated. Assuming GMSF will have another policy on this.	N/A	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	O	O	O	N/A	N/A	N/A	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated.	Using previously developed land will minimise the loss of Green Belt and greenfield land.	The supporting text states that a key part of the overall strategy is to maximise the amount of development on previously-developed sites and minimise the loss of greenfield/Green Belt land. This could be referenced in the policy text	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development and minimise the loss of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but no specific reference to contribute to or enable brownfield land development and minimise the loss of greenfield sites is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land neutral uncertain.	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	O	O	O	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development and minimise the loss of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but no specific reference to contribute to or enable brownfield land development and minimise the loss of greenfield sites is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land neutral uncertain.	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	O	O	O	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development and minimise the loss of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but no specific reference to contribute to or enable brownfield land development and minimise the loss of greenfield sites is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land neutral uncertain.	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	O	O	O	N/A	N/A	N/A				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development and minimise the loss of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	O	O	O	Policy GM-H3 is focused on type, size and design of new housing but no specific reference to contribute to or enable brownfield land development and minimise the loss of greenfield sites is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land neutral uncertain.	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	O	O	N/A	N/A	N/A	Receptors: Environment, Built Environment Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	O	O	O	N/A	N/A	N/A				None Identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM H4 - Density of New Housing

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any <u>specific sensitive receptors</u> where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of new scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	++	++	D	P	GM	Receptors: transport network, road network, road users, utility network/customers, built environment, green spaces, employment. Affected groups: all	This policy details the density requirements in order to meet the demand of mixed housing types. It mentions building houses in accessible areas to encourage walking, cycling and the use of public transport. Housing will be denser if its near to public transport links and services.	Improved levels of economic growth with the retention of skilled workers. Reductions of inequalities in terms of access to housing. Well connected areas to employment sites which will encourage the use of public transport and reduce greenhouse gas emissions.	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	?	?	?	?	?	?				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	O	O	N/A	N/A	N/A	Receptors: GM population Affected groups: All	Neutral/no effect against this objective and assessment criteria anticipated.	Since housing will be well serviced by transport infrastructure, the demand for jobs will increase. However, The retention of skilled workers will improve GM economy which could produce new employment and skill opportunities in the future.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all (emphasis on elderly/disabled who are less mobile).	Higher density housing will be focused around well-connected areas. However, this could add pressure to the transport system and cause congestion if it's not improved.	Increased congestion on public transport.	Improve transport networks and infrastructure to accommodate for the additional population residing in the new housing developments.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	?	?	?	Policy GM-H4 is focused on density of housing but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
		Improve transport connectivity?	++	++	++	I	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	++	++	++	Policy GM-H4 is focused on density of housing but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	?	?	D	P	Wider					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1 and N3 which covers GM's integrated network and public transport	?	?	?	Policy GM-H4 is focused on density of housing but has no specific reference to transport infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains unknown.	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+	+	+	I	P	GM	Receptors: GM population Affected groups: Lower socio-economic groups and deprived areas.	The policy states that in order to create an appropriate mix of housing across GM higher densities of housing should be focussed around well connected areas and town centres. Providing a mixture of types of housing in well connected areas could improve services and employment opportunities for a wide range of socio-economic backgrounds and reduce inequalities/deprivation.	Reduced housing inequalities and a better IMD for 'barriers to housing' domain	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	+	++	I	P	GM				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	+	+	I	P	Local	Receptors: GM population Affected groups: various, depending on locality	Mixed types of housing across GM will encourage good relations between different people. This will also promote equality of opportunity and equal access to infrastructure. This policy details how town centres will be the main focus of housing developments. This takes into consideration the needs of different areas across GM.	Improved community cohesion as different people have access to a variety of housing and can form good relationships.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	++	++	I	P	GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+	++	++	D	P	GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	++	++	I	P	GM	Receptors: built environment, air quality, green spaces and cycling Affected groups: various	Housing will be delivered in accessible locations where people can walk and cycle. This will indirectly improve health and reduce inequalities as mixed types of housing in accessible locations is provided across GM. Green space can be easily accessed as green infrastructure and design aspects of lower density areas are protected. However, there may be less green spaces provided in the higher density areas.	Improved health and reduced health inequalities through positive planning and the promotion of walking and cycling. Could be unequal access to green spaces in higher and lower density areas.	Ensure green spaces are protected and provided in higher density areas also.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting and providing green spaces. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be provided with critical infrastructure such as green spaces	++	++	++	Policy GM-H4 is focused on density of housing but has no specific reference to opportunities for provision of green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces remains positive. .	None identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	GM					Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting and providing green spaces. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be provided with critical infrastructure such as green spaces	+	+	+	Policy GM-H4 is focused on density of housing but has no specific reference to opportunities for provision of green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces remains positive.	None identified

		Promote access to green space?	?	?	?	D	P	Local						Partially	No amendments have been made to the policy text to address mitigation comments in relation to protecting and providing green spaces. However, this topic is covered by corresponding thematic policy GM E1 covering sustainable places and the need for developments to be provided with critical infrastructure such as green spaces	?	?	?	Policy GM-H4 is focused on density of housing but has no specific reference to opportunities for provision of green spaces. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for the provision of green spaces remains positive.	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	+	+	I	P	GM	Receptors: GM population Affected groups: all groups	Improving connectivity across GM through the use of public transport as well as walking and cycling will improve access to healthcare and key facilities for all.	Socio-economic groups will be spread out across GM through the provision of affordable and mixed housing. This means reduced health and education inequalities, with the improved access to key facilities.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	+	+	+	I	P	Local							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	+	+	I	P	Local							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	+	+	+	I	P	GM	Receptors: GM population Affected groups: all groups	Improving connectivity across GM through the use of public transport as well as walking and cycling will improve access to educational facilities for all.	Mixed housing across GM will lead to reduced inequalities and improved skill set of working population. This will lead to wider economic growth.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	+	+	+	I	P	GM				None identfied			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	+	+	I	P	Wider	Receptors: GM population, transport network Affected groups: Various	The policy states that higher density housing will be located near to facilities and transport stations. This will promote efficient patterns of movement and encourage the use of public transport.	An increasing population could put strain on the transport services unless they are improved.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+	+	+	I	P	Wider							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	+	+	+	I	P	Wider							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	++	I	P	Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	The policy promotes the use of public transport, cycling and walking which will positively impact air quality medium/long term across wider areas.	The use of public transport, cycling and walking will improve air quality over time.	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	O	O	O	N/A	N/A	N/A	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy mentions that lower density housing will be in areas where there are site specific issues which could impact the wider landscape/townscape including heritage assets and green infrastructure.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++	++	++	D	N/A	N/A							++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	++	++	++	D	N/A	N/A							++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	O	O	N/A	N/A	N/A	Receptors: Communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated.	Buildings which aren't equipped to deal with the effects of climate change could be susceptible to damage and loss.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	O	O	N/A	N/A	N/A	Receptors: Communities, built environment, wider economy Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated. This is covered through an alternative policy.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	N/A	N/A	N/A	Receptors: Environmental Affected Groups: Non Identified	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	O	O	N/A	N/A	N/A	Receptors: None identified Affected groups: Various	The policy promotes the use of public transport, cycling and walking by ensuring housing is accessible and located near to the associated facilities. This will positively impact air quality medium/long term across wider areas and reduce greenhouse gas emissions across GM.	Less use of private motor vehicles as people use public transport, walk and cycle. This will improve air quality and benefit GM long term.	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	I	P	Wider							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+ / -	+ / -	+ / -	D	P	GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	This policy states that lower density housing can be justified on sites with specific landscape/townscape issues and heritage assets. This may result in these areas being enhanced, and utilised more or it may impact on the landscape and heritage assets causing negative effects	Local character and distinctiveness will be conserved which will benefit communities long term and make better places to live.	Policy should state how the sites could be affected and that any impact on these will be mitigated and avoided where possible	Partially	No amendments have been made to the policy text to address mitigation comments in relation to landscape, townscape and heritage including local character. However, this topic is covered by corresponding thematic policy GM E2 covers heritage matters	+ / -	+ / -	+ / -	Policy GM-H4 is focused on density of housing but no specific reference to landscape, townscape and heritage is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on landscape, townscape and heritage remains unknown.	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	+ / -	+ / -	+ / -	D	P	GM					Partially	No amendments have been made to the policy text to address mitigation comments in relation to landscape, townscape and heritage including local character. However, this topic is covered by corresponding thematic policy GM E2 covers heritage matters	+ / -	+ / -	+ / -	Policy GM-H4 is focused on density of housing but no specific reference to landscape, townscape and heritage is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on landscape, townscape and heritage remains unknown.	None identified

		Respect, maintain and strengthen local character and distinctiveness?	+ / -	+ / -	+ / -	D	P	GM					Partially	No amendments have been made to the policy text to address mitigation comments in relation to landscape, townscape and heritage including local character. However, this topic is covered by corresponding thematic policy GM E2 covers heritage matters	+ / -	+ / -	+ / -	Policy GM-H4 is focused on density of housing but no specific reference to landscape, townscape and heritage is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on landscape, townscape and heritage remains unknown.	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	+	+	D	P	GM	Receptors: greenfield and brownfield land Affected groups: Non identified	Focusing higher density housing in areas located near to public transport stations and town centres will reduce the amount of land that needs to be used for development, assisting in the protection of greenfield and Green Belt land.	Green Belt and greenfield sites will benefit from protection as housing is focused on previously developed sites.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	+	+	I	P	GM							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	+	+	I	P	GM							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	+	+	I	P	GM							+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	O	O	N/A	N/A	N/A	Receptors: Environment, Built Environment Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	N/A	None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	O	O	O	N/A	N/A	N/A							O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

Greater Manchester for Everyone

GM E1 - Sustainable Places+A1:M15

Ref	Objective	Assessment criteria….will the GMSF	Assessment: ST (0-4 years)	Assessment: MT (5-9 years)	Assessment: LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020: Has 2019 mitigation been addressed? 1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	?	?	?	D	P	Local / GM	Receptors: transport network, road network, road users, utility network/customers, built environment, green spaces Affected groups: all	This policy mentions making Greater Manchester a resilient and adaptable place, capable of dealing with major environmental and economic events. It states that Greater Manchester will be resource-efficient with a low carbon footprint; efficient use of land; minimised use of new materials and high levels of recycling. Developments will also be durable, being built to last and using robust materials which weather well and are easily maintained. Part of this policy specifically states that places will be well-connected, by public transport and digitally which will enable everyone to take advantage of employment opportunities across Greater Manchester. The policy covers incorporating green infrastructure in the form of outdoor spaces.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces.	None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	?	?	?	D	P	Local / GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	++	++	D	P	GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	+	++	++	D	P	GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	+	+	++	I	P	GM	Receptors: GM population Affected groups: All	The policy states that areas will be well-serviced by local shops, services and amenities, including education and health facilities. It will also aim to connect areas through transport and digitally enabling everyone to take advantage of employment, cultural and leisure opportunities across GM. This will indirectly positively affect current and future demand for employment land as more people are drawn to GM for work and leisure, due to increased service provision and interconnectedness.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	+	+	+	I	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	I	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	++	D	P	Wider	Receptors: transport network, road network, road users, utility network/customers Affected groups: all (emphasis on elderly/disabled who are less mobile).	This policy describes how Greater Manchester will be easy to move around for those of all mobility levels, particularly by walking and cycling, with enjoyable routes free from obstacles and disorienting stimuli, and places to rest. Areas will also be legible, easy to understand and navigate. This will assist in supporting the transport network and improve connectivity. The policy states that GM will be well-connected to other places, particularly by public transport and digitally. This will benefit GM long term by improving transport connectivity and access to jobs.	Improved health with the policy improving walking and cycling routes. Reduced inequalities for those less mobile.	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	+	+	++	D	P	Wider							+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	+	+	++	D	P	Wider							+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	?	?	?	I	P	Wider	Receptors: GM population Affected groups: Lower socio-economic groups and deprived areas.	This policy could reduce health deprivation levels through the provision of green infrastructure, open spaces and increased mobility with emphasis on walking and cycling routes. Improving connectivity between places will maximise opportunities for all people, which could indirectly reduce the proportion of people living in deprivation long term.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Focus on connecting specific deprived areas in GM and ensure they are connected to employment land and transport networks.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to providing connectivity in deprived areas. However, this topic is covered in corresponding thematic policies GM N1, N2, N3 and N5 which cover GM's integrated network, digital connectivity, public transport and active travel	?	?	?	Policy GM- E1 is focused on creating sustainable places but has no specific reference to providing specific connectivity opportunities in deprived areas. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for this topic remains positive. However, the mitigation was suggested to strengthen the policy and it is not anticipated that there would be a detrimental impact as a result of the policy on connectivity and therefore no further mitigation is suggested.	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	+	+	I	P	GM				Focus on providing more green spaces (of good design quality) and access to free or low-cost green transport (bike schemes) in deprived areas.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to providing more green spaces and sustainable travel opportunities in deprived areas. However, this topic is covered in corresponding thematic policies GM Strat 13 and G2 for green infrastructure and N5 which covers active travel	+	+	+	Policy GM- E1 is focused on creating sustainable places but has no specific reference to providing specific green infrastructure and sustainable travel opportunities in deprived areas. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for this topic remains positive. However, the mitigation was suggested to strengthen the policy and it is not anticipated that there would be a detrimental impact as a result of the policy on green infrastructure and sustainable travel and therefore no further mitigation is suggested.	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	+	+	D	P	GM	Receptors: GM population Affected groups: various, depending on locality	The policy aims to incorporate opportunities for recreation and outdoor play for children and interaction between generations, which will foster good relations between people. Promoting a sense of community and providing opportunities for social contact and support will also help to foster good relationships between people. This policy is socially inclusive by enabling everyone to participate equally and independently, providing opportunities for social contact and support and promoting a sense of community. This will ensure no discrimination based on 'protected characteristics'. By ensuring places are easy to navigate and move around for all mobility levels, this policy promotes equal opportunity and access to infrastructure. This is furthered by improving connectivity between places by transport and digitally, with the policy stating this will enable everyone to take advantage of employment, cultural and leisure opportunities. This policy will indirectly impact different areas (urban, suburban, urban fringe and rural) by ensuring they benefit from being connected to infrastructure and services. However, the policy doesn't mention whether the needs of these areas will be equally addressed.	Reduced inequalities and improved community cohesion.	Covered in policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	++	++	++	D	P	Wider				Covered in policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	N/A				Covered in policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	?	?	?	I	P	Wider				Policy could detail more on how the needs of different areas will be met.	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing how different communities needs are met	?/-	?/-	?/-	Policy GM- E1 is focused on creating sustainable places but could provide further detail surrounding opportunities for tackling inequalities, reducing poverty and accessibility to create places. As such, the scoring has been changed and the potential impacts of the policy on opportunities for meeting all communities' needs remains unknown to negative. Whilst there is some reference to this specific objective in thematic policies and / or supporting text, it is not considered that the recommendation has been sufficiently addressed.	The policy should include reference to accessibility design standards within all spaces with support for tackling inequality and poverty to form part of creating sustainable places
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	++	++	I	P	GM	Receptors: built environment, air quality, green spaces and cycling Affected groups: various	This policy will indirectly benefit the long term health and wellbeing of GM's population. The policy mentions ensuring places are easy to navigate and accessible for all mobility levels. Walking and cycling will be a main focus, with routes free from obstacles and disorienting stimuli, and places to rest. Access to green spaces is covered in this policy through the provision of outdoor spaces for children to play. This will directly benefit promoting healthier lifestyles. Provding opportunities for social contact and support will also indirectly benefit health. The policy states that areas will be well-served by local services and amenities including health facilities, which will directly improve the health of local populations. Developments will be 'comfortable and inviting, with indoor and outdoor environments: A. Offering a high level of amenity that minimises exposure to pollution; and B. Addressing microclimate issues such as sunlight, shade, wind and shelter', this will indirectly encourage healthier lifestyles by making outdoor environments more attractive for use.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces, community and social support and accessible design/access to green modes of transport.	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	++	++	++	D	P	GM/L	Receptors: GM population Affected groups: all groups, especially children.	The policy supports the provision of educational and healthcare facilities for all, regardless of socio-economic background as it states that areas will be well-served by local shops, services and amenities, including education and health. The provision of community infrastructure including playground facilities is also mentioned in this policy.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided. However, this policy could reduce inequalities	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	++	++	D	P	L				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational	Improve education levels of children in the area, regardless of their background?	+	+	++	I	P	GM	Receptors: GM population	This policy states that areas will be well-served by educational services which will directly improve the educational and skill levels of the population. Making sure areas are well connected by transport and digitally will improve access to employment and education	Reduced inequalities and improved skill set of working population.	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

	attainment and skill levels for all	Improve educational and skill levels of the population of working age?	+	+	++	I	P	GM	Affected groups: all groups	opportunities.	This will lead to wider economic growth.	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	++	++	D	P	Wider	Receptors: GM population, transport network Affected groups: Various	This policy supports efficient patterns of transport as it focuses on improving public transport and connectivity to places. Cycling and walking routes are promoted in this policy which reduces the reliance on private motor vehicles and supports sustainable transport. This policy also talks about providing well-serviced areas which are well connected to employment areas, thus reducing the need to travel.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+	+	++	D	P	Wider				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	+	+	++	I	P	Wider				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	-	+	++	I	P	GM/Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Air quality will be indirectly improved by this policy through the promotion of cycling, walking and use of public transport. This will reduce pollution long term but could increase it temporarily through the construction of new public transport across the region. The policy directly mentions how it aims to ensure GM is resource efficient, with; a) low carbon footprint, b) efficient use of land, c) minimised use of new materials and d) high levels of recycling.	Increased trips by private motor vehicle will worsen the air quality over time	The short term rise in pollution is inevitable if the region is to benefit long term from improved air quality.			-	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	+	D	P	N/A	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy states that areas will be distinctive with a clear identity, that; a) Responds to the natural environment, landscape features, heritage assets and local history and culture; and b) Enables a clear understanding of how the place has developed. Opportunities for recreation, amenity and tranquillity will be supported through 'creating areas that are visually stimulating, interesting, imaginative and expose the public to greenery, wildlife, public art and quality design'.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?	?	?	N/A	N/A	N/A				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++	++	++	D	P	Local				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	++	++	++	I	P	GM	Receptors: Communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	This policy states that GM will be resilient and capable of dealing with major environmental and economic events. Developments will be durable and robust, and GM will be adaptable and able to respond easily to varied and changing needs and technologies.		None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	?	?	?	D	P	Local / GM	Receptors: Communities, built environment, wider economy Affected groups: all	The policy states that GM will be resilient and capable of dealing with major environmental and economic effects. Buildings will be doable, using robust materials which weather well.		None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+	+	+	D	P	L				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	?	?	?	I	P	Local / GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	+	+	D	P	L				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	O	O	I	P	Wider	Receptors: Environmental Affected Groups: Non Identified			None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	++	++	D	P	GM / Wider	Receptors: None identified Affected groups: Various	This policy details that GM will be resource efficient with a low carbon footprint, minimised use of new materials and high levels of recycling. The improvement of public transport, cycling and walking routes will directly reduce greenhouse gas emissions across GM long term.		None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+	++	++	D	P	GM/Wider				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	++	++	D	P	GM / Wider				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	++	++	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The character of open spaces and public realm will be improved by this policy as it states development will respond to the natural environment, Distinctive, with a clear identity that: a) Responds to the natural environment , landscape features, heritage assets and local history and culture. Places will have a clear identity and provide an understanding of how the place has developed, which will conserve and enhance the heritage of areas. They will be visually stimulating, interesting and imaginative, which will improve landscape quality and character.		None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	++	++	++	D	P	L				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	++	++	++	D	P	L				None identified			++	++	++	Policy has been amended to specifically reference respecting local character. However, scoring has not changed from 2019 due to already being positive	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	O	O	O	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	N/A		None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	O	O	O	D	P	Local / GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	O	O	O	D	P	Local / GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	O	O	O	I	P	Local / GM				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	+	+	++	D	P	Wider	Receptors: Environment, Built Environment Affected groups: Various	This policy states that developments will aim to be resource efficient, with a low carbon footprint, minimised use of new materials and high levels of recycling. This policy also states that areas will be functional and convenient, enabling people to act efficiently through the provision of recycling facilities, refuse collection and storage.	N/A	None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	O	O	O	I	P	Wider				None identified			O	O	O	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	+	+	++	I	P	Wider				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM E2 - Heritage

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	The policy could make more explicit reference to interactions between different groups being facilitated	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- E2 is focused on heritage but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- E2 is focused on heritage but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- E2 is focused on heritage but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- E2 is focused on heritage but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	I	P	L/GM	Receptors: built environment, air quality Affected groups: various	The policy is focused on the protection and enhancement of heritage assets. The policy states that one of the positive benefits of an enhanced historic environment is improved social wellbeing	Improved health and reduced health inequalities may occur through planning policy and other national initiatives	Identify the potential benefits to physical and mental health	Y	Policy text has changed in to reference the impact heritage can have on social wellbeing	++	++	++	Policy GM- H2 is focused on heritage. Policy text has been amended to reference the benefit of social wellbeing from contributing to the historic environment following the IA mitigation.	None Identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	L/GM				Identify the potential benefits to physical and mental health	Y	Policy text has changed in to reference the impact heritage can have on social wellbeing	++	++	++	Policy GM- H2 is focused on heritage. Policy text has been amended to reference the benefit of social wellbeing from contributing to the historic environment following the IA mitigation.	None Identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

	attainment and skill levels for all	Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a	Affected groups: various / all			None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	-/?	-/?	-/?	I	P	L/GM/W	Receptors: None identified Affected groups: Various	There may be tensions between heritage building restoration and creating energy efficient / low carbon developments, particularly where restoration to meet building regulations (or better) requires external treatments to buildings or new glazing. Retrofitting buildings to modern standards may also affect the viability of restoration schemes	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	Consider how to ensure building restoration to modern standards can be made viable through a strategic approach to development (for example, considering how greenfield development can be linked to heritage building restoration).	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing building restoration and modern standards of energy efficiency. However, this topic is covered in corresponding thematic policies GM S1, S2 and E1 which cover sustainable development, carbon and energy and requirements for creating sustainable places.	?	?	?	Policy GM-H2 is focused on heritage but has no specific reference to building restoration and modern standards of energy efficiency. As such, the scoring has not been changed and the potential impacts of the policy on energy efficiency remains uncertain.	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	-/?	-/?	I	P	L/GM/W					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing building restoration with low carbon and renewable technology. However, this topic is covered in corresponding thematic policies GM S1, S2 and E1 which cover sustainable development, carbon and energy and requirements for creating sustainable places.	?	?	?	Policy GM-H2 is focused on heritage but has no specific reference to building restoration and low carbon and renewable technology. As such, the scoring has not been changed and the potential impacts of the policy on low carbon and renewable technology remains uncertain.	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	-/?	-/?	I	P	L/GM/W					Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing building restoration and reductions in greenhouse gas emissions. This topic is covered in corresponding thematic policies GM S1, S2 and E1 which cover sustainable development, carbon and energy and requirements for creating sustainable places. However, the policy could be further strengthened through reference to building restoration and historic buildings.	?	?	?	Policy GM-H2 is focused on heritage but has no specific reference to building restoration and reductions in greenhouse gas emissions. As such, the scoring has not been changed and the potential impacts of the policy on reductions in greenhouse gas emissions remains uncertain.	The policy could be strengthened further with reference to building restoration or historic buildings.
		Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets.	The overall aim of the policy is to maximise the heritage assets of Greater Manchester, through preservation, ensuring new design is coherent, sympathetic long-term uses	Landscape and heritage receptors may be eroded	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Conserve and enhance the historic environment, heritage assets and their setting?	++	++	++	D	P	L/GM	Protected or locally significant views Affected groups: Non identified		incrementally as development comes forward	Covered in policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	+	+	+	D	P	L/GM				Ensure policy makes reference to local character and distinctiveness being maintained as an important part of protecting heritage assets	Y	Policy text has changed in to reference local character and maintaining a place's distinctiveness to protect heritage assets	++	++	++	Policy GM-E2 is focused on heritage. Policy text has been amended to reference local character and maintaining a place's distinctiveness to protect heritage assets following the IA mitigation.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	?/+	?/+	?/+	D	P	L/GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy scores positively as it should initiate restoration and re-use of disused heritage buildings. This may result in re-use of previously developed land where heritage buildings are situated, and may result in development being directed away from agricultural and greenfield sites.	Prevent loss of further greenfield sites	None identified			?/+	?/+	?/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	?/+	?/+	?/+	D	P	L/GM				None identified			?/+	?/+	?/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	+	+	D	P	L/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	+	+	D	P	L/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	+	+	+	D	P	L/GM	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Restoration of heritage buildings with also have a beneficial effect against construction waste generation, assuming building restoration projects are less likely to require excavation work or demolition	n/a	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	+	+	+	D	P	L/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	+	+	+	D	P	L/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM-E3- Cultural facilities

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)							
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy states that cultural facilities should be encouraged especially where they can provide an anchor for local regeneration and town centre renewal	Could have cumulative effects with other local development schemes.	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	+	I	P	GM				None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	+	+	D	P	L/GM/W	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy is focused on the provision existing and new cultural venues which provide job opportunities. The locations outlined are considered to be the most likely areas which are well-connected and have good public transport connectivity	Could have cumulative effects with other local development schemes.	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	+	++	D	P	L/GM/W				None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	+	+	D	P	L/GM/W	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy is focused on the provision of new and existing cultural facilities, and the policy outlines these should be in places with good public transport connectivity	Could have cumulative effects with other local development schemes.	None identified
		Improve transport connectivity?	o	+	+	D	P	L/GM/W				None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o/?	o/?	o/?	I	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	There is no specific mention of deprivation and poverty through there maybe some indirect impact through job creation and operation of cultural facilities. The policy does make reference to enhancing the local economy.	Link to other initiatives or investments (e.g. apprenticeships)	The policy should consider how to ensure economic benefits flow into deprived areas. This can be achieved by developers and the districts/GMCA working together to investigate how local businesses and residents can apply for employment during the construction and end use of facilities
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o/?	o/?	o/?	I	P	Local / GM				As above
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o/?	o/?	o/?	I	P	L/GM/W	Receptors: none identified Affected groups: various, depending on locality	The policy is focused on new and existing cultural facilities. These facilities may provide an opportunity to enable different groups to connect.	Potential link to other initiatives which seek to integrate communities	The policy could make more explicit reference to interactions between different groups being facilitated
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o/?	o/?	o/?	I	P	L/GM/W				As above
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				As above
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o/?	o/?	o/?	I	P	L/GM/W				As above
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	D	P	L/GM/W	Receptors: built environment, air quality Affected groups: various	The provision of cultural facilities can provide positive benefits for mental health for users.	n/a	None identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	The policy promotes the provision of new and existing cultural facilities which can play an important role in providing social infrastructure	n/a	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	+	+	D	P	Local / GM / Wider				None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	+	+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy makes specific reference to supporting the development of new cultural venues in town centres and places with good public transport connectivity	Changes in travel patterns as people begin to take advantage of public transport as their main	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	+	+	D	P	Local / GM				None

		Support the use of sustainable and active modes of transport?	o	+	+	D	P	Local / GM			form of transport	The policy could make specific reference to active transport options
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	?	?	?	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	There is the potential for air quality effects from new trips to new cultural facilities. The policy seeks to locate new cultural facilities in town centre locations or locations with good public transport but many of these areas have existing air quality issues	Increased trips by private motor vehicle will worsen the air quality over time	Stress the importance of active transport, and travel plans for new development
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	?	?	?	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Effects will depend on the local environment where the sites are located. The different areas identified vary significantly. These are predominantly built up areas, however this still bring potential impact on ecological resources	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Opportunities for green space creation should be explored in new development. As such opportunities for linking existing spaces and ecological networks
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?	?	?	D	P	Local / GM / Wider				Supporting studies for new development to include appraisal of impacts on sites where necessary
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	?	?	D	P	Local / GM				Larger, strategic development should contribute to creation of new multifunctional green infrastructure within the sites themselves, but also attempt to connect to existing sites through green and blue corridors. New sites should be accessible to existing communities as well as proposed future residents.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?	?	?	D	P	Local				As above
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o/-	o/-	o/-	D	P	W	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	The policy encourages the support of new cultural venues. Any new development will have an impact on climate change e.g. carbon footprint from building the new facility, transport to the new facility	n/a	Considering impacts on climate change could be referenced in the policy, with the aim to limit any detrimental impact of new development
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	-/?	-/?	D	P	W	Receptors: None identified Affected groups: Various	New development will result in carbon emissions and energy use	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	Considering impacts on carbon emissions could be referenced in the policy, with the aim to limit any detrimental impact of new development
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	GM / W				None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The policy makes reference to stimulating vibrancy, viability and promoting diversity in town centres	Landscape quality is reduced and character is lost from various assets until it is diminished	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	+	+	D	P	L				None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	+	+	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy makes specific reference to considering the reuse of vacant properties and to promoting new or exhancing existing facilities, especially where they can provide an anchor for local regeneration and town centre renewal	Loss of greenfield land	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	++	++	D	P	Local / GM				None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	+	+	D	P	Local / GM				None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	?	?	?	D	P	GM / W	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Unknown effects	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified
		Promote movement up the waste hierarchy?	?	?	?	D	p	GM / W				None identified
		Promote reduced waste generation rates?	?	?	?	D	P	GM / W				None identified

GM E4 - New Retail and Leisure Uses in Town Centres

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy states that retail and leisure facilities will be prioritised to centres, which are often well connected to housing	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	++	D	P	GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	+	++	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy is focused on the provision of retail and leisure opportunities across Greater Manchester which will present opportunities for employment. The locations outlined are considered to be the most likely areas which are well-connected and well-serviced by infrastructure	Could have cumulative effects with other local development schemes.	None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	+	++	D	P	GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	?	?	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy is focused on the provision of retail and leisure within Greater Manchester which will necessitate a need to travel. However the policy does not currently make reference to utilising or expanding transport infrastructure	Could have cumulative effects with other local development schemes.	Ensure that the policy makes an explicit reference to utilising and growing the existing transport infrastructure, prioritising active and public modes of transport	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing using and improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which covers GM's integrated network, public transport and active travel	o	?	?	Policy GM-E4 is focused on retail and town centre uses but has no specific reference to infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains neutral.	None Identified
		Improve transport connectivity?	o	?	?	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing using and improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which covers GM's integrated network, public transport and active travel	o	?	?	Policy GM-E4 is focused on retail and town centre uses but has no specific reference to infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains neutral.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	?	?	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing using and improving infrastructure networks. However, this topic is covered by corresponding thematic policies GM N1, N2, N3 and N5 which covers GM's integrated network, digital connectivity, public transport and active travel	o	?	?	Policy GM-E4 is focused on retail and town centre uses but has no specific reference to infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for transport infrastructure remains neutral.	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o/?	o/?	o/?	I	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	There is no specific mention of deprivation and poverty through there maybe some indirect impact through job creation and operation of the site	Link to other initiatives or investments (e.g. apprenticeships)	The policy should consider how to ensure economic benefits flow into the local area. This will only be achieved by developers and the districts/GMCA working together to investigate how local businesses and residents can apply for employment during the construction and end use of facilities	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing economic benefits being brought into the local area and reducing deprivation. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o/?	o/?	o/?	Policy GM- E4 is focused on retail and leisure within town centres but has no specific reference to reducing the proportion of people in deprivation and bringing economic benefits into the local area. As such, the scoring has not been changed and the potential impacts of the policy on reducing deprivation remains neutral.	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o/?	o/?	o/?	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing economic benefits being brought into the local area and reducing deprivation. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o/?	o/?	o/?	Policy GM- E4 is focused on retail and leisure within town centres but has no specific reference to reducing the proportion of people in deprivation and bringing economic benefits into the local area. As such, the scoring has not been changed and the potential impacts of the policy on reducing deprivation remains neutral.	None Identified
		Foster good relations between different people?	o	+	+	D	P	L/GM/W	Receptors: none identified Affected groups: various, depending on locality	The policy references that varied and high-quality retail and leisure facilities contribute to creating inclusive places. These activities provide an opportunity to enable different groups to connect.	Potential link to other initiatives which seek to integrate communities	The policy could make more explicit reference to interactions between different groups being facilitated	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	+	+	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified

5	Promote equality of opportunity and the elimination of discrimination	Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	+	+	D	P	L/GM/W				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	+	+	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	o	o	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	+	++	D	P	L/GM/W				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing facilitating interactions between different groups. However, this topic is covered in corresponding thematic policy GM E1 which covers being socially inclusive	o	+	++	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to facilitating interactions between different groups. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains neutral.	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	?	?	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	There is no specific mention of sustainable modes of transport in the policy. The policy advocates central locations for its retail and leisure uses which are also likely to be the locations of the most sustainable transport options. As such, this may lead to an increase in use of these modes of transport	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	The policy should make explicit reference to linking growth of retail and leisure with utilising sustainable modes of transport	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains neutral.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	?	?	D	P	Local / GM				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains neutral.	None Identified
		Support the use of sustainable and active modes of transport?	o	?	?	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains neutral.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	?	?	?	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	There is the potential for air quality effects from new trips to new retail and leisure uses. The policy seeks to locate new retail and leisure development in well-connected central locations but many of these areas have existing air quality issues	Increased trips by private motor vehicle will worsen the air quality over time	Stress the importance of public transport and active connection, and travel plans for new development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable and active travel modes. However, this topic is covered in corresponding thematic policy GM Strat 14 which covers the GM transport network and GM N3 and N5 policies which cover public transport and active travel	?	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities remains uncertain.	None Identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	?	?	?	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Effects will depend on the local environment where the sites are located. The different areas identified vary significantly. These are predominantly built up areas, however this still bring potential impact on ecological resources	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	Opportunities for green space creation should be explored in new development. As such opportunities for linking existing spaces and ecological networks	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing opportunities for new and existing green spaces and ecological networks. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	?	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to opportunities for new and existing green spaces and ecological networks. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for new and existing green spaces and ecological networks remains uncertain.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?	?	?	D	P	Local / GM / Wider				Supporting studies for new development to include appraisal of impacts on sites where necessary	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing appraising wildlife and geological sites including habitats and species. However, this topic is covered in corresponding thematic policy GM G10 which covers biodiversity and geodiversity	?	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to appraising wildlife and geological sites including habitats and species. As such, the scoring has not been changed and the potential impacts of the policy on appraising wildlife and geological sites including habitats and species remains uncertain.	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	?	?	D	P	Local / GM				Larger, strategic development should contribute to creation of new multifunctional green infrastructure within the sites themselves, but also attempt to connect to existing sites through green and blue corridors. New sites should be accessible to existing communities as well as proposed future residents.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks	?	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains uncertain.	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?	?	?	D	P	Local				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green and blue infrastructure. However, this topic is covered in corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure	?	?	?	Policy GM- E4 is focused on retail and leisure uses within town centres but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green and blue infrastructure remains uncertain.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified		Given the greater emphasis on climate change and the role town centres can play, the policy could be strengthened further with reference to this.	o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	Given the greater emphasis on climate change and the role town centres can play, the policy could be strengthened further with reference to this
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effects against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	-/?	-/?	D	P	W	Receptors: None identified Affected groups: Various	New development will result in carbon emissions and energy use	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified			o	-/?	-/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	GM / W				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The policy makes reference to maintaining the vitality and viability of the centres listed in GM.	Landscape quality is reduced and character is lost from various assets until it is diminished	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	+	+	D	P	L				None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	?	?	?	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy does not make reference to preferred locations of new development e.g. greenfield or brownfield.	Loss of greenfield land	None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	?	?	?	D	P	Local / GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	?	?	?	D	P	Local / GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	?	?	?	D	P	GM / W	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	uncertain effects	Waste generation with other schemes. GM E5 -Education, skills and knowledge

Ref	Objective	Assessment criteria....will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	I	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Neutral/ no effect against this objective and assessment criteria anticipated.	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	I	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy makes reference to ensuring new and improved facilities for all ages from early years to adult training	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	I	P	GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	+	++	D	p	L/GM/W	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy supporting text makes reference to improving transport links to locations across the North of England to draw in skills from the wider region. In addition, the policy supporting text refers to the delivery of high quality digital infrastructure across GM	Could have cumulative effects with other local development schemes.	None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	+	++	D	P	L/GM/W				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	+	++	D	P	GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	+	+	D	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	The policy makes a direct link between education and social inclusion, ensuring it is necessary for everyone can contribute to and benefit from economic growth by having the necessary skills.	Link to other initiatives or investments (e.g. apprenticeships)	Make clear link between education and poverty/ deprivation	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between education and deprivation. However, this topic is partially covered in corresponding thematic policies GM E1 which covers being socially inclusive. However, given the important role education and training has in tackling deprivation, it is considered that explicit reference to this would strengthen the policy further.	o	+	+	Policy GM- E5 is focused on education and skills but has no specific reference to the link between education and deprivation. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	Given the important role education and training has in tackling deprivation, it is considered that explicit reference to this would strengthen the policy further.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	+	+	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between education and deprivation. However, this topic is covered in corresponding thematic policies GM E1 which covers being socially inclusive	o	+	+	Policy GM- E5 is focused on education and skills but has no specific reference to the link between education and deprivation. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	?	?	I	P	L	Receptors: none identified Affected groups: various, depending on locality	The policy supporting text mentions a growth in knowledge being fundamental to personal freedom and social inclusion, promoting opportunities for everyone to contribute to and benefit from this. However, the policy does not make specific reference to discrimination	Potential link to other initiatives which seek to integrate communities	Ensure that where new provision of education and training facilities comes forward they benefit existing communities in addition to new people moving into the area.	Y	Policy text has changed in to reference education and training facilities to benefit both existing and new communities	o	?/+	?/+	Policy GM- E5 is focused on education and skills. Policy text has been amended to reference that both existing and new communities will benefit from education and training facilities following the IA mitigation.	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	?	?	I	P	L/GM / W				Any new education provision as part of a new development should try to link to existing communities	Y	Policy text has changed in to reference education and training facilities to benefit both existing and new communities	o	?/+	?/+	Policy GM- E5 is focused on education and skills. Policy text has been amended to reference that both existing and new communities will benefit from education and training facilities following the IA mitigation.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	?	?	I	P	L				Where new education provisions is built, accessibility should be considered (e.g. for disabled people)	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing accessibility in education spaces	o/-	?/-	?/-	Policy GM- E5 is focused on education, skills and knowledge development but has no specific reference to opportunities for accessible design. As such, the scoring has been changed and the potential impacts of the policy on opportunities for accessible design remains unknown to negative.	The policy should include reference to accessibility standards within education spaces
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	?	?	I	P	L				Consider the needs of different areas in terms of skills and education	Y	Policy text has changed in to reference education and training facilities to benefit both existing and new communities which is accessible to all	o	?/+	?/+	Policy GM- E5 is focused on education and skills. Policy text has been amended to reference that both existing and new communities will benefit from education and training facilities which is accessible to all following the IA mitigation.	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	I	T	L/ GM	Receptors: built environment, air quality Affected groups: various	Enhancements in public access to education and skills could have a marginal effect on health over time, as more educated people may make more informed choices relating to health	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+/?	+/?	I	P	GM				None identified			o	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	The policy makes reference to the provision of educational facilities in the appropriate locations. Play areas and sports pitches may be associated with new schools	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	+	++	D	P	L/GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	+/?	+/?	D	P	L				None identified			o	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	+	++	D	P	Local / GM	Receptors: GM population and the GM economy Affected groups: various / all	The policy seeks to provide significant enhancements in educations, skills and knowledge throughout GM, for both younger people and adults.	Improved skill levels of the workforce	Ensure the policy explicitly states that this related to all children regardless of their background	Y	Policy text has changed in to reference education and training facilities to benefit both existing and new communities which is accessible to all	o	++	++	Policy GM- E5 is focused on education and skills. Policy text has been amended to reference that both existing and new communities will benefit from education and training facilities which is accessible to all following the IA mitigation.	None Identified
		Improve educational and skill levels of the population of working age?	o	+	++	D	P	Local / GM				None identified			o	+	++	Policy has been amended to specifically reference enhancements in education, skills and knowledge for all residents. However, scoring has not changed from 2019 due to already being positive	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated. The policy makes reference to improving transport links but there is no specific mention to sustainable modes of transport.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Ensure the policy prioritises improvements to sustainable modes of transport in the first instance	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	o	o	Policy GM-E5 is focused on education and skills but has no specific reference to sustainable transport. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel positive.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	o	o	Policy GM-E5 is focused on education and skills but has no specific reference to sustainable transport. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel positive.	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				As above.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	o	o	Policy GM-E5 is focused on education and skills but has no specific reference to sustainable transport. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel positive.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
	Ensure that land resources are allocated and used in an efficient and sustainable manner	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

17	to meet the housing and employment needs of GM, whilst reducing land contamination	Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/ no effect against this objective and assessment criteria anticipated.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM E6 - Health

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy makes mainly a neutral/ no effect against this objective and assessment criteria The policy refers to provision of new or improved health facilities as part of new developments that would increase demand	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	I	P	L/GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	+	+	I	P	L/ GM/ W	Receptors: none identified Affected groups: those identified as living in deprivation	The policy makes a mainly positive impact on the objective and assessment criteria The policy seeks to improve the disparity between the GM population including promoting an economy where everyone is able to share in the benefits of growth	Link to other initiatives or investments (e.g. social infrastructure)	There will be an indirect impact as improvements in health and a reduction in health disparities may aid the reduction of deprivation as people are more able to work and improve their lives. Policy should consider the indirect benefits, and highlight if there are considered to be any direct benefits between health and deprivation and disparity.	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between health and deprivation. However, this topic is covered in corresponding thematic policies GM E1 which covers being socially inclusive	o	+	+	Policy GM E6 is focused on health but has no specific reference to health inequality. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for accessible design remains neutral to positive.	The policy should include reference to tackling health inequality within GM
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	+	+	I	P	L / GM/ W				As above	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between education and deprivation. However, this topic is covered in corresponding thematic policies GM E1 which covers being socially inclusive	o	+	+	Policy GM- E6 is focused on health but has no specific reference to the link between health and deprivation. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for interactions remains positive.	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy makes mainly a neutral/ no effect against this objective and assessment criteria The policy makes reference to providing access to health related facilities for all the GM population	Potential link to other initiatives which seek to integrate communities	Where new facilities are developed, ensure access for existing and new communities to foster good relations.	Y	Policy text has changed in to reference health facilities to benefit both existing and new communities	o	o	o	Policy GM- E6 is focused on health. Policy text has been amended to reference that both existing and new communities will benefit from healthcare facilities following the IA mitigation.	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	+	+	D	P	L/GM/W				None identified			o	+	+	Policy has been amended to specifically reference that health facilities will benefit new and existing communities. However, scoring has not changed from 2019 due to already being positive	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	++	D	P	L/GM	Receptors: built environment, air quality Affected groups: various	The policy makes mainly a positive effect against this objective and assessment criteria The policy seeks to improve health and reduce the health disparities found between residents in GM. There is a focus on new developments supporting the provision of health and social care services, Green Infrastructure and leisure and recreation.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Covered in policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+	++	D	P	GM				As above			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	+	++	D	P	L				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	+	++	D	P	L/GM	Receptors: GM population Affected groups: all groups will be affected by this	The policy makes mainly a positive effect against this objective and assessment criteria The policy promotes access to healthcare facilities and to sports and recreation facilities	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	+	++	D	P	L				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effect against this objective and assessment criteria anticipated. There is a GMSF policy on this topic.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	The policy makes a positive effect against one assessment criteria The policy supports an increase in the proportion of trips that are made by walking and cycling	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	+	++	D	P	Local / GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	+	++	I	p	Local / GM/W	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The positive makes a positive effect against this objective and assessment criteria The policy seeks to improve air quality across GM to minimise detrimental impacts on human health	Increased trips by private motor vehicle will worsen the air quality over time	None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy makes a positive effect against two assessment criteria The policy states that it will seek to enable people to adopt healthier lifestyles through the development of a high quality green infrastructure network through GM, including facilitating a wide range of recreation and sporting facilities	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	++	I	P	L/ GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	++	I	P	L/GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	The policy makes a positive effect against two assessment criteria The policy makes reference to reducing risks to human health through taking an integrated catchment-based approach to addressing flood risk.	Increased risk of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	+	++	I	P	L				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	+	++	I	P	L				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/ no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM E7 - Sports and Recreation

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy has mainly neutral/ no effects on this objective The policy makes reference to specific distance requirements for amount of play area from residential development	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	++	++	D	P	L/GM/W				Make reference in the policy to ensuring play areas and green space are well connected to residential development.	Y	Policy text has changed to reference sport and recreation facilities are accessible to communities	+	++	++	Policy GM- E7 is focused on sport and recreation. Policy text has been amended to reference that facilities will be accessible to communities following the IA mitigation.	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/ no effects against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	+	I	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy has mainly positive impacts on transport infrastructure The policy states that it will aim to protect and enhance the public right of way which increases the amount and quality of cycling and pedestrian walking opportunities within GM	Could have cumulative effects with other local development schemes.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	+	+	+	I	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/ no effects against the objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships)	This policy could be linked to aiming to reduce deprivation through access to recreation facilities	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between recreation facilities and deprivation. However, this topic is covered in corresponding thematic policies GM E1 which covers being socially inclusive	o	o	o	Policy GM- E7 is focused on sports and recreation but has no specific reference to the link between recreation spaces and deprivation. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between recreation facilities and deprivation. However, this topic is covered in corresponding thematic policies GM E1 which covers being socially inclusive	o	o	o	Policy GM- E7 is focused on sports and recreation but has no specific reference to the link between recreation spaces and deprivation. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/ no effects against the objective and assessment criteria anticipated	Potential link to other initiatives which seek to integrate communities	Ensure that where new provision comes about, benefits are felt by existing communities as well as new people into the area	Y	Policy text has changed to reference sport and recreation facilities to benefit both existing and new communities	o	o	o	Policy GM- E7 is focused on sport and recreation. Policy text has been amended to reference that both existing and new communities will benefit from sport and recreation facilities following the IA mitigation.	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				Link the policy with ensuring equal access for all to recreation facilities, including the existing community	Y	Policy text has changed to reference sport and recreation facilities to benefit both existing and new communities	o	o	o	Policy GM- E7 is focused on sport and recreation. Policy text has been amended to reference that both existing and new communities will benefit from sport and recreation facilities following the IA mitigation.	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				Where new recreation provision comes about, accessibility should be considered (e.g. for disabled and elderly people)	N	No amendments have been made to the policy text to address mitigation comments in relation to referencing accessibility in sports and recreation spaces	o/-	o/-	o/-	Policy GM- E7 is focused on sports and recreation development but has no specific reference to opportunities for accessible design. As such, the scoring has been changed and the potential impacts of the policy on opportunities for accessible design remains unknown to negative.	The policy should include reference to accessibility standards within sports and recreation spaces
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				Include explicit mention of urban, urban fringe and rural needs which are likely to be different	Y	Policy text has changed in to reference education and training facilities to benefit both existing and new communities which is accessible to all	o	o	o	Policy GM- E5 is focused on education and skills. Policy text has been amended to reference that both existing and new communities will benefit from education and training facilities which is accessible to all following the IA mitigation.	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	++	I	P	GM	Receptors: built environment, air quality Affected groups: various	The policy has positive effects on these health and wellbeing objectives The policy makes specific reference to the numerous health benefits that can be attained from the provision of sports and recreation facilities in GM. This includes access to Green Infrastructure and Green Space	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+	++	I	P	GM				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	+	++	I	P	GM/L				None identified			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	P	L	Receptors: GM population Affected groups: all groups will be affected by this	The policy makes mostly positive impacts to this objective The policy makes specific reference to requiring the provision of recreation facilities in all education settings.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	+	++	++	D	P	L				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	++	++	D	P	L				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effects against the objective and assessment criteria anticipated	Improved skill levels of the workforce	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	The policy makes a mainly neutral impacts The policy makes reference to promoting opportunities for walking, cycling and horse riding through the protection and provision of public rights of way	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	+	++	++	D	P	Local / GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The policy has mainly positive impacts The policy promotes sustainable modes of transport which would reduce pressure on car/ public transport and therefore would lead to a reduction in emissions	Increased trips by private motor vehicle will worsen the air quality over time	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	+	+	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy makes mainly positive impacts on this objective The policy makes reference to enhancing public right of ways with the addition of green infrastructure.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	++	++	D	P	Local / GM				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+	++	++	D	P	Local				None identified			+	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+/?	+/?	I	P	L	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	New green space for recreation could be multi-functional and integrate climate change resilience but this is not a major focus of this policy.	Developments are not protected against climate change impacts and the effects are felt within new developments. Some of the potential and cumulative effects may not be predicted and will therefore cause more of an impact.	None identified			o	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effects against the objective and assessment criteria anticipated	Increased risk of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effects against the objective and assessment criteria anticipated	The quality and availability of water resources may be reduced	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	The policy has a mainly neutral/ no effect on this objective The policy encourages active modes of transport including walking, cycling and horse riding which would reduce reliance upon cars and public transport, therefore reducing vehicle emissions	The less vehicles on the road the less emissions creation	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	I	P	GM / W				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	+	+	I	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The provision of green space and play areas encourage the improvement of landscape quality including linking green infrastructure networks	Landscape quality is reduced and character is lost from various assets until it is diminished	None identified			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/ no effects against the objective and assessment criteria anticipated	Loss of greenfield land	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/ no effects against the objective and assessment criteria anticipated	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

A Greener Greater Manchester

GGM8 Valuing Important Landscapes

Ref	Objective	Assessment criteria…will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	There are uncertain effects against this objective as the policy states that development should have specific regard to access however there is a lack of information on the access that would be enhanced or created.	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	?	?	?	D	P	Local				Specify how access will be achieved, and which modes of transport will be encouraged	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to access or sustainable travel, the scoring has not been updated.	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	There are uncertain effects against this objective as the policy states that development should have specific regard to access however there is a lack of information on the access that would be enhanced or created.	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	?	?	?	D	P	Local				Specify how access will be achieved, and which modes of transport will be encouraged	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to access or sustainable travel, the scoring has not been updated.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	This objective has positive effects of ensuring needs of different areas are equally addressed as makes reference to settlements and landscape character.	Potential links to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas (namely urban, suburban, urban fringe and rural) are equally addressed?	+	+	+	D	P	Local				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	?	?	?	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy supports valuing important landscapes which could improve local communities' accessibility to greenspace; therefore supporting healthier lifestyles however this is not specified and therefore the effects are uncertain.	Improved health and reduced health inequalities may occur through planning policy and other initiatives	Make reference to the benefits to health and well being within the policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the health benefits of GI. However, this topic is covered in corresponding thematic policies GM-E1 for creating sustainable places.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to health benefits, the scoring has not been updated.	None Identified
		Reduce health inequalities within GM and with the rest of England?	?	?	?	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the health benefits of GI. However, this topic is covered in corresponding thematic policies GM-E1 for creating sustainable places.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to health benefits, the scoring has not been updated.	None Identified
		Promote access to green space?	?	?	?	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the health benefits of GI. However, this topic is covered in corresponding thematic policies GM-E1 for creating sustainable places.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to health benefits, the scoring has not been updated.	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	The policy has uncertain effects against this objective as there is potential that the landscapes will provide or include community social infrastructure, this is not referenced in policy.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	?	?	?	D	P	Local				If community social infrastructure will be included, make reference directly in the policy.	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, social infrastructure such as sports and recreation is covered through Policy GM-E7.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to social infrastructure, the scoring has not been updated.	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	?	?	?	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	There are uncertain effects against this objective as the policy states that development should have specific regard to access however there is a lack of information on the access that would be enhanced or created.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Specify how access will be achieved, and which modes of transport will be encouraged	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to access or sustainable travel, the scoring has not been updated.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	?	?	?	n/a	n/a	n/a				Specify how access will be achieved, and which modes of transport will be encouraged	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to access or sustainable travel, the scoring has not been updated.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	?	?	?	I	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Policy does not reference air quality however protecting important landscapes could help to improve air quality, or prevent it getting worse, and therefore there is an indirect effect.	Increased trips to and from additional development may worsen air quality if sustainable transport is not utilised	Mention importance of greenspace in mitigating air pollution	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the green space and its impact on air quality. However, this topic is covered in corresponding thematic Policy GM-S 6.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated to include a reference to air quality, the scoring has not been updated.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	+	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy is focused on important landscapes and therefore has a lot of crossover with this objective, although all landscapes will not link to biodiversity / green infrastructure / geodiversity. It supports the protection of these and therefore has positive effects.	Impact on the biodiversity assets may result from development	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+	+	+	I	n/a	Local				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	+	D	P	Local / GM				There is no reference to establishing new landscapes / green infrastructure	Partially	Policy text has not been updated to include this mitigation. However, this topic is covered in corresponding thematic Policies GM-G 2 and GM-G 10 which cover the green infrastructure network and the Green Belt.	+	+	+	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?	?	?	D	P	Local / GM				Make reference to access to these landscapes for the public	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	?	?	?	I	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	The policy does not make reference to mitigating the effects of climate change however there is potential for indirect effects.	Increased heat island and flood risk in conjunction with additional development	Make reference to the role landscapes and greenspaces / trees can have in ensuring resilience to the effects of climate change.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the benefits of GI to improve a development's resilience. However, this topic is covered in corresponding thematic policies GM-S1 and S4 for sustainable development and resilience considerations.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	The policy does not make reference to flood risk, however protecting and enhancing green spaces could effect flood risk management which may be relevant for a number of the landscapes.	Development elsewhere may affect flood risk and increase likelihood of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	?	?	?	D	P	Local / GM				Clarify that placement of greenspace is important for flood risk mitigation and make a clear reference.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	?	?	?	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure's potential to mitigate run off. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure.	?	?	?	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Quality and availability of water resources may be affected cumulatively by nearby development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Increase in energy use and as a result, GHG emissions as development takes place	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	++	++	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The policy is focused on valuing important landscapes and therefore has significant crossover with this objective. The policy states the special qualities and sensitivities of landscape types should be recognised, and that any development proposals should have specific regard to a number of factors, including natural character, historic landscape character, form, density and setting of existing settlements, views, access and recreation and perceptual and experiential qualities.	Landscape and heritage receptors may be eroded incrementally as development is brought forward	Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land as it is developed incrementally	Indirectly covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				Include potential to remediate previously developed land into greenfield sites	Partially	No amendments have been made to the policy text to address mitigation comments in relation to utilising remediated land. However, this topic is covered in corresponding thematic policies GM S1 and E1 which cover sustainable development and creating sustainable places.	o	o	o	Policy GM-G1 concerns valuing important landscapes and focuses on development responding to its surrounding landscape. As no amendments were made against this mitigation, the scoring has not been changed and the potential impacts of the policy on utilising previously developed land remains neutral.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation in conjunction with nearby development will have widespread effects as numerous sites are brought forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GGM2 - Green Infrastructure Network

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any <u>specific sensitive receptors</u> where they have been identified	Potential cumulative effects	Mitigation / policy input	2020							
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed?	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, local / GM population where sites come forward Affected groups: Housing with an undersupply of green infrastructure is more likely to affect those already living in deprivation and with disabilities	Policy refers to Green Infrastructure (GI) Network and improving access to green infrastructure, and states that development should take practicable opportunities to protect, enhance and expand the GI Network. This will have indirect effects on the supply of housing land and stock.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	Local / GM				Specify GI requirements in new developments and allocations	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. Allocation policies cover specific requirements for when these sites are brought forward. Additionally, Policy GM-G8 concerns standards for green space across GM and states development has a major role in achieving provision.	+	+	+	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated to include a reference to green space standards, the scoring has not been updated.	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	+	+	+	I	P	Local / GM				Make explicit for urban heat island and development in greenfield areas, specifying green roofs/walls for cooling effects	Partially	The policy does make reference to ecosystem services such as climate change mitigation and adaptation. Additionally, Policy GM-G8 concerns standards for green space across GM and states development has a major role in achieving provision.	+	+	+	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated to include a specific reference to urban heat island, the scoring has not been updated.	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial <u>distribution of development</u>?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			+	+	+	The policy has been updated to mention active travel opportunities. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o/-	o/-	o/-	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network but has no specific reference to opportunities for accessible design. As such, the scoring has been changed and the potential impacts of the policy on opportunities for accessible design is neutral to negative. Further mitigation is suggested for the policy.	The policy should include reference to accessibility standards when discussing access to green infrastructure
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Protecting and enhancing the GI network provides increased opportunity for physical activity, therefore having a direct and positive effect on the health and wellbeing of the population. Policy identifies areas and key locations for green infrastructure network improvements and such improvements will innately promote access to green space.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Stress health benefits and the connection between recreation/active transport and improved health	Partially	The policy includes text which states the GI network will support wider public health benefits, including through promotion of active travel and recreational opportunities. This topic is also covered in corresponding thematic Policy GM-N5.	+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy emphasise the relationship between green infrastructure and health benefits, scoring has been updated to show an increasing positive impact in the long-term.	None Identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	D	P	n/a				As above	Partially	The policy includes text which states the GI network will support wider public health benefits, including through promotion of active travel and recreational opportunities. This topic is also covered in corresponding thematic Policy GM-N5.	+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy emphasise the relationship between green infrastructure and health benefits, scoring has been updated to show an increasing positive impact in the long-term.	None Identified
		Promote access to green space?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	+	+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	Policy makes direct reference to active travel modes of walking and cycling and thus promotes sustainable transport Improving efficient patterns of movement should be done by encouraging active travel for short distances	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Ensure green travel routes connect existing local centres to proposed development	Partially	Policy contains text which emphasises the green infrastructure network as a method to promote active travel. However, no reference has been made sustainable travel is covered throughout GMSF chapter GM-N.	+	+	+	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated to include a reference to access or sustainable travel, the scoring has not been updated.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			+	+	+	The policy has been updated to mention active travel opportunities. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Support the use of sustainable and active modes of transport?	+	+	+	I	P	Local / GM				Covered by policy			+	+	+	Policy has been amended to specifically reference active travel. However, scoring has not changed from 2019 due to already being positive	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	Policy directly discusses the potential of GI to enhance air quality through reduction of emissions and removal of pollutants from air	Increased trips by private motor vehicle will worsen the air quality over time if sustainable modes are not utilised	Stress health benefits and the connection between active transport and improved air quality	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the connection between active travel and improved air quality. However, this topic is covered in corresponding thematic Policy GM-S 6.	+	+	+	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated to include a reference to air quality, the scoring has not been updated.	None Identified
	Conserve and	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	+	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy reflects much of this objective and assessment criteria, covering biodiversity, multifunctional GI, recreation and tranquility. Implementation of this policy has significant crossover with this objective, as it identifies opportunity areas throughout Greater Manchester for green infrastructure network improvements.	Impact on biodiversity assets may occur in conjunction with other developments	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	D	P	Local / GM / Wider				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

11	enhance biodiversity, green infrastructure and geodiversity assets	Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	++	D	P	Local / GM				Generally covered by policy. Make reference to how the Greater Manchester Green Factor will be established to ensure this is met.	Partially	Policy text has not been updated to include this mitigation. However, this topic is covered in corresponding thematic Policies GM-G 2 and GM-G 10 which cover the green infrastructure network and the Green Belt	+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+	+	++	D	P	Local				As above	Partially	Policy has not been updated to reflect this mitigation as it was not considered appropriate for this policy. However, sustainable travel is covered throughout GMSF chapter GM-N.	+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	+	++	D	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy discusses elements complementary to resilience and climate change mitigation such as managing flood risk and adapting to warmer temperatures	Increased urban heat island effect and flood risk in combination with other development	None identified			+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	I	P	L / GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Policy directly references management of flood risk through increasing infiltration and considering inundation, and will complement policies for flood risk	Other development which may affect flood risk and increase likelihood of flooding	Policy should reinforce existing guidance on flood risk, specifically steering away from developing in areas of flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure.	o	o	o	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+	+	++	D	P	L / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure.	+	+	++	Policy GM-G2 sets out a strategic approach for GM's green infrastructure network. As the policy has not been updated in regard to this mitigation, the scoring has not been updated.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	+	+	+	D	P	L / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	+	++	D	P	L / GM				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	+	+	+	I	P	L / GM	Receptors: water courses, ground water, water supplies Affected groups: Various	Policy covers all areas outlined; its implementation will have a marginal benefit against all of the assessment criteria	Both quality and availability of water resources may be impacted by other development	Consider including reference to Water Framework Directive as an aim	Partially	No amendments have been made to the policy text to address mitigation comments in relation to water resource management. However, this topic is covered in corresponding thematic policy GM-S 5 which covers the water environment.	+	+	+	Policy GM-G2 focuses on GM's green infrastructure. No amendments have been made to the policy in regard to the WFD; therefore, the assessment has not changed.	None Identified
		Promote management practices that will protect water features from pollution?	+	+	++	D	P	L				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	+	+	++	D	P	W				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	+	+	I	P	L / GM	Receptors: Climate Affected groups: All	This policy recommends GI to reduce carbon emissions and to provide cooling and shading in urban areas	GI will help mitigate the increased greenhouse gas emissions are more developments are built	Consider providing specific examples of GI to help adapt to warmer temperatures e.g., green roofs and walls	Partially	No amendments have been made to the policy text to address mitigation comments in relation to what GI can do to support warmer temperatures. However, this topic is covered in corresponding thematic policy GM-S 2 which covers energy and carbon use with energy efficiency measures	+	+	+	Policy GM-G2 focuses on GM's green infrastructure. No amendments have been made to the policy in regard to GI support for warmer weather; therefore, the assessment has not changed.	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	++	I	P	L / GM				None identified			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	+	++	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Policy covers enhancing sense of place, distinctiveness, visual interest of different areas; as well as offering a high quality setting for development and heritage assets	Landscape and heritage may be eroded over time as development comes forward	Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				Covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	+	+	++	D	P	L				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land as it is developed incrementally	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with other schemes; intradevelopment effects as a number of locations are taken forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GGM3 - River Valleys Waterways

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020							
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	I	n/a	Local / GM	Receptors: housing market, Local / GM population where sites come forward Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Policy promotes public enjoyment and recreation of river valleys and canals as well as utilising canals and rivers for renewable energy production where compatible; connecting housing sites to the landscape and green infrastructure network should therefore be encouraged	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	+	D	P	Local / GM				Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	+	D	P	GM / W				None identified			o	o	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	I	n/a	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated	Utilisation of canals and rivers for renewable energy, etc. would ensure sustainable economic growth and job creation	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	I	n/a	GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	+	D	P	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Policy supports increased use of canals and watercourses for active travel to alleviate demands on highway network, and aims to ensure that any development relates positively to rivers and canals	Improved transport and digital network as utilisation of canals and rivers increases	Covered by policy			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Improve transport connectivity?	o	o	+	D	P	Local / GM				Covered by policy			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	+	D	P	GM				Covered by policy			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	?	?	I	P	Local	Receptors: none identified Affected groups: those identified as living in deprivation	Increasing use of canals and watercourses for both recreation and commuting may provide increased opportunities at the local level for those living in deprivation	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes	Mention increased access and connectivity in areas historically deprived and isolated	Partially	The policy has not been amended to reflect this mitigation. However, Policy GM-E1 concerns the creation of sustainable places and covers socially inclusive principles.	o	?	?	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been amended to include reference to deprived and isolated populations, the scoring has not been updated.	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	?	?	I	P	Local	Receptors: none identified Affected groups: various, depending on locality	Increasing use of canals and watercourses for public enjoyment, recreation and commuting may provide increased opportunities at the local level for those living in deprivation	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes	Indirectly covered by policy (i.e. public enjoyment)			o	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	?	?	I	P	Local				None identified			o	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy supports public enjoyment of river valleys and canals as well as active travel routes for both walking and cycling. This focus encourages physical activity along watercourses; benefits will depend upon public uptake Walkways along rivers and canals may be used as "linear" green space. Enhancements in public access to natural sites could have a marginal effect on health (health is not mentioned in policy wording) DOH links with: • Recreation opportunities • Active travel routes • Tranquillity • Climate change adaption Improvements will depend on uptake and behaviours, with a potential marginal beneficial effect	Improved health and reduced health inequalities may occur through planning policy and other national initiatives	Health should be mentioned when discussing active travel and public enjoyment	Y	The policy has been amended to emphasise that connecting from urban areas to countryside provides opportunities for active travel as well as health and wellbeing value.	+	+	++	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has been updated to include a reference to health benefits provided by connectivity, this has had an increasingly positive effect on this criteria.	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+	+	D	P	Local / GM				As above	Y	The policy has been amended to emphasise that connecting from urban areas to countryside provides opportunities for active travel as well as health and wellbeing value.	+	+	++	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has been updated to include a reference to health benefits provided by connectivity, this has had an increasingly positive effect on this criteria.	None Identified
		Promote access to green space?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increased use of canals and watercourses for active travel could promote access to community social infrastructure	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	I	n/a	Local				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	I	n/a	Local				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Increased use of canals and watercourses for active travel could promote access to educational facilities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	I	n/a	Local	Receptors: GM population, transport network Affected groups: Various	Policy directly supports active travel, a sustainable mode of transport. Further utilisation of the canal network would expand/strengthen the transport network.	Lessened demand on highway network could create demand issues on the canal network	None identified			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	+	I	P	Local / GM				Clarify whether all transport modes supported by policy have an aim of sustainability	Partially	No change has been made to the policy to reflect this mitigation. However, this topic is covered through Policy GM-N1 which concerns an integrated and sustainable transport network.	o	o	+	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As no changes have been made in regard to this mitigation, the scoring has not been updated. .	None Identified
		Support the use of sustainable and active modes of transport?	o	+	++	D	P	Local / GM				Covered by policy			+	++	++	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	+	+	I	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Protecting and enhancing habitats will contribute towards AQ sequestration services, especially in proximity to development and built up areas	Increased trips to and from developments may worsen air quality over time if sustainable modes are not utilised	Mention AQ benefits of habitat protection	Partially	No amendments have been made to the policy text to address mitigation comments in relation to impact on air quality. However, this topic is covered in corresponding thematic Policy GM-S 6.	o	+	+	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated to include a reference to air quality, the scoring has not been updated.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy has considerable crossover with this objective through its protection and enhancement of river valleys and canals	Impact on the biodiversity assets may occur in combination with over developments	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	+	++	D	P	Local / GM / Wider				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	++	D	P	Local				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+	++	D	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy aims to reduce flood risk and return rivers to a more natural state, which innately supports resilience efforts and climate change mitigation	Increased flood risk in conjunction with development and utilisation of impermeable materials	Specify support of climate change mitigation particularly in relation to flood risk alleviation	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the benefits of GI for climate change mitigation. However, this topic is covered in corresponding thematic Policies GM-S1 and S4 for sustainable development and resilience considerations.	o	+	++	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	I	n/a	Local / GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Policy makes reference to reducing flood risk through careful land management and returning rivers to a more natural state where practicable	Inappropriate development could affect flood risk and increase the likelihood of flooding	Mention restricting development in sensitive flood zones or catchment areas	Partially	No amendments have been made to the policy text to address mitigation comments in relation to flood zones. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	o	o	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	+	+	D	P	Local / GM				Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	+	+	D	P	Local				Mention restricting development in sensitive flood zones or catchment areas	Partially	No amendments have been made to the policy text to address mitigation comments in relation to flood zones. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	+	+	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	+	D	P	Local / GM				Mention flood risk in conjunction with resilience and climate change mitigation	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the benefits of GI for climate change mitigation. However, this topic is covered in corresponding thematic Policies GM-S1 and S4 for sustainable development and resilience considerations.	o	o	+	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+	++	I	P	GM / W	Receptors: water courses, ground water, water supplies Affected groups: Various	Policy directly references improving water quality; there is no mention of the WFD but there is significant crossover	The quality and availability of water resources may be affected cumulatively by development nearby	Reference Water Framework Directive as strategic aim	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the Water Framework Directive. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	+	++	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
		Promote management practices that will protect water features from pollution?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	?	?	I	P	Local / GM				Include water consumption guidance in conjunction with water quality	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the Water Framework Directive. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	?	?	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As the policy has not been updated in regard to this mitigation, the scoring has not been updated. .	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	+	D	P	GM / W	Receptors: None identified Affected groups: Various	Policy encourages utilisation of canals and rivers for renewable energy, in addition to using canal network for transport	Utilisation of canal network for renewable energy production	None identified			o	o	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	+	D	P	GM / W				None identified			o	o	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	?	D	P	GM / W				Clarify whether all transport modes supported by policy have an aim of sustainability	Partially	No change has been made to the policy to reflect this mitigation. However, this topic is covered through Policy GM-N1 which concerns an integrated and sustainable transport network.	o	o	?	Policy GM-G3 concerns the protection and improvement of river valleys and waterways. As no changes have been made in regard to this mitigation, the scoring has not been updated. .	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	+	++	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: None identified	Policy supports retaining open character of the river valleys and integrating green infrastructure through high quality frontages to the river and ensuring public realm alongside the water for recreation use and maintenance	Landscape and heritage receptors may be eroded incrementally as development comes forward	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: None identified	Neutral/no effect against this objective and assessment criteria anticipated	Development coming forward alongside remediation efforts may overall increase land contamination	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	I	n/a	GM / W	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	River valleys and canals improvements may indirectly promote sustainable resource use in the surrounding area	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GGM4 - Lowland Wetland and Mosslands

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, Local / GM population where sites come forward Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Expanding public access including creation of new circular routes is supported by the policy, and will thus improve active transport connectivity. However this is likely to be in more isolated locations in the lowland wetlands and moss lands.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				Active transport covered by policy			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+ / ?	+ / ?	+ / ?	I	P	Local	Receptors: none identified Affected groups: those identified as living in deprivation	The lowland wetlands and mosslands are expected to become more accessible to communities and there may be opportunities for improvements to health and living environments, which will affect deprivation at a local level.	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programs)	None identified			+ / ?	+ / ?	+ / ?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated.	Link to other initiatives or investments which integrate communities	Reconnecting local communities is covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				Expanding public access covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Expanding both public access and recreation opportunities will have a positive effect on health and wellbeing.	Improved health and reduced health inequalities may occur through planning policy and national initiatives	Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+	+	D	P	Local / GM				Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Policy references enhancing recreation opportunities which will increase provision of community infrastructure.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	+	+	D	P	Local / GM				Elaborate upon types of recreation opportunities which should be provided through implementation of this policy	Partially	No change has been made to the policy in relation to this mitigation, as this matter was considered more appropriate on a district-level. Additionally, Policy GM-E 7 covers both sport and recreation.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria. However, no detrimental impact is anticipated as this topic is covered elsewhere in the GMSF.	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated.	Capacity issues if new facilities are not developed at same rate as residential development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Expanding public access across the area as well as creating new circular routes will encourage sustainable and active modes of transport in addition to promoting efficient patterns of movement. However this is likely to be in more isolated locations in the lowland wetlands and mosslands.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport.	Covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			+	+	+	The policy has been updated to mention active travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				Directly mention support of sustainable and active travel	Partially	Policy text has been updated to reflect enhancement of active travel opportunities. Although no change has been made to the policy to reference sustainable travel, this topic is covered through Policy GM-N1 which concerns an integrated and sustainable transport network.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. As the policy has been updated to include reference to active travel, the assessment has shown an increased positive impact against this criteria.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	+	++	D	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Policy supports the maintenance and enhancement of semi-natural habitats and the management of sensitive wetland habitats; and therefore will improve air quality in the wetlands and nearby areas.	Increased trips to and from development may worsen air quality over time if sustainable modes are not utilised.	Mention AQ benefits of wetlands and mosslands in consideration of proximity to urban areas	Partially	No amendments have been made to the policy text to address mitigation comments in relation to impact on air quality due to proximity to urban areas. However, the policy does mention carbon sequestration and air quality is covered in corresponding thematic Policy GM-S 6.	o	+	++	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy has substantial crossover with this objective on topics such as maintaining semi-natural habitats, managing and restoring sensitive habitats, and increasing features that act as stepping stones for wildlife.	Impact on biodiversity assets may occur in combination with nearby development.	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	+	++	D	P	Local / GM / Wider				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	++	D	P	Local				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+	++	D	n/a	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy encourages restoration of habitats which will strengthen resilience of communities to climate change	Increased heat island and flood risk in conjunction with additional development.	Specify that development should not occur in flood plains or other areas with adverse environmental effects.	Partially	No amendments have been made to the policy text to address mitigation comments. However, this topic is covered in corresponding thematic Policy GM-S 5 which concerns flood risk. Policies GM-S 1 and S 4 also cover sustainable development and resilience considerations.	o	+	++	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
		Restrict the development of property in areas of flood risk?	o	o	o	I	n/a	Local / GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Policy references managing land to ensure that its hydrology is not adversely affected and that the water table is restored; flood risk is therefore mitigated through these measures.	Nearby development may affect flood risk and increase the likelihood of flooding.	Covered by policy; could clarify potential to mitigate flood risk with strategically-located development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to flood zones. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	o	o	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified

13	Reduce the risk of flooding to people and property	Ensure adequate measures are in place to manage existing flood risk?	o	+	+	D	P	Local / GM				Clarify GI functions in relation to managing flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to flood risk. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	+	+	I	P	Local / GM				Mention controlling development to ensure run-off rates are not overall increased	Partially	No amendments have been made to the policy text to address mitigation comments in relation to flood risk. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	+	+	I	P	Local / GM				Covered by policy in regard to restricting development to allocated sites; potential to clarify need to future proof in policy wording	Partially	No amendments have been made to the policy text to address mitigation comments in relation to future-proofing development. However, this topic is covered in corresponding thematic Policy GM-S 5 which focuses on flood risk and the water environment. Additionally, Policies GM-S1 and S4 cover sustainable development and resilience considerations.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+	+	I	n/a	GM / Wider	Receptors: water courses, ground water, water supplies Affected groups: Various	Lowland wetlands and water resources are interlinked. Enhancement of semi-natural habitat and managing land to ensure its hydrology is not adversely affected will improve water quality in the wetlands and mosslands. There is no mention of the Water Framework Directive.	The quality and availability of water resources may be affected cumulatively in conjunction with nearby development.	Mention Water Framework Direction as a strategic aim	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the Water Framework Directive. However, this topic is covered in corresponding thematic Policy GM-S5 which concerns flood risk and the water environment.	o	+	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
		Promote management practices that will protect water features from pollution?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	I	n/a	GM / Wider				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Enhancing areas of semi-natural habitats will have a positive carbon sequestration effect.	There is an increase in energy use and greenhouse gas emissions as development comes forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	+	D	P	GM / Wider				None identified			o	o	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	+	++	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Policy contains significant crossover with this objective and covers retaining rural character of landscape, maintaining views, and safeguarding the strong cultural identity of the area.	Landscape and heritage receptors may be eroded incrementally as development comes forward.	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	I	n/a	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The restoration and enhancement of key features and sites is supported through the removal of derelict structures.	Loss of greenfield land as it is developed incrementally.	Mention encouraging development on previously developed land	Partially	Policy has not been updated to reflect this mitigation. However, prioritising brownfield land for development is covered the Policy GM-S 1.	o	o	o	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has not been updated as amendments have not been made against this criteria.	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	+	+	D	P	Local / GM				Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	I	n/a	Local / GM				Mention land remediation in the protection of semi-natural habitats	Partially	The policy has not been updated to reflect this mitigation. However, Clause 5 of the policy already covers remediation of land in instances when it is beneficial to green infrastructure provision. Additionally, Policy GM-G 9 concerns the protection of biodiversity and geodiversity.	o	o	+	Policy GM-G 4 focuses on the protection of the ecologically valuable lowland wetlands and mosslands. Scoring has been updated to having a slightly positive impact against this criteria in order to reflect the policy already including reference to remediation in conjunction with Policy GM-G 9 focusing on biodiversity.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated.	Waste generation with nearby schemes as development comes forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	-	-	-	D	P	Local / GM	Receptors: uplands habitat, air quality Affected groups: various	Policy does not refer to promoting access to these areas and the benefits that can bring for health.	Improved health and reduced health inequalities may occur through planning policy and other initiatives	Make reference to providing access to green spaces for both physical and mental health. Link to potential recreation functions	Y	Policy text has changed to reference the physical and mental health benefits of green spaces and landscapes	+	+	+	Policy GM-G5 is focused on uplands. Policy text has been amended to reference the physical and mental health benefits open space and landscapes can provide.	None Identified
		Reduce health inequalities within GM and with the rest of England?	-	-	-	D	P	Local / GM				None identified			-	-	-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	-	-	-	D	P	Local / GM				Make reference to providing access to green spaces for both physical and mental health. Link to potential recreation functions	Y	Policy text has changed to reference the physical and mental health benefits of green spaces and landscapes	+	+	+	Policy GM-G5 is focused on uplands. Policy text has been amended to reference the physical and mental health benefits open space and landscapes can provide.	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if new facilities are not developed at same rate as residential development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Changes in travel patterns as people being to take advantage of public transport as their main form of transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Air quality will be improved across the uplands and this will have an indirect effect upon Greater Manchester	Increased trips to and from development may worsen air quality over time if sustainable modes are not implemented	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy has significant crossover with this objective as it aims to conserve and enhance the distinctive upland landscape	Impact on the biodiversity assets may occur in combination with surrounding development	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	+	++	D	P	Local / GM / Wider				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Policy has been amended to specifically reference increased access to the uplands. However, scoring has not changed from 2019 due to already being positive	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+	++	I	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	The protection and enhancement of the uplands as set out in this policy will have a positive albeit indirect effect on the resilience of development; in addition to the preservation of this greenspace, development itself will also need to be made resilient to climate change	Increased heat island and flood risk in conjunction with other development	Mention benefits which upland GI present in combating heat island given off by GM	Partially	No amendments have been made to the policy text to address mitigation comments in relation to combating the heat island effect. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure	o	+	++	Policy GM-G5 is focused on uplands but has no specific reference to green infrastructure and combating heat island. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified

13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	I	n/a	Local / GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Policy specifically references increasing the role of the uplands in flood risk management	Surrounding development may affect flood risk and increase the overall likelihood of flooding	Cross-reference guidance on flood risk and GI	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	o	o	o	Policy GM-G5 is focused on uplands but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	+	++	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	o	+	++	Policy GM-G5 is focused on uplands but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+	++	I	n/a	GM / W	Receptors: water courses, ground water, water supplies Affected groups: Various	Uplands innately improve water quality and policy directly references GI functions of water storage and quality improvements	The quality and availability of water resources may be affected overall in conjunction with nearby development	Add reference to Water Framework Directive as strategic aim	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing water resource management. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	o	+	++	Policy GM-G5 is focused on uplands but has no specific reference to the water framework directive is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains neutral.	None Identified
		Promote management practices that will protect water features from pollution?	o	+	++	D	P	Local / GM							o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	+	++	D	P	GM / W							o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Increase in energy use and as a result, GHG emissions increase as development occurs	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	I	n/a	GM / W				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	+	++	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Policy seeks to protect the sense of remoteness; there is significant overlap between the policy and this objective	Landscape and heritage receptors may be eroded incrementally as development takes place	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Policy has been amended to specifically reference the uplands distinctive character. However, scoring has not changed from 2019 due to already being positive	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	I	n/a	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	Policy will controls development in the uplands and will therefore indirectly support the development of land in more sustainable locations	Loss of greenfield land as it is developed incrementally	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with nearby schemes as development is taken forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health and wellbeing initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	Link to initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy aims to maximise the proportion of people who have accessible natural greenspace near to their home, therefore supporting the health and wellbeing of residents. Policy must also enhance existing GI in local communities	Improved health and reduced health inequalities may occur through planning policy and national initiatives	Emphasise health benefits of active transport and importance of accessibility to greenspace	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility and benefits of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure, S1 for creating sustainable places and N5 for active travel	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to the benefits of green infrastructure and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure, S1 for creating sustainable places and N5 for active travel	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to the benefits of green infrastructure and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Promote access to green space?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increase access coupled with population growth could present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if educational/skills facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Changes in travel patterns as residents increasingly take advantage of public transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	I	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	Policy sets standards for incorporating greenspace into/near to new development; increased provision of GI will therefore have a positive effect on air quality	Increased trips from additional developments could worsen air quality if sustainable modes of travel are not utilised	Emphasise health benefits of incorporating GI into new and existing development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and S1 for creating sustainable places	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to the benefits of green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy aims to maximise the proportion of people who have accessible natural greenspace near to their home, and therefore ensures access to and enhances green infrastructure	Biodiversity and geodiversity may be impacted upon in combination with development	Mention wildlife in conjunction with allowing 'naturalness' to predominate greenspace	Partially	No amendments have been made to the policy text to address mitigation comments in relation to wildlife to be included with exisiting policy text. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and G9 for biodiversity and geodiversity.	+	+	++	Policy GM-G6 is focused on urban green space but has no specific reference to wildlife. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	+	+	I	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy dictates that greenspace must be within certain distances of homes, indirectly strengthening the resilience of communities; more direct measures will also need to be undertaken to increase resilience to climate change	Infrastructure in new developments may use creation of greenspace as a way to not focus on resilience elsewhere	Mention benefits of GI in strengthening resilience in new development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the benefits of GI to improve a development's resilience. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and S1 and S4 for sustainable development and resilience considerations	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to green infrastructure and the benefits of resilience for development. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Accessible greenspace near and incorporated into development will reduce risk of flooding but development will also need to utilise permeable materials in its infrastructure	Additional development could increase risk of flooding	Policy could cross-reference best practice on using GI to decrease flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	o	o	o	Policy GM-G6 is focused on urban green space but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+	+	++	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	++	Policy GM-G6 is focused on urban green space but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	+	+	+	I	P	Local / GM				Policy should highlight potential for GI to mitigate increased run-off rates from development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure's potential to mitigate run off. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to green infrastructure's potential to mitigate run off. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains positive.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	+	+	I	P	Local / GM				Policy should highlight potential for GI to mitigate future levels of flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure's potential to mitigate future flood risk. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	+	Policy GM-G6 is focused on urban green space but has no specific reference to green infrastructure's potential to mitigate future flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains positive.	None Identified
		Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies	Neutral/no effect against this objective and assessment criteria anticipated	The quality and availability of water resources may be	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

14	Protect and improve the quality and availability of water resources	Promote management practices that will protect water features from pollution?	o	o	o	I	P	Local / GM	Affected groups: Various		affected by development	Mention blue infrastructure in conjunction with GI	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing blue and green infrastructure. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green and blue infrastructure	o	o	o	Policy GM-G6 is focused on urban green space but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on blue and green infrastructure remains neutral.	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing blue and green infrastructure. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green and blue infrastructure	o	o	o	Policy GM-G6 is focused on urban green space but no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on blue and green infrastructure remains neutral.	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: Climate Affected groups: All	Maximising the proportion of accessible natural greenspace will mitigate greenhouse gas emissions in the affected area	Construction and occupation of developments will see an increase in greenhouse gas emissions if renewable energy sources are not utilised	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	++	I	P	Local / GM				Specify that greenspace will positively impact greenhouse gas emissions from nearby development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green house gas emissions. However, this topic is covered by corresponding thematic policies GM S1 and S2 which cover sustainable development and carbon and energy.	+	+	++	Policy GM-G6 is focused on urban green space but no specific reference to green house gas emissions is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains positive.	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	+	+	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Standard set out to incorporate and maximise greenspace will innately improve landscape quality and character of open spaces	Landscape and heritage assets may be negatively impacted as development is brought forward	Mention that greenspace should be quality in addition to accessible	Partially	No amendments have been made to the policy text to address mitigation comments in relation to providing quality and accessible green spaces. However, this topic is covered in corresponding thematic policy GM E1 which covers creating sustainable places	+	+	+	Policy GM-G6 is focused on urban green space but no specific reference to providing quality and accessible green spaces is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains positive.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	I	n/a	Local				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	I	n/a	Local				Mention that greenspace should take its local surroundings into consideration	Partially	No amendments have been made to the policy text to address mitigation comments in relation to ensuring greenspace takes accounts of its local surroundings. However, this topic is covered in corresponding thematic policy GM E1 which covers creating sustainable places	o	o	o	Policy GM-G6 is focused on urban green space but no specific reference to ensuring greenspace takes accounts of its local surroundings is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains neutral.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	I	n/a	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Potential loss of accessible greenspace as new development is constructed	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				Specify whether natural greenspace standard can be achieved through remediation of land	Partially	No amendments have been made to the policy text to address mitigation comments in relation to utilising remediated land. However, this topic is covered in corresponding thematic policies GM S1 and E1 which cover sustainable development and creating sustainable places	o	o	o	Policy GM-G6 is focused on urban green space but no specific reference to utilising remediated land. As such, the scoring has not been changed and the potential impacts of the policy on utilising previously developed land remains neutral.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	I	n/a	Local	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation will increase with the addition of development to an area	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM G7 - Trees and Woodland

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, Local / GM population where sites come forward Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Policy covers on-site provision of trees for development and also encourages positive management of woodland to contribute to GI functions.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	+	D	P	Local / GM				Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	+	+	I	P	Local / GM				Mentions GI functions; could expand upon this in relation to on-site provision of trees. Potential use in cooling could be made explicit.	Y	Policy text has changed to reference the benefits of urban cooling from green infrastructure	+	++	++	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to include a reference to urban cooling following the IA mitigation.	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	I	n/a	Local / GM	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	I	n/a	Local / GM				None identified			+	+	+	The policy has been updated to mention sustainable travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated.	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programs)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	I	n/a	Local / GM	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated.	Link to other initiatives or investments which integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy will improve access to woodland and target tree planting in areas of greatest need, which should reduce health inequalities and improve health and wellbeing. Improvements to air quality and recreation opportunities. The policy also seeks to provide orchards to increase fruit consumption.	Improved health and reduced health inequalities may occur through planning policy and national initiatives	Mention GI enhancements will encourage active transport and therefore benefit health	Y	Policy text has changed to encourage active travel	+	++	++	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to include a reference to active travel following the IA mitigation. The mitigation was suggested to strengthen the policy and it is not anticipated that there would be any further detrimental impact as a result of the policy text change therefore no further mitigation is suggested.	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	+	+	D	P	Local / GM				As above	Y	Policy text has changed to encourage active travel	+	++	++	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to include a reference to active travel following the IA mitigation.	None Identified
		Promote access to green space?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated.	Capacity issues if new facilities are not developed at same rate as residential development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	I	n/a	Local / GM	Receptors: GM population, transport network Affected groups: Various	Establishment of City Forest Parks and increasing the provision of street trees will make areas more attractive, thus encouraging residents to utilise active modes of transport.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport.	None identified			+	+	+	The policy has been updated to mention sustainable travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	I	n/a	Local / GM				None identified			+	+	+	The policy has been updated to mention sustainable travel. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
		Support the use of sustainable and active modes of transport?	+	+	+	D	P	Local / GM				Mention that street tree provision and targeted tree planting should benefit pedestrians and encourage active travel	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and street trees. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel with N4 and E1 covering the design of streets and sustainable places	+	+	+	Policy GM-G7 is focused on trees and woodlands but no specific reference to sustainable travel modes and street trees is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on habitat diversity remains positive.	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	+	+	D	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Policy supports conserving, protecting, and expanding woodlands to effectively contribute to carbon storage and sequestration; this will directly improve air quality.	Increased trips to and from development may worsen air quality over time if sustainable modes are not utilised.	Covered by policy			o	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy has substantial crossover with this objective on topics such as protecting and expanding woodland habitats, contributing to GI functions, and improving public access to woodland and trees; therefore it conserves and enhances GI assets.	Impact on biodiversity assets may occur in combination with nearby development.	Covered by policy however habitat diversity is not specifically mentioned in relation to ecology.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing ecology with habitat diversity. However, this topic is covered in corresponding thematic policy GM G9 which covers biodiversity and geodiversity	o	+	++	Policy GM-G7 is focused on trees and woodlands but no specific reference to habitat diversity in relation to ecology is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on habitat diversity remains positive.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	I	n/a	Local / GM				Covered by policy			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	++	D	P	Local				Add reference to recreation/amenity/tranquillity	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the amenity, tranquillity and recreational benefits of green infrastructure. However, this is covered by corresponding thematic policies Strat 13, G2, G6 and G8 which covers green infrastructure	o	+	++	Policy GM- G7 is focused on trees and woodland but has no specific reference to amenity, tranquillity and recreational benefits of green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for water quality remains positive.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+	++	D	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy highlights issues which positive management of trees and woodland can combat, such as flood risk and carbon storage/sequestration. Policy highlights links between tree planting and flood risk, which GMSF has a policy on	Increased heat island and flood risk in conjunction with additional development.	Covered by policy			+	++	++	The policy has been updated to mention the trees and woodland's role in urban cooling. As the policy text has been updated this has had an increasingly positive impact against this criteria.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	I	n/a	Local / GM	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Policy supports protecting, enhancing, conserving, etc. woodlands which will innately reduce risk of flooding in that area. It also explicitly encourages positive management of woodland and trees to more effectively contribute to GI functions such as flood risk management. The GMSF has a policy focused on this topic.	Nearby development may affect flood risk and increase the likelihood of flooding.	Mention controlling development in sensitive areas such as flood plains	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing flood plains. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	o	o	o	Policy GM- G7 is focused on trees and woodland but has no specific reference to flood plains. As such, the scoring has not been changed and the potential impacts of the policy on flood plains remains neutral.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	+	++	D	P	Local / GM				Clarify GI measures in relation to managing flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to managing flood risk. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	o	+	++	Policy GM- G7 is focused on trees and woodland but has no specific reference to flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk remains positive.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	+	++	D	P	Local / GM				Mention controlling development to ensure run-off rates are not overall increased	Partially	No amendments have been made to the policy text to address mitigation comments in relation to managing flood risk and water run off. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	o	+	++	Policy GM- G7 is focused on trees and woodland but has no specific reference to flood risk and water run off. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and water run off remains positive.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	+	++	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to managing flood risk and water run off. However, this topic is covered in corresponding thematic policy GM S5 which covers flood risk and the water environment.	o	+	++	Policy GM- G7 is focused on trees and woodland but has no specific reference to flood risk and water run off. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and water run off remains positive.	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+	++	D	P	GM / Wider	Receptors: water courses, ground water, water supplies Affected groups: Various	Policy encourages positive management of the woodland to bring it to a more productive state, including contributing towards GI functions. This will have a positive effect on water quality and availability.	The quality and availability of water resources may be affected cumulatively in conjunction with nearby development.	Mention Water Framework Direction in policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the water framework directive. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	o	+	++	Policy GM- G7 is focused on trees and woodland but no specific reference to the water framework directive is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains positive.	None Identified
		Promote management practices that will protect water features from pollution?	o	+	++	D	P	Local / GM				Include water quality as a GI function	Partially	No amendments have been made to the policy text to address mitigation comments in relation to water quality as a GI function. However, this is covered by corresponding thematic policies Strat 13, G2 and G6 which covers green infrastructure provision	o	+	++	Policy GM- G7 is focused on trees and woodland but has no specific reference to water quality as a GI function. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for water quality remains positive.	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	+	+	I	P	Local	Receptors: None identified Affected groups: Various	Provision of street trees, community orchards, etc. will assist in cooling urban areas and therefore encourage energy efficiency. There is a GMSF policy on this topic.	There is an increase in energy use and greenhouse gas emissions as development comes forward.	Elaborate upon GI benefits to include cooling and decreased energy consumption	Y	Policy text has changed to reference the benefits of urban cooling from green infrastructure	+	++	++	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to include a reference to urban cooling following the IA mitigation.	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	I	n/a	GM / Wider				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
	Conserve and/or	Improve landscape quality and the character of open spaces and the public realm?	o	+	++	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non	Policy contains crossover with this objective and calls for conservation of trees that are of cultural, heritage, and/or aesthetic value.	Landscape and heritage receptors may be eroded incrementally as development comes forward.	Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	+	++	D	P	Local / GM				Covered by policy			o	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

16	enhance landscape, townscape, heritage assets and their setting and the character of GM	Respect, maintain and strengthen local character and distinctiveness?	o	+	++	D	P	Local / GM	identified			Mention importance of ancient and veterans trees to strengthen local character	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the role of biodiversity and geodiversity within local character. However, this topic is covered in corresponding thematic policy GM H2 which covers heritage	o	+	++	Policy GM- G7 is focused on trees and woodland but no specific reference to the role of trees in relation to a place's character is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on local character is positive.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated.	Loss of greenfield land as it is developed incrementally.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				Mention land remediation in conjunction with managing woodlands	Y	Policy text has changed to reference the potential for tree planting on land in need of remediation	o	+	+	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to support opportunities for tree planting on land which requires land remediation works following the IA mitigation.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated.	Waste generation with nearby schemes as development comes forward.	Reference opportunity for woodland conservation to spread awareness for sustainable use of timber	Y	Policy text has changed to reference the opportunity for woodland conservation to raise awareness of the sustainable use of timber.	+	+	+	Policy GM- G7 is focused on trees and woodland. Policy text has been amended to support opportunities for woodland conservation to spread awareness of the sustainable use of timber following the IA mitigation.	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM G8 Standards for a Greener Greater Manchester

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, Local / GM population where sites come forward Affected groups: Those already living in deprived areas	Policy concerns GI standards and focuses on accessibility, which will benefit those in the local area and especially those in new developments	Could have cumulative socio-economic and environmental effects in development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects in development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects in development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health and wellbeing initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	Link to initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy aims to maximise the proportion of people who have accessible natural greenspace near to their home, therefore supporting the health and wellbeing of residents. Policy must also enhance existing GI in local communities	Improved health and reduced health inequalities may occur through planning policy and national initiatives	Emphasise health benefits of active transport and importance of accessibility to greenspace	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility and benefits of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure, S1 for creating sustainable places and N5 for active travel	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to the benefits of green spaces and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	D	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure, S1 for creating sustainable places and N5 for active travel	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to the benefits of green spaces and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Promote access to green space?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increase access coupled with population growth could present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if educational/skills facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Changes in travel patterns as residents increasingly take advantage of public transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	I	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	Policy sets standards for incorporating greenspace into/near to new development; increased provision of GI will therefore have a positive effect on air quality	Increased trips from additional developments could worsen air quality if sustainable modes of travel are not utilised	Emphasise health benefits of incorporating GI into new and existing development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the accessibility of green space and active travel modes. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and S1 for creating sustainable places	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to the benefits of green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	++	D	P	Local / GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy aims to maximise the proportion of people who have accessible natural greenspace near to their home, and therefore ensures access to and enhances green infrastructure	Biodiversity and geodiversity may be impacted upon in combination with development	Mention wildlife in conjunction with allowing 'naturalness' to predominate greenspace	Partially	No amendments have been made to the policy text to address mitigation comments in relation to wildlife to be included with existing policy text. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and G9 for biodiversity and geodiversity.	+	+	++	Policy GM-G8 is focused on green standards for GM but has no specific reference to wildlife. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+	+	++	D	P	Local / GM				Covered by policy			+	+	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	+	+	I	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Policy dictates that greenspace must be within certain distances of homes, indirectly strengthening the resilience of communities; more direct measures will also need to be undertaken to increase resilience to climate change	Infrastructure in new developments may use creation of greenspace as a way to not focus on resilience elsewhere	Mention benefits of GI in strengthening resilience in new development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the benefits of GI to improve a development's resilience. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green infrastructure and S1 and S4 for sustainable development and resilience considerations	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to green infrastructure and the benefits of resilience for development. As such, the scoring has not been changed and the potential impacts of the policy remains positive.	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Accessible greenspace near and incorporated into development will reduce risk of flooding but development will also need to utilise permeable materials in its infrastructure	Additional development could increase risk of flooding	Policy could cross-reference best practice on using GI to decrease flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	o	o	o	Policy GM-G8 is focused on green standards for GM but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	+	+	++	I	P	Local / GM				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing guidance on flood risk and green infrastructure. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	++	Policy GM-G8 is focused on green standards for GM but has no specific reference to flood risk or green infrastructure guidance. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains neutral.	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	+	+	+	I	P	Local / GM				Policy should highlight potential for GI to mitigate increased run-off rates from development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure's potential to mitigate run off. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to green infrastructure's potential to mitigate run off. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains positive.	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	+	+	I	P	Local / GM				Policy should highlight potential for GI to mitigate future levels of flood risk	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green infrastructure's potential to mitigate future flood risk. However, this topic is covered in corresponding thematic policies GM S5 which covers flood risk and the water environment and GM G2 and GM-Strat 13 for green infrastructure	+	+	+	Policy GM-G8 is focused on green standards for GM but has no specific reference to green infrastructure's potential to mitigate future flood risk. As such, the scoring has not been changed and the potential impacts of the policy on flood risk and green infrastructure guidance remains positive.	None Identified
		Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies	Neutral/no effect against this objective and assessment criteria anticipated	The quality and availability of water resources may be	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

14	Protect and improve the quality and availability of water resources	Promote management practices that will protect water features from pollution?	o	o	o	I	P	Local / GM	Affected groups: Various		affected by development	Mention blue infrastructure in conjunction with GI	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing blue and green infrastructure. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green and blue infrastructure	o	o	o	Policy GM-G8 is focused on green standards for GM but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on blue and green infrastructure remains neutral.	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing blue and green infrastructure. However, this topic is covered in corresponding thematic policies GM G2 and GM-Strat 13 for green and blue infrastructure	o	o	o	Policy GM-G8 is focused on green standards for GM but has no specific reference to green and blue infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on blue and green infrastructure remains neutral.	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: Climate Affected groups: All	Maximising the proportion of accessible natural greenspace will mitigate greenhouse gas emissions in the affected area	Construction and occupation of developments will see an increase in greenhouse gas emissions if renewable energy sources are not utilised	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	++	I	P	Local / GM				Specify that greenspace will positively impact greenhouse gas emissions from nearby development	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing green house gas emissions. However, this topic is covered by corresponding thematic policies GM S1 and 2 which cover sustainable development and carbon and energy.	+	+	++	Policy GM-G8 is focused on green standards for GM but no specific reference to green house gas emissions is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains positive.	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	+	+	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Standard set out to incorporate and maximise greenspace will innately improve landscape quality and character of open spaces	Landscape and heritage assets may be negatively impacted as development is brought forward	Mention that greenspace should be quality in addition to accessible	Partially	No amendments have been made to the policy text to address mitigation comments in relation to providing quality and accessible green spaces. However, this topic is covered in corresponding thematic policy GM E1 which covers creating sustainable places	+	+	+	Policy GM-G8 is focused on green standards for GM but no specific reference to providing quality and accessible green spaces is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains positive.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	I	n/a	Local				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	I	n/a	Local				Mention that greenspace should take its local surroundings into consideration	Partially	No amendments have been made to the policy text to address mitigation comments in relation to ensuring greenspace takes accounts of its local surroundings. However, this topic is covered in corresponding thematic policy GM E1 which covers creating sustainable places	o	o	o	Policy GM-G8 is focused on green standards for GM but no specific reference to ensuring greenspace takes accounts of its local surroundings is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on green house gas emissions remains neutral.	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	I	n/a	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Potential loss of accessible greenspace as new development is constructed	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				Specify whether natural greenspace standard can be achieved through remediation of land	Partially	No amendments have been made to the policy text to address mitigation comments in relation to utilising remediated land. However, this topic is covered in corresponding thematic policies GM S1 and E1 which cover sustainable development and creating sustainable places	o	o	o	Policy GM-G8 is focused on green standards for GM but no specific reference to utilising remediated land. As such, the scoring has not been changed and the potential impacts of the policy on utilising previously developed land remains neutral.	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	I	n/a	Local	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation will increase with the addition of development to an area	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM G9 - Biodiversity and Geodiversity

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, Local / GM population where sites come forward Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Policy requires development to deliver a clear net gain in biodiversity and to avoid fragmenting habitats; it should therefore have a positive effect on the connectivity of housing and greenspace.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/no effect against this objective and assessment criteria anticipated.	Could have cumulative socio-economic and environmental effects in conjunction with surrounding development schemes	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated.	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programs)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	I	n/a	Local / GM	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated.	Link to other initiatives or investments which integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	I	n/a	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy will improve access to nature and should therefore have a positive effect on healthier lifestyles.	Improved health and reduced health inequalities may occur through planning policy and national initiatives	Specify that increasing access to nature will support healthier lifestyles	Partially	No amendments have been made to the policy text to address mitigation comments in relation to healthier lifestyles. However, this is covered by corresponding thematic policies GM E1 which covers creating sustainable places, E6 which covers health and N5 which covers active travel modes	+	+	+	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to healthier lifestyles. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for tackling inequalities remains positive.	None Identified
		Reduce health inequalities within GM and with the rest of England?	?	?	?	I	P	Local / GM				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Policy calls for facilitation of greater access to nature, particularly within urban areas; this will have an uncertain effect on the provision of community social infrastructure.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	?	?	?	I	P	Local / GM				Elaborate upon recreation opportunities which could be implemented in conjunction with greater access to nature	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing recreation opportunities. However, this topic is covered by corresponding thematic policies GM E7 which covers sport and recreation	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to recreation opportunities. As such, the scoring has not been changed and the potential impacts of the policy on clean air benefits remains unknown.	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated.	Capacity issues if new facilities are not developed at same rate as residential development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Facilitating greater access to nature will have an uncertain effect on active modes of transport in the local area and throughout Greater Manchester, dependent upon location of the greenspace.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	?	?	?	I	P	Local / GM				Elaborate upon greater access to nature; it should also encourage active modes of transport	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes and transport infrastructure. However, this topic is covered by corresponding thematic policies GM N1, N3 and N5 which cover GM's integrated network, public transport and active travel	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy on sustainable travel modes remains the same.	None Identified

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	P	Local / GM / Wider	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Policy supports increasing the quality, quantity, extent and diversity of habitats; these improvements will directly improve air quality.	Increased trips to and from development may worsen air quality over time if sustainable modes are not utilised.	Covered by policy; mention air quality as a benefit of biodiversity enhancement	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the specific benefit of air quality from biodiversity. However, this topic is covered in corresponding thematic policy GM G6 which covers clean air	+	+	+	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to the benefit of clean air from biodiversity. As such, the scoring has not been changed and the potential impacts of the policy on clean air benefits remains positive.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	+	+	D	P	Local / GM / Wider	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Policy supports a significant net enhancement of biodiversity and geodiversity resources and should therefore have a positive effect on wildlife and geological features. It will have an uncertain effect on multifunctional green infrastructure and recreation opportunities. Policy supports safeguarding long-term potential of agricultural land and avoiding developing on such land when appropriate alternatives are available. It therefore avoids damage and destruction of sites and has an uncertain effect concerning its contribution towards multifunctional green infrastructure.	Impact on biodiversity assets may occur in combination with nearby development.	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	++	++	++	D	P	Local / GM / Wider				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	?	?	I	n/a	Local / GM				Mention benefit of creating multifunctional greenspaces	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the benefits of green infrastructure. However, this topic is covered in corresponding thematic policy GM Strat 13, G2, G6 and G8 which cover green infrastructure	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to the benefits of green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green infrastructure benefits remains unknown.	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?	?	?	I	n/a	Local				Add reference to recreation/amenity/tranquillity	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the benefits of green infrastructure. However, this topic is covered in corresponding thematic policy GM Strat 13, G2, G6 and G8 which cover green infrastructure	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to the benefits of green infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on green infrastructure benefits remains unknown.	None Identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	I	P	Local / GM	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated.	Increased heat island and flood risk in conjunction with additional development.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated.	Nearby development may affect flood risk and increase the likelihood of flooding.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	+	+	+	D	P	GM / Wider	Receptors: water courses, ground water, water supplies Affected groups: Various	There is no mention of the WFD within this policy but its objectives align with the policy and should therefore have a positive effect against this assessment criteria. This policy supports sustainable soil management and the restoration of habitats which will protect peat-based soils; this should have an indirectly positive effect on protecting water feature from pollution.	The quality and availability of water resources may be affected cumulatively in conjunction with nearby development.	Mention Water Framework Directive in policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the water framework directive. However, this topic is covered in corresponding thematic policy GM S5 which covers the water environment.	+	+	+	Policy GM- G9 is focused on biodiversity and geodiversity but no specific reference to the water framework directive is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on water resource management remains positive.	None Identified
		Promote management practices that will protect water features from pollution?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated.	There is an increase in energy use and greenhouse gas emissions as development comes forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	I	n/a	GM / Wider				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	?	?	?	D	P	Local / GM / Wider	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Policy supports enhancement of biodiversity and geodiversity, and will have an uncertain effect against the landscape, townscape, and heritage criteria.	Landscape and heritage receptors may be eroded incrementally as development comes forward.	Policy could make reference to landscape, open spaces and public realm	Partially	No amendments have been made to the policy text to address mitigation comments in relation to access to green space. However, this is covered by corresponding thematic policies GM E1 which covers creating sustainable places and Strat 13, G2 and G6 which covers green infrastructure provision	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but has no specific reference to access to green space. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for green space access remains unknown.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	?	?	?	D	P	Local				Make reference in policy about the role of biodiversity and geodiversity in maintaining and strengthening local character and distinctiveness	Partially	No amendments have been made to the policy text to address mitigation comments in relation to the role of biodiversity and geodiversity within local character. However, this topic is covered in corresponding thematic policy GM H2 which covers heritage	?	?	?	Policy GM- G9 is focused on biodiversity and geodiversity but no specific reference to the role of biodiversity and geodiversity in relation to a place's character is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on local character is unknown.	None Identified

17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	+	+	I	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	Policy references safeguarding the best and most versatile agricultural land and will have a strong, positive affect on this assessment criteria.	Loss of greenfield land as it is developed incrementally.	Mention preference of development on previously developed land rather than land containing soils of high environmental quality	Partially	No amendments have been made to the policy text to address mitigation comments in relation to contribute to or enable brownfield land development and minimise the loss of greenfield sites. However, this topic is covered in corresponding thematic policy GM S1 which covers sustainable development	+	+	+	Policy GM- G9 is focused on biodiversity and geodiversity but no specific reference to contribute to or enable brownfield land development and minimise the loss of greenfield sites is mentioned. As such, the scoring has not been changed and the potential impacts of the policy on brownfield land is positive.	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated.	Waste generation with nearby schemes as development comes forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GMG10 - The Greater Manchester Green Belt

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	+	+	D	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The Green Belt policy makes reference to the strong protection from inappropriate development, implying that where appropriate Green Belt may be released for housing development, given the need for housing within GM.	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	+	+	+	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The Green Belt policy makes reference to the strong protection from inappropriate development, implying that where appropriate Green Belt may be released for employment development, given the need for new employment uses within GM.	Could have cumulative effects with other local development schemes.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	To enable the release of Green Belt for housing social infrastructure will need to be provided including new educational facilities	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of series unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure sufficient access to educational facilities for all children?	+/?	+/?	+/?	D	P	L/GM				None identified			+/?	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+/?	+/?	+/?	D	P	L/GM				None identified			+/?	+/?	+/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	-/?	-/?	-/?	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	Development in the Green Belt will result in development in areas which are less likely to be near major transport or employment land areas. However, come areas proposed will include a mix of employment opportunities near to housing	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Ensure that permission granted for Green Belt sites promotes sustainable transport in the first instance through the provision of public transport and active travel	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	-/?	-/?	-/?	Policy GM- G10 is focused on the Manchester Green Belt but has no specific reference to opportunities for sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel remains unknown.	None Identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	-/?	-/?	D	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Linked to the potential that development of Green Belt may have on distance from transport and employment, this may result in an increase in the amount of trips made by car.	Increased trips by private motor vehicle will worsen the air quality over time	Ensure that permission granted for Green Belt sites promotes sustainable transport in the first instance through the provision of public transport and active travel	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing sustainable travel modes. However, this topic is covered in corresponding thematic policies GM N3 and N5 which cover public transport and active travel	o	-/?	-/?	Policy GM- G10 is focused on the Manchester Green Belt but has no specific reference to opportunities for sustainable travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for sustainable travel remains unknown.	None Identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	-/?	-/?	D	P	GM / W	Receptors: None identified Affected groups: Various	Linked to the provision of transport and impacts on air quality, as development in Green Belt may result in increased trips by private car, resulting in carbon emissions	n/a	None identified			o	-/?	-/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	-/?	-/?	D	P	GM / W				None identified			o	-/?	-/?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	?	?	?	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	An uncertain impact is anticipated with some uncertainly around potential impact on some areas through the release of Green Belt, but this will be dependent upon the site and scheme proposed	Landscape quality is reduced and character is lost from various assets until it is diminished	Detailed appraisal of openness and green belt boundaries required	Partially	No amendments have been made to the policy text to address mitigation comments in relation to Green Belt boundaries, though a Green Belt assessment has been undertaken and forms part of the GMSF evidence base	?	?	?	Policy GM-G10 is focused on the Manchester Green Belt. As such, the scoring has not been changed and the potential impacts of Green Belt boundaries is considered as part of the Green Belt Assessment.	None Identified
		Conserve and enhance the historic environment, heritage assets and their setting?	?	?	?	D	P	L				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Respect, maintain and strengthen local character and distinctiveness?	?	?	?	D	P	L				None identified			?	?	?	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	?/-	?/-	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of large amounts of Green Belt land, offering Green Belt strong protection from inappropriate development. However, the policy does make allowances for the development on Green Belt land which may reduce construction of previously developed land.	Loss of greenfield land	None identified			o	?/-	?/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	?/-	?/-	?/-	D	P	Local				None identified			?/-	?/-	?/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	?/-	?/-	D	P	Local / GM				None identified			o	?/-	?/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	?/-	?/-	D	P	Local / GM				None identified			o	?/-	?/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None Identified

GM-G11- Safeguarded Land

Ref	Objective	Assessment criteria….will the GMSF	Assessment: ST (0-4 years)	Assessment: MT (5-9 years)	Assessment: LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. As such, these area are likely to be better connected.	Could have cumulative socio-economic and environmental effects with other local development schemes	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	+	+	D	P	L/GM				None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. As such, these areas are likely to be better connected.	Could have cumulative effects with other local development schemes.	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	+	+	D	P	L/GM				None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+/?	+/?	+/?	D	P	L/GM	Receptors: GM population Affected groups: all groups will be affected by this	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. As such, these area are likely to be better connected and have better existing infrastructure. In addition, the policy states that Safeguarded Land will only be released for development where it includes the provision of necessary infrastructure.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of series unless more are provided	None identified
		Ensure sufficient access to educational facilities for all children?	+/?	+/?	+/?	D	P	L/GM				None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+/?	+/?	+/?	D	P	L/GM				None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+/?	+/?	+/?	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. As such, these area are likely to be better connected and have better existing transport infrastructure.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				None identified

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/?	+/?	+/?	D	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. As such, these area are likely to be better connected and have better existing transport infrastructure and would limit the need for additional car travel	Increased trips by private motor vehicle will worsen the air quality over time	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	?/+	?/+	D	I	L/GM	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy states that Safeguarded Land will only be released for development where… measures to positively mitigate environmental impacts [are integrated into its delivery].	n/a	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	?/+	?/+	D	I	L/GM				None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	?/+	?/+	D	I	L/GM				None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	?	?	?	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Uncertainly around potential impact on the landscape from release of Safeguarded Land, but this will be dependent upon the site and scheme proposed	Landscape quality is reduced and character is lost from various assets until it is diminished	Appraisal of landscape and visual impacts required to accompany any development proposal
		Conserve and enhance the historic environment, heritage assets and their setting?	?	?	?	D	P	L				None identified
		Respect, maintain and strengthen local character and distinctiveness?	?	?	?	D	P	L				None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	?	?	D	P	Local / GM	Receptors: greenfield and brownfield land Affected groups: Non identified	The policy by its nature, encourages development to be located on previously developed land as it restricts the development of Safeguarded Land. However, the policy does make allowances for the development on Safeguarded which may reduce construction of previously developed land.	Loss of greenfield land	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	?	?	D	P	Local				None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	?	?	D	P	Local / GM				None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	?	?	D	P	Local / GM				None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/ no effect against the objective and assessment criteria anticipated	n/a	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified

A Connected Greater Manchester

GM N1 - Our Integrated Network												2020							
Ref	Objective	Assessment criteria....will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment			Summary of 2020 scoring	Residual Impacts
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)										ST (0-4 years)	MT (5-9 years)	LT (10+ years)		
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy makes reference to delivering a pattern of development that minimises the need to travel and the distances that have to be travelled. As such, this would encourage the need to locate new houses in sustainable, well- connected locations	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy makes reference to delivering a pattern of development that minimises the need to travel and the distances that have to be travelled, specifically highlighting jobs. As such, this would encourage the need to locate new employment uses in sustainable, well-connected locations	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				Policy should seek to maximise education and skills potential from investment in transport infrastructure. Development linked to major infrastructure investment should seek to up-skill the local workforce to ensure the right mix of skills is available into the future.	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing education and training opportunities following investment in transport infrastructure. However, this topic is covered by corresponding thematic policy GM E5 covering education, skills and knowledge	o	o	o	Policy GM-N1 focuses on the GM integrated network. However, there is no reference to education and training opportunities. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for learning remains neutral.	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	++	++	D	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy is judged to make a positive impact against this assessment criteria. The policy stakes that transport infrastructure and services will be transformed. In addition the policy refers to the need for high quality digital infrastructure across the region.	Could have cumulative effects with other local development schemes.	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	++	++	++	D	P	GN				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o/+	o/+	o/+	I	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	The policy makes reference to securing investment in improved transport infrastructure including that which will support economic growth. This economic growth may have a positive impact on reducing poverty.	Link to other initiatives or investments (e.g. apprenticeships)	Covered in policy			o/+	o/+	o/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o/+	o/+	o/+	I	P	Local / GM				Covered in policy			o/+	o/+	o/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy refers to priority of people in personalised motorised vehicles which would enable access to facilities. However, this is places at the bottom of the hierarchy with pedestrians and cyclists at the top.	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o/+	o/+	o/+	D	P	Local/GM				There should be an explicit reference to ensuring equal access to transport infrastructure for all	Y	Policy text has changed in to reference that transport infrastructure is available and accessible by all across GM	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to state that transport infrastructure is available to all across GM.	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o/+	o/+	o/+	D	P	Local/GM				There should be an explicit reference to ensuring equal access to transport infrastructure for all	Y	Policy text has changed in to reference that transport infrastructure is available and accessible by all across GM	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to state that transport infrastructure is available to all across GM.	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				There should be an explicit reference to ensuring equal access to transport infrastructure for all, including people living in different area and not just city and town centre focused	Y	Policy text has changed in to reference that transport infrastructure is available and accessible by all across GM	o	o	o	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to state that transport infrastructure is available to all across GM.	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	GM	Receptors: built environment, air quality Affected groups: various	The policy states that active modes of transport such as walking and cycling will be prioritised which encouraged a healthy lifestyle and would reduce health inequality between GM and the rest of England. The policy also refers to reducing the distance travelled to other key services/ opportunities which might include greenspace	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	n/a	n/a	n/a				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o/+	o/+	o/+	D	P	L				The policy should be more descriptive about what it means by 'other key services and opportunities' making reference to greenspace as one of the services.	Y	Policy text has changed in to reference that key services include green space and green infrastructure	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services include green space and green infrastructure and improving access to these spaces.	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o/+	o/+	o/+	D	P	L	Receptors: GM population Affected groups: all groups will be affected by this	The policy refers to reducing the distance travelled to other key services/ opportunities which might include healthcare, education and recreation space but this is not explicitly referenced.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	The policy should be more descriptive about what it means by 'other key services and opportunities' making reference to healthcare, education and recreation facilities.	Y	Policy text has changed in to reference that key services are listed as healthcare, education, retail, recreation and leisure, green space and green infrastructure	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services.	None identified
		Ensure sufficient access to educational facilities for all children?	o/+	o/+	o/+	D	P	L				as above	Y	Policy text has changed in to reference that key services are listed as healthcare, education, retail, recreation and leisure, green space and green infrastructure	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services.	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o/+	o/+	o/+	D	P	L				As above	Y	Policy text has changed in to reference that key services are listed as healthcare, education, retail, recreation and leisure, green space and green infrastructure	o/+	o/+	o/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services.	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Improved skill levels of the workforce	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	++	++	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy has a positive effect against this assessment criteria. The policy encourages active modes of transport and outlines hierarchy for road use which prioritises pedestrians, cyclists and public transport users.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The policy encourages active transport and public transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact on air quality.	Increased trips by private motor vehicle will worsen the air quality over time	None identified	Y	Policy text now includes reference to protecting air quality.	+	+	++	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to include protection of air quality. As such, scoring has been updated to show an increasingly positive impact against this criteria.	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy makes no explicit reference to providing green infrastructure but the policy makes reference to improving access to services and opportunities which may include recreation facilities. In addition, by encouraging active travel there is an opportunity to link this to the provision of green infrastructure.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?/+	?/+	?/+	D	P	Local / GM				The policy could make specific link between improved transport and access to green infrastructure	Y	Policy text has changed in to reference that key services include green space and green infrastructure	?/+	?/+	?/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services include green space and green infrastructure and improving access to these spaces.	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?/+	?/+	?/+	D	P	Local				The policy could make specific link between improved transport and access to green infrastructure	Y	Policy text has changed in to reference that key services include green space and green infrastructure	?/+	?/+	?/+	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to outline key services include green space and green infrastructure and improving access to these spaces.	None identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Developments are not protected against climate change impacts and the effects are felt within new developments. Some of the potential and cumulative effects may not be predicted and will therefore cause more of an impact.	None identified	Y	Policy text now includes reference to low carbon, reducing carbon emissions, and protecting air quality.	o	+	++	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to reference low carbon, reduction of emissions and air quality. As such, scoring has been updated to show an increasingly positive impact against this criteria.	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	The quality and availability of water resources may be reduced	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	+	+	I	P	GM / W	Receptors: None identified Affected groups: Various	The policy encourages active transport and public transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact on the reduction of green house gas production and a reduction in energy use	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified	Y	Policy text now includes reference to low carbon, reducing carbon emissions, and protecting air quality.	+	+	++	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to reference low carbon, reduction of emissions and air quality. As such, scoring has been updated to show an increasingly positive impact against this criteria.	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	D	P	GM / W				None identified	Y	Policy text now includes reference to low carbon, reducing carbon emissions, and protecting air quality.	o	+	++	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to reference low carbon, reduction of emissions and air quality. As such, scoring has been updated to show an increasingly positive impact against this criteria.	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	I	P	GM / W				None identified	Y	Policy text now includes reference to low carbon, reducing carbon emissions, and protecting air quality.	+	+	++	Policy GM-N1 is focused on GM's Integrated Infrastructure Network. Policy text has been amended to reference low carbon, reduction of emissions and air quality. As such, scoring has been updated to show an increasingly positive impact against this criteria.	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM N2 - Digital Connectivity

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020							
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy has a positive effect on supporting the provision of digital infrastructure, encouraging latest mobile technology and broadband, fibre digital connections and free high speed Wi-Fi	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	++	++	++	D	P	GN				Covered in policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	neutral/no effect against this objective and assessment criteria anticipated	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/no effect against this objective and assessment criteria anticipated	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Improved skill levels of the workforce	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	o	o	n/a	n/a	n/a	Receptors: GM population, transport network Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated	Increased trips by private motor vehicle will worsen the air quality over time	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Developments are not protected against climate change impacts and the effects are felt within new developments. Some of the potential and cumulative effects may not be predicted and will therefore cause more of an impact.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	Increased risk of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	The quality and availability of water resources may be reduced	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o/-	o/-	o/-	D	P	GM / W	Receptors: None identified Affected groups: Various	The use of more and better quality digital infrastructure may have a detrimental impact on energy use if the infrastructure is less energy efficient than current products.	GI will help mitigate the increased greenhouse gas emissions are more developments are built	None identified			o/-	o/-	o/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o/-	o/-	o/-	D	P	L	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	The provision of improved digital infrastructure might have a negative impact on visual amenity as it might include the erection of phone and internet masts. However, this is identified in the policy and mitigated against	Landscape quality is reduced and character is lost from various assets until it is diminished	Covered in policy			o/-	o/-	o/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o/-	o/-	o/-	D	P	L				Covered in policy			o/-	o/-	o/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o/-	o/-	o/-	D	P	L				Covered in policy			o/-	o/-	o/-	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with other schemes. Intra-development effects as a number of CfS locations are taken forward.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM N3 - Our Public Transport													2020						
Ref	Objective	Assessment criteria....will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment			Summary of 2020 scoring	Residual Impacts
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)										ST (0-4 years)	MT (5-9 years)	LT (10+ years)		
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy refers to improvements to the public transport network which will improve connectivity between and to new and existing housing	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	L/GM/W				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy refers to improvements to the public transport network which will improve connectivity between and to new and existing employment uses	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	+	D	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy states a number of improvements which will be made to the public transport network. This improves transport connectivity and supports demands from future development.	Could have cumulative effects with other local development schemes.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	++	++	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy states a number of improvements which will be made to the public transport network. This improves transport connectivity and supports demands from future development.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The policy encourages the use of public transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact on air quality.	Increased trips by private motor vehicle will worsen the air quality over time	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	The policy encourages the use of public transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact the reduction of greenhouse gas emissions	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o/+	o/+	o/+	D	P	GM / W				None identified			o/+	o/+	o/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM N4 - Streets for All

													2020							
Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any <u>specific sensitive receptors</u> where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment			Summary of 2020 scoring	Residual Impacts
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)										ST (0-4 years)	MT (5-9 years)	LT (10+ years)		
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, local / GM population where sites come forward Affected groups: Housing with an undersupply of green infrastructure is more likely to affect those already living in deprivation and with disabilities	Policy references increasing levels of greenery on streets in Greater Manchester; it will therefore have an indirectly positive effect upon ensuring housing land is well-connected with green space.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects	This policy aims to design and manage streets within Greater Manchester in order to improve quality of place and support active transport. Although this policy does not directly support provision of employment land, it would have an indirectly positive effect on this objective because it would improve the connections and infrastructure between employment sites.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	+	D	P	Local / GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	This policy supports active travel and public transport and seeks to deliver improved routes as part of the walking and cycling network. It therefore has significant crossover with this objective and would directly improve transport connectivity and support distribution of development.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified	Y	Policy text now includes reference to utilities and digital infrastructure.	o	+	++	Policy GM-N4 focuses on street design. Text now includes reference to provision of utilities and digital infrastructure. As such, the scoring has been updated and the potential impact of the policy on this criteria has an increasingly positive effect.	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	+	+	D	P	Local	Receptors: none identified Affected groups: various, depending on locality	This policy aims to provide frequent opportunities for people to rest, linger and socialise; it also aims to ensure that the streets are welcoming for all including those with reduced mobility. It would positively affect relations between different people and indirectly ensure equal access to infrastructure and facilities.	Potential link to other initiatives which seek to integrate communities	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	D	P	Local / GM				Policy covers those with reduced mobility			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+	+	+	I	P	Local				Mention social benefits of improving quality of place	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the social benefits of improving the quality of spaces. However, this topic is covered by corresponding thematic policy GM E1 covering creating sustainable places	+	+	+	Policy GM-N4 focuses on street design. However, there is no reference to the benefits of improving the quality of places. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for improving places remains positive.	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	This policy supports improvements in the walking and cycling network and also seeks to incorporate increased levels of greenery. It therefore has significant crossover with this objective by supporting healthier lifestyles and promoting access to green space.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Policy references provision of places for people to socialise and children to play. It would thus have a direct, positive effect on this objective.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	++	++	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	As this objective concerns sustainable modes of transport, there is significant crossover with this policy. The policy would strongly support efficient patterns of movement, a safe public transport network, and encouragement of active modes of transport.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	Neutral/no effect against this objective and assessment criteria anticipated	Increased trips by private motor vehicle will worsen the air quality over time if sustainable modes are not utilised	None identified	Y	Policy text now includes reference to reducing carbon emissions.	o	+	++	Policy GM-N4 focuses on street design. Text now includes reference to reducing carbon emissions. As such, the scoring has been updated and the potential impact of the policy on improving air quality has an increasingly positive effect.	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	This policy references incorporating increased levels of greenery thus enabling people to connect with nature. It would therefore have a positive effect against this objective, both contributing towards creation of green infrastructure and providing opportunities for recreation and tranquillity.	Impact on biodiversity assets may occur in conjunction with other developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	+	+	D	P	Local / GM				Elaborate upon types of greenery to be supported by policy	Y	Policy text has changed to provide further detail on what is meant by street greenery, to include trees	+	+	+	Policy GM-N4 is focused on street design. Policy text has been amended to reference trees within street greenery.	None identified

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Increased urban heat island effect and flood risk in combination with other development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	Other development which may affect flood risk and increase likelihood of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Both quality and availability of water resources may be impacted by other development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: Climate Affected groups: All	This policy references utilisation of Ultra Low Emission Vehicle charging networks and therefore directly supports a reduction in greenhouse gas emissions.	GI will help mitigate the increased greenhouse gas emissions are more developments are built	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	D	P	Local / GM				Covered by policy	Y	Policy text now includes reference to reducing carbon emissions.	+	+	++	Policy GM-N4 focuses on street design. Text now includes reference to reducing carbon emissions. As such, the scoring has been updated and the potential impact of the policy on improving air quality has an increasingly positive effect.	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	+	+	D	P	Local / GM	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Policy supports increased greenery and quality of place, and overall improvement of the streets and public realm. It therefore has a positive effect upon this objective and would strengthen the public realm and local character.	Landscape and heritage may be eroded over time as development comes forward	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	+	+	+	I	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land as it is developed incrementally	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with other schemes; intradevelopment effects as a number of locations are taken forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM N5 - Walking and Cycling													2020						
Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment			Summary of 2020 scoring	Residual Impacts
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)										ST (0-4 years)	MT (5-9 years)	LT (10+ years)		
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy makes reference to connecting every neighbourhood and community across GM through the pedestrian and cycling networks, especially for shorter journeys. The would encourage the connection between housing and employment, centres and greenspace.	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy makes reference to connecting every neighbourhood and community across GM through the pedestrian and cycling networks, especially for shorter journeys. These connections will improve infrastructure which allows people to access employment land.	Could have cumulative effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	+	D	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy states a number of interventions which will be done to create improved infrastructure for walking and cycling in Greater Manchester. This improves transport connectivity and supports demands from future development.	Could have cumulative effects with other local development schemes.	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	+	+	+	D	P	GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	This policy aims to connect key destinations through access to walking and cycling routes which will be accessible to public transport nodes. Different areas will be connected and become accessible to a variety of people.	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	I	P	Local				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	Local				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	+	+	+	I	P	Local				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	++	++	D	P	GM	Receptors: built environment, air quality Affected groups: various	The policy encourages active travel throughout GM which would support healthier lifestyles and improved heath throughout the region	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	++	++	++	D	P	GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	++	++	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy states a number of interventions which will be done to create improved infrastructure for walking and cycling in Greater Manchester. This improves transport connectivity and supports demands from future development.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	++	++	++	D	P	Local / GM				None identified			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	I	p	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	The policy encourages active transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact on air quality.	Increased trips by private motor vehicle will worsen the air quality over time	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy states the walking and cycling network will undergo improvements which are likely to include improvements to green infrastructure including canals, parks, recreation grounds etc. However no explicit link is made between the two in the policy	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o/+	o/+	o/+	D	P	Local / GM				Make link between improvements to walking and cycling infrastructure and green infrastructure	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between green and blue infrastructure with sustainable travel modes. However, this topic is covered by corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks and N1 and Strat 14 covers GM transport networks	o/+	o/+	o/+	Policy GM-N5 is focused on sustainable travel but has no specific reference to the link between green and blue infrastructure and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains unknown.	None

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o/+	o/+	o/+	D	P	Local			become central to communities.	As above	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the link between green and blue infrastructure with sustainable travel modes. However, this topic is covered by corresponding thematic policy GM G2 and Strat-13 which covers green infrastructure networks and N1 and Strat 14 covers GM transport networks	o/+	o/+	o/+	Policy GM-N5 is focused on sustainable travel but has no specific reference to the link between green and blue infrastructure and sustainable travel modes. As such, the scoring has not been changed and the potential impacts of the policy remains unknown.	None
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	The policy encourages active transport over car use and therefore encourages a reduction in carbon emissions from car which is likely to have a positive impact the reduction of greenhouse gas emissions	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o/+	o/+	o/+	D	P	GM / W				None identified			o/+	o/+	o/+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

			Assessment												Assessment					
Ref	Objective	Assessment criteria....will the GMSF	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	ST (0-4 years)	MT (5-9 years)	LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, local / GM population where sites come forward Affected groups: Housing with an undersupply of green infrastructure is more likely to affect those already living in deprivation and with disabilities	Neutral/no effect against this objective and assessment criteria anticipated	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	+	+	+	I	P	Local / GM	Receptors: GM population and GM economy Affected groups: widespread effects	This policy enables provision of consolidation and distribution centres within existing employment areas and through new developments; it additionally accommodates the expansion of air freight activities and protects existing sites and infrastructure. Therefore it has a positive effect on this objective, through indirectly meeting demand for employment land and directly providing employment land in locations well-served by infrastructure.	Could have cumulative socio-economic and environmental effects with other local development schemes.	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o							None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	+	+	D	P	Local / GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	Policy supports more efficient and sustainable movement of freight, and therefore has a positive effect on this objective through its strengthening of associated infrastructure.	Could have cumulative socio-economic and environmental effects with other local development schemes.	Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				Include text regarding utilities improvements alongside freight infrastructure	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing freight and utilities infrastructure. However, this topic is covered in corresponding thematic policies GM N1 which covers GM's integrated network and N4 which covers appropriate utilities and digital infrastructure provision where needed	o	o	o	Policy GM-H6 is freight and logistics but has no specific reference to utilities infrastructure. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for utilities infrastructure remains neutral.	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+	+	+	I	P	Local / GM	Receptors: none identified Affected groups: those identified as living in deprivation	As this policy accommodates the expansion of freight activities, it will indirectly reduce the proportion of people living in deprivation through employment opportunities and therefore supports this objective.	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes)	None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	I	P	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	Neutral/no effect against this objective and assessment criteria anticipated	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	o	o	I	P	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	I	P	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	Neutral/no effect against this objective and assessment criteria anticipated	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Reduce health inequalities within GM and with the rest of England?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Neutral/no effect against this objective and assessment criteria anticipated	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	I	P	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	+	+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	This policy references more efficient and sustainable movement of freight and therefore has a positive effect on this objective in the long-term.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Efficient freight activities covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	o	o	I	P	Local / GM				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	+	+	+	D	P	Local / GM				Sustainable movement of freight covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	Neutral/no effect against this objective and assessment criteria anticipated	Increased trips by private motor vehicle will worsen the air quality over time if sustainable modes are not utilised	None identified	n/a	Policy text now includes reference to low- and zero-emission vehicles including electric vehicles, etc.	o	+	++	Policy GM-H6 is freight and logistics. Text now includes reference to reducing carbon emissions via low-emission vehicles. As such, the scoring has been updated and the potential impact of the policy on improving air quality has an increasingly positive effect.	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Impact on biodiversity assets may occur in conjunction with other developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Increased urban heat island effect and flood risk in combination with other development	None identified	n/a	Policy text now includes reference to low- and zero-emission vehicles including electric vehicles, etc.	o	+	++	Policy GM-H6 is freight and logistics. Text now includes reference to reducing carbon emissions via low-emission vehicles. As such, the scoring has been updated and the potential impact of the policy on this assessment criteria has an increasingly positive effect.	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	Other development which may affect flood risk and increase likelihood of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Both quality and availability of water resources may be impacted by other development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	+	+	D	P	Local / GM	Receptors: Climate Affected groups: All	This policy supports more sustainable freight movement including low- or zero- carbon delivery mechanisms. It will therefore positively support this objective in the long-term as increasing efficiency in freight logistics may take time to implement.	GI will help mitigate the increased greenhouse gas emissions are more developments are built	Covered by policy	n/a	Policy text now includes reference to low- and zero-emission vehicles including electric vehicles, etc.	+	+	++	Policy GM-H6 is freight and logistics. Text now includes reference to reducing carbon emissions via low-emission vehicles. As such, the scoring has been updated and the potential impact of the policy on this assessment criteria has an increasingly positive effect.	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+	+	+	I	P	Local / GM				None identified	n/a	Policy text now includes reference to low- and zero-emission vehicles including electric vehicles, etc.	+	+	++	Policy GM-H6 is freight and logistics. Text now includes reference to reducing carbon emissions via low-emission vehicles. As such, the scoring has been updated and the potential impact of the policy on this assessment criteria has an increasingly positive effect.	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	D	P	Local / GM				Covered by policy	n/a	Policy text now includes reference to low- and zero-emission vehicles including electric vehicles, etc.	+	+	++	Policy GM-H6 is freight and logistics. Text now includes reference to reducing carbon emissions via low-emission vehicles. As such, the scoring has been updated and the potential impact of the policy on this assessment criteria has an increasingly positive effect.	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Landscape and heritage may be eroded over time as development comes forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land as it is developed incrementally	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with other schemes; intradevelopment effects as a number of locations are taken forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

GM N7 - Transport Requirements of Development

Ref	Objective	Assessment criteria….will the GMSF	Assessment			Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input	2020						
			ST (0-4 years)	MT (5-9 years)	LT (10+ years)								Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Assessment ST (0-4 years)	Assessment MT (5-9 years)	Assessment LT (10+ years)	Summary of 2020 scoring	Residual Impacts
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	o	o	n/a	n/a	n/a	Receptors: housing market, local / GM population where sites come forward Affected groups: Housing with an undersupply of green infrastructure is more likely to affect those already living in deprivation and with disabilities	This policy aims to provide walking and cycling routes to nearby facilities and supports overall enhancement of the transport network. It therefore will have a positive effect on the connectivity of housing to centres and employment land, etc.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	o	o	n/a	n/a	n/a	Receptors: GM population and GM economy Affected groups: widespread effects	This policy supports improvements in the transport network and will therefore have an indirect, positive effect on ensuring employment land is well-served by infrastructure.	Could have cumulative socio-economic and environmental effects with other local development schemes.	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	+	+	I	P	Local / GM				None identified			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	++	++	D	P	Local / GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	This policy concerns transport requirements in regard to new development and thus has significant crossover with this objective. It would have a directly positive effect on ensuring the transport network can support anticipated development and would also improve transport connectivity.	Could have cumulative socio-economic and environmental effects with other local development schemes.	Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve transport connectivity?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: those identified as living in deprivation	Neutral/no effect against this objective and assessment criteria anticipated	Link to other initiatives or investments (e.g. apprenticeships, health initiatives, education and/or skills programmes)	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	This policy dictates transport requirements for new development. It will therefore indirectly support equal access to facilities and infrastructure as it will strengthen the transport network and promote use of the entire network. This policy also references adequate parking provision for disabled people.	Potential link to other initiatives which seek to integrate communities	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	+	+	I	P	Local / GM				Mention provision for areas that may have increased need due to lack of connectivity	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing areas which may have a lack of connectivity. However, this topic is covered by corresponding thematic policies GM N1, N2, N3 and N5 which covers sustainable and active travel, digital infrastructure and the wider public transport and travel network across GM	+	+	+	Policy GM-N7 is focused on transport requirements of new development but has no specific reference to addressing areas which are currently lacking connectivity. As such, the scoring has not been changed and the potential impacts of the policy on connectivity positive.	None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	+	+	I	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	+	+	I	P	Local / GM	Receptors: built environment, air quality Affected groups: various	Policy references enhanced walking and cycling routes and therefore will have an indirectly positive effect on health and wellbeing of the local and GM population.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	Include benefits of active transport as support for policy	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing active travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for active travel positive.	+	+	+	Policy GM-N7 is focused on transport requirements of new development but has no specific reference to active travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for active travel positive.	None identified
		Reduce health inequalities within GM and with the rest of England?	+	+	+	I	P	Local / GM				As above			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	o	o	n/a	n/a	n/a	Receptors: GM population Affected groups: all groups will be affected by this	Policy supports transport enhancements brought forward with new development. It will therefore directly support this objective in relation to increased access to community social infrastructure.	Increased access coupled with population growth may present capacity issues	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Capacity issues if facilities are not developed at same rate as residential developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	++	++	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	This policy directly supports this objective as it encourages active travel, promotes alternatives to car ownership, and makes provision for enhancements to the public transport network.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support the use of sustainable and active modes of transport?	++	++	++	D	P	Local / GM				Covered by policy			++	++	++	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	+	+	D	P	Local / GM	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor))	This policy supports an increase in the number of journeys made by walking, cycling and public transport; it also incorporates electric vehicle charging points into infrastructure provision. It therefore has a positive effect on this objective and over time will improve air quality within Greater Manchester.	Increased trips by private motor vehicle will worsen the air quality over time if sustainable modes are not utilised	Specify environmental benefits of active travel	Partially	No amendments have been made to the policy text to address mitigation comments in relation to referencing the benefits of active travel. However, this topic is covered by corresponding thematic policy GM G5 which covers sustainable and active travel in GM	+	+	+	Policy GM-N7 is focused on transport requirements of new development but has no specific reference to the benefits of active travel. As such, the scoring has not been changed and the potential impacts of the policy on opportunities for active travel positive.	None identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Impact on biodiversity assets may occur in conjunction with other developments	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Increased urban heat island effect and flood risk in combination with other development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	Other development which may affect flood risk and increase likelihood of flooding	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Both quality and availability of water resources may be impacted by other development	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: Climate Affected groups: All	This policy supports alternatives to car ownership including the provision of parking spaces for car sharers to encouraged decreased emissions from transport; additionally, it encourages sustainable modes of transport. It therefore has a positive effect on the reduction of greenhouse gas emissions across GM.	GI will help mitigate the increased greenhouse gas emissions are more developments are built	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	+	+	D	P	Local / GM				Covered by policy			+	+	+	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Landscape and heritage may be eroded over time as development comes forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	Loss of greenfield land as it is developed incrementally	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	Waste generation with other schemes; intradevelopment effects as a number of locations are taken forward	None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified			o	o	o	Scoring has not changed from 2019 based on no amendments being made against the assessment criteria	None identified

Delivering the Plan

GM-D1- Infrastructure Implementation

Ref	Objective	Assessment criteria….will the GMSF	Assessment: ST (0-4 years)	Assessment: MT (5-9 years)	Assessment: LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	+	+	D	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy makes reference to minimising energy demand and requiring sustainable building design for all new developments where practicable. In addition the policy support the coordination of infrastructure which is necessary for new development to be able to take place.	Could have cumulative effects with other local development schemes.	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	o	o	n/a	n/a	n/a				None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	+	+	+	D	P	GM				None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	+	+	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy support the coordination of infrastructure which is necessary for new development to be able to take place.	Could have cumulative effects with other local development schemes.	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	++	++	D	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy aims to align provision of transport and digital infrastructure provision to make delivery easier. It also references funding mechanisms for this infrastructure. This encourages the delivery of transport and digital infrastructure	Could have cumulative effects with other local development schemes.	None identified
		Improve transport connectivity?	+	++	++	D	P	GM				None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	+	++	++	D	P	GN				None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	o/+	o/+	I	P	Local / GM	Receptors: none identified Affected groups: those	The policy by its nature is encouraging the delivery of well designed integrated infrastructure which could have a benefit across different levels of income	Link to other initiatives or investments (e.g. apprenticeships)	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	o/+	o/+	I	P	Local / GM				None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy by its nature is encouraging the delivery of well designed integrated infrastructure which could have equal access by all members of society	Potential link to other initiatives which seek to integrate communities	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o/+	o/+	o/+	D	P	Local/GM				None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				The policy does not make reference to spatial elements. This could be referenced to make clear that infrastructure will be provided across different areas
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	o	o	n/a	n/a	n/a	Receptors: built environment, air quality Affected groups: various	The policy makes reference to collaboration and synchronisation between GM and the Clinical Commissioning Groups and the NHS which are both healthcare providers. This could ensure better services can be offered.	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified
		Reduce health inequalities within GM and with the rest of England?	o	+	+	D	P	L/GM				None identified
		Promote access to green space?	o	o	o	n/a	n/a	n/a				None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	+	+	D	P	L/GM	Receptors: GM population Affected groups: all groups will be affected by this	The policy makes reference to collaboration and synchronisation between GM and the Clinical Commissioning Groups and the NHS which are both healthcare providers. This could ensure better services can be offered.	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services	None identified
		Ensure sufficient access to educational facilities for all children?	o	o	o	n/a	n/a	n/a				None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	o	o	n/a	n/a	n/a				None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Improved skill levels of the workforce	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	+	+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy makes reference to collaboration and synchronisation between GM and the Highways England and Transport for Greater Manchester which are both transport providers. This could ensure better services can be offered, including public transport. The policy also makes reference to new long-term funding mechanisms for transport.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	+	+	D	P	Local / GM				None identified
		Support the use of sustainable and active modes of transport?	o	+	+	D	P	Local / GM				The policy could make specific reference to promotion of public and active transport through these links
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated	Increased trips by private motor vehicle will worsen the air quality over time	None identified

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	o	o	n/a	n/a	n/a				None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	o	o	n/a	n/a	n/a				None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	+	+	D	P	L/GM/W	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	The policy makes reference to minimising demand for energy, water, requiring sustainable building design and conserving natural resources. As such, these all contribute to limiting impacts on carbon emissions and climate change	Developments are not protected against climate change impacts and the effects are felt within new developments. Some of the potential and cumulative effects may not be predicted and will therefore cause more of an impact	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	+	+	D	P	L/GM/W	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	The policy makes reference to collaboration and synchronisation between GM and United Utilities and Environment Agency which both work in the water/flood industry. This could ensure better services can be offered, such as flood risk management and drainage.	n/a	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	+	+	D	P	L/GM/W				None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	+	+	D	P	L/GM/W				None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	+	+	D	P	L/GM/W				None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	+	+	D	P	L/GM/W	Receptors: water courses, ground water, water supplies Affected groups: Various	The policy makes reference to collaboration and synchronisation between GM and United Utilities and Environment Agency which both work in the water/flood industry. This could ensure better services can be offered, such as flood risk management and WFD compliance	The quality and availability of water resources may be reduced	None identified
		Promote management practices that will protect water features from pollution?	o	+	+	D	P	L/GM/W				None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	+	+	D	P	L/GM/W				None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	+	+	D	P	GM / W	Receptors: None identified Affected groups: Various	The policy makes reference to minimising demand for energy, water, requiring sustainable building design and conserving natural resources. As such, these all contribute to limiting impacts on carbon emissions and climate change	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	+	+	D	P	GM / W				None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	+	+	D	P	GM / W				None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified

GM-D2- Developer contributions

Ref	Objective	Assessment criteria….will the GMSF	Assessment: ST (0-4 years)	Assessment: MT (5-9 years)	Assessment: LT (10+ years)	Majority of effects are: direct (D) or indirect (I)	Majority of effects are: Temporary (T) or Permanent (P)	Spatial consideration: Local, GM, Wider	Receptors and/or Affected groups (see key)	Explanation / summary against overall objective Note: Draw out any specific sensitive receptors where they have been identified	Potential cumulative effects	Mitigation / policy input
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	+	+	D	P	GM	Receptors: housing market, GM population Affected groups: Undersupply may disproportionately affect those on lower incomes trying to get to purchase a home. First time buyers - younger generations.	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for affordable housing provision, or infrastructure to support new housing development	Could have cumulative effects with other local development schemes.	None identified
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	+	+	D	P	GM				None identified
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	o	o	n/a	n/a	n/a				None identified
		Support improvements in the energy efficiency and resilience of the housing stock?	o	o	o	n/a	n/a	n/a				None identified
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	+	+	D	P	GM	Receptors: GM population and GM economy Affected groups: widespread effects.	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for infrastructure to support new development	Could have cumulative effects with other local development schemes.	None identified
		Support education and training to provide a suitable labour force for future growth?	o	o	o	n/a	n/a	n/a				None identified
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	o	o	n/a	n/a	n/a				None identified
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	o	+	+	D	p	GM	Receptors: transport network, road network, road users, utility network/customers Affected groups: all	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for infrastructure to support new development, including transport and digital infrastructure	Could have cumulative effects with other local development schemes.	None identified
		Improve transport connectivity?	o	+	+	D	P	GM				None identified
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	+	+	D	P	GM				None identified
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	+	+	D	P	GM	Receptors: none identified Affected groups: those	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for affordable housing provision, providing housing options at different price ranges	Link to other initiatives or investments (e.g. apprenticeships)	None identified
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	+	+	D	P	GM				None identified
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	o	o	n/a	n/a	n/a	Receptors: none identified Affected groups: various, depending on locality	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for affordable housing provision, providing housing options at different price ranges	Potential link to other initiatives which seek to integrate communities	None identified
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	+	+	D	P	GM				None identified
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	o	o	n/a	n/a	n/a				None identified
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	o	+	+	D	P	Local / GM	Receptors: built environment, air quality Affected groups: various	The policy requires developer contributions to make development acceptable in planning terms. This is could include money towards health care infrastructure or new/maintaining open space	Improved health and reduced health inequalities through positive planning and the promotion of green spaces	None identified
		Reduce health inequalities within GM and with the rest of England?	o	+	+	D	P	Local / GM				None identified
		Promote access to green space?	o	+	+	D	P	Local / GM				None identified
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	o	+	+	D	P	Local / GM	Receptors: GM population Affected groups: all groups will be affected by this	The policy requires developer contributions to make development acceptable in planning terms. This is could include money towards education facilities	The increased number of residents in areas will put pressure on the existing facilities and social infrastructure and may reduce quality of services unless more are provided	None identified
		Ensure sufficient access to educational facilities for all children?	o	+	+	D	P	Local / GM				None identified
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	o	+	+	D	P	Local / GM				None identified
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	o	o	o	n/a	n/a	n/a	Receptors: GM population and the GM economy Affected groups: various / all	Neutral/no effect against this objective and assessment criteria anticipated	Improved skill levels of the workforce	None identified
		Improve educational and skill levels of the population of working age?	o	o	o	n/a	n/a	n/a				None identified
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	o	+	+	D	P	Local / GM	Receptors: GM population, transport network Affected groups: Various	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for infrastructure to support new development, including transport infrastructure.	Changes in travel patterns as people begin to take advantage of public transport as their main form of transport	None identified
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	o	+	+	D	P	Local / GM				None identified
		Support the use of sustainable and active modes of transport?	o	+	+	D	P	Local / GM				The policy could make specific reference to promotion of public and active transport through these links

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	o	o	o	n/a	n/a	n/a	Receptors: the atmosphere Affected groups: those affected by poor AQ (see living environment deprivation (outdoor)	Neutral/no effect against this objective and assessment criteria anticipated	Increased trips by private motor vehicle will worsen the air quality over time	None identified
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	o	o	o	n/a	n/a	n/a	Receptors: wildlife, landscapes and green spaces Affected groups: Various	The policy requires developer contributions to make development acceptable in planning terms. This is likely to include contributions for infrastructure to support new development, including green infrastructure.	Wildlife, geological and other sites that have a landscape value or value to different habitats deteriorate if they are not enhanced and looked after, whereas if they are they are able to thrive and become central to communities.	None identified
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	o	o	o	n/a	n/a	n/a				None identified
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	o	+	+	D	P	Local / GM				None identified
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	o	+	+	D	P	Local / GM				None identified
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	o	o	n/a	n/a	n/a	Receptors: communities, various aspects of the built and natural environment Affected groups: potential for various groups to be affected	Neutral/no effect against this objective and assessment criteria anticipated	Developments are not protected against climate change impacts and the effects are felt within new developments. Some of the potential and cumulative effects may not be predicted and will therefore cause more of an impact.	None identified
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	o	o	n/a	n/a	n/a	Receptors: flood risk areas Affected groups: residents in or near to flood risk areas	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Ensure adequate measures are in place to manage existing flood risk?	o	o	o	n/a	n/a	n/a				None identified
		Ensure that development does not increase flood risk due to increased run-off rates?	o	o	o	n/a	n/a	n/a				None identified
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	o	o	n/a	n/a	n/a				None identified
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	o	o	n/a	n/a	n/a	Receptors: water courses, ground water, water supplies Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	The quality and availability of water resources may be reduced	None identified
		Promote management practices that will protect water features from pollution?	o	o	o	n/a	n/a	n/a				None identified
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	o	o	n/a	n/a	n/a				None identified
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	o	o	o	n/a	n/a	n/a	Receptors: None identified Affected groups: Various	Neutral/no effect against this objective and assessment criteria anticipated	There is an increase in energy use and consequently greenhouse gas emissions increase as more developments are built	None identified
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	o	o	o	n/a	n/a	n/a				None identified
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	o	o	o	n/a	n/a	n/a				None identified
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	o	o	n/a	n/a	n/a	Receptors: protected landscapes and/or built heritage assets. Protected or locally significant views Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Conserve and enhance the historic environment, heritage assets and their setting?	o	o	o	n/a	n/a	n/a				None identified
		Respect, maintain and strengthen local character and distinctiveness?	o	o	o	n/a	n/a	n/a				None identified
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	o	o	o	n/a	n/a	n/a	Receptors: greenfield and brownfield land Affected groups: Non identified	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	o	o	o	n/a	n/a	n/a				None identified
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	o	o	o	n/a	n/a	n/a				None identified
		Support reductions in land contamination through the remediation and reuse of previously developed land?	o	o	o	n/a	n/a	n/a				None identified
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	o	o	n/a	n/a	n/a	Receptors: waste disposal facilities, finite resources. Affected groups: All those in new development	Neutral/no effect against this objective and assessment criteria anticipated	n/a	None identified
		Promote movement up the waste hierarchy?	o	o	o	n/a	n/a	n/a				None identified
		Promote reduced waste generation rates?	o	o	o	n/a	n/a	n/a				None identified

Appendix D

Allocation Policies - Assessment Tables

Cross-Boundary

Northern Gateway (Heywood Pilsworth and Simister & Bowlee)

			2019				2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	Policy states: around 4,500 new homes split between the following sites Heywood/Pilsworth- 1200 units Simister and Bowlee- 2700 units Whitefield- 600 units				++	Policy states: around 4,500 new homes split between the following sites Heywood/Pilsworth- around 200 units Simister and Bowlee- around 1,550 units	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	+	There is reference for a mix of housing in the Simister and Bowlee, and the Whitefield sites. There is no reference to a mix of housing in the Heywood/Pilsworth policy	Ensure that all three of the sites refer to a mix of housing types	Yes	Allocation policy refers to housing mix	++	Allocation policy references custom and self build housing	Scoring has been increased from positive to very positive for consistency between allocation policies	When the framework is read as a whole, no further recommendations are made.
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy includes the provision of employment land at the Heywood/ Pilsworth site In Simister and Bowlee and Whitefield there is new district centre proposed Across all three of the area the policy states: Make provision for new, upgraded and publicly accessible green infrastructure throughout the site				++	Policy includes the provision of employment land at the Heywood/ Pilsworth site In Simister and Bowlee there are new district centres proposed Across the areas the policy states: Make provision for new, upgraded and publicly accessible green infrastructure throughout the site	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Policy states: Deliver around 1,200,000 m2 of industrial and warehousing space in Heywood/ Pilsworth In addition, the new district centre in Simister and Bowlee, and Whitefield would create new jobs through retail and service provision				++	Policy states: Deliver around 1,200,000 m2 of industrial and warehousing space in Heywood/ Pilsworth In addition, the new district centres in Simister and Bowlee would create new jobs through retail and service provision	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states across the whole allocation there will be: Community facilities; including three new primary schools and a new secondary school	The policy should also highlight the importance of local employment during construction.	Partially	Allocation policy amended to references 1 new primary school and contributions to off site secondary school	++	Policy states across the whole allocation there will be: Community facilities; including one new primary school and contributions to an off-site secondary school	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	The site is adjacent to a number of existing bus stops. New public transport proposed: improved public transport connectivity including rapid transit, and potential for Metrolink extension to Middleton				++	The site is adjacent to a number of existing bus stops. New public transport proposed: improved public transport connectivity including rapid transit, and potential for Metrolink extension to Middleton	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: including new and upgraded highway networks and the potential for provision of a new motorway junction between junctions 18 and 19 of the M62 at Birch, access by rail freight, improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods				++	Policy states: an upgrade to the local highways network, offsite highways works where required, junction improvements where required, improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods	No change	
		Improve transport connectivity?	++	Policy states: including new and upgraded highway networks and the potential for provision of a new motorway junction between junctions 18 and 19 of the M62 at Birch, access by rail freight, improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods				++	Policy states: an upgrade to the local highways network, offsite highways works where required, junction improvements where required, improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	No mentioned in policy	Consider feasibility study into requirements and ability of local network to support development	Yes	Allocation policy amended to references utilities provision, broadband and EV charging points. A comprehensive masterplan for the Northern Gateway area has also been added to the allocation policy text. The recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies.	Scoring has been increased from neutral to very positive for consistency between allocation policies	No further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+	Policy references that the area currently suffers with significant pockets of high deprivation, low skills and worklessness. As such, the scheme would seek to improve these current issues.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Allocation policy amended to support the integration with local communities with active travel links and connections to local services. The recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	+	Policy states: Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to local services and to the new areas of employment	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	Policy references that the area currently suffers with significant pockets of high deprivation, low skills and worklessness. As such, the scheme would seek to improve these current issues.				+		No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+/?	The policy states for all the sites that the design of the new sites will maximise integration between new neighbourhoods and surrounding communities.	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	Allocations policy amended to include integration with local communities. The recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	+	Policy states: Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to local services and to the new areas of employment	Scoring has been increased from neutral/positive to positive for consistency between allocation policies	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				+	Policy includes reference to integrating with local communities	Scoring has increased from neutral to positive for consistency between allocation policies	It is considered that accessibility standards is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Nothing proposed				O	Nothing proposed	No change	Each allocation is within specific locations and therefore is within one area type
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	The policy states that the following interventions will be taken throughout all three of the sites Policy makes reference to walking and cycling improvements: improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods. In reference to green infrastructure the policy makes significant reference to: A network of new, upgraded and publicly accessible green infrastructure.				++	The policy states that the following interventions will be taken throughout all three of the sites Policy makes reference to walking and cycling improvements: improved public transport connectivity including rapid transit, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods. In reference to green infrastructure the policy makes significant reference to: A network of new, upgraded and publicly accessible green infrastructure.	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	The policy makes significant reference to improvements across all three sites including: Develop a satisfactory management plan for areas of green infrastructure, biodiversity features and other areas of open space				++	The policy makes significant reference to improvements across the all two sites including: plans for areas of green infrastructure, biodiversity features and other areas of open space	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy does not make specific reference to health services but does refer to the provision of community facilities	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	The policy text highlights health benefits of green and blue infrastructure and active travel with requirements for health facilities where required. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	Policy states: Make provision for new local centres in accessible locations which include a range of appropriate retail, health and community facilities and ensure they are integrated with existing communities	Scoring has been increased from positive to very positive for consistency between allocation policies	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states across the whole allocation there will be: Community facilities; including three new primary schools and a new secondary school	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Allocation policy amended to references 1 new primary school and contributions to off site secondary school. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	Policy states across the whole allocation there will be community facilities including one new primary school contributions to an off site secondary school	No changes made to scoring.	No further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	The policy makes reference to the provision of recreational facilities across all three of the sites	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	The policy text outlines the protection and enhancement of recreational facilities. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	The policy makes reference to the provision of recreational facilities across the two sites	No changes made to scoring.	No further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states across the whole allocation there will be: Community facilities; including three new primary schools and a new secondary school	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Allocation policy amended to references 1 new primary school and contributions to off site secondary school. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	Policy states across the whole allocation there will be community facilities including one new primary school contributions to an off site secondary school	No changes made to scoring.	No further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy	No change	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy makes reference to walking and cycling improvements across the whole allocation: improved public transport connectivity including rapid transit and Metrolink extension, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods.				++	Policy makes reference to walking and cycling improvements across the whole allocation: improved public transport connectivity including rapid transit and Metrolink extension, and routes for walking/cycling which increase connectivity through the area and to adjoining towns and neighbourhoods.	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	
		Support the use of sustainable and active modes of transport?	++					++		No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	AQMA cuts through the centre of the site. The policy make reference to improved active transport and to mitigating air quality along the M62 and M66 motorway corridors	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially relevant to buffer around the AQMA through the site	Partially	Policy promotes active travel opportunities, supports a comprehensive masterplan approach, tree planting, public open space and public realm provision. It is also noted that the policy includes improvements into public transport including a potential extension to the Metrolink or Bus Rapid Transit to Middleton. The policy also includes text covering EV charging points. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2	++/--	AQMA cuts through the centre of the site. The policy make reference to improved active transport and to mitigating air quality along the M62 and M66 motorway corridors. The policy also makes reference to a project specific HRA to consider the impact of traffic increasing on the M62.	Scoring has been increased from positive/ very negative to very positive/very negative for consistency between allocation policies	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Within the site there is a site of biological importance 'streams and flushes near Bradley Hall Farm' a priority habitat and a wildlife corridor. The policy makes references across the allocation to: A network of new, upgraded and publicly accessible green infrastructure. The includes the following across the sites: Seek to offset the loss of private open land through the provision of an accessible and high quality green and blue infrastructure network				+	Within the site there is a site of biological importance 'streams and flushes near Bradley Hall Farm' a priority habitat and a wildlife corridor. The policy makes references across the allocation to: A network of new, upgraded and publicly accessible green infrastructure. The includes the following across the sites: Seek to offset the loss of private open land through the provision of an accessible and high quality green and blue infrastructure network	No change	
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+					+		No change	
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++		No change	
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	++					++		No change	

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+/-	Climate change vulnerability is varying across the site from low to high. The policy states for each of the sites: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	This is covered in a thematic policy	Partially	There are policy text references to active travel, green and blue infrastructure, flood risk and net gain in biodiversity. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	+	Climate change vulnerability is varying across the site from low to high. The policy includes supporting to improve public transport infrastructure, active travel, green and blue infrastructure and EV charging points	Scoring has been increased from negative/positive to positive for consistency between allocation policies	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+/-	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	There are policy text references to flood risk ensuring that any development is not at risk from flooding, in line with policy GM- S5 which is cited throughout the allocation policy. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	+	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from all sources;	Scoring has been increased from negative/positive to positive for consistency between allocation policies	No further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+/-	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk. Especially relevant around the areas of flood zone 2 and 3	Partially	There are policy text references to flood risk ensuring that any development is not at risk from flooding, in line with policy GM- S5 which is cited throughout the allocation policy. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	+	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from all sources;	Scoring has been increased from negative/positive to positive for consistency between allocation policies	No further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+/-	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk. Especially relevant around the areas of flood zone 2 and 4	Partially	There are policy text references to flood risk ensuring that any development is not at risk from flooding, in line with policy GM- S5 which is cited throughout the allocation policy. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	+	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from all sources;	Scoring has been increased from negative/positive to positive for consistency between allocation policies	No further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+/-	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk. Especially relevant around the areas of flood zone 2 and 5	Partially	There are policy text references to flood risk ensuring that any development is not at risk from flooding, in line with policy GM- S5 which is cited throughout the allocation policy. The recommendation is also addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	+	A small section of the site contains flood zone 2 and 3 The policy states: Ensure that any development is safe from potential flood risk from all sources;	Scoring has been increased from negative/positive to positive for consistency between allocation policies	No further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking, in addition to significant public transport provision. No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to include green infrastructure and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is addressed by thematic Policy GM-S 2 , GM-S 3 and GM-S 4.	+	Reference in policy to cycling and walking, in addition to significant public transport provision. No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to include green infrastructure including tree planting, and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. The recommendation is also addressed by thematic Policy GM-S2 and GM-S3.	+	No mention in policy	Scoring has been increased from negative/neutral to positive for consistency between allocation policies	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	There are no landscape designations on the site				O	There are no landscape designations on the site	No change	
		Conserve and enhance the historic environment, heritage assets and their setting? Policy does not make reference to heritage assets	-/+	The site contains listed structures Lower Whittle Farmhouse, Brick Farmhouse and Church of St George	Consider the listed structures throughout detailed design to reduce risk throughout construction and operational phases.	Yes	The policy text states that heritage assets will be protected and enhanced within the vicinity and setting of the two sites. The recommendation is also addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this.	++	The site contains listed structures Lower Whittle Farmhouse and Brick Farmhouse Heritage assets are listed in the policy	Scoring has been increased from negative/positive to very positive for consistency between allocation policies	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	not referenced in policy				O	not referenced in policy	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	-	Mainly greenfield land, grade 4 and 3 agricultural land	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	-	Mainly greenfield land, grade 4 and 3 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	-	Mainly greenfield land, grade 4 and 3 agricultural land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	-	Mainly greenfield land, grade 4 and 3 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Mainly greenfield land, grade 4 and 3 agricultural land	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	-	Mainly greenfield land, grade 4 and 3 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Mainly greenfield land, grade 4 and 3 agricultural land	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)			-	Mainly greenfield land, grade 4 and 3 agricultural land	No change	
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 900 new homes			Allocation policy amended to provide around 1,680 homes.	++	Policy states: around 1,680 new homes	Scoring has been increased from positive to very positive.	No further recommendations are made
				Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	+	Policy states: around 900 high quality homes, including larger, higher value properties				+	Policy states: around 1,680 high quality homes, including larger, higher value properties		
				Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	The policy is for both housing and employment land. The policy also makes reference to green space stating: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area			Allocation policy amended to contribute to the proposed new railway station at Slattocks and associated walking/cycling routes.	++	The policy is for both housing and employment land. The policy also makes reference to green space stating: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area		
				Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Policy states: Deliver around 250,000 sq m of high quality, adaptable, employment floorspace			Allocation policy amended to provide around 155,000 sq.m of employment floorspace.	++	Policy states: Deliver around 155,000 sq m of high quality, adaptable, employment floorspace		
				Support education and training to provide a suitable labour force for future growth?	++	Policy states: Ensure the provision of additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5.	++	Policy states: Contribute and make provision for additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas				++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas; Be designed in a way to maximise the benefits of the potential new rail station at Slattocks which is currently being investigated by TfGM; Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles				++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas; Be designed in a way to maximise the benefits of the potential new rail station at Slattocks which is currently being investigated by TfGM through the creation of high quality walking and cycling routes; Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles		
				Improve transport connectivity?	++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas; Be designed in a way to maximise the benefits of the potential new rail station at Slattocks which is currently being investigated by TfGM; Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles				++	Policy states: Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas; Be designed in a way to maximise the benefits of the potential new rail station at Slattocks which is currently being investigated by TfGM through the creation of high quality walking and cycling routes; Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles		
				Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1. More specific reference could be made to deprivation to strengthen the policy further.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
				Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	Allocation policy amended to include the opportunity to adopt a 'garden village' approach within the northern part of the site. The recommendation is addressed by Thematic PolicyGM-E 1 and Chapter 9 of the GMSF	+	Policy states: Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development. The scale of the residential development on the northern part of the allocation provides an opportunity to adopt a 'garden village' approach to create a locally distinctive residential offer	Score has improved from neutral to positive.	When the framework is read as a whole, no further recommendations are made.
				Ensure equality of opportunity and equal access to facilities / infrastructure *for all*?	O	Nothing proposed			It is considered that reference to accessibility standards would strengthen this policy or relevant thematic policy.	O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
				Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
				Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles In relation to green infrastructure policy states: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include good quality boundary treatment, particularly on the southern edge of the site to provide an attractive defensible Green Belt boundary				++	In relation to walking and cycling policy states: Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles In relation to green infrastructure policy states: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include good quality boundary treatment, particularly on the southern edge of the site to provide an attractive defensible Green Belt boundary		
				Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
				Promote access to green space?	++	Policy states: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area				++	Policy states: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area		
7	Ensure access to and provision of appropriate social infrastructure	7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	The policy states: Given the scale of the new housing provision it will be necessary for the proposal to deliver social infrastructure to ensure that the needs of new and existing communities are properly met	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7, and a masterplan required in the allocations policy will determine this.	+	The policy states: Given the scale of the new housing provision it will be necessary for the proposal to deliver social infrastructure to ensure that the needs of new and existing communities are properly met	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Ensure sufficient access to educational facilities for all children?	++	Policy states: Ensure the provision of additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to contribute and make provision for additional primary and secondary school places to serve the development. This will include provision of financial and land contributions to deliver the expansion of Thornham St John's Primary School. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7, and a masterplan required in the allocations policy will determine this.	++	Policy states: Contribute and make provision for additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	The policy states: Given the scale of the new housing provision it will be necessary for the proposal to deliver social infrastructure to ensure that the needs of new and existing communities are properly met	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7, and a masterplan required in the allocations policy will determine this.	+	The policy states: Given the scale of the new housing provision it will be necessary for the proposal to deliver social infrastructure to ensure that the needs of new and existing communities are properly met	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure the provision of additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to contribute and make provision for additional primary and secondary school places to serve the development. This will include provision of financial and land contributions to deliver the expansion of Thornham St John's Primary School. The recommendation is addressed by Thematic Policy GM-E 5, and a masterplan required in the allocations policy will determine this.	++	Policy states: Contribute and make provision for additional school places either through an expansion of existing primary and secondary schools or through new provision within the site, including the expansion of Thornham St John's Primary School located within the allocation	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		

9	Promote sustainable modes of transport	9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles. Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas				++	Policy states: Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles. Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas		
				Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
				Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	An AQMA is located directly adjacent to the site along the northern and eastern boundaries. The policy makes provision for active transport. In addition the policy states: incorporate air quality mitigation	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially important along the northern and eastern boundaries	Partially	Allocation policy wording amended to include provision of electric vehicle charging infrastructure and cycle storage, contributing to the proposed new railway station at Slattocks with associated walking/cycling routes. The policy will also deliver improvements to the local and strategic highway network to accommodate traffic generated by the development. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	++/--	An AQMA is located directly adjacent to the site along the northern and eastern boundaries. The policy makes provision for active transport, electric vehicle and cycle infrastructure. In addition the policy states: incorporate air quality mitigation. Contribute to the proposed new railway station at Slattocks which is currently being investigated by TfGM and ensure that new development is designed in a way to maximise the benefits of the new rail station through the creation of high quality walking and cycling routes Deliver appropriate improvements to the local and strategic highway network to accommodate the traffic generated from the new development;	Score has improved from positive/very negative to very positive/very negative	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	++	Within the site there is a wildlife corridor. Rochdale Canal SSSI runs to the west of the site The policy reflects this stating: Retain and where possible enhance areas of biodiversity within the area, notably the Rochdale Canal Site of Special Scientific Interest, along with the existing brooks and reservoirs within the site The policy also makes reference to green infrastructure and recreation: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include good quality boundary treatment, particularly on the southern edge of the site to provide an attractive defensible Green Belt boundary	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases. The is especially important where there are sensitive receptors such as the Rochdale Canal SSSI to the west of the site	Partially	Allocation policy amended to include delivery of blue infrastructure within the site. The recommendation is addressed by Thematic GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++	Within the site there is a wildlife corridor. Rochdale Canal SSSI runs to the west of the site The policy reflects this stating: Retain and where possible enhance areas of biodiversity within the area, notably the Rochdale Canal Site of Special Scientific Interest, along with the existing brooks and reservoirs within the site The policy also makes reference to green infrastructure and recreation: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include good quality boundary treatment, particularly on the southern edge of the site to provide an attractive defensible Green Belt boundary	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	++			Partially	Allocation policy amended to include delivery of blue infrastructure within the site. The recommendation is addressed by Thematic GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++	Within the site there is a wildlife corridor. Rochdale Canal SSSI runs to the west of the site The policy reflects this stating: Retain and where possible enhance areas of biodiversity within the area, notably the Rochdale Canal Site of Special Scientific Interest, along with the existing brooks and reservoirs within the site The policy also makes reference to green infrastructure and recreation: Deliver high quality landscaping and green infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include good quality boundary treatment, particularly on the southern edge of the site to provide an attractive defensible Green Belt boundary	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++			
				Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++					++			
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Climate change vulnerability: High No reference in the policy to flood mitigation	This is covered within a thematic policy	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	Climate change vulnerability: High No reference in the policy to flood mitigation	Scoring has been increased from no effect to positive.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
				Ensure adequate measures are in place to manage existing flood risk?	O	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
				Ensure that development does not increase flood risk due to increased run-off rates?	O	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
				Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	None of the site is within flood zone 2 or 3 No reference to mitigation in policy	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
				Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
				Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been conducted on the site. However, the recommendation is addressed by Thematic Policy GM-S 5, and a masterplan required in the allocation policy will determine this.	+	This is a consideration for detailed design and thematic policy.	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking No reference to energy efficiency	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	+	Reference in policy to cycling and walking No reference to energy efficiency	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	Reference in policy to cycling and walking No reference to energy efficiency	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	Reference in policy to cycling and walking No reference to energy efficiency	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	Reference in policy to cycling and walking No reference to energy efficiency	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy wording amended to include provision of electric vehicle charging infrastructure and cycle storage, contributing to the proposed new railway station at Slattocks with associated walking/cycling routes. The recommendation is addressed by thematic Policy GM-S2 and GM-S3.	+	Reference in policy to cycling and walking No reference to energy efficiency The policy makes provision for active transport, electric vehicle and cycle infrastructure. In addition the policy states: incorporate air quality mitigation. Contribute to the proposed new railway station at Slattocks which is currently being investigated by TfGM and ensure that new development is designed in a way to maximise the benefits of the new rail station through the creation of high quality walking and cycling routes Deliver appropriate improvements to the local and strategic highway network to accommodate the traffic generated from the new development;	Scoring has been increased from negative / no effect to positive.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Have regard to views from Tandle Hill Country Park in terms of the design, landscaping and boundary treatment in order to minimise the visual impact as much as possible				+	Policy states: Have regard to views from Tandle Hill Country Park in terms of the design, landscaping and boundary treatment in order to minimise the visual impact as much as possible		
				Conserve and enhance the historic environment, heritage assets and their setting?	O	There are two listed buildings on the site; Church of St. John and Thornham Parish War Memorial The policy states: Take into account the setting of the Listed St John's Church and war memorial in any detailed masterplan for the site	Consider the listed buildings throughout detailed design to reduce risk throughout construction and operational phases.	Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	O	There are two listed buildings on the site; Church of St. John and Thornham Parish War Memorial The policy states: Take into account the setting of the Listed St John's Church and war memorial in any detailed masterplan for the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Respect, maintain and strengthen local character and distinctiveness?	O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.				O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.		

17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 3	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 3	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Protect the best and most versatile agricultural land / soil resources from inappropriate development?	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 3	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-G 8 & GM-G 9	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 4	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 3	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 5	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 3	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4: Our Strategy.	-	Nearly all Grade 4 apart from a small patch in the south which is Grade 6	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
				Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
				Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019						2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	o	Employment land				o	Employment land	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	Employment land				o	Employment land	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	Employment land				o	Employment land	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	o	Employment land				o	Employment land	No change	
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Policy states: deliver 86,000sqm of B1 focused floorspace				++	Policy states: deliver 86,000sqm of B1 focused floorspace	No change	
		Support education and training to provide a suitable labour force for future growth?	O	Not mentioned in policy	Noted for each site but it would be better dealt with in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM- E1 and GM-E5. These policies could be strengthened further in respectto tackling deprivation.	O	Not mentioned in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Policy states: Development should be configured to take advantage of the significant opportunities of transport infrastructure in the area protecting the line of the proposed Metrolink extension to Manchester Airport				++	Policy states: Development should be configured to take advantage of the significant opportunities of transport infrastructure in the area protecting the line of the proposed Metrolink extension to Manchester Airport	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Facilitate improvements to the surrounding local highway network and configured to take advantage of proposed Metrolink extension to Manchester Airport				++	Policy states: Facilitate improvements to the surrounding local highway network and configured to take advantage of proposed Metrolink extension to Manchester Airport	No change	
		Improve transport connectivity?	+	Policy states: takes into consideration proposed Metrolink extension to Manchester Airport				+	Policy states: takes into consideration proposed Metrolink extension to Manchester Airport	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E1 & GM-N2.	O	No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	?	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and GM-P 1.	?	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	?	Cannot be certain that development will affect deprived areas.				?	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	No mention. Employment land potentially less likely to directly affect community relations than new housing.	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	No changes made to the allocation policy wording. However, the recommendatio n is addressed by Thematic Policy GM-E 1 and Chapter 9 of the 2020 draft GMSF.	O	No mention. Employment land potentially less likely to directly affect community relations than new housing.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	No mention in policy				O	No mention in policy	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	No mention in policy				O	No mention in policy	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy makes reference to enhancing green infrastructure and providing high quality natural landscaping with benefits including promoting biodiversity				++	Policy makes reference to enhancing green infrastructure and providing high quality natural landscaping with benefits including promoting biodiversity	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	+	Policy states: protect adjacent playing field and enhanced green infrastructure				+	Policy states: protect adjacent playing field and enhanced green infrastructure	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision, but proposal for employment land unlikely to affect local capacity				O	No new provision, but proposal for employment land unlikely to affect local capacity	No change	
		Ensure sufficient access to educational facilities for all children?	O	As above				O	As above	No change	
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	As above. Policy states that development should not impact on adjacent playing fields				O	As above. Policy states that development should not impact on adjacent playing fields	No change	
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	No new provision, but proposal for employment land unlikely to affect local capacity				O	No new provision, but proposal for employment land unlikely to affect local capacity	No change	
		Improve educational and skill levels of the population of working age?	O	No mention in policy.	Could link the development of employment land to improved education and the provision of training	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5 and GM-P 1.	O	No mention in policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	No mention to active travel but includes need to configure design around proposed Metrolink extension	Consider active transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7.	+	No mention to active travel but includes need to configure design around proposed Metrolink extension	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+		Consider active transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support the use of sustainable and active modes of transport?	+		Consider active transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	-/+	No AQMA within 150m. Additional trips to site may affect AQ	include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	Allocation policy amended to include promotion of green infrastructure. The recommendation is also addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2.	-/+	No AQMA within 150m. Additional trips to site may affect AQ	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/?	No designations or priority habitats on sites. This does not necessarily mean there is no ecological interest on the site. Policy states: High quality natural landscaping, including the provision of native species, should be delivered adjoining the brook to help mitigate flood risk and promote biodiversity. Enhanced green infrastructure included in policy Protection of adjacent playing field included	Consider ecological receptors throughout detailed design to reduce risk through construction and operational phases.	Partially	Allocation policy wording amended to include promotion of green infrastructure. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10.	+/?	No designations or priority habitats on sites. This does not necessarily mean there is no ecological interest on the site. Policy states: High quality natural landscaping, including the provision of native species, should be delivered adjoining the brook to help mitigate flood risk and promote biodiversity. Enhanced green infrastructure included in policy Protection of adjacent playing field included	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+			Partially	Allocation policy wording amended to include promotion of green infrastructure. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		Make reference to protection and enhancement of green infrastructure	Partially	Allocation policy wording amended to include promotion of green infrastructure. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10.	++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+			Partially	Allocation policy wording amended to include promotion of green infrastructure. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+/?	Less than 10% of the site is in flood zone 3. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook and natural landscaping used to mitigate flood risk Climate change vulnerability is mixed, flood vulnerability, surface water disadvantage are high, and surface water exposure for a 1 in 30 year event is extremely high.	This is covered within a thematic policy	No	No changes made to allocation policy wording. The recommendation is addressed by Thematic Policy GM- S 5.	+/?	Less than 10% of the site is in flood zone 3. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook and natural landscaping used to mitigate flood risk Climate change vulnerability is mixed, flood vulnerability, surface water disadvantage are high, and surface water exposure for a 1 in 30 year event is extremely high.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	Less than 10% of the site is in flood zone 3. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook and natural landscaping used to mitigate flood risk				+	Less than 10% of the site is in flood zone 3. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook and natural landscaping used to mitigate flood risk	No change	
		Ensure adequate measures are in place to manage existing flood risk?	++	As above. In addition to policy makes reference to maximising the use of sustainable drainage systems				++	As above. In addition to policy makes reference to maximising the use of sustainable drainage systems	No change	
		Ensure that development does not increase flood risk due to increased run-off rates?	++	As above	As above	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	++	As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	Assume development will follow best practice and adhere to planning guidance	As above	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	o	Assume development will follow best practice and adhere to planning guidance	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o	Assumed compliance with best practice with regards to surface and ground water. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook	This is covered within a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	o	Assumed compliance with best practice with regards to surface and ground water. Policy states: Development of the site should reflect the sequential approach to flood risk management, focusing more sensitive development furthest from Fairywell Brook	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	o	As above	As above	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	o	As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	This is a consideration for detailed design and thematic policy.	As above	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	o	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	++	Reference in policy to maximising the use of renewable energies and promoting design to utilise Metrolink proposed line				++	Reference in policy to maximising the use of renewable energies and promoting design to utilise Metrolink proposed line	No change	
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	++	As above				++	As above	No change	
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	++	As above				++	As above	No change	
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	o	No landscape designations highlighted				o	No landscape designations highlighted	No change	
		Conserve and enhance the historic environment, heritage assets and their setting?	+	Policy states: Development within the site should not impact the listed buildings of Newall Green Farm	Consider heritage assets in policy and ensure enhancement	Partially	Allocation policy amended to incorporate suitable site mitigation to account for the historic landscape features within the site. However, the recommendation is also addressed by Thematic Policy GM-G 1, GM-E 2.	++	Policy states: Ensure development within the site should not impact the listed buildings of Newall Green Farm Incorporate suitable site mitigation to account for the historic landscape features within the site	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	o	No landscape designations highlighted				o	No landscape designations highlighted	No change	

17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	-/+	Mostly urban with some agriculture	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	-/+	Mostly urban with some agriculture	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+/-	Mostly urban with some grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	+/-	Mostly urban with some grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Mostly urban with some agriculture	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	-	Mostly urban with some agriculture	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Mostly urban with some agriculture	As above	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	-	Mostly urban with some agriculture	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	O	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	O	No mention in policy	As above	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	Policy states: around 2,400 new homes				++	Policy states: around 2,500 new homes	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: incorporating a broad mix of housing types and tenures creating a distinctive neighbourhood with a clear sense of place				++	Policy states: Deliver a range of house types, sizes, layouts and tenures through a place-led approach	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy includes the provision of employment land, a new local centre and green space within the site.	The policy could be further enhanced by referencing links to the wider green network for both ecological and recreational benefits and identify what they are.	Yes	Allocation policy amended to provide accessible linkages to residential areas and the local centre from employment land, green links.	++	Policy includes the provision of employment land, a new local centre, additional school spaces, new health facilities and green space within the site.	No change has been made to scoring.	No further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Yes	Allocation policy amended to mitigate the impacts of climate change and utilise the most energy and water efficient technologies, exploring solutions to provide decentralised low carbon heat and energy. The recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	++	Policy states: Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon. Explore and deliver the most appropriate solutions to providing decentralised low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks the implementation of renewable and low carbon heat and energy technologies and the co-location of potential heat and energy customers and suppliers	Scoring has been increased from neutral / no effect to very positive for consistency between allocation policies	No further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Policy states: Deliver a minimum of 60,000 sqm of employment land within the plan period to provide high quality office space to support the expansion of Manchester Airport and University Hospital South Manchester				++	Policy states: Deliver a minimum of 60,000 sqm of employment land within the plan period to provide high quality office space to support the expansion of Manchester Airport and University Hospital South Manchester	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: provide community infrastructure including education to support the new community	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Yes	Allocation policy amended to create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies. The recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: provide community infrastructure including education to support the new community Create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies	No change has been made to scoring.	No further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	The site is adjacent to a number of existing bus stops. New public transport proposed: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport and contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport.				++	The site is adjacent to a number of existing bus stops. New public transport proposed: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport and contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport.	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Deliver a new spine road through the site to provide access and improve east west connections between Altrincham and Manchester Airport; Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport; Contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport and deliver a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles				++	Policy states: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Deliver a new spine road through the site to provide access and improve east west connections between Altrincham and Manchester Airport; Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport; Contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport and deliver a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles	No change	
		Improve transport connectivity?	++	Policy states: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Deliver a new spine road through the site to provide access and improve east west connections between Altrincham and Manchester Airport; Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport; Contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport and deliver a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles				++	Policy states: Deliver the Manchester Airport Metrolink Line, Western Leg extension including Metrolink stop(s); Deliver a new spine road through the site to provide access and improve east west connections between Altrincham and Manchester Airport; Incorporate a route for cycling and bus rapid transit to improve east west connections between Altrincham, HS2 and the Airport; Contribute to the necessary improvements to the existing Strategic, Primary and Local Road Networks ensuring incorporation of the necessary public transport and deliver a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not mentioned in policy	Consider feasibility study into requirements and ability of local network to support development	Yes	Allocation policy wording amended to make provision for necessary infrastructure such as utilities and broadband. The recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies	Scoring has been increased from neutral / no effect to very positive for consistency between allocation policies	No further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+	Cannot be certain that development will affect deprived areas however the allocation is close to Wythenshawe and provision of housing, employment and improved public transport are likely to have positive effects.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Allocation policy amended to create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies. Policy justification states that targets for training and employment of local people could be agreed between developers, local colleges and the local authority. The recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	++	Policy states: Create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies	Scoring has been increased from positive to very positive for consistency between allocation policies	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+	Cannot be certain that development will affect deprived areas however the allocation is close to Wythenshawe and provision of housing, employment and improved public transport are likely to have positive effects.		Yes	Allocation policy amended to create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies. Policy justification states that targets for training and employment of local people could be agreed between developers, local colleges and the local authority. The recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	++	Policy states: Create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies	Scoring has been increased from positive to very positive for consistency between allocation policies	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	++	Policy states: Ensure new development is sensitively Integrated with existing residential areas				++	Policy states: Ensure new development is sensitively Integrated with existing residential areas	No change	
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	++	As above. Assumed to be covered through sensitive integration				++	As above. Assumed to be covered through sensitive integration	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy makes significant reference to walking and cycling improvements including improving east west cycling connections linking Altrincham and Manchester Airport, and delivering a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles. In reference to green infrastructure the policy makes significant reference to improvements including providing a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt. In addition, it proposed, new green spaces for recreational use, minimising impacts on SBIs and ancient woodland, increased level of sports and recreation facilities.				++	Policy makes significant reference to walking and cycling improvements including improving east west cycling connections linking Altrincham and Manchester Airport, and delivering a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles. In reference to green infrastructure the policy makes significant reference to improvements including providing a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt. In addition, it proposed, new green spaces for recreational use, minimising impacts on SBIs and ancient woodland, increased level of sports and recreation facilities.	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	The policy makes significant reference to improvements including providing a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt. In addition, it proposed, new green spaces for recreational use, minimising impacts on SBIs and ancient woodland, increased level of sports and recreation facilities.				++	The policy makes significant reference to improvements including providing a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt. In addition, it proposed, new green spaces for recreational use, minimising impacts on SBIs and ancient woodland, increased level of sports and recreation facilities.	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	++	Policy states: Provide community infrastructure including education and health facilities to support the new community	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	++	Policy states: Provide and contribute to community infrastructure including education and health facilities to support the new community	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide community infrastructure including education and health facilities to support the new community	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy amended to provide additional primary school places, including a new primary school and contribute to the provision of secondary school places. The recommendation is addressed by Thematic Policy GM-E 5.	++	Policy states: Provide additional primary school places, including a new primary school and contribute to the provision of secondary school places	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Increase and enhance the level of sports and recreation facilities to meet the future needs of the existing and new local community	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended in relation to open space, but still ensures appropriate green infrastructure is provided, to meet the future needs of the existing and new local community. The recommendation is also addressed by Thematic Policy GM-E 5.	++	Policy states: Provide a significant area of enhanced and accessible green infrastructure (including new public rights of way) within a rural park to remain in the Green Belt.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide community infrastructure including education and health facilities to support the new community	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy amended to provide additional primary school places, including a new primary school and contribute to the provision of secondary school places. The recommendation is addressed by Thematic Policy GM-E 5.	++	Policy states: Provide additional primary school places, including a new primary school and contribute to the provision of secondary school places	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				+	Policy states: Create employment and training opportunities for local people in particular through the construction phase, to be set out in a local labour and skills plan/agreement in accordance with Local Plan Policies	Scoring has changed from neutral to positive for consistency between allocation policies	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy makes significant reference to walking and cycling improvements including improving east west cycling connections linking Altrincham and Manchester Airport, and delivering a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles.				++	Policy makes significant reference to walking and cycling improvements including improving east west cycling connections linking Altrincham and Manchester Airport, and delivering a network of new safe cycle and walking routes through the allocation, encouraging sustainable short journeys and promoting healthier lifestyles.	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	
		Support the use of sustainable and active modes of transport?	++					++		No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/–	An AQMA is located directly adjacent to the allocation to the south east. The policy makes reference to improved active transport. Trips to new development may affect air quality at nearby sensitive receptors.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Allocation policy amended to create wildlife corridors and accessible green infrastructure, make provision for electric vehicle charging infrastructure, and promotion of active travel over private cars through walking/cycle networks. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2.	++/–	An AQMA is located directly adjacent to the allocation to the south east. The policy makes reference to improved active transport, new green infrastructure, walking and cycling networks. Trips to new development may affect air quality at nearby sensitive receptors.	Score has improved from positive/very negative to very positive/very negative for consistency between allocation policies	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	++	Site is located within a site of biological interest 'Ponds at Davenport Green' and 'Davenport Green Wood', Ancient & Semi-Natural Woodland, a priority habitat for deciduous woodland and a wildlife corridor. The policy reflects this stating: Provide a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt; Provide new accessible green spaces for recreation use, within the development areas, which will be protected from future development. Consideration will be given to identifying some of this land as Local Green Space; Protect enhance and minimise adverse effects on environmental assets including SBIs and ancient woodland both within and adjacent to the allocation and enhance landscape features to create defensible Green Belt boundaries and deliver a clear and measurable net gain in biodiversity and make appropriate provision for long-term management of habitats and geological features				++	Site is located within a site of biological interest 'Ponds at Davenport Green' and 'Davenport Green Wood', Ancient & Semi-Natural Woodland, a priority habitat for deciduous woodland and a wildlife corridor. The policy reflects this stating: Provide a significant area of enhanced and accessible Green Infrastructure within the area of the allocation to remain in the Green Belt; Provide new accessible green spaces for recreation use, within the development areas, which will be protected from future development. Consideration will be given to identifying some of this land as Local Green Space; Protect enhance and minimise adverse effects on environmental assets including SBIs and ancient woodland both within and adjacent to the allocation and enhance landscape features to create defensible Green Belt boundaries and deliver a clear and measurable net gain in biodiversity and make appropriate provision for long-term management of habitats and geological features	No change	
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	++					++		No change	
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++		No change	
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++					++		No change	
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	This is covered within thematic policies.	Yes	Allocation policy wording amended to include a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases, seeking to actively reduce the impact of potential flood risk both within and beyond the site, incorporating on-site measures to deal with surface water run off. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	++	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	Scoring has been increased from neutral / no effect to very positive for consistency between allocation policies	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Yes	Allocation policy wording amended to include a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases, seeking to actively reduce the impact of potential flood risk both within and beyond the site, incorporating on-site measures to deal with surface water run off. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	++	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases.	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Allocation policy wording amended to include a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases, seeking to actively reduce the impact of potential flood risk both within and beyond the site, incorporating on-site measures to deal with surface water run off. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	++	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases.	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	Flood risk to adjacent sites should be considered in design	Yes	Allocation policy wording amended to include a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases, seeking to actively reduce the impact of potential flood risk both within and beyond the site, incorporating on-site measures to deal with surface water run off. The recommendation is addressed by Thematic Policy GM-G 1, GM-G 2, GM-G 7 and a masterplan required in the allocations policy will determine this.	++	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases.	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive drainage strategy	Flood risk to adjacent sites should be considered in design	Yes	Allocation policy wording amended to include a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases, seeking to actively reduce the impact of potential flood risk both within and beyond the site, incorporating on-site measures to deal with surface water run off. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this.	++	Small sections of the site contain flood zone 2 and 3, including Fairywell Brook and Timperley Brook. The policy states: Address flood risk and water management including SUDS through the design and layout of development and in accordance with a comprehensive flood risk and foul and surface water management strategy which demonstrates how each phase of development interacts with other phases.	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. The policy states: Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status as proposed under the EU Water Framework Directive	This is covered within thematic policies.	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. The policy states: Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status as proposed under the EU Water Framework Directive	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. The policy states: Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status as proposed under the EU Water Framework Directive	This is covered within thematic policies.	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. The policy states: Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status as proposed under the EU Water Framework Directive	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within thematic policies.	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking, in addition to significant public transport provision. No reference to low carbon or renewables	Make reference to low carbon and renewable energy	Yes	Allocation policy amended to mitigate the impacts of climate change and utilise the most energy and water efficient technologies, exploring solutions to provide decentralised low carbon heat and energy. The recommendation is addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	++	Policy states: Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon. Explore and deliver the most appropriate solutions to providing decentralised low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks the implementation of renewable and low carbon heat and energy technologies and the co-location of potential heat and energy customers and suppliers Ensure the design of new buildings and development layouts maximise the amount of renewable energy that can be generated via solar PV and other green technologies, linked to the provision of and supply to electric vehicle charging infrastructure	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.

15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	No mention in policy	Make reference to low carbon and renewable energy	Yes	Allocation policy amended to mitigate the impacts of climate change and utilise the most energy and water efficient technologies, exploring solutions to provide decentralised low carbon heat and energy. The recommendation is addressed by thematic Policy GM-S2 and GM-S3.	++	Policy states: Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon. Explore and deliver the most appropriate solutions to providing decentralised low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks the implementation of renewable and low carbon heat and energy technologies and the co-location of potential heat and energy customers and suppliers Ensure the design of new buildings and development layouts maximise the amount of renewable energy that can be generated via solar PV and other green technologies, linked to the provision of and supply to electric vehicle charging infrastructure	Scoring has been increased from neutral/ no effect to very positive for consistency between allocation policies	No further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	No mention in policy	Make reference to low carbon and renewable energy	Yes	Allocation policy amended to mitigate the impacts of climate change and utilise the most energy and water efficient technologies, exploring solutions to provide decentralised low carbon heat and energy. The recommendation is addressed by thematic Policy GM-S2 and GM-S3.	++	Policy states: Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon. Explore and deliver the most appropriate solutions to providing decentralised low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks the implementation of renewable and low carbon heat and energy technologies and the co-location of potential heat and energy customers and suppliers Ensure the design of new buildings and development layouts maximise the amount of renewable energy that can be generated via solar PV and other green technologies, linked to the provision of and supply to electric vehicle charging infrastructure	Scoring has been increased from neutral/ no effect to very positive for consistency between allocation policies	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Provide new accessible green spaces for recreation use, within the development areas, which will be protected from future development. Consideration will be given to identifying some of this land as Local Green Space				+	Policy states: Provide new accessible green spaces for recreation use, within the development areas, which will be protected from future development. Consideration will be given to identifying some of this land as Local Green Space	No change	
		Conserve and enhance the historic environment, heritage assets and their setting?	+	The site contains listed structures Davenport Green Farmhouse, Hall and Barn Policy states: Protect and enhance heritage assets and their settings within the allocation, particularly listed structures including Davenport Green Farmhouse, Hall and Barn	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy amended to positively conserve heritage assets in the area with a Heritage Impact Assessment. The recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	++	The site contains listed structures Davenport Green Farmhouse, Hall and Barn Policy states: Protect and enhance heritage assets and their settings within the allocation, particularly listed structures including Davenport Green Farmhouse, Hall and Barn Be in accordance with the Council's adopted Design Guide embracing strategic design principles, including creating connected communities, redefining streets, delivering inclusive characterful design and responding to heritage Positively conserve all aspects of the historic environment as appropriate without harm to the significance of heritage assets or their setting and in line with a Heritage Impact Assessment	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: creates a distinctive neighbourhood with a clear sense of place				+	Policy states: creates a distinctive neighbourhood with a clear sense of place	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield in agricultural use	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield in agricultural use	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	The site is mainly Grade 3 Agricultural Land (assumed 3a worst case scenario), and the north west corner is urban land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	The site is mainly Grade 3 Agricultural Land (assumed 3a worst case scenario), and the north west corner is urban land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	No housing proposed				O	No housing proposed	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No housing proposed				O	No housing proposed	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	No housing proposed				O	No housing proposed	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	No housing proposed				O	No housing proposed	No change	
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Employment site	Reference could be made in policy to the amount of employment land that is proposed.	Yes	Changes have been made to the allocation policy wording.	++	Allocation policy wording states: Provide a location for around 21,000 sq m of industrial and warehousing floorspace	No change has been made to scoring.	No further recommendations are made.
		Support education and training to provide a suitable labour force for future growth?	O	No mention in policy	The policy should reference the potential to link local jobs to the site if appropriate education and training is provided locally.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-P1, GM-E4, GM-E5.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Existing public transport near by - 4 bus stops to west and east of site.				++	Existing public transport near by - 4 bus stops to west and east of site.	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	?	No mention in policy				?	No mention in policy	No change	
		Improve transport connectivity?	?	No mention in policy				?	No mention in policy	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2.	?	There is no mention of this type of infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	?	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	Changes have been made to the allocation policy wording, including, reference to the local link service, which will provide transport to deprived areas. The recommendation is also addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1 .	? / +	Cannot be certain that development will affect deprived areas, but improvements in accessibility will assist.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	?	Cannot be certain that development will affect deprived areas.				? / +			
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	?	Policy does not mention integration with existing communities however this is an employment only site.				?	Policy does not mention integration with existing communities however this is an employment only site.	No change	
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	?	Nothing proposed				?	Nothing proposed	No change	
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect protected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect protected characteristics	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	?	Nothing proposed				?	Nothing proposed	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	?	Nothing proposed				?	Nothing proposed	No change	
		Reduce health inequalities within GM and with the rest of England?	?	Nothing proposed				?	Nothing proposed	No change	
		Promote access to green space?	?	Nothing proposed				?	Nothing proposed	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to. Proposal for employment land is unlikely to affect local capacity.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E5, GM-E6 & GM-E7.	O	No new provision is referred to.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	O					O			
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O					O			
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	No new provision is referred to				O	No new provision is referred to	No change	
		Improve educational and skill levels of the population of working age?	O	No new provision is referred to	Link new employment to the provision of training and education such as apprenticeships	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E4 & GM-E5	O	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	-	No reference in policy to sustainable or active transport. There are bus links around the existing site.	The policy should make reference to enhancing sustainable transport and consider maximising the benefits from use of the existing facilities.	Yes	Changes have been made to the allocation policy wording, including, reference to the local link service, which will provide transport to deprived areas. The recommendation is also addressed by thematic Policy GM-E1, GM-G2, GM-N4, GM-N5 & GM-N7	+	Reference in policy to local link service. There are also bus links around the existing site.	Scoring has been increased from negative to positive.	No further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	-					+			
		Support the use of sustainable and active modes of transport?	-					+			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	--	Site is within 150m of an AQMA and policy does not make reference to public transport improvements	Include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	Changes have been made to the allocation policy wording, including reference to the local link service. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	--/+	Site is within 150m of an AQMA. Allocation policy makes reference to public transport improvements - local link service	Scoring has been increased from very negative to very negative/positive.	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-	The proposed site is adjacent to a priority habitat for deciduous woodland and the site is located 42m from a site of biological importance. No mitigation is proposed. The policy states the requirement for high quality landscaping.	Make reference to mitigation in the policy. Consider ecological receptors throughout detailed design to reduce risk through construction and operational phases.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10. It is considered that the site is too small to consider ecological or landscape corridors	-	The proposed site is adjacent to a priority habitat for deciduous woodland and the site is located 42m from a site of biological importance. The policy states the requirement for high quality landscaping along the A6 frontage.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-					-			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	The policy does not make a reference to green infrastructure	Landscaping should look to tie in to ecological or recreation corridors where appropriate and not just for buffers and screening			?	The policy does not make a reference to green infrastructure	No change has been made to scoring.	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	?	As above				?			
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Average Flood Vulnerability				O	Average Flood Vulnerability	No change	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	Not adjacent to areas of flood zone 2 or 3				O	Not adjacent to areas of flood zone 2 or 3	No change	
		Ensure adequate measures are in place to manage existing flood risk?	O	Not adjacent to areas of flood zone 2 or 3				O	Not adjacent to areas of flood zone 2 or 3	No change	
		Ensure that development does not increase flood risk due to increased run-off rates?	O	Not adjacent to areas of flood zone 2 or 3				O	Not adjacent to areas of flood zone 2 or 3	No change	
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	Not adjacent to areas of flood zone 2 or 3				O	Not adjacent to areas of flood zone 2 or 3	No change	
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice with regards to surface and ground water.	Consider how development might align with the strategic aims of the WFD.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S5	O	Assumed compliance with best practice with regards to surface and ground water.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.	No change	
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.	No change	
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	-/?	No mention in policy	Make reference in policy to the need to encourage low-carbon generation and reduce emissions. Seek opportunities to include renewable energy within the sites, such as solar panels.	Partially	Changes have been made to the allocation policy wording, including reference to the local link service. The recommendation is also addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 & GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy				-/?	No mention in policy		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	There are no designations nearby the site	The policy should reference the potential to link local jobs to the site if appropriate education and training is provided locally.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-P1, GM-E4, GM-E5.	O	There are no designations nearby the site	No change	When the framework is read as a whole, no further recommendations are made.
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no designations nearby the site				O	There are no designations nearby the site	No change	
		Respect, maintain and strengthen local character and distinctiveness?	?	Not mentioned in the policy				?	Not mentioned in the policy	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield				--	Greenfield	No change	
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 3 agricultural land	Consider feasibility study into requirements and ability of local network to support development.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2.	--	Grade 3 agricultural land	No change	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	Changes have been made to the allocation policy wording, including, reference to the local link service, which will provide transport to deprived areas. The recommendation is also addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1 .	--	Greenfield	No change	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield				--	Greenfield	No change	
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E1.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o

1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	No housing proposed				O	No housing proposed		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No housing proposed				O	No housing proposed		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	No housing proposed				O	No housing proposed		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	No housing proposed				O	No housing proposed		
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Employment site. Proposed 25,000 sqm of B2 and B8 uses.				++	Employment site. Proposed 25,000 sqm of B2 and B8 uses.		
		Support education and training to provide a suitable labour force for future growth?	O	No mention in policy				O	No mention in policy		
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling				++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling				++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling		
		Improve transport connectivity?	++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling				++	Existing public transport near by, and propose financial contributions to good enhance access by public transport, walking and cycling		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	There is no mention of this type of infrastructure.				O	There is no mention of this type of infrastructure.		
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	?	Cannot be certain that development will affect deprived areas however it will provide employment in close proximity to areas of deprivation.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	Changes have been to the allocation policy wording, including, reference to the local link service, which will provide transport to deprived areas. The recommendation is also addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1 .	?	Cannot be certain that development will affect deprived areas however it will provide employment in close proximity to areas of deprivation.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	?					?			
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	?	Policy does not mention integration with existing communities however this is an employment only site.				?	Policy does not mention integration with existing communities however this is an employment only site.		
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	?	Nothing proposed				?	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	?	Nothing proposed				?	Nothing proposed		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: Provide financial contributions for good quality access to the site by motor vehicles, public transport, walking and cycling. Require high quality landscaping particularly alongside the western boundary				++	Policy states: Provide good quality access to the site by motor vehicle, public transport, walking and cycling, including improvements to the Chequerbent roundabout Require high quality landscaping particularly to the west along Snydale Way and to the north along the M61; trees and hedgerows along the eastern boundary should be retained for screening		
		Reduce health inequalities within GM and with the rest of England?	?	Strategic aim which is not likely to be affected by site proposals.				?	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	O	Not referenced in policy				O	Not referenced in policy		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to. Proposal for employment land is unlikely to affect local capacity.				O	No new provision is referred to. Proposal for employment land is unlikely to affect local capacity.		
		Ensure sufficient access to educational facilities for all children?	O	As above				O	As above		
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	As above				O	As above		
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	No new provision is referred to				O	No new provision is referred to		
		Improve educational and skill levels of the population of working age?	O	No new provision is referred to	Link new employment to the provision of training and education such as appentieceships	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E4 & GM-E5	O	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Provide financial contributions for good quality access to the site by motor vehicles, public transport, walking and cycling.	The policy should make reference to enhancing sustainable transport and consider maximising the benefits from use of the existing facilities, particularly for workers accessing the site.	Yes	Changes have been to the allocation policy wording, including, reference to the provison of good quality access to the site by motor vehicle, public transport, walking and cycling, including improvements to the Chequerbent roundabout. The recommendation is also addressed by thematic Policy GM-E1, GM-G2, GM-N4, GM-N5 & GM-N7	++	Policy states: Provide good quality access to the site by motor vehicle, public transport, walking and cycling, including improvements to the Chequerbent roundabout	No change has been made to scoring.	No further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+	As above, however the site is proposed for B8 uses and therefore it is likely that there will be vehicles access the site from the surrounding motorway network.				++	As above, however the site is proposed for industrial and warehousing uses and therefore it is likely that there will be vehicles access the site from the surrounding motorway network.	Scoring has increased from positive to very positive	
		Support the use of sustainable and active modes of transport?	+					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	--/+	Site is within 150m of an AQMA but policy does refer to financial contributions for good quality access by public transport, walking and cycling.	Include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	Changes have been to the allocation policy wording, including reference to the local link service. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	--/+	Site is within 150m of an AQMA but policy does refer to financial contributions for good quality access by public transport, walking and cycling.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	O	The proposed site is adjacent to a priority habitat for deciduous woodland. No mitigation is proposed. The policy states the requirement for high quality landscaping along the western boundary and retaining trees and hedgerows along the eastern boundary.	Make reference to mitigation in the policy. Consider ecological receptors throughout detailed design to reduce risk through construction and operational phases. Highlight the potential for landscaping to be more than a screen / buffer and set out what it will achieve.	Partially	Amendments have been made to policy text, including the requirement for high quality landscaping particularly to the west along Snydale Way and to the north along the M61; trees and hedgerows along the eastern boundary should be retained for screening. The recommendation is also addressed by thematic Policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10.	O	The proposed site is adjacent to a priority habitat for deciduous woodland. No mitigation is proposed. The policy states the requirement for high quality landscaping particularly to the west along Snydale Way and to the north along the M61; trees and hedgerows along the eastern boundary should be retained for screening	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	O					O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?	The policy does not make reference to green infrastructure	Make reference to protection and enhancement of green infrastructure			?	The policy does not make reference to green infrastructure	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?					?		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Relatively low flood risk				+	Relatively low flood risk	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	No adjacent flood zone 2 or 3				O	No adjacent flood zone 2 or 3		
		Ensure adequate measures are in place to manage existing flood risk?	O	No adjacent flood zone 2 or 3				O	No adjacent flood zone 2 or 3		
		Ensure that development does not increase flood risk due to increased run-off rates?	O	No adjacent flood zone 2 or 3				O	No adjacent flood zone 2 or 3		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	No adjacent flood zone 2 or 3				O	No adjacent flood zone 2 or 3		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice with regards to surface and ground water.	Consider how development might align with the strategic aims of the WFD.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S5.	O	Assumed compliance with best practice with regards to surface and ground water.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to public transport, cycling and walking	Make reference to energy efficiency directly, and ways that it can be increased,, such as highlighting the benefits of sustainable modes of transport and the potential for solar panels on large scale buildings..	Yes	Changes have been to the allocation policy wording, including reference to the provison of good quality access to the site by motor vehicle, public transport, walking and cycling, including improvements to the Chequerbent roundabout. The recommendation is also addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	++	Reference in policy to public transport, cycling and walking	Scoring has increased from positive to very positive.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 & GM-S3.	-	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-	No mention in policy				-	No mention in policy		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	There are no designations nearby the site				O	There are no designations nearby the site		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no designations nearby the site				O	There are no designations nearby the site		
		Respect, maintain and strengthen local character and distinctiveness?	?	Not mentioned in the policy				?	Not mentioned in the policy		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Mainly PDL with some greenfield land				+	Mainly PDL with some greenfield land		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	++	Urban				++	Urban		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Mainly PDL with some greenfield land				+	Mainly PDL with some greenfield land		
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Mainly PDL with some greenfield land				+	Mainly PDL with some greenfield land		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	++	Policy states: Ensure the extraction of any viable sandstone, surface coal and/or brickclay resources in advance of construction, in accordance with the relevant policies of the Greater Manchester Joint Minerals Plan	Promote sustainable construction methods.	No	No changes made to the policy wording to promote sustainable construction methods. In addition, it is not considered that the recommendation is addressed by thematic policy. Sustainable use of resources is covered by Policy Reference to ensure the extraction of any viable sandstone, surface coal and/or brickclay resources in advance of construction, in accordance with the relevant policies of the Greater Manchester Joint Minerals Plan has been removed as this is already a policy in the GM Minerals Plan.	O	No mention in policy.	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate policy within the Sustainability and Resilience Chapter.
		Promote movement up the waste hierarchy?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy Policy GM-S7.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	O	No mention in policy	As above			O	No mention in policy

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	No housing proposed				O	No housing proposed		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No housing proposed				O	No housing proposed		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	No housing proposed				O	No housing proposed		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	No housing proposed				O	No housing proposed		
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Employment site: 440,000 sqm. B2 or B8 uses				++	Employment site: 440,000 sqm. for a mix of large scale warehousing and advanced manufacturing		
		Support education and training to provide a suitable labour force for future growth?	O	No mention in policy	Consider how employment land can enhance work force skills and training.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-P1, GM-E4, GM-E5	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Existing public transport near by- bus stops adjacent to the site				++	Existing public transport near by- bus stops adjacent to the site		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Makes reference to providing financial contributions for enhancement of the highway network, public transport facilities, including bus services. Policy states: Ensure that good quality road access is provided, including a link from the A6 to Westhoughton. Take advantage of the site's location near Junction 6 of the M61, whilst making sure that it has no significantly adverse effect on the motorway or other surrounding roads. Provide financial contributions to the enhancement of the highway network, public transport facilities or other improvements identified through a transport assessment; this should include bespoke bus services linking Westhoughton to Horwich Parkway and Middlebrook.				++	Makes reference to providing financial contributions for enhancement of the highway network, public transport facilities, including bus services. Policy states: Ensure that good quality road access is provided, allowing a link from the A6 to Westhoughton. Take advantage of the site's location near Junction 6 of the M61, whilst making sure that it has no significantly adverse effect on the motorway or other surrounding roads. Provide financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment.		
		Improve transport connectivity?	++	Makes reference to providing financial contributions for enhancement of the highway network, public transport facilities, including bus services				++	Makes reference to providing financial contributions for enhancement of the highway network, public transport facilities, including bus services.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2.	O	There is no mention of this type of infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	? / +	Cannot be certain that development will affect deprived areas. However the site is in close proximity to deprived areas so could have a benefit, although no mention in policy.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including reference to the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1 .	? / +	Cannot be certain that development will affect deprived areas. However the site is in close proximity to deprived areas so could have a benefit, although no mention in policy. Contributions to facilitate access by non-car modes will also assist.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	? / +								
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Policy does not mention integration with existing communities however this is an employment only site.				O	Policy does not mention integration with existing communities however this is an employment only site.		
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Nothing proposed				O	Nothing proposed		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	Policy states: Incorporate very high levels of landscaping, including the retention of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape and mitigate against its environmental impacts	Incorporate active transport improvements	Yes	Changes have been to the allocation policy wording, including the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic policy GM-E5 & GM-E6.	++	Allocation policy states: Incorporate very high levels of landscaping, including the retention of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape and mitigate against its environmental impacts Provide financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment,	Scoring has increased from positive effect to very positive effect.	No further recommendations are made.
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	O	Not referenced in policy				O	Not referenced in policy		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to. Proposal for employment land is unlikely to affect local capacity.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E5, GM-E6 & GM-E7.	O	No new provision is referred to. Proposal for employment land is unlikely to affect local capacity.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	O					O			
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O					O			
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	No new provision is referred to	Link new employment to the provision of training and education such as apprenticeships	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E4 & GM-E5	O	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No new provision is referred to				O			
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Provide financial contributions to the enhancement of the highway network, public transport facilities or other improvements identified through a transport assessment; this should include bespoke bus services linking Westhoughton to Horwich Parkway and Middlebrook	If possible, highlight role of active transport. However location of the site may not allow for this.	Yes	Changes have been to the allocation policy wording, including the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic policy GM-E1, GM-G2, GM-N4, GM-N5 & GM-N7	++	Policy states: Provide financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment	Scoring has increased from positive effect to very positive effect.	No further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					++			
		Support the use of sustainable and active modes of transport?	+					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	-/+	Site is within 500m of AQMA. The policy makes reference to provision of improved public transport	Include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site and encourage active travel. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	Changes have been to the allocation policy wording, including the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2.	-/+	Site is within 500m of AQMA. The policy makes reference to provision of improved public transport	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	++/?	Development presents risk and opportunity to existing ecological receptors. Special area of conservation: Site is 9.299 km from Manchester Mosses Priority habitats: 0.09% of site covers deciduous woodland; lowland fens, no main habitat but additional habitats Sites of special scientific interest: Site is 1.6km from Red Moss SSSI Local nature reserves: Site is 116 m from Borsdane Wood Sites of biological importance: 0.4% of site is covered by SBI [Pond at Four Gates; Great Crested Newt] Site is within 150 m of 1 SBIs [Borsdane Wood East] Policy states: . Protect the Site of Biological Importance within the site from development and incorporate very high levels of landscaping, including the retention of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape and mitigate its environmental impacts.	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases. In addition, ensure that a significant section of the site is retained for green infrastructure	Yes	Allocation policy wording states that development should be in accordance with a masterplan that shows phasing within the site, and which areas should or should not be developed. Policy wording also references the need to protect the Site of Biological importance at Four Gates from development and incorporate very high levels of landscaping where practicable, so as to mitigate against its environmental impact. The recommendation is also addressed by thematic Policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10.	++	Development presents risk and opportunity to existing ecological receptors. Special area of conservation: Site is 9.299 km from Manchester Mosses Priority habitats: 0.09% of site covers deciduous woodland; lowland fens, no main habitat but additional habitats Sites of special scientific interest: Site is 1.6km from Red Moss SSSI Local nature reserves: Site is 116 m from Borsdane Wood Sites of biological importance: 0.4% of site is covered by SBI [Pond at Four Gates; Great Crested Newt] Site is within 150 m of 1 SBIs [Borsdane Wood East] Policy states: . Protect the Site of Biological Importance within the site from development and incorporate very high levels of landscaping, including the retention of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape and mitigate its environmental impacts.	Scoring has increased from very positive/uncertain to very positive.	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	++/?					++/?			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?/+			Partially		?/+	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O					O			
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Flood vulnerability: Average / Relatively low. Policy states: Fully mitigate against any flood risk	Design should also consider how to address other risks associated with climate change, such as high temperature events. Resilient Masterplan design might include best practice for cooling during high temperature and other weather events associated with climate change.	Partially	Changes have been made to policy wording, including the removal of reference to mitigation against any flood risk. However, the recommendation is addressed by thematic Policy GM-S2, GM-S4 & GM-S5	+	Flood vulnerability: Average / Relatively low. Policy no longer states: Fully mitigate against any flood risk	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	Site is not in a flood zone	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk,	Partially	Changes have been made to policy wording, including the removal of reference to mitigation against any flood risk. However, the recommendation is addressed by thematic Policy GM-S5.	O	Site is not in a flood zone	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	O	Site is not in a flood zone Policy states: Fully mitigate against any flood risk				O	Site is not in a flood zone Policy no longer states: Fully mitigate against any flood risk		
		Ensure that development does not increase flood risk due to increased run-off rates?	O	Site is not adjacent to any flood risk areas				O	Site is not adjacent to any flood risk areas Policy no longer states: Fully mitigate against any flood risk		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	Site is not adjacent to any flood risk areas				O	Site is not adjacent to any flood risk areas Policy no longer states: Fully mitigate against any flood risk		
	Protect and improve the quality and	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Consider how the development might align with strategic aims of WFD, including achieving "good status" and emitting emissions to	Partially	Changes have been made to policy wording, including the removal of reference to mitigation against any flood risk. However, the	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

14	The quality and availability of water resources	Promote management practices that will protect water features from pollution?	O	As above	water.		recommendation is addressed by thematic Policy GM-S3.	O			
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	Consideration for detailed design and thematic policy	Consideration for detailed design and thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S1.	O	Consideration for detailed design and thematic policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Policy states: Provide financial contributions to the enhancement of public transport No mention of energy use or energy efficiency.	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Yes	Changes have been made to policy wording, including the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	+	Policy states: Provide financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment No mention of energy use or energy efficiency.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention of low carbon and renewable energy facilities in policy wording		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 & GM-S3.	-/?	No mention of low carbon and renewable energy facilities in policy wording		
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention of low carbon and renewable energy facilities in policy wording				-/?	No mention of low carbon and renewable energy facilities in policy wording		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Incorporate very high levels of landscaping and minimise visual impact on the wider landscape				+	Policy states: Incorporate very high levels of landscaping and minimise visual impact on the wider landscape		
		Conserve and enhance the historic environment, heritage assets and their setting?	-/+	Site is near to Grade II Church of St John The Evangelist (600m) Site is 1.3km from listed building [Georgian House Hotel; Grade: II	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Partially	Changes have been made to the allocation policy wording, including referencing the protection and enhancement of heritage assets. The recommendation is also addressed by thematic Policy GM-G1 & GM-E2	-/+	Site is near to Grade II Church of St John The Evangelist (600m) Site is 1.3km from listed building [Georgian House Hotel; Grade: II	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	?	Not mentioned in policy				?	Not mentioned in policy		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	-	Greenfield with a small amount of PDL	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	-	Greenfield with a small amount of PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	6.9% grade 3 agricultural 93.1% urban (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	--	Grade 3 agricultural land and urban		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Greenfield with a small amount of PDL	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	-	Greenfield with a small amount of PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Greenfield with a small amount of PDL		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	-			
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	++	Policy states: Ensure the extraction of any viable sandstone, surface coal and/or brickclay resources in advance of construction, in accordance with the relevant policies of the Greater Manchester Joint Minerals Plan	Promote sustainable construction methods	No	Changes have been made to the allocation policy wording, inluding the removal of reference to the extraction of any viable sandstone, surface coal and/or brickclay resources in advance of construction (as this is covered by the GM Minerals Plan).	o	No mention in policy	Policy has been decreased from very positive to neutral / no effect	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy Policy GM-S 7.	o			
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019					2020			
Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	Policy states: that there is the potential to provide around 4,100 new homes				++	Policy states: that there is the potential to provide around 3,500 new homes including plots for custom and self-build	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: provide a mix of housing across the site				++	Policy states: Make provision for affordable housing in accordance with local planning policy requirements, equivalent to at least 25% of the dwellings on the site and across a range of housing types and sizes (within an indicative affordable housing tenure split of 60% social or affordable rented and 40% affordable home ownership).	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy states: make provision for parkland asset, new local centres and public transport and highways connectivity				++	Policy states: make provision for parkland asset, new local centres and public transport and highways connectivity	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: make provision for new primary and secondary education	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	++	Policy states: make provision for new primary and secondary education form entries and a new secondary school	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	Housing only				O	Housing only	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: make provision for significant new and improved highways infrastructure, major investment in public transport and enable more infrastructure for walking and cycling				++	Policy states: make provision for significant new and improved highways infrastructure, major investment in public transport and enable more infrastructure for walking and cycling. This includes: A north-south strategic spine road connecting Bury and Bolton Road (A58) to Bury Road, Radcliffe that is designed to be suitable for buses, would not adversely impact on the operation of Metrolink services, incorporates provision for active travel and is in line with local design standards; A strategic connection from the spine road to Spring Lane, Radcliffe via the former Coney Green High School site that is designed to be suitable for buses, incorporates provision for active travel and is in line with local design standards; and Other off-site highway works where these are necessary to ensure acceptable traffic movement, including in and around Radcliffe town centre;	No change	
		Improve transport connectivity?	++	Policy states: major improvements to public transport infrastructure including providing new Metrolink stop and Park & Ride facilities in Warth area				++	Policy states: major improvements to public transport infrastructure including providing new Metrolink stop and Park & Ride facilities in Warth area	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	Consider feasibility study into requirements and ability of local network to support development	Partially	Allocation policy wording amended to specify that a masterplan required in the policy should include the delivery of grey infrastructure including utilities and broadband. The recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies.	Score has improved from neutral to Very positive for consistency between allocation policies	No further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain investment/development will affect deprived areas. This area is classed as middle to most deprived in the Index of Multiple Deprivation.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	+	Cannot be certain investment/development will affect deprived areas. This area is classed as middle to most deprived in the Index of Multiple Deprivation. Policy wording has been amended to include reference to the allocation integrating with exsiting communities.	Scoring has improved from neutral to positive for consistency between allocation policies	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	As above	As above	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	+	As above	Scoring has improved from neutral to positive for consistency between allocation policies	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	++	Policy states: effective integration with surrounding communities	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	Allocation policy wording amended to include ensuring effective integration with Radcliffe Metrolink station, local schools and Bury town centre. However, the recommendation is also addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	++	Policy states: effective integration with surrounding communities	No change has been made to scoring.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	++	As above				++	As above	No change has been made to scoring.	It is considered that accessibility standards is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: enable more trips to be made by walking and cycling, publicly accessible green infrastructure, ecological mitigation and compensation	The policy could be more specific about the exact amount of green infrastructure as currently it states a "large amount." There could also be reference to linking to the wider green infrastructure network.	Yes	Allocation policy wording amended to specify that a masterplan required for the site includes green and blue infrastructure, recreation provision and social infrastructure. Policy will link neighbourhoods with key destinations through cycling and walking routes, and integrate the development with surrounding communities including active travel links. The recommendation is addressed by Thematic Policy GM-N 5.	++	Policy states: enable more trips to be made by walking and cycling, publicly accessible green infrastructure, ecological mitigation and compensation	No change has been made to scoring.	No further recommendations are made.
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	Policy states: create a significant parkland asset, publicly accessible green infrastructure				++	Policy states: create a significant parkland asset, publicly accessible green infrastructure	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	-/?	No mention in policy - potential negative effects if local facilities are at capacity.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Allocation policy wording amended to include provision for new local centres including health facilities. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	++	Policy states: Make provision for new local centres in accessible locations which include a range of appropriate retail, health and community facilities and ensure they are integrated with existing communities	Scoring has been increased from negative/neutral to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	New primary and secondary school				++	New primary and secondary school	No change	
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Upgrade recreation offer and create a significant parkland asset				++	Upgrade recreation offer and create a significant parkland asset	No change	
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	New primary and secondary school				++	New primary and secondary school	No change	
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy	No change	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Enable more trips to be made by walking and cycling by retaining, extending and enhancing strategic recreation routes on the former Bury to Bolton railway line and beside the Manchester, Bolton and Bury Canal, together with improvements to the network of pedestrian and cycle routes and public rights of way across the site, facilitating new connections to surrounding urban areas major investment in public transport				++	Policy states: Deliver a network of safe cycling and walking routes through the allocation linking neighbourhoods with key destinations, designed and constructed in accordance with national and GM standards and local planning policies.	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	
		Support the use of sustainable and active modes of transport?	++					++		No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	There is an AQMA within 150m of the site to the south, but the allocation includes sustainable transport major road network improvements Policy references active travel links to nearby communities, suitable infrastructure for buses and active travel.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially relevant to the southern side where there is close proximity to an AQMA	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure and electric vehicle charging points. Policy will make provision for new strategic road connections that are suitable for buses and active travel, and integrated development connected via walking and cycling routes. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2	++/-	There is an AQMA within 150m of the site to the south, but the allocation includes sustainable transport major road network improvements	Scoring has been increased from positive/negative to very positive/negative for consistency between allocation policies	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/?	Within the site there are priority habitats wildlife corridors and a number of SBI. Policy states: mitigate against or compensate for any ecological impacts on wildlife corridors and sites of biological importance. There is no reference to enhancement of assets. GI mentioned in policy Policy states: Upgrade the recreation, leisure and tourism offer of the wider area;	Make reference in the policy to enhancement of assets, the policy is currently not worded positively and instead deals with handling negative impact. This is especially relevant to the SBIs within the site	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will provide a significant green corridor including the integration of existing green assets., and their long-term management and maintenance. The recommendation is addressed by Thematic policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	++	Within the site there are priority habitats wildlife corridors and a number of SBI. Policy states: Provide a significant green corridor which remains within the Green belt and provides a strategic amount of new, high quality and publicly accessible open space/parkland coupled with a network of multi-functional green and blue infrastructure within the allocation to provide health benefits to residents as well as creating a visually attractive environment in accordance with Policy GM-G2 Green Infrastructure Network and Policy GM-G9 Standards to a Greener Greater Manchester. This should include the enhancement and the integration of the existing assets at Elton and Withins Reservoirs and the Manchester, Bolton and Bury Canal to create an extensive recreation, tourism and leisure asset	Scoring has been increased from negative / no effect to very positive for consistency between allocation policies	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-/?					++		No change	
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		The policy could be more specific about the exact amount of green infrastructure as currently it states a "large amount." There could also be reference to linking to the wider green infrastructure network.	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will provide a significant green corridor including the integration of existing green assets., and their long-term management and maintenance. The recommendation is addressed by Thematic policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++		The policy could be more specific about the exact amount of green infrastructure as currently it states a "large amount." There could also be reference to linking to the wider green infrastructure network.	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will provide a significant green corridor including the integration of existing green assets., and their long-term management and maintenance. The recommendation is addressed by Thematic policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Climate change vulnerability: Average to high. Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	This is covered in a thematic policy	Partially	Allocation policy wording amended to refer to active travel, green and blue infrastructure, flood risk and net gain in biodiversity. The recommendation is addressed by Thematic Policy GM- S 5 and a masterplan required in the allocations policy will determine this. The policy also includes improvements to public transport infrastructure, active travel and EV charging points.	O	Climate change vulnerability: Average to high. Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk. This is particularly relevant to the east and south of the site which are in flood zone 2 or 3	Partially	Allocation policy wording amended to contribute to refer to flood risk ensuring that any development is not at risk from flooding, in line with policy GM-S5 which is cited throughout the allocation policy. The recomeendation is addressed by Thematic Policy GM-S5 and a masterplan required in the allocations policy will determine this.	o	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	o	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off		Partially		o	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	-/?	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off		Partially		-/?	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	-	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off		Partially		-	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to refer to flood risk ensuring that any development is not at risk from flooding, in line with policy GM-S5 which is cited throughout the allocation policy. The recomeendation is addressed by Thematic Policy GM-S5 and a masterplan required in the allocations policy will determine this.	O	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	O	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to refer to flood risk ensuring that any development is not at risk from flooding, in line with policy GM-S5 which is cited throughout the allocation policy. The recomeendation is addressed by Thematic Policy GM-S5 and a masterplan required in the allocations policy will determine this.	O	A section of the site to the east and south is within flood zone 2 and 3 . Policy states: Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+/-	Includes extensive public / active transport. No mention of energy use or energy efficiency.	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to specify a masterplan required in the policy includes electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	+	Includes extensive public / active transport. No mention of energy use or energy efficiency.	Scoring has been increased from positive/negative to positive for consistency between allocation policies	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-	No mention of low carbon and renewable energy facilities in policy wording		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-	No mention of low carbon and renewable energy facilities in policy wording	No change has been made to scoring.	Policy could reference low carbon / renewable energy directly.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-	No mention in policy		Partially	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	+	No mention in policy	Scoring has been increased from negative to positive.	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	No landscape designations	Ensure landscape appraisal as part of any planning application	No	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-G 2, GM-G 6 & GM-E 2	O	No landscape designations	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Conserve and enhance the historic environment, heritage assets and their setting?	-/?	Listed building identified in vicinity - risk and opportunity Gate Piers To North West Of Old Hall Farmhouse [Grade: II]; Old Hall Farmhouse [Grade: II]	Consider listed buildings throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy amended to protect and enhance heritage and archaeological assets with a Heritage Impact Assessment. The recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	++	Listed building identified in vicinity - risk and opportunity Gate Piers To North West Of Old Hall Farmhouse [Grade: II]; Old Hall Farmhouse [Grade: II] Policy states: Protect and enhance heritage and archaeological assets and their setting within the allocation in accordance with the findings and recommendations of a Heritage Impact Assessment, including the Grade II Listed Old Hall Farmhouse and the wider historic character of the surrounding area	Scoring has been increased from negative/no effect to very positive for consistency between allocation policies.	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	No mention in policy				O	No mention in policy	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield with 1.3% landfill	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield with 1.3% landfill	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Urban/ grade 4 agricultural land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	+	Urban/ grade 4 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield site	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield site				--	Greenfield site	No change	
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	O	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 140 new homes		N/A		++	Policy states: around 140 new homes, with at 25% being affordable housing	Scoring has been amended from positive to very positive for consistency between allocation policies	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: provide a broad mix of housing		N/A	Allocation policy amended to make provision for at least 25% affordable housing with a tenue split of 60% social/affordable rented and 40% affordable home ownership.	++	Policy states: provide a broad mix of housing	No change has been made to scoring.	No further recommendations are made.
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	The policy makes reference to making provision for improved access to Burrs Country Park		N/A		+	The policy makes reference to making provision for improved access to Bury town centre	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only		N/A		O	Housing only	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Make provision for additional capacity at existing schools in the area to meet additional demand arising from the development in accordance with locally-derived requirements	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5 and GM-P 1	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops which serve the development and the policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area		N/A		++	There are existing bus stops which serve the development and the policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park		N/A		++	Policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park	No change	
		Improve transport connectivity?	++	Policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park		N/A		++	Policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Yes	Allocation policy wording amended to make provision for necessary infrastructure such as utilities and broadband. The recommendation is also addressed by Thematic Policy GM-E 1 & GM-N 2	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies	Score has improved due to addition of specific policy wording.	No further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	+	Cannot be certain that development will affect deprived areas. Policy wording has been amended to include reference to the allocation integrating with exisiting communities.	Scoring has changed from neutral to positive for consistency between allocation policies It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.	As above	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	+	Cannot be certain that development will affect deprived areas. Policy wording has been amended to include reference to the allocation integrating with exisiting communities.	Scoring has changed from neutral to positive for consistency between allocation policies It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Yes	Allocation policy amended to include at least 25% affordable housing across a range of types and sizes with a split of 60% social/affordable rented and 40% affordable home ownership. Policy will ensure design and layout allows for effective integration with surrounding communities. The recommendation is also addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	++	Policy wording has been amended to include reference to the allocation integrating with exisiting communities.	Scoring has been increased from neutral / no effect to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed		Yes	Allocation policy amended to include at least 25% affordable housing across a range of types and sizes with a split of 60% social/affordable rented and 40% affordable home ownership. Policy will ensure design and layout allows for effective integration with surrounding communities. The recommendation is also addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	+	Nothing proposed	Scoring has been increased from neutral / no effect to positive for consistency between allocation policies	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; including new walking and cycling routes, including improved access to Burrs Country Park; In relation to green infrastructure policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures		N/A		++	In relation to walking and cycling policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; including new walking and cycling routes, including improved access to Burrs Country Park; In relation to green infrastructure policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures allocation to provide health benefits to residents as well as creating a visually attractive environment	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.		N/A		O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	Policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures		N/A		++	Policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	-/?	The policy does not make reference to the provision of social infrastructure. If the increase in demand increases due to the use of the existing infrastructure this could result in a negative impact.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	-/?	The policy does not make reference to the provision of social infrastructure. If the increase in demand increases due to the use of the existing infrastructure this could result in a negative impact.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Make provision for a new one form entry primary school within the site to accommodate additional demand on school places	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Policy wording has been amended and there is now no reference in to education contributions. However the reccomendation is addressed by thematic policies GM-E 5, GM-E 6 & GM-E 7.	-/?	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies.	Scoring has been decreased from very positive to positive/neutral for consistency between allocation policies	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	The policy states: Secure and bring into use suitable replacement sports facilities	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to retain and enhance and/or replace existing recreation facilities and make provision The recommendation is addressed by Thematic Policy GM-E 7.	++	Policy states: Retain and enhance and/or replace existing recreation facilities and make provision for new recreation facilities to meet the needs of the prospective residents in accordance with local planning policy requirements	No change has been made to scoring.	No further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Make provision for a new one form entry primary school within the site to accommodate additional demand on school places	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Policy wording has been amended and there is now no reference in to education contributions. However the reccomendation is addressed by thematic policies GM-E 5, GM-E 6 & GM-E 7.	++	Policy states: Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant GMSF or local planning policies.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy	No change	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park				++	The policy states: Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area; Ensure the design and layout allows for effective integration with surrounding communities through the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	
		Support the use of sustainable and active modes of transport?	++					++		No change	

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	The policy is located within 500m of and AQMA The policy makes provision for improved public transport and modes of active transport.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially appropriate towards the south eastern side nearest to the AQMA	Yes	Allocation policy amended to make provision for electric vehicle charging infrastructure, active travel links to surrounding communities, and retaining and enhancing green infrastructure. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2	+	The policy is located within 500m of and AQMA The policy makes provision for improved public transport and modes of active transport.	Score has improved from positive/negative to positive for consistency between allocation policies	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Site is located within a priority habitat for deciduous woodland and a wildlife corridor The policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures In relation to recreation the policy states: Secure and bring into use suitable replacement sports facilities	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy wording amended to incorporate green infrastructure, retain and enhance the wildlife corridor, minimise impacts on and provide net gains to biodiversity assets, and make provision for the long term management and maintenance of green infrastructure and biodiversity features. The recommendation is addressed by Thematic PolicyGM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++	Site is located within a priority habitat for deciduous woodland and a wildlife corridor The policy states: Retain, enhance the wildlife corridor and green infrastructure elements to the west and south of the site and introduce appropriate mitigation measures. Make appropriate provision for the long term management and maintenance of areas of green infrastructure, biodiversity features and sustainable drainage features. In relation to recreation the policy states: Secure and bring into use suitable replacement sports facilities	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+		Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy wording amended to incorporate green infrastructure, retain and enhance the wildlife corridor, minimise impacts on and provide net gains to biodiversity assets, and make provision for the long term management and maintenance of green infrastructure and biodiversity features. The recommendation is also addressed by Thematic PolicyGM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+		Integrate green infrastructure throughout the scheme at masterplan stage	Yes	Allocation policy wording amended to incorporate green infrastructure, retain and enhance the wildlife corridor, minimise impacts on and provide net gains to biodiversity assets, and make provision for the long term management and maintenance of green infrastructure and biodiversity features. The recommendation is addressed by Thematic PolicyGM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+		Integrate green infrastructure throughout the scheme at masterplan stage	Yes	Allocation policy wording amended to incorporate green infrastructure, retain and enhance the wildlife corridor and introduce mitigation measures to provide health benefits to residents, retain and enhance and/or replace existing recreation facilities and make provision for new recreation facilities, minimise impacts on and provide net gains to biodiversity assets, and make provision for the long term management and maintenance of green infrastructure and biodiversity features. The recommendation is also addressed by Thematic Policy GM-G 1, GM-G 2, GM-G 7 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	?/+	The site has a low to high climate change vulnerability The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	This is covered within a thematic policy	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, and incorporates measures to deal with surface water run off. The recommendation is addressed by Thematic PolicyGM- S 5 and a masterplan required in the allocations policy will determine this.	+	The site has a low to high climate change vulnerability The policy states: Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including surface water, sewer flooding and groundwater; Incorporate on-site measures to deal with surface water and control the rate of surface water run off in line with the hierarchy of drainage options ensuring, wherever possible, they are designed as multi-functional green infrastructure connecting to the wider green infrastructure network in accordance with Policy GM-S5 - Flood Risk and the Water Environment	Score has improved due to addition of specific policy wording.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, and incorporates measures to deal with surface water run off. The recommendation is also addressed by Thematic PolicyGM- S 5 and a masterplan required in the allocations policy will determine this.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, and incorporates measures to deal with surface water run off. The recommendation is also addressed by Thematic PolicyGM- S 5 and a masterplan required in the allocations policy will determine this.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, and incorporates measures to deal with surface water run off. The recommendation is addressed by Thematic PolicyGM- S 5 and a masterplan required in the allocations policy will determine this.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, and incorporates measures to deal with surface water run off. The recommendation is also addressed by Thematic PolicyGM- S 5 and a masterplan required in the allocations policy will determine this.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park; Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area The policy makes no reference to energy use	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to include green infrastructure and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is addressed by thematic Policy GM-S2, GM-S3 and GM-S4.	+	Reference in policy to cycling and walking: incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, including improved access to Burrs Country Park; Make necessary improvements to local highway infrastructure to facilitate appropriate access to the site and incorporate enhancements to public transport, pedestrian and cycle routes in the area The policy makes no reference to energy use	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to include green infrastructure and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	No protected landscape designation		N/A		O	No protected landscape designation	No change	
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	O	There are no heritage assets on the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.		N/A		O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.	No change	

17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Urban land, half PDL	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	+	Urban land, half PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	++	Urban land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within by thematic policy GM-G 8 & GM-G 9	++	Urban land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Urban land, half PDL. Policy does not state that buildings or materials will be used	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	+	Urban land, half PDL. Policy does not state that buildings or materials will be used	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Urban land, half is PDL	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	+	Urban land, half is PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No changes made to the policy wording.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	Policy states: around 1,250 new homes		N/A		++	Policy states: around 1,250 new homes including provision of plots for custom and self build housing with 25% affordable dwellings	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: provide a mix of housing		N/A		++	Policy states: provide a mix of housing including plots for custom and self build housing	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	The policy makes reference to making provision for a new local centre and making accessible green infrastructure including recreational uses		N/A		++	The policy makes reference to making provision for a new local centre and making accessible green infrastructure including recreational uses	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only		N/A		O	Housing only	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: make provision for a new one form entry primary school within the site to accommodate additional demand on school places	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5 and GM-P 1	++	Policy states: make provision for a new one form entry primary school within the site to accommodate additional demand on school places	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops which serve the development and the policy states: Make provision for major investment in public transport in order to enable more sustainable transport choices		N/A		++	There are existing bus stops which serve the development and the policy states: Make provision for major investment in public transport in order to enable more sustainable transport choices	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Make provision for significant improvements to highways infrastructure, including: The provision of a new through road to enable an alternative to Church Street, Bank Street and High Street; A contribution towards the provision of highways infrastructure through the Elton Reservoir site; and Other off-site highway works where these are necessary to ensure acceptable traffic movement. In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south		N/A		++	Policy states: Make provision for significant improvements to highways infrastructure, including: The provision of a new through road to enable an alternative to Church Street, Bank Street and High Street that is designed to be suitable for buses and incorporates active travel and is in line with local design standards; A contribution towards the provision of highways infrastructure through the Elton Reservoir site; and Other off-site highway works where these are necessary to ensure acceptable traffic movement. In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices including potential upgrade of existing bus services or a new bus service linking Tottington — Walshaw — Elton — proposed new Metrolink stop at Warth – Bury/Radcliffe In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south	No change	
		Improve transport connectivity?	++	Policy states: Make provision for significant improvements to highways infrastructure, including: The provision of a new through road to enable an alternative to Church Street, Bank Street and High Street; A contribution towards the provision of highways infrastructure through the Elton Reservoir site; and Other off-site highway works where these are necessary to ensure acceptable traffic movement. In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south		N/A		++	Policy states: Make provision for significant improvements to highways infrastructure, including: The provision of a new through road to enable an alternative to Church Street, Bank Street and High Street; A contribution towards the provision of highways infrastructure through the Elton Reservoir site; and Other off-site highway works where these are necessary to ensure acceptable traffic movement. In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Yes	Allocation policy wording amended to specify that a masterplan required in the policy should include the delivery of grey infrastructure including utilities and broadband. The recommendation is addressed by Thematic GM-E1 & GM-N2	++	Not referenced in policy	Score has improved due to addition of specific policy wording.	No further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1	+	Cannot be certain that development will affect deprived areas. Policy has been amended to support the integration of the allocation and existing community.	Scoring has improved from neutral to positive for consistency between allocation policies It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1	+	Cannot be certain that development will affect deprived areas. Policy has been amended to support the integration of the allocation and existing community.	Scoring has improved from neutral to positive for consistency between allocation policies It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	?/+	Ensure the design and layout allows for effective integration with surrounding communities	The allocation needs to encourage integration with existing community and provision of a range of tenures	Partially	Allocation policy amended to include ensuring effective integration including active travel links and connections to recreation areas at Dow Lane, Elton Vale and Bury town centre. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	+	Ensure the design and layout allows for effective integration with surrounding communities	Score has improved due to addition of specific policy wording for consistency between allocation policies	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				+	Policy has been amended to support the integration of the allocation and existing community.	Scoring has improved from neutral to positive for consistency between allocation policies	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		N/A		O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		N/A		O	Each allocation is within a specific location and therefore is within one area type.	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: including the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south In relation to green infrastructure policy states: Make provision for green infrastructure corridors focusing on the areas around Walshaw and Elton Brooks and the reservoirs and wildlife corridors including improved accessibility and connectivity within the site and to surrounding areas, including to existing areas of recreation at Dow Lane and Elton Vale		N/A		++	In relation to walking and cycling policy states: including the incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south In relation to green infrastructure policy states: Make provision for green infrastructure corridors focusing on the areas around Walshaw and Elton Brooks and the reservoirs and wildlife corridors including improved accessibility and connectivity within the site and to surrounding areas, including to existing areas of recreation at Dow Lane and Elton Vale	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.		N/A		O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	Policy states: Make provision for green infrastructure corridors focusing on the areas around Walshaw and Elton Brooks and the reservoirs and wildlife corridors including improved accessibility and connectivity within the site and to surrounding areas, including to existing areas of recreation at Dow Lane and Elton Vale.		N/A		++	Policy states: Make provision for new, high quality, publicly accessible, multifunctional green and blue infrastructure within the allocation to provide health benefits to residents as well as creating a visually attractive environment in accordance with Policy GM-G2 Green Infrastructure Network and Policy GM-G9 Standards to a Greener Greater Manchester This should include the integration and enhancement of the existing green infrastructure corridors and assets at Walshaw and Elton Brooks	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	The policy does not make specific reference to health facilities but it does state: Make provision for a new local centre including a range of appropriate retail, community facilities and other services	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Allocation policy wording amended to include provision for new local centres including health facilities. The recommendation is also addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	The policy makes specific reference to health facilities and the provision for a new local centre including a range of appropriate retail, community facilities and other services	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Make provision for a new one form entry primary school within the site to accommodate additional demand on school places		N/A		++	The policy states that there will be a contribution to off-site secondary school provision	No change	
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	The policy does not make specific reference to health facilities but it does state: Make provision for a new local centre including a range of appropriate retail, community facilities and other services		Yes	Allocation policy wording amended to specify that a masterplan required for the site includes recreation provision and social infrastructure. Policy will ensure the development integrates with recreation areas at Dow Lane, Elton Vale and Bury town centre, and make provision for recreation facilities. The recommendation is also addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	++	The policy does make provision for a new local centre including a range of appropriate retail, community facilities and other services include recreation facilities	Score has improved due to addition of specific policy wording for consistency between allocation policies	No further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Make provision for a new one form entry primary school within the site to accommodate additional demand on school places	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-E 5.	++	Policy states: Make provision for a new one form entry primary school within the site to accommodate additional demand on school places in addition to off site contributions for secondary school provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy		N/A		O	No mention in policy	No change	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south		N/A		++	In regard to public transport the policy states: make provision for major investment in public transport in order to enable more sustainable transport choices In regard to walking and cycling the policy states: allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	

		Support the use of sustainable and active modes of transport?	++			N/A		++		No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	The policy is not located within 500m of and AQMA The policy makes provision for improved public transport and modes of active transport.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure and electric vehicle charging points. Policy will make provision for new strategic road connections that are suitable for buses and active travel, the potential upgrade of existing bus services or a new bus service linking key centres and integrated development connected via walking and cycling routes. The recommendation is also addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2.	++	The policy is not located within 500m of and AQMA The policy makes provision for improved public transport and modes of active transport, as well as safe walking and cycling routes around the allocation.	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and goodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/+	Site is located within a priority habitat for deciduous woodland and a wildlife corridor The policy states: Make provision for green infrastructure corridors focusing on the areas around Walshaw and Elton Brooks and the reservoirs and wildlife corridors including improved accessibility and connectivity within the site and to surrounding areas, including to existing areas of recreation at Dow Lane and Elton Vale. In addition the policy states: Minimise impacts on and providing net gains for biodiversity assets within the site In reference to recreation, the policy states: Make provision for recreation to meet the needs of the prospective residents in accordance with locally-derived requirements	Consider the priority habitat and wildlife corridor throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will integrate and enhance existing green infrastructure corridors and assets and ensure their long-term management and maintenance. The recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	++	Site is located within a priority habitat for deciduous woodland and a wildlife corridor The policy states: Make provision for green infrastructure corridors focusing on the areas around Walshaw and Elton Brooks and the reservoirs and wildlife corridors including improved accessibility and connectivity within the site and to surrounding areas, including to existing areas of recreation at Dow Lane and Elton Vale. In addition the policy states: Minimise impacts on and providing net gains for biodiversity assets within the site In reference to recreation, the policy states: Make provision for recreation to meet the needs of the prospective residents in accordance with locally-derived requirements	Scoring has been increased from negative/positive to very positive for consistency between allocation policies	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-/+			Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will provide a significant green corridor including the integration of existing green assets., and their long-term management and maintenance. The recommendation is also addressed by Thematic GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	+		Scoring has been increased from negative/positive to positive for consistency between allocation policies	No further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+		Integrate green infrastructure throughout the scheme at masterplan stage	Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure. Policy will integrate and enhance existing green infrastructure corridors and assets and ensure their long-term management and maintenance. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	++		Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+			Yes	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure and recreation provision. Policy will integrate and enhance existing green infrastructure corridors and assets and ensure their long-term management and maintenance. The recommendation is also addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10	+	The policy states that provision for multifunctional greenspace is required to provide health benefits to residents, in line with policies GM-G2 and GM-G9	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	The site has a low to average climate change vulnerability The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	This is covered in a thematic policy	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, incorporating on-site measures to deal with surface water run off. A Level 2 SFRA has been completed for the site. The recommendation is adequately addressed by Thematic Policy GM-S 5.	++	The site has a low to average climate change vulnerability The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, incorporating on-site measures to deal with surface water run off. A Level 2 SFRA has been completed for the site. The recommendation is also addressed by Thematic Policy GM-S 5.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, incorporating on-site measures to deal with surface water run off. A Level 2 SFRA has been completed for the site. The recommendation is also addressed by Thematic Policy GM-S 5.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off		Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, incorporating on-site measures to deal with surface water run off. A Level 2 SFRA has been completed for the site. The recommendation is also addressed by Thematic Policy GM-S 5.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off		Yes	Allocation policy wording amended to ensure the site is safe from potential flood risk from all sources, incorporating on-site measures to deal with surface water run off. A Level 2 SFRA has been completed for the site. The recommendation is also addressed by Thematic Policy GM-S 5.	++	No part of the site is in flood zone 2 or 3. The policy states: Ensure that any development is safe from potential flood risk from any source and incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off	Scoring has been increased from positive to very positive for consistency between allocation policies	No further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south The policy makes no reference to energy use	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to specify a masterplan required in the policy includes electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is also addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	+	Reference in policy to cycling and walking: incorporation of linkages and connections that allow for sustainable modes of travel such as new walking and cycling routes, particularly to allow through access from north to south. The policy makes no reference to energy use.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2, GM-S	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy		Partially	Allocation policy amended to specify a masterplan required in the policy includes green and blue infrastructure and electric vehicle charging points. Policy also includes promotion of active travel. Policy does not reference energy efficiency directly. However, the recommendation is also addressed by thematic Policy GM-S2 and GM-S3.	+	No mention in policy	Score has improved due to addition of specific policy wording for consistency between allocation policies	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	No protected landscape designation		N/A		O	No protected landscape designation	No change	
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site The policy states: Provide appropriate mitigation and respect the setting of heritage assets in the vicinity of the site	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy amended to protect and enhance heritage and archaeological assets, their setting and the wider historic character including the Christ Church listed building. The recommendation is also addressed by Thematic Policy GM-G 1 & GM-E 2 and a masterplan required in the allocations policy will determine this.	++	There are no heritage assets on the site The policy states: Provide appropriate mitigation and respect the setting of heritage assets in the vicinity of the site	Scoring has been increased from no effect to very positive for consistency between allocation policies	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.		N/A		O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	The sites urban and Grade 4 agricultural land classification	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed by thematic policy GM-G 8 & GM-G 9	+	The sites urban and Grade 4 agricultural land classification	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield		N/A		--	Greenfield	No change	
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is also addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	--/+	Site is within 150m of an AQMA but the policy does make reference to improvements to public transport, walking and cycling	include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	Allocation policy amended to include potential enhancement and provision for green infrastructure. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2.	--/+	Site is within 150m of an AQMA but the policy does make reference to improvements to public transport, walking and cycling	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	?/+	Site is adjacent to a priority habitat for deciduous woodland, a SSSI, a site of biological importance and Ancient Woodland. The policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value	Consider ecological receptors throughout detailed design to reduce risk through construction and operational phases.	Partially	Allocation policy wording amended to include potential enhancement and provision for green infrastructure. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 .	?/+	Site is adjacent to a priority habitat for deciduous woodland, a SSSI, a site of biological importance and Ancient Woodland. The policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. Suitable buffers should be maintained between development and biodiversity assets with potential enhancement and provision for green infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			?/+			Partially				No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			?/+			Partially				No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			?			Partially				No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Flood vulnerability relatively high. The site is 260m from River Bollin in flood zone 3. However there is no risk from pluvial and fluvial sources.	Design should also consider how to address other risks associated with climate change, such as high temperature events. Resilient Masterplan design might include best practice for cooling during high temperature and other weather events associated with climate change.	Partially	No changes made to allocation policy wording. The recommendation is addressed by Thematic Policy GM- S 5	O	Flood vulnerability relatively high. The site is 260m from River Bollin in flood zone 3. However there is no risk from pluvial and fluvial sources.	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	The site is 260m from River Bollin in flood zone 3 however none of the site is within flood zone. Assumed that development will follow best practice and adhere to planning guidance.				O	The site is 260m from River Bollin in flood zone 3 however none of the site is within flood zone. Assumed that development will follow best practice and adhere to planning guidance.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	As above					As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	As above					As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	As above					As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice. Water course should be protected from development. Policy states protection of biodiversity from water pollution	Consider how the development might align with strategic aims of WFD, including achieving "good status" and emitting emissions to water.	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	Assumed compliance with best practice. Water course should be protected from development. Policy states protection of biodiversity from water pollution	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	As above				O	As above	No change	
			O	As above				O	As above	No change	
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	++	Policy States: maximising the use of renewable energy In addition the policy states: Include surface access and car parking arrangements which encourage the use of public transport, walking and cycling, and satisfactorily manage impacts on the highway network		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2, GM-S3 and GM-S 4.	++	Policy States: maximising the use of renewable energy In addition the policy states: Include surface access and car parking arrangements which encourage the use of public transport, walking and cycling, and satisfactorily manage impacts on the highway network	No change	
			++	Policy States: maximising the use of renewable energy.	Make reference to facilitating energy efficiency		No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	++	Policy States: maximising the use of renewable energy.		
			++	Policy States: maximising the use of renewable energy In addition the policy states: Include surface access and car parking arrangements which encourage the use of public transport, walking and cycling, and satisfactorily manage impacts on the highway network			No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	++	Policy States: maximising the use of renewable energy In addition the policy states: Include surface access and car parking arrangements which encourage the use of public transport, walking and cycling, and satisfactorily manage impacts on the highway network		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. Suitable uses for the site will be cargo facilities and landscape mitigation but could also include airport operational facilities where it would have no greater adverse impact than would occur for cargo facilities, There is ancient woodland which surrounds the site.	Policy should separate out the landscape mitigation from the uses of the allocation, explaining what the landscaping will do and what that will achieve.	Yes	Policy has been amended to separate landscape mitigation from the uses of the allocation. Reference is now made to potential enhancement and provision for green infrastructure as buffers to biodiversity assets.	+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. Suitable uses for the site will be cargo facilities but could also include airport operational facilities where it would have no greater adverse impact than would occur for cargo facilities, There is ancient woodland which surrounds the site. Reference is now made to potential enhancement and provision for green infrastructure as buffers to biodiversity assets.	No change has been made to scoring.	
			-/+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. There is a listed building approx. 100m away				-/+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. There is a listed building approx. 100m away	No change	
			+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. There is a listed building in approx. 100m away and ancient woodland surrounds the site that there is a risk to.	Ensure that ancient woodland surrounding the site is protected. Policy should separate out the landscape mitigation from the uses of the allocation, explaining what the landscaping will do and what that will achieve.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-E 2.	+	Policy states: Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. There is a listed building in approx. 100m away and ancient woodland surrounds the site that there is a risk to.	No change	When the framework is read as a whole, no further recommendations are made.
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst	Support the development of previously developed land and other sustainable locations?	--	Greenfield	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			--	100% grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed within Chapter 4 and Chapter 9 of the GMSF	--	100% grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			--	Greenfield	Consider how development of derelict land could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

	reducing land contamination		--	Greenfield		Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
			o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			o	No mention in policy					No mention in policy	No change	When the framework is read as a whole, no further recommendations are made.

(Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: 20 new homes				+	Policy states: 20 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	Not referenced in policy				O	Not referenced in policy		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	Not referenced in policy				O	Not referenced in policy		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only and therefore not applicable				O	Housing only and therefore not applicable		
		Support education and training to provide a suitable labour force for future growth?	O	Not referenced in policy. However, it is not considered that an increase of 20 new homes would be likely to increase pressure on local facilities	Noted for each site but would be better dealt with in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5 and GM-P 1	O	Not referenced in policy. However, it is not considered that an increase of 20 new homes would be likely to increase pressure on local facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	There are existing bus stops and a metro stop which serve the development and the site. There is no reference to public transport in the policy				+	There are existing bus stops and a metro stop which serve the development and the site. There is no reference to public transport in the policy		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Facilitate improvements to the local highway network, including entry/egress from Southwick Road in the south, to enable safe vehicular and pedestrian access to and from the site				+	Policy states: Facilitate improvements to the local highway network, including entry/egress from Southwick Road in the south, to enable safe vehicular and pedestrian access to and from the site		
		Improve transport connectivity?	+	Policy states: Facilitate improvements to the local highway network, including entry/egress from Southwick Road in the south, to enable safe vehicular and pedestrian access to and from the site				+	Policy states: Facilitate improvements to the local highway network, including entry/egress from Southwick Road in the south, to enable safe vehicular and pedestrian access to and from the site		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not reference in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2.	O	Not reference in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, The recommendation is addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, The recommendation is addressed by thematic Policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and the provision of a range of tenures	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Nothing proposed		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	There is no reference in the policy to walking or cycling within the site. In regard to green infrastructure the policy states: Enhance the landscaped buffer to the north of the site, between the proposed housing and the motorway, comprising planting of suitable mature native species				+	There is no reference in the policy to walking or cycling within the site. In regard to green infrastructure the policy states: Enhance the landscaped buffer to the north of the site, between the proposed housing and the motorway, comprising planting of suitable mature native species		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	-/?	The policy makes allowance for a new landscaped buffer and a smaller play facility to the existing. However, development of the site will result in the loss of an existing play facility and green space.	Ensure that the new development maximises the ability to mitigate for the loss of the existing play facility and green space.	No	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-E 7.	-/?	The policy makes allowance for a new landscaped buffer and a smaller play facility to the existing with a contribution to the investment strategy for park facilities in the local area. However, development of the site will result in the loss of an existing play facility and green space.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of health infrastructure	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 6.	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of health infrastructure	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of education infrastructure		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5.	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of education infrastructure	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	-/?	The site would include a smaller play facility to the south of the site and provide a financial contribution to the investment strategy for park facilities in the local area. However, the proposed dwellings are replacing a larger play facility on the site.	Ensure that the new development maximises the ability to mitigate for the loss of the existing play facility and green space.	Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-E 7.	-/?	The site would include a smaller play facility to the south of the site and provide a financial contribution to the investment strategy for park facilities in the local area. However, the proposed dwellings are replacing a larger play facility on the site.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of education infrastructure	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5.	O	Not referenced in the policy. However, it is not considered that the increase of 20 homes would have a significant affect on the provision of education infrastructure	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	O	No reference to this in the policy. However, the site has good existing public and active transport connections and the increase of 20 homes is not expected to put a significant pressure on the road network.				O	No reference to this in the policy. However, the site has good existing public and active transport connections and the increase of 20 homes is not expected to put a significant pressure on the road network.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	O					O			
		Support the use of sustainable and active modes of transport?	O					O			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	--	An AQMA is located within the site to the north The policy does not make references to mitigation.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure along the northern boundary of the site, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-S 6, GM-N 1, GM-N 3, GM-N 5, GM-G 2, and GM-G 6.	--	An AQMA is located within the site to the north The policy text makes references to mitigating air quality.	Scoring has improved from very negative to very negative/positive	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/?	There are no biodiversity assets within the site.				+/?	There are no biodiversity assets within the site.		
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/?	The policy states: Enhance the landscaped buffer to the north of the site, between the proposed housing and the motorway, comprising planting of suitable mature native species				+/?	The policy states: Enhance the landscaped buffer to the north of the site, between the proposed housing and the motorway, comprising planting of suitable mature native species		
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+/?	In regard to recreation, the site would include a smaller play facility to the south of the site and provide a financial contribution to the investment strategy for park facilities in the local area. However, the proposed dwellings are replacing a larger play facility on the site.				+/?	In regard to recreation, the site would include a smaller play facility to the south of the site and provide a financial contribution to the investment strategy for park facilities in the local area. However, the proposed dwellings are replacing a larger play facility on the site.		
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	-/+		Ensure that the new development maximises the ability to mitigate for the loss of the existing play facility and green space.	No	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-S 1, GM-S 2, and GM-S7	-/+		No change has been made to scoring.	This policy could be stregthened with reference to mitigate for the loss of the existing play facility and green space.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Average to high climate change vulnerability. The policy makes no reference to flood mitigation	This is covered in a thematic policy	Partially	No changes made to the allocation policy wording. The recommendation is addressed by Thematic Policy GM-G 1, GM-G 2, and GM-G 7.	O	Average to high climate change vulnerability. The policy makes no reference to flood mitigation	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.				O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.		
		Ensure adequate measures are in place to manage existing flood risk?	O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.				O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.		
		Ensure that development does not increase flood risk due to increased run-off rates?	O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.				O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.				O	The site is not within flood zone 2 or 3. As such the policy makes no reference to flood risk.		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	O	No reference to this in the policy. However, the site has good existing public and active transport connections and the increase of 20 homes is not expected to make a significant impact.	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Changes have been made to the allocation policy wording, including reference to the local link service. The recommendation is also addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4.	O	No reference to this in the policy. However, the site has good existing public and active transport connections and the increase of 20 homes is not expected to make a significant impact.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2 and GM-S 3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve landscape quality and the character of open spaces and the public realm?	O	There are no landscape designations on the site				O	There are no landscape designations on the site		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site.				O	There are no heritage assets on the site.		

16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Respect, maintain and strengthen local character and distinctiveness?	O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.				O	No designations exist locally which could be impacted upon in relation to local character and distinctiveness. Additionally the policy does not make reference to such assets.		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	++	Urban land, mostly PDL	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	++	Urban land, mostly PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	The site is urban land in Grade 3 Agricultural Land (assumed 3a worst case scenario)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	The site is urban land in Grade 3 Agricultural Land (assumed 3a worst case scenario)	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+/-	The land is PDL used as a play area. However, this will be replaced by housing	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	+/-	The land is PDL used as a play area. However, this will be replaced by housing	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	++	Urban land, mostly PDL		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	++	Urban land, mostly PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording. With the greater emphasis on climate change, it is considered the policy could be strengthened further relating to climate change and sustainable construction.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: the site will deliver 531 new homes				+	Policy states: the site will deliver around 480 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: deliver a range of dwelling types and sizes				++	Policy states: deliver a range of dwelling types and sizes		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy refers to enhancing linkages to the countryside, creating cycling and pedestrian friendly routes to the existing Metrolink	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Yes	Changes have been made to the allocation policy wording, including reference to appropriate access points to and from the site in liaison with the local highway authority and the safeguarding of a route from the proposed spine road, through the northern part of the site to offer the potential to link the site to Shaw Town Centre and further improve connectivity to the local area and beyond. Amendments to policy text also include reference to contributing to the delivery of the new Metrolink stop and new park and ride facility and enhancement of pedestrian and cycling links to and from the site to the Shaw Metrolink stop.	++	Policy refers to enhancing linkages to the countryside and local town centres, creating cycling and pedestrian friendly routes to link with existing PRoW's and improvements to metrolink and park & ride facilities	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy.	Make reference to energy efficient housing e.g. renewable energy, vehicle charging	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and design codes. The recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Not referred to in policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	+	Policy makes reference to providing for increased demand through provision of new facility or expansion to existing facility	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	+	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Policy states: Create safe and pedestrian / cycle friendly routes to the existing Metrolink stop at Shaw (0.84km from development area) In addition, the allocation is served by a number of bus stops				++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss strategic allocation, the bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility, building on the existing recreation routes and public rights of way network.		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Create safe and pedestrian / cycle friendly routes to the existing Metrolink stop at Shaw and neighbouring areas.				++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss strategic allocation, the bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility, building on the existing recreation routes and public rights of way network.		
		Improve transport connectivity?	+	Policy makes reference to providing for increased demand through provision of new facility or expansion to existing facility				++	Policy states: Contribute to the delivery of the new Metrolink stop and new park and ride facility as part of the neighbouring Broadbent Moss allocation, which in part will help to serve and improve the accessibility and connectivity of both allocations. Take account of and deliver any other highway improvements, that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities	Scoring has been increased from positive to very positive.	
		0	O	No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	cannot be certain investment/development will affect deprived areas	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types to deliver inclusive neighbourhoods and meet local needs, improve connectivity to the surrounding area through a new spine road and new Metrolink stop, enhance pedestrian and cycling links, deliver multi functional green infrastructure; provide for new / improvement of existing open space; and contribute towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1	O	cannot be certain investment/development will affect deprived areas	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.

5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	++	Policy states: deliver inclusive neighbourhoods and meet local needs	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	Policy states: deliver inclusive neighbourhoods and meet local needs	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				++	Policy states: deliver inclusive neighbourhoods	Scoring has been increased from neutral / no effect to very positive.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)				o	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: Deliver multi-functional green infrastructure, enhance linkages with the countryside, enhance biodiversity within the site, provide for new and/or improved open space, sport and recreation facilities	Ensure that the policy makes reference to site specific sustainable modes of transport and green infrastructure, including specifically access to green space	Yes	Changes have been to the allocation policy wording, including additional text on enhancements to pedestrian and cycling links to encourage sustainable modes of transport. Delivered as part of a multifunctional green infrastructure network with linkages to neighbouring communities and countryside.	++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss strategic allocation, the bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility, building on the existing recreation routes and public rights of way network. This should be delivered as part of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Enhance linkages with the countryside and provide for new and/or improved open space, sport and recreation facilities				++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss strategic allocation, the bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility, building on the existing recreation routes and public rights of way network. This should be delivered as part of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	++	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision				++	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision		
		Ensure sufficient access to educational facilities for all children?	++	Policy states: provide for additional school places to meet the increased demand, either through expansion of existing facilities or the creation of new facilities				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority		
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements.		
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: provide for additional school places to meet the increased demand, either through expansion of existing facilities or the creation of new facilities				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority		
		Improve educational and skill levels of the population of working age?	o	No mention in policy				o	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink Station and the potential new Metrolink station proposed as part of the Broadbent Moss strategic allocation as well as the bus network.				++	Policy states: Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss strategic allocation, the bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility, building on the existing recreation routes and public rights of way network. This should be delivered as part of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	AQMA within 150 m of the site. Safe and pedestrian / cycle friendly routes proposed. New trips to site may affect air quality at sensitive receptors.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it requires development to take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities. Policy text also refers to the delivery of a multi functional green infrastructure network. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+/--	AQMA within 150 m of the site. Safe and pedestrian / cycle friendly routes proposed. New trips to site may affect air quality at sensitive receptors.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/-	Within the site there is a priority habitat and a SBI 'Shaw Side' Policy states: Deliver multi-functional Green Infrastructure and high quality landscaping within the site and around the main development areas. Enhance links with the countryside. The enhancement of the Green Infrastructure and biodiversity of the green wedge between the development parcels and the Metrolink line should form part of the comprehensive development of the site	Ensure the scheme is masterplan to take into consideration sensitive receptors such as the SBI and priority habitat	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code. In addition, reference is made to the need to retain and enhance the hierarchy of biodiversity within the site, notably the existing Shawside SBI, including areas of priority habitats and the Twingates local nature reserve, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network which should ensure the requirements of wading bird populations are met, The recommendation is also addressed by thematic policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10	+	Within the site there is a priority habitat and a SBI 'Shaw Side' Policy states: Deliver multi-functional Green Infrastructure and high quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Ensure the protection of a large green wedge, between the main development area and the Metrolink line to the east, from development and its enhancement as of part of the multi-function green infrastructure network and contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment. Retain and enhance the hierarchy of biodiversity within the site, notably the existing Shawside SBI, including areas of priority habitats and the Twingates local nature reserve, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network which should ensure the requirements of wading bird populations are met	Scoring has been increased from positive / negative effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/-					+/-			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O					++		Scoring has been increased from neutral / no effect to very positive.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	Climate change vulnerability / resilience: low to average Policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures, including mitigation measures and the incorporation of Sustainable Urban Drainage Systems				o	Climate change vulnerability / resilience: low to average Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. Opportunities to use natural flood management and highway SUD's schemes should be explored	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures, including mitigation measures and the incorporation of Sustainable Urban Drainage Systems				+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. Opportunities to use natural flood management and highway SUD's schemes should be explored		
		Ensure adequate measures are in place to manage existing flood risk?	+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures, including mitigation measures and the incorporation of Sustainable Urban Drainage Systems				+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. Opportunities to use natural flood management and highway SUD's schemes should be explored		
		Ensure that development does not increase flood risk due to increased run-off rates?	+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures, including mitigation measures and the incorporation of Sustainable Urban Drainage Systems				+/-	19.7% in flood zone 2, 4.5% in flood zone 3. Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. Opportunities to use natural flood management and highway SUD's schemes should be explored		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o	All development to follow best practice				o	All development to follow best practice		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	o/+	Assumed compliance with best practice with regards to surface and ground water. River Beal passes within the site. Policy states: Have regard to the Groundwater Source Protection Zone in the design of the development to ensure there is no infiltration.				o/+	Assumed compliance with best practice with regards to surface and ground water. River Beal passes within the site. Policy states: Have regard to the Groundwater Source Protection Zone in the design of the development to ensure there are no adverse impacts to groundwater resources or groundwater quality and to ensure compliance with the Environment Agency approach to groundwater protection and any relevant position statements		
		Promote management practices that will protect water features from pollution?	o	Assumed compliance with best practice with regards to surface and ground water. River Beal passes within the site. Policy states: Have regard to the Groundwater Source Protection Zone in the design of the development to ensure there is no infiltration.				o	Assumed compliance with best practice with regards to surface and ground water. River Beal passes within the site. Policy states: Have regard to the Groundwater Source Protection Zone in the design of the development to ensure there are no adverse impacts to groundwater resources or groundwater quality and to ensure compliance with the Environment Agency approach to groundwater protection and any relevant position statements		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	o	This is a consideration for detailed design and thematic policy.				o	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Policy refers to enhancing linkages to the countryside, creating cycling and pedestrian friendly routes to the existing Metrolink	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and design codes and to the enhancements of pedestrian and cycling links to encourage sustainable modes of transport. The recommendation is also adequately addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	+	Policy refers to enhancing linkages to the countryside, creating cycling and pedestrian friendly routes to the existing Metrolink	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy		Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and design codes and to the enhancements of pedestrian and cycling links to encourage sustainable modes of transport. The recommendation is also addressed by thematic Policy GM-S2 & GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy				-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	No designated landscape features on the site Policy states: Have regard should also be had to the conclusions of the Landscape Character Assessment, provide new or enhanced open space, and deliver multi-functional Green Infrastructure and high quality landscaping within the site				+	No designated landscape features on the site Policy states: Have regard should also be had to the conclusions of the Landscape Character Assessment, provide new or enhanced open space, and deliver multi-functional Green Infrastructure and high quality landscaping within the site		
		Conserve and enhance the historic environment, heritage assets and their setting?	+	No heritage designations on the site. There are a number of nearby listed buildings. Policy states: Preserve or enhance heritage assets within, and in the vicinity of, the site and their setting. This includes the Grade II listed buildings at Birshaw House and New Bank mitigating any adverse impact.	Consider nearby listed buildings throughout detailed design to reduce risk throughout construction and operational phases	Yes	Changes have been made to the allocation policy wording, including reference to the assessment of potential impact on heritage assets and their setting, when bringing forward the proposals, through further Heritage Impact Assessments. The recommendation is also addressed by thematic Policy GM-G1, GM-G2, GM-G6 & GM-E2	++	No heritage designations on the site. There are a number of nearby listed buildings. Policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications	Scoring has been increased from positive to very positive.	No further recommendations are made.

		Respect, maintain and strengthen local character and distinctiveness?	O	Nothing proposed				O	Nothing proposed			
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Mix of historic landfill and agricultural	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Mix of historic landfill and agricultural	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Mix of urban and agricultural grade 4 land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised	Yes	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Mix of urban and agricultural grade 4 land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Mix of historic landfill, agricultural	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Yes	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Chapter 4 and Chapter 9 of the GMSF	-	Mix of historic landfill, agricultural	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Mix of historic landfill, agricultural		Yes	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	-		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	O	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	O	Policy text refers to a comprehensive masterplan and Design Code	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	O	No mention in policy				O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Bottom Field Farm (Woodhouses)

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 261 new homes				+	Policy states: around 30 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs				++	Policy states: range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy makes reference to provision of open space, sport and recreation facilities	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Yes	Deliver multi-functional green infrastructure and high quality landscaping within the site and around the main development areas so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation	+	Policy makes reference to provision of open space, sport and recreation facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in the policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, recommendation is also addressed by thematic Policy GM-S 2, Policy GM-S 3 and Chapter 5 of the GMSF.	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	+	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	+	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops which serve the development The policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surroundings areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site.				++	There are existing bus stops which serve the development The policy states: Provide for appropriate access to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				++	Policy states: Provide for appropriate access to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing Public Rights of Way running through the site, integrating them as part of the multi-functional green infrastructure network so as to encourage active travel and improve connections and access to adjoining communities and countryside		
		Improve transport connectivity?	++	Policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				++	Policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing Public Rights of Way running through the site, integrating them as part of the multi-functional green infrastructure network so as to encourage active travel and improve connections and access to adjoining communities and countryside		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in the policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1. The policy / thematic policies could be further strengthened with reference to tackling deprivation.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	The policy states: a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs.	The allocation should encourage integration within existing communities and should provide a range of housing tenures	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs	Scoring has been increased from neutral / no effect to very positive.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	As above				++		No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside In relation to green infrastructure policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area				++	In relation to walking and cycling policy states: Retain and enhance existing Public Rights of Way running through the site, integrating them as part of the multi-functional green infrastructure network so as to encourage active travel and improve connections and access to adjoining communities and countryside In relation to green infrastructure policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the local plan for Oldham.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities, commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E5, GM-E6 & GM-E7	+	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham local plan				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities, commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E5.	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority		
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
		Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to				++	The policy states: Provide for appropriate access to and from the sites in liaison with the local highways authority and take account of and deliver any other improvements that may be needed so as to		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			

9	Promote sustainable modes of transport	Support the use of sustainable and active modes of transport?	++	minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				++	minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. Retain and enhance existing Public Rights of Way running through the site, integrating them as part of the multi-functional green infrastructure network so as to encourage active travel and improve connections and access to adjoining communities and countryside		
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	The site is directly adjacent to an AQMA The policy makes reference to active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially important in relation to the east adjacent to the AQMA boundary.	Yes	Changes have been made to the allocation policy wording, including the requirement for development to take account of and deliver any other improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+/--	The site is directly adjacent to an AQMA The policy makes reference to active transport provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	The site is directly adjacent to a site of biological importance 'Lord's Brook Flushes' which are located to the north The policy states: Retain and enhance areas of biodiversity within the site (most notably the existing Brookdale Golf Course and Lord's Brook Flushes SBIs) and the areas of priority habitats and protected species, to deliver a clear and measurable net gain in biodiversity. In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area. In addition, the policy makes provision for recreation uses.	Consider ecological receptors throughout detailed design, especially to the north adjacent to the SBI, to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including the retention and enhancement of biodiversity within the site, notably areas of priority habitats, following the mitigation hierarchy and delivering a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network. It also requires further ecological surveys to inform planning applications. It also requires contribution towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment. The recommendation is also addressed by thematic policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+					+	The site is directly adjacent to a site of biological importance 'Lord's Brook Flushes' which are located to the north	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		Integrate green infrastructure throughout the scheme at masterplan stage, to mitigate from impact on the adjacent habitats	Yes		++	The policy states: Retain and enhance the hierarchy of biodiversity within the site, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity integrating them as part of a multi-functional green infrastructure network with the wider environment In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site and around the main development areas so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area. In addition, the policy makes provision for recreation uses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+					++		Scoring has been increased from positive to very positive.	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the predicted effects of climate change across GM?	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	-/O	Relatively average to high Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.				-/O	Relatively average to high Flood Vulnerability. Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for each site and deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network. Development should be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored		
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the south of the site. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk, the is especially relevant to the south of the site where there is closer proximity to River Medlock	Yes	Changes have been made to the allocation policy wording, including reference to appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site and ensuing mitigation and sustainable drainage systems are in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. In addition, allocation policy wording has been amended to suggest that further opportunities to use natural flood management should be explored. The recommendation is also addressed by thematic Policy GM-S5	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+					+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the south of the site. As such the policy reflects this stating:	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+					+	Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for each site and deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network. Development should be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Promote management practices that will protect water features from pollution?	O	As above				O	As above		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to walking provision The policy does not make reference to energy efficiency				+	Reference in policy to walking provision The policy does not make reference to energy efficiency		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+					+			
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+					+			
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	No landscape designations Policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area.				++	No landscape designations Policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site and around the main development areas so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area.		
		Conserve and enhance the historic environment, heritage assets and their setting?	+	No heritage assets on the site. Bank Woodhouses Conservation Area runs through the centre of the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals.				++	No heritage assets on the site. Bank Woodhouses Conservation Area runs through the centre of the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and its setting, when bringing forward the proposals, through further Heritage Impact Assessments. Development should be in keeping with the local character of Woodhouses in terms of materials, design and landscaping	Scoring has been increased from positive to very positive	No further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	++	As above				++	As above		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield land				--	Greenfield land		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Grade 4 agricultural land				+	Grade 4 agricultural land		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield land	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E1.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Broadbent Moss

			2019					2020			
Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	Policy aims to deliver 1,451 homes including affordable housing.				++	Policy aims to deliver 1,450 homes including affordable housing.		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy includes a mix of high quality family housing.				++	Policy includes a range of dwelling types and sizes so as to deliver inclusive neighbourhoods and meet local needs, including a mix of high quality family housing		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy references employment floorspace, delivery of a local centre to provide retail, and green infrastructure as part of integrated approach to infrastructure delivery.				++	Policy references employment floorspace, delivery of a local centre to provide retail, and green infrastructure as part of integrated approach to infrastructure delivery.		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	Make specific reference to energy efficiency of the housing stock	Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code which may address energy efficiency and resilience. The recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Policy text refers to a comprehensive masterplan and Design Code which may address energy efficiency and resilience	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Policy seeks to deliver 21,720sqm of employment floorspace.				++	Policy seeks to deliver 21,720sqm of employment floorspace.		
		Support education and training to provide a suitable labour force for future growth?	++	Policy aims to contribute towards the provision of additional school places within the allocation, either through new schools or expansions. May be more appropriate to deal with education and training in thematic policies.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	++	Policy aims to contribute towards the provision of additional school places within the allocation, either through new schools or expansions.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Policy seeks to deliver a new Metrolink stop, potentially including park and ride facilities.				++	Policy seeks to deliver a new Metrolink stop, potentially including park and ride facilities.		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy aims to deliver highway improvements and deliver a new Metrolink stop.				++	Policy aims to contribute towards the delivery of a new Metrolink stop and park and ride facility		
		Improve transport connectivity?	++	Policy aims to deliver highway improvements and deliver a new Metrolink stop.				++	Policy aims to deliver highway improvements and deliver a new Metrolink stop.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	Nothing proposed	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	o	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.

5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs	Scoring has been increased from neutral / no effect to positive.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				++		No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy includes provision of safe pedestrian/cycle friendly routes and delivery of multi-functional green space.				++	Policy states: Enhance pedestrian and cycling links to and from the site to the new Metrolink stop, the Broadbent Moss strategic allocation, bus network and surrounding area, to encourage sustainable modes of travel and maximise the sites accessibility. This should be delivered as part of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Greenspace exists within the site in the form of playing fields or spaces; multiple greenspace areas around the site. Policy includes provision for delivery of multi-functional green infrastructure and high quality landscaping.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements; Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	++	Policy calls for provision of appropriate health facilities to meet increased demand which will be placed on existing provision in conjunction with the local authority and Public Health.	Ensure provision is accessible to all and that capacity is considering during master planning	Partially	Changes have been made to the allocation policy wording, including, reference to a comprehensive masterplan and Design Code. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	++	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	It is considered that the policy or appropriate thematic policy could be further strengthened through reference to accessibility standards.
		Ensure sufficient access to educational facilities for all children?	++	Policy provides for additional school places to meet the increased demand, either through expansion or provision of new facilities.				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	Policy seeks appropriate contribution towards provision of new community facilities.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements	Scoring has been increased from positive to very positive.	No further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy seeks contributions towards additional school places in regard to need generated by the development.				++	Policy seeks contributions towards additional school places in regard to need generated by the development.		
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Deliver a new Metrolink stop, provide safe pedestrian/cycle friendly routes to and from the wider strategic allocation, deliver highway improvements. It includes enhancement of recreational routes.				++	Policy states: Deliver a new Metrolink stop, provide safe pedestrian/cycle friendly routes to and from the wider strategic allocation, deliver highway improvements and enhancement of recreational routes.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	- / +	AQMA runs along the site's western border along B6194. However, policy calls for noise and air quality mitigation to protect the amenity of any new and existing occupiers.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code. It requires development to take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities. Policy text also refers to the delivery of a multi functional green infrastructure network and the incorporation of air quality mitigation to protect the amenity of any new and existing occupiers (both residential and employment) where new residential development adjoins Higginshaw Business Employment Area and the proposed extension. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	- / +	AQMA runs along the site's western border along B6194. Policy references the incorporation of air quality mitigation to protect the amenity of any new and existing occupiers (both residential and employment) where new residential development adjoins Higginshaw Business Employment Area and the proposed extension and highways improvements and walking and cycling infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide opportunities to enhance new and existing wildlife and geological sites?	+					+			

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+	Site boundary includes priority habitats and sites of biological importance. Additionally, it borders a wildlife corridor. Policy seeks to deliver multi-functional greenspace, enhance linkages with the neighbouring communities and countryside, and retain and enhance biodiversity areas within the site. It additionally aims to retain and enhance existing recreational routes and Public Rights of Way as well as provide or improve open space/sport/recreation facilities.				+	Site boundary includes priority habitats and sites of biological importance. Additionally, it borders a wildlife corridor. Policy seeks to deliver multi-functional greenspace, enhance linkages with the neighbouring communities and countryside, and retain and enhance biodiversity areas within the site. It additionally aims to retain and enhance existing recreational routes and Public Rights of Way as well as provide or improve open space/sport/recreation facilities.		
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		Design should consider how to integrate green infrastructure and enhance biodiversity, incorporating existing green infrastructure into the development.	Yes	Changes have been made to the allocation policy wording, including the delivery of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. The recommendation is also addressed by thematic Policy GM-G9 & GM-G10	++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+		Include provision for amenity and tranquillity			++		Scoring has been increased from positive to very positive.	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Flood vulnerability ranges from relatively low to relatively high. Policy ensures appropriate flood risk assessment and a comprehensive drainage strategy, including sustainable drainage systems.	Design should include mitigation for high temperature events.	Yes	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code and the provision for a wetland catchment area to provide flood storage, alongside the wider GI network. The recommendation is also addressed by thematic Policy GM-S2, GM-S4 & GM-S5	+	Flood vulnerability ranges from relatively low to relatively high. Policy states: Be informed by an appropriate flood risk assessment, incorporating the Environment Agency's updated Beal model and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including recommendations from the GMSF exceptions test and further mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. SUDSs should be delivered in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management and highway SUD's schemes should be explored	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	-	This site is within both Flood Zone 2 and 3. Policy ensures a flood risk assessment and comprehensive drainage strategy be completed. Policy also includes provision for a wetland catchment area.	Restrict development to areas not in flood zones	Yes	Changes have been made to the allocation policy wording, including referencing the need for development to be informed by an appropriate flood risk assessment, exploration of further opportunities to use natural flood management and also provision for a wetland catchment area to provide net gains in flood storage for the wider catchment and / or actively reduce flood risk impacts downstream . Allocation policy wording also references a comprehensive masterplan and Design Code agreed by the local planning authority. The recommendation is also addressed by thematic policy GM-S5	-	This site is within both Flood Zone 2 and 3. Policy states: Be informed by an appropriate flood risk assessment, incorporating the Environment Agency's updated Beal model and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including recommendations from the GMSF exceptions test and further mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multi-functional green infrastructure network. SUDSs should be delivered in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management and highway SUD's schemes should be explored. Policy also refers to the provision for a wetland catchment area, in liaison with the Environment Agency, Local Lead Flood Authority and Greater Manchester Ecology Unity, in the northern central part of the site to the south of Cop Road within the Flood Zone 3 area, to provide net gains in flood storage for the wider catchment and / or actively reduce flood risk impacts downstream through additional storage, integrating it with the wider multi-functional green infrastructure network and incorporating SUDs	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+	Policy ensures appropriate flood risk assessment and a comprehensive drainage strategy, including sustainable drainage systems.				+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+	Policy calls for delivery of measures to control the rate of surface water run-off.				+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	Policy calls for sustainable drainage systems.				+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.		
		Promote management practices that will protect water features from pollution?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Policy includes provision for a new Metrolink stop and pedestrian/cycle friendly routes.	Make reference to low carbon and renewable energy, and ways in which energy efficiency can be increased.	Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code and to the enhancements of pedestrian and cycling links to encourage sustainable modes of transport. The recommendation is also addressed by thematic Policy GM-S2 & GM-S3.	+	Policy includes provision for a new Metrolink stop and pedestrian/cycle friendly routes.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-	No mention in policy				-	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-	No mention in policy				-	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve landscape quality and the character of open spaces and the public realm?	+	The site is almost entirely within a landscape character area. Policy aims provide new and/or improved open space, sport/recreation facilities.	Ensure landscape appraisal as part of any planning application	Yes	Changes have been made to the allocation policy wording, including ensuring regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines Foothills South / West Pennines. A Landscape Appraisal is required to inform any planning application. The recommendation is also addressed by thematic Policy GM-G1, GM-G2, GM-G6 & GM-E2	+	The site is almost entirely within a landscape character area. Policy aims to provide new and/or improved open space, sport/recreation facilities and states that regard will be given to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines Foothills South / West Pennines and that a Landscape Appraisal is required to inform any planning application	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Conserve and enhance the historic environment, heritage assets and their setting?	+	There are no listed assets within the site. Policy seeks to preserve or enhance heritage assets within the vicinity of the site.				+	There are no listed assets within the site. Policy seeks to preserve or enhance heritage assets within the vicinity of the site.		
		Respect, maintain and strengthen local character and distinctiveness?	o	No mention in policy				o	No mention in policy		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.				+	Site is primarily Grade 4 agricultural land classification with urban along the edges.		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.				+	Site is primarily Grade 4 agricultural land classification with urban along the edges.		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.				+	Site is primarily Grade 4 agricultural land classification with urban along the edges.		
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.				+	Site is primarily Grade 4 agricultural land classification with urban along the edges.		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Chew Brook Vale (Robert Fletchers)

			2019				2020			
Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: 171 homes and 10 to 15 holiday lodges				+	Policy states: 170 homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: mix of low density family and executive homes and affordable homes of 2 and 3 bedrooms				++	Policy states: mix of low density family and executive homes and affordable homes of 2 and 3 bedrooms		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	The policy makes provision for employment and access to green space				++	The policy makes provision for access to green space		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in the policy	Make specific reference to energy efficiency of the housing stock	Yes	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code and ensuring high quality design that is environmentally driven including maximum energy efficiency through good building design and fuel-efficient technology. The recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	++	Policy states: maximum energy efficiency through good building design and fuel-efficient technology	Scoring has been increased from neutral / no effect to very positive.	No further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	The policy states: provide up to 2,500sqm of B1 employment floorspace. The policy also makes reference to new commercial, leisure and retail facilities, in addition to significant tourism opportunities including a hotel and holiday lodges.				++	The policy states: Deliver a mixed-use area on the site of the former Robert Fletchers Mill that will provide a range of commercial, leisure and retail facilities		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority. In addition the policy states: Make provision for a visitor education centre linking to the Dovestones Reservoir in partnership with the RSPB and United Utilities.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops and a train station which serve the development. The policy states: It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site.				++	There are existing bus stops and a train station which serve the development. The policy states: Take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Provide a new access point to the site at Manchester Road, with a spine road into the south western part of the site to the rear of Waterside Mill and linking to and enhancing the existing highway network to the redundant paper mill site and Dovestones Reservoir beyond. It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site.				++	Policy states: Take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site. Provide a new access point to the site at off the A669 / A635, including a new bridge structure		
		Improve transport connectivity?	++	Policy states: Provide a new access point to the site at Manchester Road, with a spine road into the south western part of the site to the rear of Waterside Mill and linking to and enhancing the existing highway network to the redundant paper mill site and Dovestones Reservoir beyond. It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site.				++	Policy states: Take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in the policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including, deliver a mix of housing and affordable housing, require highway improvements and green and blue infrastructure to improve access to the surrounding area. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Foster good relations between different people?	O	Not referenced in the policy				O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

5	Promote equality of opportunity and the elimination of discrimination	Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	As above	The allocation should encourage integration within existing communities and should provide a range of housing tenures	Partially	Changes have been made to the allocation policy wording, including, delivering a mix of housing and affordable housing, highway improvements and green and blue infrastructure to improve access to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	O	Policy states: delivery of green and blue infrastructure to improve access to the surrounding area	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	In relation to walking and cycling policy states: It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site. In relation to green infrastructure policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas and which provides a green route along the river/brook, ensuring that development is set back to allow ecological movement.				++	In relation to walking and cycling policy states: Take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site. In relation to green infrastructure policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas.	Scoring has been increased from positive to very positive	No further recommendations are made.
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the local plan for Oldham.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with local planning policy requirements, and local surpluses and deficiencies		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places and health and community facilities. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	+	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham local plan				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with local planning policy requirements, and local surpluses and deficiencies	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority. In addition the policy states: Make provision for a visitor education centre linking to the Dovestones Reservoir in partnership with the RSPB and United Utilities.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places. The recommendation is also addressed by thematic policy GM-E5	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site.				++	The policy states: It will also need to take account of and deliver other highway improvements, including walking, cycling and bus infrastructure improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas, including linkages to Dovestones Reservoir, as well as explore and deliver opportunities for public transport services to and from the site.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	The site is not within 500m of an AQMA The policy makes reference to active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, and requirement for development to take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site. The recommendation is also addressed by Chapter 5 of the GMSF and thematic Policy GM-S 2 and Policy GM-S 6.	+	The site is not within 500m of an AQMA The policy makes reference to active transport provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	++/-	Within the site are priority habitats. Adjacent to the site along the eastern side is a SBI, SSSI, SAC, SPA and Peak District National Park. As such there is a risk and an opportunity to biodiversity and nature The policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas and which provides a green route along the river/brook, ensuring that development is set back to allow ecological movement. Be designed so as to minimise the landscape impact having regard to the findings and recommendations of the GM Landscape Character Assessment for the Unenclosed Uplands and Fringes (Dark Peak) – Shore Edge to Dovestones Reservoir Landscape	Consider ecological receptors throughout detailed design, especially the area of priority habitat and to the east of the site which is adjacent to a number of receptors, to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code and the retention and enhancement of biodiversity within the site, notably the areas of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network with the wider environment. It also requires a HRA and	++/-	Within the site are priority habitats. Adjacent to the site along the eastern side is a SBI, SSSI, SAC, SPA and Peak District National Park. As such there is a risk and an opportunity to biodiversity and nature The policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	++/-					++/-		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++/-	Character Type. Retain and enhance areas of biodiversity within and adjoining the site to deliver a clear and measurable net gain in biodiversity and be designed to relate positively to Chew Brook running through the site, including the protection and enhancement of semi-natural habitats and promotion of their public enjoyment. Ensure that development does not have an adverse impact on the integrity of the nearby Special Protection Area (SPA) and Special Area of Conservation (SAC).	Integrate green infrastructure throughout the scheme at masterplan stage, to mitigate from impact on the adjacent habitats		further ecological surveys to inform planning applications. The recommendation is also addressed by thematic policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10	++	Retain and enhance the hierarchy of biodiversity within the site, notably the areas of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network with the wider environment Ensure that development does not have an adverse impact on the integrity of the nearby Special Protection Area (SPA) and Special Area of Conservation (SAC). The recommendations from the Habitat Regulations Assessment must be considered	Scoring has been increased from very positive/ negative to very positive	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++/-	Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham Local Plan, including the enhancement of the existing playing fields.				++		Scoring has been increased from very positive/ negative to very positive	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+/O	Relatively average Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.				+/O	Relatively average Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	There is a section of the site in flood zone 3, which runs through the site and to the east. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk, the is especially relevant to the east of the site near Dovestone Reservoir	Partially	Changes have been made to policy wording, including the removal of reference to mitigation against any flood risk. However, the recommendation is addressed by thematic Policy GM-S5.	+	There is a section of the site in flood zone 3, which runs through the site and to the east. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment, which takes account of any recommendations form the Strategic Flood Risk Assessment Exceptions Test, and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. A detailed topographical study may be required. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+					+	There is a section of the site in flood zone 3, which runs through the site and to the east. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment, which takes account of any recommendations form the Strategic Flood Risk Assessment Exceptions Test, and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. A detailed topographical study may be required. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+					+	There is a section of the site in flood zone 3, which runs through the site and to the east. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment, which takes account of any recommendations form the Strategic Flood Risk Assessment Exceptions Test, and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. A detailed topographical study may be required. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+					+	There is a section of the site in flood zone 3, which runs through the site and to the east. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment, which takes account of any recommendations form the Strategic Flood Risk Assessment Exceptions Test, and feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems so as to control the rate of surface water run-off. A detailed topographical study may be required. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. In addition the policy states: Be informed by, and deliver the recommendations of, an appropriate visitor management plan to ensure that there is no adverse impact on Dovestones Reservoir, the Peak District National Park and designated conservation areas.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. In addition the policy states: Be informed by, and deliver the recommendations of, an appropriate visitor management plan to ensure that there is no adverse impact on Dovestones Reservoir, the Peak District National Park and designated conservation areas. Development must have regard to the duty to care for the Peak District National Park under Section 62(2) of the Environment Act		
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. In addition the policy states: Be informed by, and deliver the recommendations of, an appropriate visitor management plan to ensure that there is no adverse impact on Dovestones Reservoir, the Peak District National Park and designated conservation areas.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. In addition the policy states: Be informed by, and deliver the recommendations of, an appropriate visitor management plan to ensure that there is no adverse impact on Dovestones Reservoir, the Peak District National Park and designated conservation areas. Development must have regard to the duty to care for the Peak District National Park under Section 62(2) of the Environment Act		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to the provision of walking and cycling infrastructure The policy does not make reference to energy efficiency				+	Reference in policy to the provision of walking and cycling infrastructure Policy states: maximum energy efficiency through good building design and fuel-efficient technology		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+					+			
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+					+			

16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	No landscape designations Policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas and which provides a green route along the river/brook, ensuring that development is set back to allow ecological movement; Be designed so as to minimise the landscape impact having regard to the findings and recommendations of the GM Landscape Character Assessment for the Unenclosed Uplands and Fringes (Dark Peak) – Shore Edge to Dovestones Reservoir Landscape Character Type.				++	No landscape designations Policy states: Incorporate multi-functional green and blue infrastructure and high levels of landscaping so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. This should include footpath networks and recreation routes that incorporate existing trees, hedgerows, habitat areas and mill / fishing ponds, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas;		
		Conserve and enhance the historic environment, heritage assets and their setting?	++	The site contains two listed buildings; Greenfield House at Greenfield Mill and New Barn. In addition, the site is adjacent to Hey Top Conservation Area to the south west. The policy states: Preserve and enhance heritage assets within, and in the vicinity of, the site and their setting. This includes Hey Top Conservation Area and New Barn and Greenfield House at Greenfield Mill listed buildings. It will also identify and assess the potential impact on other non-designated heritage assets within the site and its setting.				++	The site contains two listed buildings; Greenfield House at Greenfield Mill and New Barn. In addition, the site is adjacent to Hey Top Conservation Area to the south west. The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications. Development proposals should seek opportunities to secure and enhance the sustainable use of Greenfield House and other non-designated heritage assets, including their settings		
		Respect, maintain and strengthen local character and distinctiveness?	++	The site contains two listed buildings; Greenfield House at Greenfield Mill and New Barn. In addition, the site is adjacent to Hey Top Conservation Area to the south west. The policy states: Preserve and enhance heritage assets within, and in the vicinity of, the site and their setting. This includes Hey Top Conservation Area and New Barn and Greenfield House at Greenfield Mill listed buildings. It will also identify and assess the potential impact on other non-designated heritage assets within the site and its setting.				++	The site contains two listed buildings; Greenfield House at Greenfield Mill and New Barn. In addition, the site is adjacent to Hey Top Conservation Area to the south west. The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications. Development proposals should seek opportunities to secure and enhance the sustainable use of Greenfield House and other non-designated heritage assets, including their settings		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+/-	Greenfield land and PDL				+/-	Greenfield land and PDL		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Grade 4 agricultural land	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	Grade 4 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+/-	Greenfield land and PDL	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+/-	Greenfield land and PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+/-	Greenfield land and PDL	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+/-	Greenfield land and PDL	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).			o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 465 new homes				+	Policy states: around 460 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: providing a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs, including the delivery of a mix of high quality family housing.				++	Policy states: providing a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs, including the delivery of a mix of high quality family housing		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy states: Mitigate the impact of the development on the local highway network as required, including by ensuring good public transport access and improving walking and cycling connections to Shaw and Royton town centres.				++	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in the policy	Make reference in the policy to bringing forward energy efficient housing e.g. Vehicle charging points, renewable energies	Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code which may address energy efficiency and resilience. The recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Policy text refers to a comprehensive masterplan and Design Code which may address energy efficiency and resilience	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5.	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops and metrolink stops which serve the development and the policy proposed transport improvements which link it to employment opportunities. The policy states: Mitigate the impact of the development on the local highway network as required, including by ensuring good public transport access and improving walking and cycling connections to Shaw and Royton town centres.				++	There are existing bus stops and metrolink stops which serve the development and the policy proposed transport improvements which link it to employment opportunities. The policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	The policy suggests transport infrastructure including: Mitigate the impact of the development on the local highway network as required, including by ensuring good public transport access and improving walking and cycling connections to Shaw and Royton town centres.				++	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities		
		Improve transport connectivity?	++	As above				++	As above		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in the policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1 . The policy / thematic policies could be strengthened with regard to benefits to deprived areas.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.

5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	The policy states: providing a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs, including the delivery of a mix of high quality family housing.	The allocation should encourage integration within existing communities and should provide a range of housing tenures	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	The policy states: providing a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs, including the delivery of a mix of high quality family housing.				++		No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Mitigate the impact of the development on the local highway network as required, including by ensuring good public transport access and improving walking and cycling connections to Shaw and Royton town centres. In relation to green infrastructure policy states: Deliver multi-functional green infrastructure and a high level of landscaping within the site and around the main development areas. This should include the retention of existing features where practicable, so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside				++	In relation to walking and cycling policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities In relation to green infrastructure policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site and around the main development areas. So as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the local plan for Oldham.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated, and local surpluses and deficiencies, in line with local planning policy requirements. This includes the retention or relocation, if required, and improvement of the existing play area off Kings Road, within the site		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Changes have been made to the allocation policy wording, including, including reference to a comprehensive masterplan and Design Code and states that development will be required to contribute to additional school places and health and community facilities. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	+	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham local plan				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated, and local surpluses and deficiencies, in line with local planning policy requirements. This includes the retention or relocation, if required, and improvement of the existing play area off Kings Road, within the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places. The recommendation is also addressed by thematic policy GM-E5	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: Mitigate the impact of the development on the local highway network as required, including by ensuring good public transport access and improving walking and cycling connections to Shaw and Royton town centres.				++	The policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	The site is within 500m of an AQMA The policy makes reference to active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it requires development to take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+/-	The site is within 500m of an AQMA The policy makes reference to active transport provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Within the site are a number of priority habitat sites and 'Ponds at Cowlishaw Farm' site of biological importance.	Consider ecological receptors throughout detailed design, to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code and the retention and enhancement of the hierarchy of biodiversity within the site, notably the existing Cowlishaw Ponds SBI and the area of priority habitat to the south of Crompton Primary School, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network with the wider environment. It also requires a Habitats Regulation Assessment and further ecological surveys to inform planning applications. The recommendation is also addressed by thematic policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10	+	Within the site are a number of priority habitat sites and 'Ponds at Cowlishaw Farm' site of biological importance. The policy states: Retain and enhance the hierarchy of biodiversity within the site, notably the existing Cowlishaw Ponds SBI and the area of priority habitat to the south of Crompton Primary School, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network with the wider environment. In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site and around the main development areas. So as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. In addition, the policy makes provision for recreation uses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+	The policy states: Retain and enhance areas of biodiversity within the site, most notably the existing Cowlishaw Ponds SBI and the area of priority habitat to the rear of Worsley Drive to deliver a clear and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network. In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site and around the main development areas. So as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be had to the conclusions of the Landscape Character Assessment for the Rochdale and Oldham South Pennines Foothills. In addition, the policy makes provision for recreation uses.			+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		Integrate green infrastructure throughout the scheme at masterplan stage, to mitigate from impact on the adjacent habitats	Yes		++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	-/O	Relatively average Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy for the whole site and deliver any appropriate recommendations and measures, including mitigation measures. Incorporate sustainable drainage systems within the site adjacent to the boundary with Crocus Drive, in the south western corner and below the area of development south of Denbigh Drive, so as to control the rate of surface water run-off. Any sustainable drainage systems should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs			Given the greater emphasis on climate change, it is considered this policy	-/O	Relatively average Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	None of the site is within flood zone 2 or 3. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy for the whole site and deliver any appropriate recommendations and measures, including mitigation measures. Incorporate sustainable drainage systems within the site adjacent to the boundary with Crocus Drive, in the south western corner and below the area of development south of Denbigh Drive, so as to control the rate of surface water run-off. Any sustainable drainage systems should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Yes	Changes have been made to the allocation policy wording, including reference to appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site and ensuing mitigation and sustainable drainage systems are in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. In addition, allocation policy wording has been amended to suggest that further opportunities to use natural flood management should be explored. The recommendation is also addressed by thematic policy GM-S5	+	None of the site is within flood zone 2 or 3. As such the policy reflects this stating: The policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency				+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency				+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency		
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency				+	Reference in policy to cycling and walking provision The policy does not make reference to energy efficiency		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	No landscape designations Policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site and around the main development areas. So as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be had to the conclusions of the Landscape Character Assessment for the Rochdale and Oldham South Pennines Foothills				++	No landscape designations Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site and around the main development areas. So as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	No heritage assets on the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals.				O	No heritage assets on the site The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications		
		Respect, maintain and strengthen local character and distinctiveness?	++	As above				++	As above		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	majority of the site is Grade 4 but some of the north is urban				+	majority of the site is Grade 4 but some of the north is urban		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	majority of the site is Grade 4 but some of the north is urban	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	majority of the site is Grade 4 but some of the north is urban	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	majority of the site is Grade 4 but some of the north is urban	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	majority of the site is Grade 4 but some of the north is urban	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	majority of the site is Grade 4 but some of the north is urban	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	majority of the site is Grade 4 but some of the north is urban	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans.		No changes made to the allocation policy wording. However, the	o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Promote reduced waste generation rates?	o	No mention in policy	and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy aims to deliver 260 homes including affordable housing.				+	Policy aims to deliver 260 homes including affordable housing.		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy includes a range of dwelling types and sizes.				++	Policy includes a range of dwelling types and sizes.		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	o	No mention in policy	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Yes	Changes have been made to the allocation policy wording, including reference to highway improvements that may be needed to improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities and delivery of multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) to enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation	++	No mention in policy	Scoring has been increased from neutral / no effect to very positive	No further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy.	Make specific reference to energy efficiency of the housing stock	Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code which may address energy efficiency and resilience. The recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Policy text refers to a comprehensive masterplan and Design Code which may address energy efficiency and resilience	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	Housing only				o	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy includes provision for additional schools to meet the increased demand. May be more appropriate to deal with education and training in thematic policies.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic policy GM-P1, GM-E4, GM-E5	++	Policy includes provision for additional schools to meet the increased demand.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	o	Housing only				o	Housing only		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy aims to deliver highway improvements and contribute to improved public transport facilities such as waiting facilities at bus stops.	Travel Plan would help mitigate any negative impact on transport network resulting from new development	Partially	Changes have been made to the allocation policy wording, including taking account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site. In addition travel plans are addressed in the Network Chapter.	+	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve transport connectivity?	+	Policy aims to deliver highway improvements including new public transport facilities.				+	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	o	Nothing proposed	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	o	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Amendments have been made to policy text, including referencing the delivery of a range of dwelling types to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				++		No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy includes provision of high quality walking and cycling infrastructure and delivery of multi-functional green space.				++	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	+	Policy includes delivery of multi-functional green infrastructure and high quality landscaping, and seeks to enhance linkages with the neighbouring communities and countryside.				+	Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas, so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	++	Policy calls for provision of appropriate health facilities to meet increased demand which will be placed on existing provision in conjunction with the local authority and Public Health.	Ensure provision is accessible to all and that capacity is considering during master planning	Partially	Changes have been made to the allocation policy wording, including, reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places and health and community facilities. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	++	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy provides for additional school places to meet the increased demand, either through expansion or provision of new facilities.				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority		
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	Policy seeks appropriate contribution towards provision of new community facilities.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements	Scoring has been increased from positive to very positive.	No further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy seeks contributions towards additional school places in regard to need generated by the development.				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority		
		Improve educational and skill levels of the population of working age?	O	No mention in policy; would be more appropriate for thematic policies.				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy seeks to improve highways, deliver high quality walking and cycling infrastructure, and contribute to improved public transport facilities such as waiting facilities.				+	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+					+			

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	The site is not within an AQMA. Policy includes provision for public transport, walking and cycling.				+	The site is not within an AQMA. Policy includes provision for public transport, walking and cycling.		
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	The site does not include any designations but 2 priority habitats lie to the south west. Policy seeks to deliver multi-functional greenspace, enhance linkages with the neighbouring communities and countryside, and retain and enhance biodiversity areas within the site. It additionally aims to retain and enhance existing recreational routes and Public Rights of Way as well as provide or improve open space/sport/recreation facilities.				+	The site does not include any designations but 2 priority habitats lie to the south west. Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas, so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+					+			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++			
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+		Include provision for amenity and tranquillity	Yes	Changes have been made to the allocation policy wording, including reference to delivering a multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas, so as to provide opportunities for leisure and recreation. The recommendation is also addressed by thematic Policy GM-G9 & GM-G10	++		Scoring has been increased from positive to very positive.	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Flood vulnerability is relatively low. Policy ensures appropriate flood risk assessment and a comprehensive drainage strategy, including sustainable drainage systems.	Design should include mitigation for high temperature events.	Yes	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code, alongside the wider GI network. The recommendation is also addressed by thematic Policy GM-S2, GM-S4 & GM-S5	+	Flood vulnerability is relatively low. Policy ensures appropriate flood risk assessment and a comprehensive drainage strategy, including sustainable drainage systems.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o	Site is not within a flood zone				o	Site is not within a flood zone		
		Ensure adequate measures are in place to manage existing flood risk?	+	Policy ensures appropriate flood risk assessment and a comprehensive drainage strategy, including sustainable drainage systems.				+	Policy states: Be informed by an appropriate flood risk assessment feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Opportunities to use natural flood management should be explored and the use of incorporating highway SUD's schemes		
		Ensure that development does not increase flood risk due to increased run-off rates?	+	Policy calls for delivery of measures to control the rate of surface water run-off.				+			
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	Policy calls for sustainable drainage systems.				+			
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.		
		Promote management practices that will protect water features from pollution?	O	Assumed compliance with best practice with regards to surface and ground water.				O	Assumed compliance with best practice with regards to surface and ground water.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Policy includes provision for public transport enhancements as well as provision for high quality walking and cycling infrastructure.	Make reference to low carbon and renewable energy, and ways in which energy efficiency can be increased.	Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code and to the enhancements of pedestrian and cycling links to encourage sustainable modes of transport. The recommendation is also addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	+	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities, such as waiting facilities at bus stops near the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-	No mention in policy		Partially	Changes have been made to the allocation policy wording, including referencing a comprehensive masterplan and Design Code and to the enhancements of pedestrian and cycling links to encourage sustainable modes of transport. The recommendation is also addressed by thematic Policy GM-S2 & GM-S3.	-	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-	No mention in policy				-	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	The site is entirely within a landscape character area. Policy aims provide new and/or improved open space, sport/recreation facilities.	Ensure landscape appraisal as part of any planning application	Yes	Changes have been made to the allocation policy wording, including ensuring regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines Foothills South / West Pennines. A Landscape Appraisal is required to inform any planning application. The recommendation is also addressed by thematic Policy GM-G1, GM-G2, GM-G6 & GM-E2	+	The site is entirely within a landscape character area. Policy aims provide new and/or improved open space, sport/recreation facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Conserve and enhance the historic environment, heritage assets and their setting?	+	There are no listed assets within the site. Policy seeks to preserve or enhance heritage and archaeological assets within the vicinity of the site.				+	There are no listed assets within the site. Policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications		
		Respect, maintain and strengthen local character and distinctiveness?	o	No mention in policy				o	No mention in policy		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	Encourage brownfield development over greenfield	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	Research needed into agricultural land quality and how impacts can be avoided/minimised	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	Encourage reuse of derelict land, properties, etc.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Site is primarily Grade 4 agricultural land classification with urban along the edges.	Encourage reuse of derelict land, properties, etc.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Land south of Coal Pit Lane (Ashton Road)

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 264 new homes				+	Policy states: around 255 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs				++	Policy states: range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs, including the delivery of high-quality family housing. Provide for affordable homes, in line with local planning policy requirements		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	Not referenced in the policy				O	Not referenced in the policy		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in the policy	Make reference in the policy to bringing forward energy efficient housing e.g. Vehicle charging points, renewable energies	Partially	No changes made to the allocation policy wording. However, recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Policy makes reference to a masterplan and Design Code which may address energy efficiency and resilience.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	+	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	+	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops which serve the development. The policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site.				++	There are existing bus stops which serve the development. The policy states: Provide for appropriate access points to and from the site in liaison with the local highways authority. As part of this, provision should be made to safeguard a route from the north western edge of the site through to Coal Pit Lane, linked to the internal road infrastructure of the site. Take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site;		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site; Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network so as to improve linkages and connections to adjoining communities and countryside				++	Policy states: Provide for appropriate access points to and from the site in liaison with the local highways authority. As part of this, provision should be made to safeguard a route from the north western edge of the site through to Coal Pit Lane, linked to the internal road infrastructure of the site. Take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site;		
		Improve transport connectivity?	++	Policy states: Provide for appropriate access points to and from the sites in liaison with the local highways authority and take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site; Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network so as to improve linkages and connections to adjoining communities and countryside				++	Policy states: Provide for appropriate access points to and from the site in liaison with the local highways authority. As part of this, provision should be made to safeguard a route from the north western edge of the site through to Coal Pit Lane, linked to the internal road infrastructure of the site. Take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site;		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in the policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1. The policy could be strengtehned through reference to deprivation.	?	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy..
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				?	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy..
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	The policy states: a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs.	The allocation should encourage integration within existing communities and should provide a range of housing tenures	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs	Scoring has been increased from neutral / no effect to very positive effect.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	As above				++		No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	In relation to walking and cycling policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside; take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. In relation to green infrastructure policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area				+	In relation to walking and cycling policy states: take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. In relation to green infrastructure policy states: Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment; Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation;		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the local plan for Oldham.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Changes have been made to the allocation policy wording, including, reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places and health and community facilities. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	+	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham local plan				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, it also states that development will be required to contribute to additional school places. The recommendation is also addressed by thematic policy GM-E5	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
		Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: Retain and enhance existing public rights of way				++			

9	Promote sustainable modes of transport	Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside; take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site.					++	The policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way); take account of and deliver any other highway improvements that may be needed so as to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site		
		Support the use of sustainable and active modes of transport?	++						++				
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	The site is not within 500m of an AQMA The policy makes reference to active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code, and requirement for development to take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+	The site is not within 500m of an AQMA The policy makes reference to a comprehensive masterplan and design code and active transport provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Within the site is a priority habitat and Fennifield Lily Ponds SBI. Adjacent to the site along the eastern corridor is a wildlife corridor. To the east of the site is Bankfield Clough site of biological importance and to the south there is ancient woodlands and a County Park. The policy states: Retain and enhance areas of biodiversity within and adjoining the site, most notably Fennifields Lily Ponds SBI and areas of priority habitat to the south of the site, to deliver a clear and measurable net gain in biodiversity. In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area. In addition, the policy makes provision for recreation uses.	Consider ecological receptors throughout detailed design, especially the area of priority habitat and SBI, to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan and Design Code. In addition, reference is made to the need to retain and enhance the hierarchy of biodiversity within the site, notably the existing Shawside SBI, including areas of priority habitats and the Twingates local nature reserve, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network which should ensure the requirements of wading bird populations are met	+	The policy states: Retain and enhance the hierarchy of biodiversity within the site, notably areas of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Contribution towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment In addition, the policy makes provision for recreation uses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	+		Integrate green infrastructure throughout the scheme at masterplan stage, to mitigate from impact on the adjacent habitats	Yes		++		Scoring has been increased from positive effect to very positive effect.	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	-/O	Relatively average to high Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.				-/O	Relatively average to high Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment feeding into a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network) and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. Opportunities to use natural flood management should be explored; and Incorporate necessary remediation measures in areas affected by contamination and previously worked for landfill purposes	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the east and south of the site. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk, the is especially relevant to the east and south of the site where there is closer proximity to River Medlock	Yes	Changes have been made to the allocation policy wording, including reference to appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site and ensuing mitigation and sustainable drainage systems are in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. In addition, allocation policy wording has been amended to suggest that further opportunities to use natural flood management should be explored. The recommendation is also addressed by thematic policy GM-S5	+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the east and south of the site. Policy states: Be informed by an appropriate flood risk assessment feeding into a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network) and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+					+			
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+					+			
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to the provision of walking and cycling infrastructure The policy does not make reference to energy efficiency				+	Reference in policy to the provision of walking and cycling infrastructure The policy does not make reference to energy efficiency		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+	Reference in policy to the provision of walking and cycling infrastructure The policy does not make reference to energy efficiency				+			
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	Reference in policy to the provision of walking and cycling infrastructure The policy does not make reference to energy efficiency				+			
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	No landscape designations Policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area.				++	No landscape designations Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	No heritage assets on the site. The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals. This includes Garden Suburbs Conservation Area, Bardsley House and Church of the Holy Trinity listed buildings, and other assets of local heritage significance				o	No heritage assets on the site. However there are listed buildings within 150m. The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications and take into consideration the findings of the Greater Manchester Historic Environment Assessment Screening Exercise, and provide an up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed		
		Respect, maintain and strengthen local character and distinctiveness?	++	No heritage assets on the site. The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals. This includes Garden Suburbs Conservation Area, Bardsley House and Church of the Holy Trinity listed buildings, and other assets of local heritage significance				++	No heritage assets on the site. However there are listed buildings within 150m. The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications and take into consideration the findings of the Greater Manchester Historic Environment Assessment Screening Exercise, and provide an up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Part of site is urban				+	Part of site is urban		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	The site is urban/ Grade 4 agricultural land	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	The site is urban/ Grade 4 agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Part of site is urban	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Part of site is urban	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Part of site is urban	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF	+	Part of site is urban	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E1.	o	Policy makes reference to a masterplan and Design Code which may consider waste and recycling facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 60 new homes				+	Policy states: around 60 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs				++	Policy states: range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	Not referenced in the policy	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Yes	Changes have been to the allocation policy wording, including reference to providing necessary highway improvements to improve accessibility to the surrounding areas.	++	Policy states: Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities	Scoring has been increased from neutral / no effect to very positive	No further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in the policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, recommendation is also addressed by thematic policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	+	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E4, GM-E5	+	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	There are existing bus stops which serve the development, but the policy does not reference new public transport infrastructure				++	There are existing bus stops which serve the development, Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities	Scoring has been increased from positive to very positive	No further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				+	There are existing bus stops which serve the development, Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities		
		Improve transport connectivity?	+	Policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				+	There are existing bus stops which serve the development, Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in the policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2	O	Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E4, GM-E5 & GM-P1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	The policy states: a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs.	The allocation should encourage integration within existing communities and should provide a range of housing tenures	Yes	Allocation policy wording requires development to deliver a range of dwelling types to deliver inclusive neighbourhoods and meet local needs and improve accessibility to the surrounding area. The recommendation is also addressed by thematic policy GM-E1 and Chapter 9 of the GMSF	++	The policy states: a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs.	Scoring has been increased from neutral / no effect to very positive effect.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				++	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	In relation to walking and cycling policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside In relation to green infrastructure policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area				+	Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation. Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment;		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the local plan for Oldham.				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Provide for appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Yes	Changes have been to the allocation policy wording, including the provision of financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment. The recommendation is also addressed by thematic policy GM-E5, GM-E6 & GM-E7	+	Policy states: Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority				++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with requirements set out in the Oldham local plan				++	Policy states: Provide for new and/or improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide for additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E5	++	Policy states: Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	The policy states: Retain and enhance existing public rights of way running through the site, integrating them as part of the multi-functional green infrastructure network, so as to improve linkages and connections to adjoining communities and countryside.				++	Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and countryside and provide opportunities for leisure and recreation. Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment;		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			

10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	The site is not within 500m of an AQMA The policy makes reference to active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Changes have been to the allocation policy wording, including the requirement for development to take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities. It requires multi functional green infrastructure. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+	The site is not within 500m of an AQMA The policy makes reference to active transport provision Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and countryside and provide opportunities for leisure and recreation. Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment. Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Within the site is a priority habitat and a site of biological importance 'Bankfield Clough' The policy states: Retain and enhance areas of biodiversity within and adjoining the site, most notably the SBI and area of priority habitat to the south of the site, to deliver a clear and measurable net gain in biodiversity. In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area. In addition, the policy makes provision for recreation uses.	Consider ecological receptors throughout detailed design, especially the area of priority habitat and SBI, to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including the retention and enhancement of biodiversity within the site, notably the SBI and area of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network. It also a requires a buffer between development plots of the SBI. It also requires further ecological surveys to inform planning applications. The recommendation is also addressed by thematic policy GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10	+	Within the site is a priority habitat and a site of biological importance 'Bankfield Clough' The policy states: Retain and enhance the hierarchy of biodiversity within the site, notably Bankfield Clough SBI and area of priority habitat to the south of the site, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating the delivery of functional ecological networks into multi-functional green infrastructure to enable free movement of species of principal importance. Planning proposals should incorporate a suitable buffer between development plots and the SBI to protect its important features In relation to green infrastructure the policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and countryside and provide opportunities for leisure and recreation In addition, the policy makes provision for recreation uses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++		Integrate green infrastructure throughout the scheme at masterplan stage, to mitigate from impact on the adjacent habitats	Yes		++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	-/O	Relatively average to high Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.				-/O	Relatively average to high Flood Vulnerability. The policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network) and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the east of the site. As such the policy reflects this stating: Be informed by an appropriate flood risk assessment and comprehensive drainage strategy and deliver any appropriate recommendations and measures (including mitigation measures and the incorporation of sustainable drainage systems) so as to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk, the is especially relevant to the east of the site where there is closer proximity to River Medlock	Yes	Changes have been made to the allocation policy wording, including reference to appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site and ensuing mitigation and sustainable drainage systems are in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. In addition, allocation policy wording has been amended to suggest that further opportunities to use natural flood management should be explored. The recommendation is also addressed by thematic policy GM-S5	+	None of the site is within flood zone 2 or 3. However, River Medlock runs to the east of the site. As such the policy reflects this stating: Policy states: Be informed by an appropriate flood risk assessment, feeding in a comprehensive drainage strategy for the whole site. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network) and be in line with the GM Strategic Flood Risk Assessment (SFRA) SUDSs guidance. Opportunities to use natural flood management should be explored	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+					+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to walking provision The policy does not make reference to energy efficiency				+	Reference in policy to walking provision The policy does not make reference to energy efficiency		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+					+			
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+					+			
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	No landscape designations Policy states: Deliver multi-functional green infrastructure and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside. Regard should also be has to the conclusions of the Incised Urban Fringe Valley – River Medlock Landscape Character Area.				++	No landscape designations Policy states: Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and countryside and provide opportunities for leisure and recreation		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	No heritage assets on the site. Bank Top Farmhouse is a nearby listed building to the south of the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals.				O	No heritage assets on the site. Bank Top Farmhouse is a nearby listed building to the south of the site The policy states: Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications.		
		Respect, maintain and strengthen local character and distinctiveness?	++	No heritage assets on the site. Bank Top Farmhouse is a nearby listed building to the south of the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the asset and their setting, when bringing forward the proposals.				++	No heritage assets on the site. Bank Top Farmhouse is a nearby listed building to the south of the site The policy states: Identify any designated and non-designated heritage assets and assess the potential impact on the assets and their setting, when bringing forward the proposals through a further Heritage Impact Assessments. Harm to the significance of Bank Top Farmhouse (Grade II listed building) should be mitigated through additional tree planting and native hedgerows to enhance the interface between the farmhouse and any new development		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+	Mostly urban land				+	Mostly urban land		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	The majority of the site is in urban and a small section to the west of the site is Grade 4 agricultural land				+	The majority of the site is in urban and a small section to the west of the site is Grade 4 agricultural land		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	Mostly urban land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	Mostly urban land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	Mostly urban land	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+	Mostly urban land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: deliver around 450 new homes				+	Policy states: deliver around 450 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	o	These will focus on larger, higher value properties				o	These will focus on larger, higher value properties		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy states: ensure high quality links/routes to the wider countryside	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Partially	Allocation policy has been amended to include access to electric vehicle charging infrastructure and cycle storage. The recommendation is addressed by Thematic Policy GM-N 1, GM-N 3 and GM-N 5.	+	Policy states: ensure high quality links/routes to the wider countryside. Provision of electric vehicle and cycle storage included.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	o	Nothing proposed				o	Nothing proposed		
		Support education and training to provide a suitable labour force for future growth?	+	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	Allocation policy amended to ensure there are sufficient school places to accommodate to new housing. The recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	+	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Bus route within 1km				++	Bus route within 1km		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: support the delivery of improvements to local highway network and public transport servicing the area including contributing to the potential extension of the proposed bus rapid transit services between Heywood and Manchester.				++	Policy states: support the delivery of improvements to local highway network and public transport servicing the area including contributing to the potential extension of the proposed bus rapid transit services between Heywood and Manchester.		
		Improve transport connectivity?	++	Policy states: support the delivery of improvements to local highway network and public transport servicing the area including contributing to the potential extension of the proposed bus rapid transit services between Heywood and Manchester.				++	Policy states: support the delivery of improvements to local highway network and public transport servicing the area including contributing to the potential extension of the proposed bus rapid transit services between Heywood and Manchester.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Nothing proposed No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Nothing proposed No mention, site assessment highlights local infrastructure in the area, but ability to support scale/distribution cannot be determined.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain investment/development will affect deprived areas				O	Cannot be certain investment/development will affect deprived areas	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain investment/development will affect deprived areas	Consider how development might have long term benefits for those living in deprivation within the policy directly although benefits are generally assumed with the developments increasing the number of jobs and the transport links into the area, along with a range of community facilities in some instances. It would be beneficial in terms of reduce the number of people living in deprivation to target deprived areas for new developments.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1.	O	Cannot be certain investment/development will affect deprived areas	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and provision of arrange of tenures	Partially	Allocation policy amended to specify that the site will have a focus on family housing. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)				O	Policy does not mention protected characteristics. It is assumed that the policy is too high level to affect protected characteristics (noting that development specifics such as access/facilities for the disabled and elderly will be considered at detailed design)		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: Retain and significantly enhance the existing recreational facilities as part of an integrated green infrastructure network on the site				++	Policy states: Retain and significantly enhance the existing recreational facilities as part of an integrated green and blue infrastructure network on the site		
		Reduce health inequalities within GM and with the rest of England?	O	Nothing proposed				O	Nothing proposed		
		Promote access to green space?	+	Policy states: Ensure there are high quality links/routes to the wider countryside				+	Policy states: Ensure there are high quality links/routes to the wider countryside		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to				O	No new provision is referred to		
		Ensure sufficient access to educational facilities for all children?	++					++			
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++					++			
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities		Yes	Allocation policy amended to ensure there are sufficient school places to accommodate to new housing.	++	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No changes have been made to scoring.	No further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	Nothing proposed				O	Nothing proposed		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area. Ensure there are high quality links/routes to the wider countryside.				+	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area. Ensure there are high quality links/routes to the wider countryside. Provide appropriate access to electric vehicle charging infrastructure and cycle storage		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+			Yes	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage.	++		Scoring has been increased from positive to very positive.	No further recommendations are made.
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	There is an AQMA within 150m of the site to the south Some mitigation proposed in policy.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors. This is especially important along the southern boundary to mitigation air quality from the AQMA	Yes	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	++/-	There is an AQMA within 150m of the site to the south Some mitigation proposed in policy. Policy states: Provide appropriate access to electric vehicle charging infrastructure and cycle storage;	Scoring has been increased from positive / negative to very positive / negative.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/?	There are no environmental or ecological receptors within the site.	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases.	Partially	Allocation policy wording amended to include blue infrastructure network on site. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+/?	There are no environmental or ecological receptors within the site.	Scoring has been increased from neutral / no effect to positive / no effect.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+	There are a number of nearby receptors: SAC within 15km: Rochdale Canal (3.022 km) ; South Pennine Moors (8.599 km), SPA within 15km: South Pennine Moors Phase 2 (8.599 km), SBI within 150m: Naden Brook (114 metres) [Ancient Woodland (Wd1)]				+	There are a number of nearby receptors: SAC within 15km: Rochdale Canal (3.022 km) ; South Pennine Moors (8.599 km), SPA within 15km: South Pennine Moors Phase 2 (8.599 km), SBI within 150m: Naden Brook (114 metres) [Ancient Woodland (Wd1)]		
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+					+			
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	+	Policy states: Development will take account of visual impact from Ashworth Valley to the west and ensure high quality links to the wider countryside. Policy makes reference to an integrated green infrastructure network on the site				+	Policy states: Development will take account of visual impact from Ashworth Valley to the west and ensure high quality links to the wider countryside. Policy makes reference to an integrated green and blue infrastructure network on the site		
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	o	No mention/no major risks - slight risk of surface water flooding 1/30 years	This is covered in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	o	No mention/no major risks - slight risk of surface water flooding 1/30 years	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	o					o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	o					o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	o					o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	o					o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	Assumed compliance with best practice with regards to surface and ground water. Naden Brook approx. 600m away	This is covered in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	Assumed compliance with best practice with regards to surface and ground water. Naden Brook approx. 600m away	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	Assumed compliance with best practice with regards to surface and ground water.	This is covered in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	Assumed compliance with best practice with regards to surface and ground water.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce	Encourage reduction in energy use and increased energy efficiency?	O	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

	greenhouse gas emissions	Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	Policy states: have regard to the existing character of the local area and visual impact from Ashworth Valley				++	Policy states: have regard to the existing character of the local area and visual impact from Ashworth Valley		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets within the site. There are a number of listed buildings to the south of the site Policy states: Have regard to the setting of the Listed Bamford Chapel immediately to the south of the site	Enhance wording more than just having regard to, ensure integration/ consideration to design	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1 & GM-E 2 and a masterplan required in the allocations policy will determine this..	O	There are no heritage assets within the site. There are a number of listed buildings to the south of the site Policy states: Have regard to the setting of the Listed Bamford Chapel immediately to the south of the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	++	Have regard to the existing character and setting of the area and surrounding countryside				++	Have regard to the existing character and setting of the area and surrounding countryside		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Agricultural land	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Agricultural land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within thematic policy GM-G 8 & GM-G 9.	--	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.				-	Grade 3 agricultural land - not clear whether this is 3a (good quality) which would be BMV or 3b (moderate quality) which wouldn't.		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	O	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	O	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	O	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).			O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 125 high quality homes				+	Policy states: around 125 high quality homes including higher value, family housing		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No mention in policy				O	No mention in policy		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy states: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. In reference to employment land the policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities. Policy also states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.				++	Policy states: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. In reference to employment land the policy states: Provide contributions to ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities. Policy also states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton, the Bee Network scheme and the nearby railway station, and westwards to employment locations around Heywood.		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Provide contributions to ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	Within 1km of existing bus stops. No new provision for public transport.	Ensure that access public transport is a key consideration of access to the site.			+	Within 1km of existing bus stops. Policy text includes reference to providing pedestrian and cycling routes through the site and to the centre of Castleton		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.				+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.		
		Improve transport connectivity?	+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.				+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	o	Cannot be certain that development will affect deprived areas.	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o				No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1			No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	Policy states: Built development will be limited to the eastern half of the site to minimise encroachment of built development into the Green Belt with the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. 7. Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. 8. Incorporate high quality landscaping, multi-functional green infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	Allocation policy amended to include higher value, family housing. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	+	Policy states: Built development will be limited to the eastern half of the site to minimise encroachment of built development into the Green Belt with the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. 7. Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. 8. Incorporate high quality landscaping, multi-functional green and blue infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	+	Policy states: Built development will be limited to the eastern half of the site to minimise encroachment of built development into the Green Belt with the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. 7. Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. 8. Incorporate high quality landscaping, multi-functional green infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land		Partially	Allocation policy amended to include higher value, family housing. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	+	Policy states: Built development will be limited to the eastern half of the site to minimise encroachment of built development into the Green Belt with the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. 7. Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. 8. Incorporate high quality landscaping, multi-functional green and blue infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	Allocation policy amended to include higher value, family housing. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		Partially	Allocation policy amended to include higher value, family housing. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. In relation to green infrastructure: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green infrastructure.				++	In relation to walking and cycling policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood. In relation to green infrastructure: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green and blue infrastructure.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	O	not referenced in policy				O	not referenced in policy		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No mention of new facilities. This is not referred to directly but this is a relatively small development	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	O	No mention of new facilities. This is not referred to directly but this is a relatively small development	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?					Allocation policy wording amended to provide contributions to ensure there are sufficient school facilities to serve the development. The recommendation is adequately addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to provide contributions to ensure provision of school facilities to serve the development. However, the recommendation is adequately addressed by Thematic Policy GM-E 5.	++	Policy states: Provide contributions to ensure that that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.				+	Policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+					+			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	An AQMA is located within 500m The policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage, as well as connection to the Castleton Bee Network scheme. The recommendation is adequately addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	+/-	An AQMA is located within 500m The policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/?	Site is located adjacent to a priority habitat for deciduous woodland and a wildlife corridor. No mitigation is incorporated in the policy The policy states: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green infrastructure.	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases. The policy states there will be an area of open space or nature conservation, but the use of 'or' leaves this ambiguous.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+/?	Site is located adjacent to a priority habitat for deciduous woodland and a wildlife corridor. No mitigation is incorporated in the policy The policy states: the western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green and blue infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	-/?		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from neutral / no effect to very positive.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	-		Scoring has been increased from neutral / no effect to positive.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	No part of the site is in flood zone 2 or 3. Policy states: Address the risk of surface water flooding that affects part of the site through an appropriate sustainable drainage strategy (SuDS).	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this.	+	No part of the site is in flood zone 2 or 3. Policy states: Address the risk of surface water flooding that affects part of the site through an appropriate sustainable drainage strategy (SuDS).	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this.			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this.			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this.			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?					No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this.			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	No changes made to allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5 and a masterplan required in the allocations policy will determine this	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	+	Reference in policy to cycling and walking: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2 and GM-S 3.	O	No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O			Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2 and GM-S 3.	O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land				+	Policy states: western part of the site will be redeveloped as an area of open space or nature conservation area and retained within the Green Belt. Incorporate high quality landscaping, multi-functional green and blue infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site. However, adjacent to the site to the east is Castleton (South) Conservation Area and a number of heritage assets. There is no reference to this in the policy	Consider adjacent Conservation Area and heritage assets throughout detailed design to reduce risk throughout construction and operational phases.	Partially	No changes made to the allocation policy wording. The recommendation is adequately addressed by Thematic Policy GM-G 1 & GM-E 2 and a masterplan required in the allocations policy will determine this..	O	There are no heritage assets on the site. However, adjacent to the site to the east is Castleton (South) Conservation Area and a number of heritage assets. There is no reference to this in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	There are no heritage assets on the site. However, adjacent to the site to the east is Castleton (South) Conservation Area and a number of heritage assets. There is no reference to this in the policy				O	There are no heritage assets on the site. However, adjacent to the site to the east is Castleton (South) Conservation Area and a number of heritage assets. There is no reference to this in the policy		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	++	The development area is brownfield land.				++	The development area is brownfield land.		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	The development area is brownfield land.				+	The development area is brownfield land.		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+	The development area is brownfield land.				+	The development area is brownfield land.		
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+	The development area is brownfield land.				+	The development area is brownfield land.		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy			No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 7.			No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 250 new homes				+	Policy states: around 250 new homes including higher value family homes		
			O	No mention in policy				O	No mention in policy		
			+	Policy states: new and improved access to the adjacent Queens Park				+	Policy states: new and improved access to the adjacent Queens Park		
			O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
			+	Policy states: Any proposal should provide some land adjacent to the existing school to the south of the site, to allow for the expansion of the school to accommodate the additional demand for places	Noted for each site but it would be better dealt with in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	+	Policy states: Any proposal should provide some land adjacent to the existing school to the south of the site, to allow for the expansion of the school to accommodate the additional demand for places. Financial contributions will also be required to ensure provision of primary and secondary schools places to serve the development.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			+	Within 1km of existing bus stops. No new provision for public transport.	Ensure that access public transport is a key consideration of access to the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-N 3.	+	Within 1km of existing bus stops. No new provision for public transport.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Provide appropriate access on to the A58 to the south of the site along with secondary access onto Mutual Street. Retain and enhance existing rights of way and general access through and around the site. This should include: New and improved access to the adjacent Queens Park; Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre: and Creation of a route adjacent to the River Roch to support the wider Roch Valley Way.				++	Policy states: Provide appropriate access on to the A58 to the south of the site along with secondary access onto Mutual Street. Retain and enhance existing rights of way and general access through and around the site. This should include: New and improved access to the adjacent Queens Park; Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre: and Creation of a route adjacent to the River Roch to support the wider Roch Valley Way.		
			++	Policy states: Provide appropriate access on to the A58 to the south of the site along with secondary access onto Mutual Street. This should include: New and improved access to the adjacent Queens Park; Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre: and Creation of a route adjacent to the River Roch to support the wider Roch Valley Way.		
			O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
			O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially			Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	Nothing proposed					Nothing proposed	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
			O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics					Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
			O	Nothing proposed					Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	In relation to walking and cycling policy states: Retain and enhance existing rights of way and general access through and around the site. This should include: New and improved access to the adjacent Queens Park; Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre: and Creation of a route adjacent to the River Roch to support the wider Roch Valley Way. No specific reference to green infrastructure other than PRoW improvements				+	In relation to walking and cycling policy states: Retain and enhance existing rights of way and general access through and around the site. (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 300 new homes				+	Policy states: around 300 new homes including higher value family housing		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	Not referenced in policy				O	Not referenced in policy		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy references links to the centres: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough				+	Policy references links to the centres: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Provide a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Facilitate the delivery of a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	Within 1km of existing bus stops. Policy states: Support the delivery of improvements to the local highway network and public transport serving the area;	Unsure that access public transport is a key consideration of access to the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-N 3.	++	Within 1km of existing bus stops. Policy states: Support the delivery of improvements to the local highway network and public transport serving the area;	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area; Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough.				++	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area; Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough.		
		Improve transport connectivity?	++	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area; Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough.				++	Policy states: Support the delivery of improvements to the local highway network and public transport serving the area; Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough; In relation to green infrastructure: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site			Allocation policy amended to include incorporation of high quality green and blue infrastructure	++	In relation to walking and cycling policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough; In relation to green infrastructure: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site including the incorporation of high quality green and blue infrastructure.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	+	Policy states: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site. In addition, the policy makes reference to outdoor playing space linked to a new primary school				+	Policy states: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site. In addition, the policy makes reference to outdoor playing space linked to a new primary school		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Provide a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area				++	Policy states: Facilitate the delivery of a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area		
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	Policy states: Provide a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area				+	Policy states: Facilitate the delivery of a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area		
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Provide a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to facilitate the delivery of a new primary school and associated outdoor playing space, and contribute to additional primary and secondary places to serve the development. However, the recommendation is adequately addressed by Thematic Policy GM-E 5.	++	Policy states: Facilitate the delivery of a new primary school and associated outdoor playing space at the southern end of the site and contribute to additional secondary places to meet demand arising from the new development as well as existing demand within the local area	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough; Support the delivery of improvements to the local highway network and public transport serving the area	Ensure that public transport is integrated into the scheme at masterplanning stage	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is adequately addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7, and a masterplan required in the allocations policy will determine this.	+	Policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough; Support the delivery of improvements to the local highway network and public transport serving the area	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+		Ensure that public transport is integrated into the scheme at masterplanning stage	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is adequately addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7, and a masterplan required in the allocations policy will determine this.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Support the use of sustainable and active modes of transport?	+		Ensure that public transport is integrated into the scheme at masterplanning stage	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is adequately addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7, and a masterplan required in the allocations policy will determine this.	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	An AQMA is not located within 500m. The policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough;	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. The recommendation is adequately addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	+	An AQMA is not located within 500m. The policy states: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough;	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/?	Within the site is a priority habitat for deciduous woodland, a site of biological importance 'Hollingworth Lake', Hollingworth country park and a wildlife corridor Limited mitigation in the policy. The policy makes reference to: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site;	Consider the priority habitat, SBI, wildlife corridor and Hollingworth Country Park throughout detailed design to reduce risk throughout construction and operational phases.	Partially	Allocation policy wording amended to include the incorporation of green and blue infrastructure. The recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+/?	Within the site is a priority habitat for deciduous woodland, a site of biological importance 'Hollingworth Lake', Hollingworth country park and a wildlife corridor Limited mitigation in the policy. The policy makes reference to: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site;	Scoring has been increased from negative /no effect to positive/ no effect	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-/?			Partially	Allocation policy wording amended to include the incorporation of green and blue infrastructure. The recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+/?		Scoring has been increased from negative /no effect to positive/ no effect	No further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?/+		Integrate green infrastructure throughout the scheme at masterplan stage	Partially	Allocation policy wording amended to include the incorporation of green and blue infrastructure. The recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive/no effect to very positive	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O			Partially	Allocation policy wording amended to include the incorporation of green and blue infrastructure. The recommendation is adequately addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+		Scoring has been increased from no effect to positive	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	The allocation is not within flood zone 2 or 3. Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy wording amended to include electric vehicle charging infrastructure and cycling provision. However, the recommendation is adequately addressed by thematic Policy GM-S2, GM-S3 and GM-S4.	+	Reference in policy to cycling and walking: Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy wording amended to include electric vehicle charging infrastructure and cycling provision. However, the recommendation is adequately addressed by thematic Policy GM-S2 and GM-S3.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy wording amended to include electric vehicle charging infrastructure and cycling provision. However, the recommendation is adequately addressed by thematic Policy GM-S2 and GM-S3.	+	No mention in policy	Score has improved from neutral to positive	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	Policy states: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site				++	Policy states: Deliver a landscape-led development which maximises its Pennine fringe setting and takes account of views from and into the site		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	No heritage assets within the allocation Not referenced in the policy				O	No heritage assets within the allocation Not referenced in the policy		
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: taking advantage of its attractive setting next to Hollingworth Lake and the Rochdale Canal				+	Policy states: taking advantage of its attractive setting next to Hollingworth Lake and the Rochdale Canal		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	-	Mainly greenfield site	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed within Chapter 4 and Chapter 9 of the GMSF.	-	Mainly greenfield site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Mostly Grade 4 apart from small patch to the west which is urban				+	Mostly Grade 4 apart from small patch to the west which is urban		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	-	Mainly greenfield site				-	Mainly greenfield site		
		Support reductions in land contamination through the remediation and reuse of previously developed land?	-	Mainly greenfield site				-	Mainly greenfield site		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is adequately addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 250 homes				+	Policy states: around 250 homes including higher value family housing		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: Deliver a mix of housing density, with the potential for higher density development in the south west part of the site closest to the village centre and the Metrolink stop. The northern and eastern parts of the site could include larger, higher value housing to diversify housing choice in the local area				++	Policy states: Deliver a mix of housing density, with the potential for higher density development in the south west part of the site closest to the village centre, the Metrolink stop and the existing cycle / walking network. The northern and eastern parts of the site could include larger, higher value housing to diversify housing choice in the local area. Provide safe and appropriate access onto Huddersfield Road		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy references links to the local centre: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Partially	Allocation policy has been amended to include access to electric vehicle charging infrastructure and cycle storage, as well as links to existing cycle/walking network and provide safe and appropriate access onto Huddersfield Road. The recommendation is addressed by Thematic Policy GM-N 1, GM-N 3 and GM-N 5.	++	Policy references links to the local centre: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	Within 1km of existing bus stops. In regard to public transport the policy states makes greater accessibility and parking for Newhey Metrolink stop	Ensure that access public transport is a key consideration of access to the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-N 3.	+	Within 1km of existing bus stops. In regard to public transport the policy states makes greater accessibility and parking for Newhey Metrolink stop and the existing cycle / walking network. Provide safe and appropriate access onto Huddersfield Road	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop;				+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop, and the existing cycle / walking network; Provide safe and appropriate access onto Huddersfield Road		
		Improve transport connectivity?	+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop;				+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop, and the existing cycle / walking network; Provide safe and appropriate access onto Huddersfield Road		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	Allocation policy wording amended to include creating of a high quality development including open space and landscaping, water features and safeguarding and enhancing biodiversity. The recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	+	Policy references the creation of open space and landscaping.	Scoring has been increased from no effect to positive.	No further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed		Partially	Allocation policy wording amended to include creating of a high quality development including open space and landscaping, water features and safeguarding and enhancing biodiversity. The recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	+	Policy references the creation of open space and landscaping.	Scoring has been increased from no effect to positive.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop; and In relation to green infrastructure: incorporating water features, the creation of attractive and interesting open spaces and landscaping.				++	In relation to walking and cycling policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop and the existing cycle / walking network Provide safe and appropriate access onto Huddersfield Road In relation to green infrastructure: incorporating water features, the creation of attractive and interesting open spaces and landscaping.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	+	Policy states: incorporating water features, the creation of attractive and interesting open spaces and landscaping.				+	Policy states: incorporating water features, the creation of attractive and interesting open spaces and landscaping.		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No mention of new facilities	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	O	No mention of new facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities..		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	++	Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	No mention of new facilities		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	O	No mention of new facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to provide contributions to ensure that there are sufficient school facilities schools to serve the development. The recommendation is addressed by Thematic Policy GM-E 5.	++	Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop				+	Policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop and the existing cycle / walking network. Provide safe and appropriate access onto Huddersfield Road		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+					+			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	An AQMA is located within 500m. The policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage, creation of open spaces and landscaping and enhancing biodiversity, as well as creating links to existing cycle/walking networks. The recommendation is addressed by Thematic Policy GM-S 6, GM-N 1, GM-N 3, GM-N 5, GM-G 2, GM-G 6, and a masterplan required in the allocations policy will determine this.	++/-	An AQMA is located within 500m. The policy states: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop and existing cycle/walking network. Provide safe and appropriate access onto Huddersfield Road	Scoring has been increased from positive / negative to very positive / negative.	No further recommendations are made.
11	Conserve and enhance biodiversity, green	Provide opportunities to enhance new and existing wildlife and geological sites?	+	Within the site is a priority habitat for deciduous woodland The policy states: Incorporate the features of the quarry in a way	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Allocation policy wording amended to create open spaces and landscaping, water features, safeguarding and enhancement of biodiversity, and reprofiling quarry face with biodiversity incorporation and attractive visual features. The re-profiled quarry face will be retained in the Green Belt. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++	Within the site is a priority habitat for deciduous woodland The policy states: Create a unique, high quality development including attractive and interesting open spaces and landscaping by carrying out any necessary re-profiling of the quarry face,	Scoring has been increased from positive to very positive	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+			Yes	Allocation policy wording amended to create open spaces and landscaping, water features, safeguarding and enhancement of biodiversity, and reprofiling quarry face with biodiversity incorporation and attractive visual features. The re-profiled quarry face will be retained in the Green Belt. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive	No further recommendations are made.

11	biodiversity, green infrastructure and geodiversity assets	Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+	which produces a unique, high quality development, including retaining and incorporating water features, the creation of attractive and interesting open spaces and landscaping.	Integrate green infrastructure throughout the scheme at masterplan stage	Yes	Allocation policy wording amended to create open spaces and landscaping, water features, safeguarding and enhancement of biodiversity, and reprofiling quarry face with biodiversity incorporation and attractive visual features. The re-profiled quarry face will be retained in the Green Belt. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++	incorporating water features and safeguarding and enhancing biodiversity Ensure that the re-profiled quarry face, which is to be retained in the Green Belt, takes the opportunity to incorporate biodiversity and attractive visual features to enhance the quality of the development;	Scoring has been increased from positive to very positive	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O			Yes	Allocation policy wording amended to create open spaces and landscaping, water features, safeguarding and enhancement of biodiversity, and reprofiling quarry face with biodiversity incorporation and attractive visual features. The re-profiled quarry face will be retained in the Green Belt. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O/-	A very small section of the site to the east is in flood zone 3 Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	+	Reference in policy to cycling and walking: Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey and the nearby Metrolink stop and the existing cycle/walking network No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Incorporate the features of the quarry in a way which produces a unique, high quality development, including retaining and incorporating water features, the creation of attractive and interesting open spaces and landscaping.				+	Policy states: Create a unique, high quality development including attractive and interesting open spaces and landscaping by carrying out any necessary re-profiling of the quarry face, incorporating water features and safeguarding and enhancing biodiversity Ensure that the re-profiled quarry face, which is to be retained in the Green Belt, takes the opportunity to incorporate biodiversity and attractive visual features to enhance the quality of the development		
		Conserve and enhance the historic environment, heritage assets and their setting?	-/+	Church of St. Thomas New Hey Grade II listed building to the west of the site. Not referenced in the policy	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	-/+	Church of St. Thomas New Hey Grade II listed building to the west of the site. Not referenced in the policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: Incorporate the features of the quarry in a way which produces a unique, high quality development, including retaining and incorporating water features, the creation of attractive and interesting open spaces and landscaping.				+	Policy states: Create a unique, high quality development including attractive and interesting open spaces and landscaping by carrying out any necessary re-profiling of the quarry face, incorporating water features and safeguarding and enhancing biodiversity Ensure that the re-profiled quarry face, which is to be retained in the Green Belt, takes the opportunity to incorporate biodiversity and attractive visual features to enhance the quality of the development		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land	Support the development of previously developed land and other sustainable locations?	++	Brownfield land				++	Brownfield land		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	++	Brownfield land, grade 4 agricultural land classification				++	Brownfield land, grade 4 agricultural land classification		
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	++	Brownfield land				++	Brownfield land		
		Support reductions in land contamination through the remediation and reuse of previously developed land?	++	Brownfield land				++	Brownfield land		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 210 new homes			Allocation policy amended to deliver around 200 homes including higher value family homes	+	Policy states: around 200 new homes including higher value family homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	Not referenced in policy				O	Not referenced in policy		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north				++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes. Provide appropriate access to electric vehicle charging infrastructure and cycle storage.		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	Within 1km of existing bus stops and train station. No reference to public transport improvements	Unsure that access public transport is a key consideration of access to the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-N 3.	+	Within 1km of existing bus stops and train station. No reference to public transport improvements	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north				++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes. Provide appropriate access to electric vehicle charging infrastructure and cycle storage.		
		Improve transport connectivity?	++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north				++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes. Provide appropriate access to electric vehicle charging infrastructure and cycle storage.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation needs to encourage integration with existing communities and provision of a range of tenures	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	In relation to walking and cycling policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north No reference to green infrastructure			Allocation policy amended to include the incorporation of green and blue infrastructure, a proposed new road incorporating high quality pedestrian and cycle routes	++	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes. Provide appropriate access to electric vehicle charging infrastructure and cycle storage. Policy includes the incorporation of green and blue infrastructure	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	o	Not referenced in policy				o	Not referenced in policy		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No mention of new facilities	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	O	No mention of new facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.		Partially	Allocation policy wording amended to provide contributions to ensure that there are sufficient school facilities schools to serve the development. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O	No mention of new facilities		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	O	No mention of new facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to provide contributions to ensure that there are sufficient school facilities schools to serve the development. The recommendation is addressed by Thematic Policy GM-E 5.	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north	Ensure that public transport is integrated into the scheme at masterplanning stage	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7	+	Policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes. Provide appropriate access to electric vehicle charging infrastructure and cycle storage. Policy includes the incorporation of green and blue infrastructure	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+			Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Support the use of sustainable and active modes of transport?	+			Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-G 2, GM-N 4, GM-N 5 & GM-N 7	+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	An AQMA is not located within 500m. The policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage, green and blue infrastructure and creating a new road incorporating cycle/walking routes. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	++	An AQMA is not located within 500m. The policy states: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes Policy includes the incorporation of green and blue infrastructure	Scoring has been increased from positive to very positive.	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	?/+	There is a wildlife corridor within the site The policy makes reference to: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses and the landscaping along the boundary of the site	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases.	Partially	Allocation policy wording amended to incorporate green and blue infrastructure. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+	There is a wildlife corridor within the site The policy makes reference to: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses, the incorporation of green and blue infrastructure and the landscaping along the boundary of the site	Scoring has been increased from positive / no effect to positive.	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	?/+			Partially	Allocation policy wording amended to incorporate green and blue infrastructure. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+		Scoring has been increased from positive / no effect to positive.	No further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?/+		Integrate green infrastructure throughout the scheme at masterplan stage	Partially	Allocation policy wording amended to incorporate green and blue infrastructure. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive / no effect to very positive.	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	?/+			Partially	Allocation policy wording amended to incorporate green and blue infrastructure. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+		Scoring has been increased from positive / no effect to positive.	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Scoring has been increased from no effect to positive.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Yes	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	O	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Appropriate flood risk mitigation, especially to the south of the site, should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	O	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)		Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)		Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	A small section of the site to the south is in flood zone 3 The policy states: Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. This should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS)	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered in a thematic policy	Partially	Allocation policy wording amended to contribute to flood alleviation measures of the River Roch rather than enhance measures. A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in a thematic policy	Partially	No change to allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3 & GM-S 4	+	Reference in policy to cycling and walking: Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north The layout of the scheme should be designed in a way to deliver the eastern section of a proposed residential relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporate attractive, high quality pedestrian and cycle routes No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	O	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses and the landscaping along the boundary of the site				+	Policy states: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses, the incorporation of green and blue infrastructure and the landscaping along the boundary of the site		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	No heritage assets within the allocation Not referenced in the policy				O	No heritage assets within the allocation Not referenced in the policy		
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses and the landscaping along the boundary of the site				+	Policy states: Have regard to the river valley setting in terms of the design and layout, particularly in relation to the materials uses, the incorporation of green and blue infrastructure and the landscaping along the boundary of the site		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4: Our Strategy.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Greenfield land, urban agricultural land classification 4 with small sections of urban land	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. The site has been reclassified as urban land. However, the recommendation is addressed within Chapter 4: Our Strategy.	++	Urban Land	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4: Our Strategy.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4: Our Strategy.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy to ensure this objective is achieved
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019						2020			
Ref	Objective	Assessment criteria….will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 360 homes			Allocation policy amended to include around 550 homes including higher value family housing	+	Policy states: around 550 homes including higher value family housing		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: incorporating a good mix of house types including higher value housing;				++	Policy states: incorporating a good mix of house types including higher value housing;		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Partially	Allocation policy has been amended to include access to electric vehicle charging infrastructure and cycle storage, as well having regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-N 1, GM-N 3 and GM-N 5.	+	Policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referenced in policy	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	Within 1km of existing bus stops. In regard to public transport the policy states: Contribute to public transport accessibility improvements	Ensure that access public transport is a key consideration of access to the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-N 3.	+	Within 1km of existing bus stops. In regard to public transport the policy states: Contribute to public transport accessibility improvements	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Contribute to public transport accessibility improvements; Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station				+	Policy states: Contribute to public transport accessibility improvements; Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station		
		Improve transport connectivity?	+	Policy states: Contribute to public transport accessibility improvements; Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station				+	Policy states: Contribute to public transport accessibility improvements; Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Not referenced in policy	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Not referenced in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic PolicyGM-E 1, GM-E 4, GM-E 5 & GM-P 1	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and GM-P 1.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy to ensure this objective is achieved.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF	O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station; In relation to green infrastructure: deliver a well-designed scheme which incorporates good quality green infrastructure				++	In relation to walking and cycling policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station; In relation to green infrastructure: deliver a well-designed scheme which incorporates good quality green and blue infrastructure having regard to existing biodiversity and greenspace corridors;		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	O	not referenced in policy				O	not referenced in policy		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities..		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	++	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7	-	No mention of new facilities. Assuming new population requires access to existing facilities, there is a risk to capacity.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Ensure that that are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording amended to provide contributions to ensure that there are sufficient school facilities schools to serve the development. The recommendation is addressed by Thematic Policy GM-E 5.	++	Policy states: Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station				+	Policy states: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+					+			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	An AQMA is located within 150m. The policy makes specific mention to air quality: Incorporate appropriate noise and air quality mitigation along the M62 and A627(M) motorway corridors The policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Yes	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage, and give regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-S 6, GM-N 1, GM-N 3, GM-N 5, GM-G 2, GM-G 6, and a masterplan required in the allocations policy will determine this.	++/--	An AQMA is located within 150m. The policy makes specific mention to air quality: Incorporate appropriate noise and air quality mitigation along the M62 and A627(M) motorway corridors The policy states: Provide good quality pedestrian and cycling routes through the site to facilitate safe and convenient access to the centre of Castleton and the nearby railway station, and westwards to employment locations around Heywood.	Score has improved from positive/very negative to very positive/very negative	No further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/?	Within the site there is a priority habitat for deciduous woodland and a wildlife corridor No mitigation is included in the policy The policy states: deliver a well-designed scheme which incorporates good quality green infrastructure	Consider ecological receptors throughout detailed design to reduce risk throughout construction and operational phases. Integrate green infrastructure throughout the scheme at masterplan stage	Partially	Allocation policy wording amended to include blue infrastructure and give regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++/?	Within the site there is a priority habitat for deciduous woodland and a wildlife corridor No mitigation is included in the policy The policy states: deliver a well-designed scheme which incorporates good quality green and blue infrastructure having regard to existing biodiversity and greenspace corridors;	Scoring has been increased from positive/no effect to very positive.	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/?			Partially	Allocation policy wording amended to include blue infrastructure and give regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++/?		Scoring has been increased from positive/no effect to very positive.	No further recommendations are made.
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+			Partially	Allocation policy wording amended to include blue infrastructure and give regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	++		Scoring has been increased from positive to very positive.	No further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O			Partially	Allocation policy wording amended to include blue infrastructure and give regard to existing biodiversity and greenspace corridors. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10 and a masterplan required in the allocations policy will determine this.	+		Score has improved from neutral to positive	No further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	No part of the site is in flood zone 2 or 3. Policy makes no reference.	This is covered within a thematic policy	Yes	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Scoring has been increased from no effect to positive.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	No part of the site is in flood zone 2 or 3. Policy makes no reference.	A suitable flood risk assessment may be required and associated mitigation in order to prevent the Flood zone expanding.	Yes	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Scoring has been increased from no effect to positive.	No further recommendations are made.
		Ensure adequate measures are in place to manage existing flood risk?	O	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Scoring has been increased from no effect to positive.	No further recommendations are made.
		Ensure that development does not increase flood risk due to increased run-off rates?	O	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Scoring has been increased from no effect to positive.	No further recommendations are made.

		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Appropriate flood risk mitigation should be implemented (in line with best practice) for all developments that are within or near to areas of flood risk	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	No part of the site is in flood zone 2 or 3. Policy makes no reference.	Scoring has been increased from no effect to positive.	No further recommendations are made.
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	No further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	Scoring has been increased from no effect to positive.	No further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within a thematic policy	Partially	A Level 2 SFRA has been completed for the site. The recommendation is addressed by Thematic Policy GM-S 5.	+	This is a consideration for detailed design and thematic policy.	Scoring has been increased from no effect to positive.	No further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station No reference to low carbon or renewables	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is addressed by thematic Policy GM-S2, GM-S3 and GM-S4.	+	Reference in policy to cycling and walking: Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station No reference to low carbon or renewables	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No change to allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	Allocation policy amended to provide appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is addressed by thematic Policy GM-S2 and GM-S3.	+	No mention in policy	Scoring has been increased from negative / no effect to positive.	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	O	No reference in policy				O	No reference in policy		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site.				O	There are no heritage assets on the site.		
		Respect, maintain and strengthen local character and distinctiveness?	O	There are no heritage assets on the site.				O	There are no heritage assets on the site.		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Greenfield land	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Greenfield land	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	+	Greenfield land, grade 4 agricultural land classification	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	+	Greenfield land, grade 4 agricultural land classification	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	The allocation is for housing.	Reference could be made directly in the policy to the number of dwellings that will be provided on the allocation.	Yes	Policy already states for 400 dwellings	+	Land at Hazelhurst to the east of the M60 and south of the A580 East Lancashire Road will be developed for around 400 dwellings	No change has been made to scoring.	No further recommendations are made.
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No reference to this in the policy	Include details regarding mix of housing	Partially	Assumed 400 houses. The exact mix will be determined through a masterplan.	O	No reference to this in the policy	No change has been made to scoring. Will be determined through masterplan	No further recommendations are made.
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Policy States: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. The site benefits from close proximity to the route of services that utilise the Leigh Guided Busway, provided access to employment and leisure opportunities.				++	Policy States: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. The site benefits from close proximity to the route of services that utilise the Leigh Guided Busway, provided access to employment and leisure opportunities.		
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.				O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.		
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-P 1, GM-E 4, GM-E 5	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	Housing only				O	Housing only		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site				++	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site		
		Improve transport connectivity?	+	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site				+	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	Policy states: Provide a buffer for the overhead power lines that run across the site, in accordance with National Grid requirements. However this only maintains the current position and does not improve it.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	Policy states: Provide a buffer for the overhead power lines that run across the site, in accordance with National Grid requirements. However this only maintains the current position and does not improve it.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	o	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1. It is considered that the policy / thematic policy could be strengthened by specific reference to tackling deprivation.	o	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	o	Cannot be certain that development will affect deprived areas.				o	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	o	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	o	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	o	Nothing proposed				o	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	o	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				o	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	o	Each allocation is within a specific location and therefore is within one area type.				o	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site. Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. In addition, the policy makes reference to providing new allotment plots.				++	Policy states: high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site. Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. In addition, the policy makes reference to providing new allotment plots.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. In addition, the policy makes reference to providing new allotment plots.				++	Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. In addition, the policy makes reference to providing new allotment plots.		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	-/?	No new provision is referred to	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	-/?	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing				++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	Policy makes provision for new allotment plots				+	Policy makes provision for new allotment plots	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing				++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing		
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy		
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site.				+	Policy states: Be designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops. In addition, the policy makes reference to incorporating attractive public rights of way through the site.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+					+			
		Support the use of sustainable and active modes of transport?	+					+			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	The site is within 150m of an AQMA. The policy supports the use of active modes of transport and the use of public transport, in particularly bus rapid transit service	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	Allocation policy amended to take opportunities to incorporate green infrastructure that can most effectively benefit the site and the wider area. The recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	+/--	The site is within 150m of an AQMA. The policy supports the use of active modes of transport and the use of public transport, in particularly bus rapid transit service	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/-	The site is within a wildlife corridor and is adjacent to a priority habitat for Lowland fens. In addition the site is adjacent Worsley Woods which is a site of biological importance Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. Protect and enhance the Worsley Woods Site of Biological Importance to the west of the site. In addition, the policy makes reference to providing new allotment plots.				+/-	The site is within a wildlife corridor and is adjacent to a priority habitat for Lowland fens. In addition the site is adjacent Worsley Woods which is a site of biological importance Policy states: Protect and enhance the Worsley Woods site of biological interest to the west of the site, retain other mature woodland, hedgerows, swamp and water bodies. Protect and enhance the Worsley Woods Site of Biological Importance to the west of the site. In addition, the policy makes reference to providing new allotment plots. Respond to the site's location, characteristics and surroundings to take opportunities to incorporate green infrastructure that can most effectively benefit the site and the wider area;		
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/-					+/-			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++			
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++					++			
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	Site is has relatively low flood vulnerability Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.	This is covered in thematic policies	Partially	Policy has been amended to include ensuring that surface water flooding mitigation systems must ensure there is no adverse impact on the potential for flooding off-site. The recommendation is addressed by thematic Policy GM-S 5.	+	Site is has relatively low flood vulnerability Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site, while ensuring that there is no adverse impact on the potential for flooding off-site;	Scoring has been increased from no effect to positive.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	Allocation is not in a flood zone Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.				O	Allocation is not in a flood zone Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.		
		Ensure adequate measures are in place to manage existing flood risk?	O					O	Allocation is not in a flood zone Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.		

		Ensure that development does not increase flood risk due to increased run-off rates?	O					O	Allocation is not in a flood zone Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O					O	Allocation is not in a flood zone Policy states: Incorporate sustainable drainage systems to mitigate the surface water flooding on the site.		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site	This is covered in thematic policies	Partially	Policy has been amended to include ensuring that surface water flooding mitigation systems must ensure there is no adverse impact on the potential for flooding off-site. The recommendation is addressed by thematic Policy GM-S 5.	++	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Promote management practices that will protect water features from pollution?	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site	This is covered in thematic policies	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered in thematic policies	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3 & GM-S 4.	+	Reference in policy to cycling and walking	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?					-/?			
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?					-/?			
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Retain other mature woodland, hedgerows, and swamp and water bodies as important landscape features, supporting an overall increase in the nature conservation value of the site. The landscape features within and around the site are important to the character of the wider area, and their rendition will help to differentiate its development and ensure a high quality residential environment				+	Policy states: Retain other mature woodland, hedgerows, and swamp and water bodies as important landscape features, supporting an overall increase in the nature conservation value of the site. The landscape features within and around the site are important to the character of the wider area, and their rendition will help to differentiate its development and ensure a high quality residential environment		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no heritage assets on the site.	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases, particularly to the locally listed buildings to the south of the site.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-E 2 and a masterplan required in the allocations policy will determine this..	O	There are no heritage assets on the site.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: Ensure that vehicular access to the site does not compromise the quality of existing residential areas	Ensure the policy is designed to take advantage of the natural landscape assets and connections to these both on and off site and also townscape assets that are present.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-E 1, GM-E 2, GM-E 3 and a masterplan required in the allocations policy will determine this..	+	Policy states: Ensure that vehicular access to the site does not have an unacceptable impact on the quality of existing residential areas	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Land is on an agricultural greenfield site	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Land is on an agricultural greenfield site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 3 agricultural land (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Yes	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	+	Grade 3 agricultural land (subset of Grade 3 not known, worst case scenario has been assumed)	Scoring has been increased from very negative to positive.	Development could accord with the results of the Agricultural Land Assessment.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield				--	Greenfield		
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy	As above			o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019						2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	The allocation is for housing.	Reference could be made directly in the policy to the number of dwellings that will be provided on the allocation.	Yes	Policy already states for 300 dwellings	+	Policy states around 300 dwellings will be built	No change has been made to scoring.	No further recommendations are made.
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No mention in policy	Include details regarding mix of housing	Partially	Assumed 300 houses. The exact mix will be determined through a masterplan.	O	No mention in policy	No change has been made to scoring. Will be determined through masterplan	No further recommendations are made.
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy States: Utilise Shaw Brook as a central landscape feature running through the site, with the retention of significant open land around it. Policy also references: Retain the existing playing fields and footpaths.				+	Policy States: Utilise Shaw Brook as a central landscape feature running through the site, with the retention of significant open land around it. Policy also references: Retain the existing playing fields and footpaths.	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy.	May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3, GM-S 4 and GM-S 5.	O	Not referred to in policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P 1, GM-E 4, GM-E 5	O	Housing only	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support education and training to provide a suitable labour force for future growth?	O	Housing only				O	Housing only	No change	
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	Housing only				O	Housing only	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route				+	Policy states: Secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route	No change	
		Improve transport connectivity?	+	Policy states: Secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route				+	Policy states: Secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	There is no mention of this type of infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O					O		No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF. The policy requires 50% affordable housing with a mix of tenures.	O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	+	Policy states: ensure good quality walking and cycling routes, retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature Improvement Area and utilise Shaw Brook as a central landscape feature running through the site.				+	Policy states: ensure good quality walking and cycling routes, retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature Improvement Area and utilise Shaw Brook as a central landscape feature running through the site.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature Improvement Area and utilise Shaw Brook as a central landscape feature running through the site.				++	Policy states: retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature Improvement Area and utilise Shaw Brook as a central landscape feature running through the site.		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	O	No new provision is referred to	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	O					O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++					++		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	-/?	No new provision is referred to				-/?	No new provision is referred to		
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O			
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	+ / -	Policy states: Ensure good quality access by walking and cycling for all residents to services in Boothstown, bus services on the surrounding road network, the Bridgewater Canal and Chat Moss to the south. In addition, secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route to RHS Garden Bridgewater, Worsley Village and Boothsbank Park	The policy includes comments on sustainable travel, however it is noted that the site is not very accessible by public transport.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-N 1, GM-N 3 and GM-N 5.	+ / -	Policy states: Ensure good quality access by walking and cycling for all residents to services in Boothstown, bus services on the surrounding road network, the Bridgewater Canal and Chat Moss to the south. In addition, secure further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route to RHS Garden Bridgewater, Worsley Village and Boothsbank Park	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	+ / -					+ / -			
		Support the use of sustainable and active modes of transport?	+ / -					+ / -			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/--	Within 150m of AQMA, but also includes reference to retaining existing footpath	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2, and a masterplan required in the allocations policy will determine this.	+/--	Within 150m of AQMA, but also includes reference to retaining existing footpath	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+/-	SACs within 15km of the sites boundary: Manchester Mosses (3.69km) [UK0030200]; Rixton Clay Pits (10.378km) [UK0030265]. Policy states: retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature Improvement Area and utilise Shaw Brook as a central landscape feature running through the site.			Allocation policy justification amended to include a priority for any off-site nature conservation enhancements to deliver a minimum 10% net gain in biodiversity from the development.	+	SACs within 15km of the sites boundary: Manchester Mosses (3.69km) [UK0030200]; Rixton Clay Pits (10.378km) [UK0030265].	Scoring has been increased from neutral to positive.	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/-					+/-	Policy states: retain or replace the existing playing fields, include new allotment plots, support Greater Manchester Wetlands Nature		
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++					++			
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquility?	+					+			
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Policy states: mitigate flood risk and incorporate sustainable drainage systems	This is covered within thematic policies.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	+	Policy states: mitigate flood risk and incorporate sustainable drainage systems	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	1.2% in flood zones. Some within flood zones 2 and 3.				O	1.2% in flood zones. Some within flood zones 2 and 3.		
		Ensure adequate measures are in place to manage existing flood risk?	+	Policy states: mitigate flood risk and incorporate sustainable drainage systems				+	Policy states: mitigate flood risk and incorporate sustainable drainage systems		
		Ensure that development does not increase flood risk due to increased run-off rates?	+	Policy states: mitigate flood risk and incorporate sustainable drainage systems				+	Policy states: mitigate flood risk and incorporate sustainable drainage systems		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	Policy states: mitigate flood risk and incorporate sustainable drainage systems				+	Policy states: mitigate flood risk and incorporate sustainable drainage systems		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	This is covered within thematic policies.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	O	As above				O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within thematic policies.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to buses, cycling and walking	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3, and GM-C 5.	+	Reference in policy to buses, cycling and walking	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention in policy		Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S.	-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention in policy				-/?	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
	Conserve and/or enhance landscape	Improve landscape quality and the character of open spaces and the public realm?	+	The policy states: retain Alder Wood and the other areas of mature deciduous woodland and protected trees.	Ensure landscape appraisal as part of any planning application	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1 and GM-G 10.	+	The policy states: retain Alder Wood and the other areas of mature deciduous woodland and protected trees.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no listed buildings on the site. Policy states: preserve and enhance the setting of nearby heritage assets				O	There are no listed buildings on the site. Policy states: Conserve and enhance the setting of nearby heritage assets		

16	townscape, heritage assets and their setting and the character of GM	Respect, maintain and strengthen local character and distinctiveness?	?/+	None proposed				?/+	None proposed			
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Land is on an agricultural greenfield site	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4: Our Strategy.	--	Land is on an agricultural greenfield site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 3 agricultural land (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised	Yes	An Agricultural Land Assessment has been undertaken by the landowner.	-	Grade 3 agricultural land (subset of Grade 3 not known, worst case scenario has been assumed)	Scoring has been increased from very negative to negative.	Development could accord with the results of the Agricultural Land Assessment.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-G 10.	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield				--			
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy ...
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

North of Irlam Station

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	++	The allocation is for housing.				++	Policy states around 1,400 dwellings will be built	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy States: a broad mix of housing with densities increasing towards the most accessible parts of the site around Irlam Station, including accommodation specifically targeted at older people				++	Policy States: a broad mix of housing with densities increasing towards the most accessible parts of the site around Irlam Station, including accommodation specifically targeted at older people	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	Policy States: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows				+	Policy States: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.				O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	No change	
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing				++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	No change	
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	Housing only				O	Housing only	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station				++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	No change	
		Improve transport connectivity?	++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station				++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	?	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	?	There is no mention of this type of infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1. The policy could be strengthened to specifically refer tp tackling deprivation.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O	Cannot be certain that development will affect deprived areas.				O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Nothing proposed	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	Allocation policy amended to reduce affordable housing provision by 5%. However, the recommendation is addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	O	Nothing proposed	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	Nothing proposed				O	Nothing proposed	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station				++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. In addition, the allocation makes reference to providing new allotment plots and a new neighbourhood park including equipped areas for play.				++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. In addition, the allocation makes reference to providing new allotment plots and a new neighbourhood park including equipped areas for play.	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No new provision is referred to	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation Policy description has been amended to include capacity of associated social and community uses. The recommendation is addressed by Thematic Policy GM-E 5, GM-E 6 & GM-E 7.	O	Policy States: The site has capacity for around 1,400 dwellings and associated social and community uses	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing				++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	++	Policy makes provision for new neighbourhood equipped area of play and new allotment plots				++	Policy makes provision for new neighbourhood equipped area of play and new allotment plots	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing				++	Policy states: Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing	No change	
		Improve educational and skill levels of the population of working age?	O	No mention in policy				O	No mention in policy	No change	
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station				++	Policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	No change	
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++		No change	
		Support the use of sustainable and active modes of transport?	++					++		No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	The site is within 500m of an AQMA. The policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 6 & GM-G 2.	+/-	The site is within 500m of an AQMA. The policy states: Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss. In addition, the policy states: Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	+	The site is adjacent to a wildlife corridor and a priority habitat for deciduous woodland. In addition the site contains a GMEU Priority species site.			Allocation policy amended to achieve a minimum 10% net gain in biodiversity from the development. The recommendation is addressed by Thematic Policy GM-G 2, GM-G 6, GM-G 8, GM-G 9 & GM-G 10.	++	The site is adjacent to a wildlife corridor and a priority habitat for deciduous woodland. In addition the site contains a GMEU Priority species site.	Scoring has been increased from positive to very positive.	No further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+					+		No change	
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. In addition, the allocation makes reference to supporting the objectives for the Greater Manchester Wetlands Nature Improvement Area, minimising the loss of carbon storage function of the peat and avoid any adverse impacts on the hydrology of Chat Moss, providing new allotment plots and a new neighbourhood park including equipped areas for play.				++	Policy states: Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows. In addition, the allocation makes reference to supporting the objectives for the Greater Manchester Wetlands Nature Improvement Area, minimising the loss of carbon storage function of the peat and avoid any adverse impacts on the hydrology of Chat Moss, providing new allotment plots and a new neighbourhood park including equipped areas for play.	No change	
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	++					++		No change	
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	O	No reference to this in the policy	This is covered within thematic policies.	Yes	Allocation policy has been amended to incorporate measures to mimic natural drainage through the use of sustainable urban drainage to control surface water run-off, and the undertaking of a hydrological assessment to avoid adverse impacts on the hydrology of Chat Moss. The recommendation is addressed by Thematic Policy GM-S 5.	+	No reference to this in the policy	Scoring has been increased from no effect to positive.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	Allocation is not in a flood zone				O	Allocation is not in a flood zone	No change	
		Ensure adequate measures are in place to manage existing flood risk?	O					+	No reference to this in the policy		
		Ensure that development does not increase flood risk due to increased run-off rates?	O					+	No reference to this in the policy		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	O					O	No reference to this in the policy		

14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site	This is covered within thematic policies.	Partially	Allocation policy has been amended to incorporate measures to mimic natural drainage through the use of sustainable urban drainage to control surface water run-off, and the undertaking of a hydrological assessment to avoid adverse impacts on the hydrology of Chat Moss. The recommendation is addressed by Thematic Policy GM-S 5.	+	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses. Policy States: protect the quality of watercourses through and around the site Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off;	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote management practices that will protect water features from pollution?	+	As above	This is covered within thematic policies.	Partially	Allocation policy has been amended to incorporate measures to mimic natural drainage through the use of sustainable urban drainage to control surface water run-off, and the undertaking of a hydrological assessment to avoid adverse impacts on the hydrology of Chat Moss. The recommendation is addressed by Thematic Policy GM-S 5.	+	As above	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.	This is covered within thematic policies.	Partially	Allocation policy has been amended to incorporate measures to mimic natural drainage through the use of sustainable urban drainage to control surface water run-off, and the undertaking of a hydrological assessment to avoid adverse impacts on the hydrology of Chat Moss. The recommendation is addressed by Thematic Policy GM-S 5.	O	This is a consideration for detailed design and thematic policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Reference in policy to cycling and walking	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport. The site is peat and therefore there are potential CO2 impacts.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3, and GM-S 4.	+	Reference in policy to cycling and walking	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	O				No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3.	O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+				No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 2, GM-S 3.	++		Scoring has been increased from positive to very positive.	No further recommendations are made.
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	The policy states: retain Alder Wood and the other areas of mature deciduous woodland and protected trees.	Ensure landscape appraisal as part of any planning application	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-G 1, GM-G 2, GM-G 6 & GM-E 2.	+	The policy states: retain Alder Wood and the other areas of mature deciduous woodland and protected trees.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Conserve and enhance the historic environment, heritage assets and their setting?	O	There are no listed buildings on the site.				O	There are no listed buildings on the site.	No change	
		Respect, maintain and strengthen local character and distinctiveness?	+	Policy states: 5. Ensure that vehicular access to the site does not compromise the quality of existing residential areas				+	Policy states: 5. Ensure that vehicular access to the site does not compromise the quality of existing residential areas	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	--	Land is on an agricultural greenfield site	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Land is on an agricultural greenfield site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 1 agricultural land				--	Grade 1 agricultural land	No change	
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Greenfield	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed within Chapter 4 and Chapter 9 of the GMSF	--	Greenfield	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--	Greenfield				--	Greenfield	No change	
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the allocation policy wording.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods are integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-S 7, and a masterplan required in the allocations policy will determine this.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

1	Provide a sustainable supply of housing land including for an	1	Provide a sustainable supply of housing land including for an	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	No housing proposed				O	No housing proposed		
					O	No housing proposed				O	No housing proposed		
					O	No housing proposed				O	No housing proposed		
					O	No housing proposed				O	No housing proposed		
2	Provide a sustainable supply of employment land to ensure sustainable economic growth	2	Provide a sustainable supply of employment land to ensure sustainable economic growth	Meet current and future demand for employment land across GM?	++	Employment site	Make reference in the policy to the size of the site and the type of employment proposed.	Yes	Allocation Policy states around 320,000 sq m of industrial and warehousing floorspace will be provided	++	Employment site	No change has been made to scoring.	No further recommendations are made.
					O	No mention in policy				O	No mention in policy		
					++	Existing public transport near by - bus stops				++	Existing public transport near by - bus stops		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy makes reference to provision of railway link, highway improvements, high quality walking and cycling routes, access from bus stops and potential Metrolink extension				++	Policy makes reference to provision of railway link, highway improvements, high quality walking and cycling routes, access from bus stops and potential Metrolink extension		
					++	Policy makes reference to provision of railway link, highway improvements, high quality walking and cycling routes, access from bus stops and potential Metrolink extension				++	Policy makes reference to provision of railway link, highway improvements, high quality walking and cycling routes, access from bus stops and potential Metrolink extension		
					O	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1 & GM-N 2, and a masterplan required in the allocations policy will determine this.	O	There is no mention of this type of infrastructure.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O	Cannot be certain that development will affect deprived areas.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Thematic Policy GM-E 1, GM-E 4, GM-E 5 & GM-P 1. This policy / thematic policy could be strenthened by specific reference to tackling deprivation.	O	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
					O	Cannot be certain that development will affect deprived areas.					Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy
5	Promote equality of opportunity and the elimination of discrimination	5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	+	Policy mentions: Involve high levels of community engagement, including through frequent liaison meetings convened by the landowner and / or developers.	Clarify if the community engagement will be during construction or operation and the purpose of the engagement to identify the opportunities, such as identifying and promoting local employment opportunities.	Yes	Allocation policy already states the development will Involve high levels of community engagement, including through regular liaison meetings convened by the landowner and/or developers. Purpose of this engagement, or stage of development it will be held at is not discussed in the policy. The recommendation is also addressed by Thematic Policy GM-E 1 and Chapter 9 of the GMSF.	+	Policy mentions: Involve high levels of community engagement, including through regular liaison meetings convened by the landowner and / or developers.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
					+	Policy mentions: Involve high levels of community engagement, including through frequent liaison meetings convened by the landowner and / or developers.				+	Policy mentions: Involve high levels of community engagement, including through regular liaison meetings convened by the landowner and / or developers.	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy to ensure this objective is achieved.
					O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics				O	Policy does not mention this, it is assumed that it is too high level to affect unprotected characteristics

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	O	No housing proposed				O	No housing proposed	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	O	No housing proposed				O	No housing proposed	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	O	No housing proposed				O	No housing proposed	No change	
		Support improvements in the energy efficiency and resilience of the housing stock?	O	No mention in policy.				O	No mention in policy.	No change	
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	++	Employment site - 90,000 sqm of B2 and B8 floorspace proposed, in a range of unit sizes.				++	Employment site - 60,000 sqm of B2 and B8 floorspace proposed, in a range of unit sizes.	No change	
		Support education and training to provide a suitable labour force for future growth?	O	No mention in policy, but the development of employment land could result in an increase in education and training for the local workforce	Noted for each site but recognise it would be better dealt with in a thematic policy	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policies GM-P1, GM-E5, GM-E6	O	No mention in policy, but the development of employment land could result in an increase in education and training for the local workforce	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	+	Existing public transport near by- bus stops. Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village.	Policy should mention links to other areas that there will be links to, not only referencing Stockport Sports Village.	Partially	No changes have been made to the policy. The policy does however state improving cycling and walking links to adjacent local communities in Stockport and Tameside. It also requires imporvements to public transport.	++	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.	For consistency, and to reflect references to improved access within the policy, scoring has been changed to very positive.	When the framework is read as a whole, no further recommendations are made.
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village.				++	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.	No change	
		Improve transport connectivity?	++	Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village.	Policy should mention links to other areas that there will be links to, not only referencing Stockport Sports Village.	No	No changes have been made to the policy. The policy does however state improving cycling and walking links to adjacent local communities in Stockport and Tameside.	++	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	O	There is no mention of this type of infrastructure.	Consider feasibility study into requirements and ability of local network to support development	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policies GM-E1 & GM-N2.	O	There is no mention of this type of infrastructure, although it does refer to integrated approach to infrastructure delivery that supports the scale of the whole development.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	+ / ?	Cannot be certain that development will affect deprived areas however it will provide further employment in an area of deprivation.	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Partially	The recommendation is addressed by thematic policies GM-E1, GM-E4, GM-E5 & GM-P1 .	+ / ?	Cannot be certain that development will affect deprived areas however it will provide further employment in an area of deprivation.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	+ / ?	Cannot be certain that development will affect deprived areas however it will provide further employment in an area of deprivation.				+ / ?	Cannot be certain that development will affect deprived areas however it will provide further employment in an area of deprivation.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy..
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	No mention in policy				O	No mention in policy	No change	
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	O	No mention in policy				O	No mention in policy	No change	
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	O / ?	Policy does not mention protected characteristics. It is assumed that it is too high level to affect unprotected characteristics and that this will be considered at design stage.				O / ?	Policy does not mention protected characteristics. It is assumed that it is too high level to affect unprotected characteristics and that this will be considered at design stage.	No change	
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	No mention in policy				O	No mention in policy	No change	
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village. In addition, it suggests a suitable landscaping scheme needs to be delivered				++	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.;	No change	
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.	No change	
		Promote access to green space?	+	Policy states: Suitable landscaping scheme to be delivered to minimise tree loss and mitigate any unavoidable loss of trees and to provide a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary.				+	Policy states: Suitable landscaping scheme to be delivered to minimise tree loss and mitigate any unavoidable loss of trees and to provide a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary	No change	
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	O	No reference to this in the policy, however an employment site is unlikely to affect local capacity.				O	No reference to this in the policy, however an employment site is unlikely to affect local capacity	No change	
		Ensure sufficient access to educational facilities for all children?	O					O		No change	
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	O					O		No change	
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	O	No new provision is referred to.				O	No new provision is referred to	No change	
		Improve educational and skill levels of the population of working age?	O	No new provision is referred to.			Policy text has been amended to include reference to training and employment opportunities	+	Policy states: Secure an appropriate proportion of training and employment opportunities at all stages of the development for local people, including a Training and Employment Management Plan to be approved by the local authority	Scoring has been increased from neutral to positive	When the framework is read as a whole, no further recommendations are made.
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village.	Policy should mention links to other areas that there will be links to, not only referencing Stockport Sports Village.	No	No changes have been made to the policy. The policy does however state improving cycling and walking links to adjacent local communities in Stockport and Tameside.	++	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.;	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++	As above				++	As above	No change	
		Support the use of sustainable and active modes of transport?	++	As above				++	As above	No change	
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+	Site is not within 500m of AQMA. The policy makes reference to provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village.	include air quality mitigation and protection. Seek to minimise the number of trips made by private car to / from the site. Consider the use of mitigation solutions including green infrastructure, incentivising electric vehicles.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policies GM-S2, GM-S6 & GM-G2.	+	Site is not within 500m of AQMA. The policy makes reference to provision of suitable pedestrian, cycle and vehicular access to surrounding area.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Provide opportunities to enhance new and existing wildlife and geological sites?	-/?	Site is adjacent to a priority habitat for deciduous woodland, a site of biological importance and a wildlife corridor. The policy states: Suitable landscaping scheme to be delivered to minimise tree loss and mitigate any unavoidable loss of trees and to provide a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary.	Considered ecological receptors throughout detailed design to reduce risk through construction and operational phases.	Partially	The policy has been amended. To make the following references: Contribute to the area's special landscape qualities and key sensitivities in line with Policy GM-G 1 'Valuing Important Landscapes'. Development should restore positive landscape characteristics and features that reinforce scenic quality and distinctiveness particularly of the Tame Valley; Protect and enhance biodiversity interests, securing opportunities to achieve biodiversity net gains in line with Policy GM-G 10 'A Net Enhancement of Biodiversity and Geodiversity' both within Stockport and neighbouring areas; Be designed to minimise any adverse impacts on the remaining Green Belt, including a comprehensive and high quality landscaping scheme (minimising tree loss and mitigating for any unavoidable loss of trees with significant levels of mature tree planting), provision of a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary and a detailed scheme for external illumination at the site which shows how light pollution will be controlled; In addition, the recommendation is addressed by thematic policies GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10.	+	Site is adjacent to a priority habitat for deciduous woodland, a site of biological importance and a wildlife corridor. Contribute to the area's special landscape qualities and key sensitivities in line with Policy GM-G 1 'Valuing Important Landscapes'. Development should restore positive landscape characteristics and features that reinforce scenic quality and distinctiveness particularly of the Tame Valley; Protect and enhance biodiversity interests, securing opportunities to achieve biodiversity net gains in line with Policy GM-G 10 'A Net Enhancement of Biodiversity and Geodiversity' both within Stockport and neighbouring areas; Be designed to minimise any adverse impacts on the remaining Green Belt, including a comprehensive and high quality landscaping scheme (minimising tree loss and mitigating for any unavoidable loss of trees with significant levels of mature tree planting), provision of a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary and a detailed scheme for external illumination at the site which shows how light pollution will be controlled; Development must be designed to minimise any adverse impacts on the remaining Green Belt, including the use of landscaping and carefully designed buffer zones that will manage the transition, and create strong defensible boundaries at the edge of strategic allocations and the new Green Belt boundary; Suitable landscaping scheme to be delivered to minimise tree loss and mitigate any unavoidable loss of trees and to provide a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary;	Scoring has been increased from negative & uncertain to positive.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	-/?					+			
		Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	?/+		Make reference to protection and enhancement of green infrastructure	Partially		?/+		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O					O		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	+	Flood vulnerability relatively low. The site is not in a flood zone Policy states: 7. Ensure provision of suitable and appropriate drainage measures to be achieved through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries.				+	Flood vulnerability relatively low. The site is not in a flood zone.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	O	The site is not in a flood zone				O	The site is not in a flood zone	No change	
		Ensure adequate measures are in place to manage existing flood risk?	+	The site is adjacent to flood zone 3. The policy includes mitigation stating: Ensure provision of suitable and appropriate drainage measures to be achieved through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries.				+	The site is adjacent to flood zone 3. Policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring there are no negative impacts on the water quality of the surrounding watercourses	No change	
		Ensure that development does not increase flood risk due to increased run-off rates?	+	The site is adjacent to flood zone 3. The policy includes mitigation stating: Ensure provision of suitable and appropriate drainage measures to be achieved through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries.				+	The site is adjacent to flood zone 3. Policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring there are no negative impacts on the water quality of the surrounding watercourses	No change	
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	The site is adjacent to flood zone 3. The policy includes mitigation stating: Ensure provision of suitable and appropriate drainage measures to be achieved through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries.				+	The site is adjacent to flood zone 3. Policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable urban drainage systems, mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring there are no negative impacts on the water quality of the surrounding watercourses	No change	
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.	No change	
		Promote management practices that will protect water features from pollution?	O	As above				O	As above	No change	
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	Consideration for detailed design and thematic policy				O	Consideration for detailed design and thematic policy	No change	
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	+	Policy states: Provision of suitable pedestrian, cycle and vehicular access to link the site to Stockport Sports Village. No mention of energy use or energy efficiency.	Make reference to energy efficiency directly and ways that it can be increased, such as highlighting the benefits of sustainable modes of transport	Partially	The recommendation is addressed by thematic Policy GM-S2, GM-S3 & GM-S4.	+	Existing public transport near by- bus stops. Policy states: Provision of appropriate pedestrian, cycle and public transport access to the site from surrounding residential areas including an improved link from Brinnington over the M60; Provision of pedestrian and cycle access within the site and to link it to Stockport Sports Village and improved cycling and walking links and to adjacent local communities in Stockport and Tameside; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.;	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	-/?	No mention of low carbon and renewable energy facilities in policy wording	Make reference to facilitating energy efficiency	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2 & GM-S3.	-/?	No mention of low carbon and renewable energy facilities in policy wording	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	-/?	No mention of low carbon and renewable energy facilities in policy wording				-/?	No mention of low carbon and renewable energy facilities in policy wording	No change	
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	+	Policy states: Suitable landscaping scheme to be delivered				+	Policy states: Suitable landscaping scheme to be delivered to minimise tree loss and mitigate any unavoidable loss of trees and to provide a wildlife corridor linking land to the north and east of the site with the existing wildlife corridor at the southern boundary	No change	
		Conserve and enhance the historic environment, heritage assets and their setting?	-	AMGA mapping: Grade II listed building 73m from site boundary (Castle Hill Farmhouse)	Consider receptors throughout detailed design to reduce risk throughout construction and operational phases.	Yes	Changes have been made to the allocation policy wording, including referencing the protection and enhancement of heritage assets. The recommendation is also addressed by thematic Policy GM-G1 & GM-E2.	+	AMGA mapping: Grade II listed building 73m from site boundary (Castle Hill Farmhouse). Policy states: Protect and enhance heritage and archaeological assets and their setting within the surrounding area including the Grade II listed buildings, Castle Hill Farmhouse, Arden Hall and Arden Hall Barn.	Scoring has been increased from negative to positive	When the framework is read as a whole, no further recommendations are made.
		Respect, maintain and strengthen local character and distinctiveness?	O	Not mentioned in policy				O	Not mentioned in policy	No change	
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+ / -	Agricultural land and some areas of landfill	Consider how development of PDL sites could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	+ / -	Agricultural land and some areas of landfill	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	100% grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	--	100% grade 3 (subset of Grade 3 not known, worst case scenario has been assumed)	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	--	Agricultural land and some areas of landfill	Consider how development of derelict land, properties, buildings and infrastructure could be encouraged as a result of greenfield development (e.g. by incentives or inclusion of adjacent PDL)	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	--	Agricultural land and some areas of landfill	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	--			Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	--		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	Partially	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states: around 250 new homes				+	Policy states: around 185 new homes		
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states: range of housing types, including provision for older persons' affordable accommodation and custom/self-build.				++	Policy states: Make provision of a minimum of 20% affordable housing on site, providing a range of housing types, including older persons' affordable accommodation and at least 5 custom/self build plots within the site		
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	++	Significant transport interventions including making provision for new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley				++	Policy states: Provide comprehensive traffic calming on estate roads between the site and Marple Road to mitigate traffic impact; Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.		
		Support improvements in the energy efficiency and resilience of the housing stock?	+	Policy states: provide appropriate access to electric vehicle charging infrastructure and cycle storage		Partially	Allocation policy wording has been changed, including the removal of reference to providing appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is addressed by thematic Policy GM-S2, GM-S3, GM-S4 & GM-S5	O	No mention in policy	Scoring decreased from positive to neutral / no effect	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only		
		Support education and training to provide a suitable labour force for future growth?	+	Policy states: contribute towards the provision of additional school places and health provision generated by the development. This includes a new SEN school within the site. However this replaces an existing school which is already on the site.	Noted for each site but it would be better dealt with in a thematic policy	Partially	Allocation policy wording has been changed. The recommendation is also addressed by thematic Policy GM-P1, GM-E5, GM-E6	+	Policy states: contribute towards the provision of additional school places and health provision generated by the development. To provide additional SEND places in a new building on the site through expansion of the existing Lisburne School	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	++	There are existing bus stops which serve the development and the policy proposed significant transport improvements which link it to employment opportunities. The policy states: making provision for new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley				++	There are existing bus stops which serve the development and the policy proposed significant transport improvements which link it to employment opportunities. The policy states: Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area		
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	++	The policy suggests significant transport infrastructure including: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan. Travel Plans could include measures such as public transport vouchers and access to car clubs; Provide appropriate access to electric vehicle charging infrastructure and cycle storage; Provide new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley.				++	The policy states: Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.		
		Improve transport connectivity?	++	The policy suggests significant transport infrastructure including: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan. Travel Plans could include measures such as public transport vouchers and access to car clubs; Provide appropriate access to electric vehicle charging infrastructure and cycle storage; Provide new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley.				++	The policy states: Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.		
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	++	Policy states: consider surface water drainage, grey infrastructure including utilities provision, green infrastructure, superfast broadband and electric vehicle charging points	Consider feasibility study into requirements and ability of local network to support development	Partially	Allocation policy wording has been changed, including the removal of reference to providing appropriate access to electric vehicle charging infrastructure and cycle storage. However, the recommendation is addressed by thematic Policy GM-E1 & GM-N2.	O	No mention in policy	Scoring decreased from very positive to neutral / no effect	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O/+	Cannot be certain that development will affect deprived areas. The policy states: Make provision of a minimum of 40% affordable housing on site. This may have a positive contribution to tackling wider inequalities	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types including affordable housing and older persons affordable accomodation, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic Policy GM-E1, GM-E5, GM-E6 & GM-P1 .	O/+	Cannot be certain that development will affect deprived areas.	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O/+	Cannot be certain that development will affect deprived areas. The policy states: Make provision of a minimum of 40% affordable housing on site. This may have a positive contribution to tackling wider inequalities				O/+	The policy states: Make provision of a minimum of 40% affordable housing on site. This may have a positive contribution to tackling wider inequalities	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
5	Promote equality of opportunity and the elimination of discrimination	Foster good relations between different people?	O	Not referenced in the policy	The allocation policy could reference integration with existing communities and also encourage the provision of varied tenures within the development.	Partially	Allocation policy wording requires development to deliver a range of dwelling types including affordable housing and older persons affordable accomodation. The recommendation is also addressed by thematic Policy GM-E1 and Chapter 9 of the GMSF	O	Policy states: Make provision of a minimum of 20% affordable housing on site, providing a range of housing types, including older persons' affordable accommodation	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure equality of opportunity and equal access to facilities / infrastructure for all?	++	The allocation includes the provision of an SEN school				++	The allocation includes the provision of an SEN school	No change has been made to scoring.	It is considered that accessibility is integrated into an appropriate Thematic policy.
		Ensure no discrimination based on 'protected characteristics', as defined in the Equality Act 2010?	+	The allocation includes the provision of an SEN school				+	The allocation includes the provision of an SEN school		
		Ensure that the needs of different areas, (namely urban, suburban, urban fringe and rural) are equally addressed?	O	Each allocation is within a specific location and therefore is within one area type.				O	Each allocation is within a specific location and therefore is within one area type.		
6	Support improved health and wellbeing of the population and reduce health inequalities	Support healthier lifestyles and support improvements in determinants of health?	++	In relation to walking and cycling policy states: Provide new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley. In relation to green infrastructure policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.				++	In relation to walking and cycling policy states: Provide new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley. In relation to green infrastructure policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.		
		Reduce health inequalities within GM and with the rest of England?	O	Strategic aim which is not likely to be affected by site proposals.				O	Strategic aim which is not likely to be affected by site proposals.		
		Promote access to green space?	++	Policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.				++	Policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.		
7	Ensure access to and provision of appropriate social infrastructure	Ensure people are adequately served by key healthcare facilities, regardless of socio-economic status?	+	Policy states: Contribute towards the provision of additional school places and health provision generated by the development.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Allocation policy wording includes reference to a comprehensive masterplan. The recommendation is also addressed by thematic Policy GM-E5 & GM-E6	+	Policy states: Contribute towards the provision of additional school places and health provision generated by the development.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure sufficient access to educational facilities for all children?	+	Policy states: contribute towards the provision of additional school places and health provision generated by the development. This includes a new SEN school within the site. However this replaces an existing school which is already on the site.				+	Policy states: contribute towards the provision of additional school places and health provision generated by the development. To provide additional SEND places in a new building on the site through expansion of the existing Lisburne School		
		Promote access to and provision of appropriate community social infrastructure including playgrounds and sports facilities?	+	Policy states: Improve the existing playing fields within the site through the provision of improved drainage and suitable changing facilities.				+	Policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems.		
8	Support improved educational attainment and skill levels for all	Improve education levels of children in the area, regardless of their background?	++	Policy states: Policy states: contribute towards the provision of additional school places and health provision generated by the development. This includes a new SEN school within the site. However this replaces an existing school which is already on the site.	Ensure any new provision is accessible to all and that local capacity is considered throughout future masterplanning stages	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan. The recommendation is also addressed by thematic Policy GM-E5	++	Policy states: Policy states: contribute towards the provision of additional school places and health provision generated by the development. To provide additional SEND places in a new building on the site through expansion of the existing Lisburne School	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Improve educational and skill levels of the population of working age?	O	No mention in policy	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-E4 & GM-E5	O	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
9	Promote sustainable modes of transport	Reduce the need to travel and promote efficient patterns of movement?	++	Policy states: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan. Travel Plans could include measures such as public transport vouchers and access to car clubs; Provide appropriate access to electric vehicle charging infrastructure and cycle storage; Provide new cycle and footpaths to connect with the existing local network and strategic networks to improve access to Offerton, Stockport and the Goyt Valley.		Given the greater emphasis on climate change, the policy / thematic policies could be strengthened with regards to climate change.	++	Policy states: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; Include measures to promote sustainable travel including production of a Travel Plan and appointment of a Travel Coordinator to develop, implement and monitor the Travel Plan.		
		Promote a safe and sustainable public transport network that reduces reliance on private motor vehicles?	++					++			
		Support the use of sustainable and active modes of transport?	++					++			
10	Improve air quality	Improve air quality within Greater Manchester, particularly in the 10 Air Quality Management Areas (AQMAs)?	+/-	The site is located within 500m of an AQMA The policy makes reference to provision of public transport improvements and active transport provision	Seek to minimise the number of trips made by private car to/from the site. Consider use of mitigation solutions including green infrastructure, incentivising electric vehicles and/or masterplan layout which reduces emissions near sensitive receptors.	Partially	Changes have been made to the allocation policy wording, including reference to the provision of green infrastructure within the site. The recommendation is also addressed by thematic Policy GM-S2, GM-S6 & GM-G2	+/-	The site is located within 500m of an AQMA The policy makes reference to provision of public transport improvements and active transport provision for a range of suitable and publicly accessible open space and green infrastructure within the site	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide opportunities to enhance new and existing wildlife and geological sites?	+/-	The site is directly adjacent to a priority habitat, Local Nature Reserve, site of biological importance and an ancient woodland.	Consider ecological receptors throughout detailed design, especially along the northern boarder to reduce risk throughout construction and operational phases.	No		+/-	The site is directly adjacent to a priority habitat, Local Nature Reserve, site of biological importance and an ancient woodland.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Avoid damage to or destruction of designated wildlife sites, habitats and species and protected and unique geological features?	+/-					+/-	The policy states: Protect and enhance biodiversity interests.		

11	Conserve and enhance biodiversity, green infrastructure and geodiversity assets	Support and enhance existing multifunctional green infrastructure and / or contribute towards the creation of new multifunctional green infrastructure?	+/-	The policy states: Protect and enhance biodiversity interests, through securing measures to improve linkages and habitat value within and between the Goyt Valley section of the ecological corridor, this could be through retaining and enhancing existing landscape and natural features (e.g. trees, hedgerow, watercourses, water bodies, pollination species and priority habitats) in order to achieve biodiversity net gains In relation to green infrastructure the policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.	Integrate green infrastructure throughout the scheme at masterplan stage, especially along the northern border to mitigate from impact on the adjacent habitats	No	The recommendation is addressed by thematic policies GM-G2, GM-G6, GM-G8, GM-G9 & GM-G10.	+/-	through securing measures to improve linkages and habitat value within and between the Goyt Valley section of the ecological corridor, this could be through retaining and enhancing existing landscape and natural features (e.g. trees, hedgerow, watercourses, water bodies, pollination species and priority habitats) in order to achieve biodiversity net gains in line with Policy GM-G 10 'A Net Enhancement of Biodiversity and Geodiversity In relation to green infrastructure the policy states: Make provision for a range of suitable and publicly accessible open space and green infrastructure within the site.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Ensure access to green infrastructure providing opportunities for recreation, amenity and tranquillity?	O					O		No change has been made to scoring.	
12	Ensure communities, developments and infrastructure are resilient to the effects of expected climate change	Ensure that communities, existing and new developments and infrastructure systems are resilient to the predicted effects of climate change across GM?	-/O	Average to high Flood Vulnerability. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.				-/O	Average to high Flood Vulnerability. The policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.	No change has been made to scoring.	It is considered that climate change adaptation is integrated into an appropriate Thematic policy.
13	Reduce the risk of flooding to people and property	Restrict the development of property in areas of flood risk?	+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.				+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.		
		Ensure adequate measures are in place to manage existing flood risk?	+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.				+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.		
		Ensure that development does not increase flood risk due to increased run-off rates?	+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.				+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.		
		Ensure development is appropriately future proof to accommodate future levels of flood risk including from climate change?	+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.				+	None of the allocation is within flood zone 2 or 3. The river Goyt is located to the north of the site. The policy states: Ensure provision of suitable and appropriate drainage measures, to be delivered through sustainable drainage systems. Surface water should be managed as close to its source as possible and on the surface where practicable to do so. Measures such as rainwater recycling, green roofs, water butts and permeable surfaces will be encouraged mitigating the impact of potential flood risk both within and beyond the site boundaries, whilst ensuring potential is minimised for urban diffuse pollution to affect the surrounding watercourses and water bodies.		
14	Protect and improve the quality and availability of water resources	Encourage compliance with the Water Framework Directive?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Promote management practices that will protect water features from pollution?	O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.				O	All development is assumed to follow best practice with regards water management, flood risk and (potential) impacts on watercourses.		
		Avoid consuming greater volumes of water resources than are available to maintain a healthy environment?	O	This is a consideration for detailed design and thematic policy.				O	This is a consideration for detailed design and thematic policy.		
15	Increase energy efficiency, encourage low-carbon generation and reduce greenhouse gas emissions	Encourage reduction in energy use and increased energy efficiency?	++	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift. In addition, the policy makes reference to appropriate access to electric vehicle charging infrastructure and cycling storage, to encourage energy efficiency.				++	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift.		
		Encourage the development of low carbon and renewable energy facilities, including as part of conventional developments?	+	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift. In addition, the policy makes reference to appropriate access to electric vehicle charging infrastructure and cycling storage, to encourage energy efficiency.				+	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift.		
		Promote a proactive reduction in direct and indirect greenhouse gas emissions emitted across GM?	+	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift. In addition, the policy makes reference to appropriate access to electric vehicle charging infrastructure and cycling storage, to encourage energy efficiency.				+	Reference in policy to cycling and walking and the need for Travel Plans to create a modal shift.		
16	Conserve and/or enhance landscape, townscape, heritage assets and their setting and the character of GM	Improve landscape quality and the character of open spaces and the public realm?	++	Policy states: Contribute to the area's special landscape qualities and key sensitivities in line with Policy GGM 8. Development should restore positive landscape characteristics and features that reinforce the scenic quality and distinctiveness, having specific regard to the Stockport LCA and Landscape Sensitivity study, GM and National Character Area Opportunity statement				++	Policy states: Contribute to the area's special landscape qualities and key sensitivities in line with Policy GGM 8. Development should restore positive landscape characteristics and features that reinforce the scenic quality and distinctiveness, having specific regard to the Stockport LCA and Landscape Sensitivity study, GM and National Character Area Opportunity statement		
		Conserve and enhance the historic environment, heritage assets and their setting?	O	The site does not contain a heritage asset. The policy makes no reference to heritage assets				O	The site does not contain a heritage asset. The policy makes no reference to heritage assets		
		Respect, maintain and strengthen local character and distinctiveness?	++	Policy states: Ensure a high quality of design, creating a visually attractive development, which establishes a strong sense of place by means of architecture, layout, landscaping and materials				++	Policy states: Ensure a high quality of design, creating a visually attractive development, which establishes a strong sense of place by means of architecture, layout, landscaping and materials		
17	Ensure that land resources are allocated and used in an efficient and sustainable manner to meet the housing and employment needs of GM, whilst reducing land contamination	Support the development of previously developed land and other sustainable locations?	+/-	PDL and Greenfields related to existing school				+/-	PDL and Greenfields related to existing school		
		Protect the best and most versatile agricultural land / soil resources from inappropriate development?	--	Grade 3 agricultural land, assumed 3a worse case scenario	Further research into agricultural land quality, and investigation into if impacts on any 3a land can be avoided/minimised.	Partially	Changes have been made to the allocation policy wording, including reference to a comprehensive masterplan. The recommendation is addressed by Chapter 4 and Chapter 9 of the GMSF.	--	Grade 3 agricultural land, assumed 3a worse case scenario	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Encourage the redevelopment of derelict land, properties, buildings and infrastructure, returning them to appropriate uses?	+/-	PDL and Greenfields related to existing school	Consider the reuse of existing school buildings on the site	Partially	No changes made to the allocation policy wording. Former OHS site not suitable for education or housing purposes	+/-	PDL and Greenfields related to existing school	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support reductions in land contamination through the remediation and reuse of previously developed land?	+/-					+/-		No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
18	Promote sustainable consumption of resources and support the implementation of the waste hierarchy	Support the sustainable use of physical resources?	o	No mention in policy	Promote sustainable construction methods	No	No changes made to the policy wording. In addition, it is not considered that the recommendation is addressed by thematic policy.	o	No mention in policy	No change has been made to scoring. It is not considered that the recommendation has been sufficiently addressed.	It is considered that sustainable construction methods is integrated into an appropriate Thematic policy to ensure this objective is achieved.
		Promote movement up the waste hierarchy?	o	No mention in policy	Consider waste and recycling facilities in design. E.g. Consider location of waste/recycling facilities in design/layout of masterplans, and how waste facilities can be located to encourage recycling (link to thematic policy on allocations).	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy Policy GM-S7.	o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Promote reduced waste generation rates?	o	No mention in policy				o	No mention in policy	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.

			2019					2020			
Ref	Objective	Assessment criteria....will the GMSF (site)	Score	2019 Explanation from GM mapping + policy wording	2019 Mitigation	Has 2019 mitigation been addressed? (Yes/Partially/No)	Commentary on changes made since 2019	Score	2020 Explanation from GM mapping + policy wording	2020 Summary of new scoring	Residual recommendation
1	Provide a sustainable supply of housing land including for an appropriate mix of sizes, types, tenures in locations to meet housing need, and to support economic growth	Ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing?	+	Policy states up to 850 new dwellings				+	Policy states up to 850 new dwellings	No change	
		Ensure an appropriate mix of types, tenures and sizes of properties in relation to the respective levels of local demand?	++	Policy states a mix of housing types including a provision of affordable housing				++	Policy states a mix of housing types including a provision of affordable housing and provision for older persons' affordable accommodation and at least 9 customer/self build plots within the site	No change	
		Ensure housing land is well-connected with employment land, centres and green space or co-located where appropriate?	+	The policy makes reference to the provision of green infrastructure and improved transport connections including: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area	Make reference to opportunities to sustainably connect the site to employment, town centres and green space.	Partially	Allocation ion policy wording makes reference to provision for suitable and publicly accessible open space and green infrastructure within the site in addition to making provision for the loss of the playing pitches off Outwood Road with suitable changing facilities and allotments and/or community orchard, production of a Travel Plan and enhancements to public transport, direct and high quality pedestrian and cycle routes in the area. The reccomendation is also addressed by thematic policy GM-E2.	+	The policy makes reference to the provision of green infrastructure and improved transport connections including: Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Support improvements in the energy efficiency and resilience of the housing stock?	O	Not referred to in policy. May be more appropriate to add energy efficiency and resilience considerations to thematic policy on carbon emissions.	Make specific reference to energy efficiency of the housing stock	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic Policy GM-S2, GM-S3, GM-S4 & GM-S5	O	Not referred to in policy.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
2	Provide a sustainable supply of employment land to ensure sustainable economic growth and job creation	Meet current and future demand for employment land across GM?	O	Housing only				O	Housing only	No change	
		Support education and training to provide a suitable labour force for future growth?	++	Policy aims to contribute towards the provision of additional school places within the allocation. May be more appropriate to deal with education and training in thematic policies.	Consider how housing land can enhance work force skills and training, such as through construction jobs.	Partially	No changes made to the allocation policy wording. However, the recommendation is addressed by thematic policy GM-P1, GM-E5, GM-E6	++	Policy aims to contribute towards the provision of additional school places within the allocation. May be more appropriate to deal with education and training in thematic policies.	No change has been made to scoring.	When the framework is read as a whole, no further recommendations are made.
		Provide sufficient employment land in locations that are well-connected and well-served by infrastructure?	O	Housing only				O	Housing only	No change	
3	Ensure that there is sufficient coverage and capacity of transport and utilities to support growth and development	Ensure that the transport network can support and enable the anticipated scale and spatial distribution of development?	+	Policy states: Make necessary improvements to local highway infrastructure, facilitate appropriate access to the site and incorporate enhancements to public transport.				+	Policy states: Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area	No change	
		Improve transport connectivity?	+	Policy states: Make necessary improvements to local highway infrastructure, facilitate appropriate access to the site and make provision for new cycle and footpaths to connect with existing local network.				+	Policy states: Make improvements to local transport infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area	No change	
		Ensure that utilities / digital infrastructure can support and enable the anticipated scale and spatial distribution of development?	++	Policy mentions an integrated approach to infrastructure delivery including utilities provision.		Partially	Allocation policy wording has been changed, including the removal of reference to infrastructure delivery including utilities provision. The recommendation is also addressed by thematic Policy GM-E1 & GM-N2	O	No mention in policy	Scoring has been decreased from very positive to neutral	When the framework is read as a whole, no further recommendations are made.
4	Reduce levels of deprivation and disparity	Reduce the proportion of people living in deprivation?	O/+	Cannot be certain that development will affect deprived areas. The policy makes reference to the delivery of affordable housing which will contribute to opportunities for improvements in a range of inequalities	Benefits such as creation of construction and operational employment, or improved transport links or increases in the range of community facilities, should consider deprived areas. Where possible such benefits should be maximised to help bring about long term benefits for deprived areas.	Yes	Changes have been to the allocation policy wording, including referencing the delivery of a range of dwelling types including affordable housing and older persons affordable accommodation, improving accessibility to the surrounding area, delivering multi functional green infrastructure; providing for new / improvement of existing open space; and contributing towards additional school places and health facilities as appropriate. The recommendation is also addressed by thematic policy GM-E1, GM-E5, GM-E6 & GM-P1	O/+	Cannot be certain that development will affect deprived areas. The policy makes reference to the delivery of affordable housing which will contribute to opportunities for improvements in a range of inequalities	No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
		Support reductions in poverty (including child and fuel poverty), deprivation and disparity across the domains of the Indices of Multiple Deprivation?	O/+	Cannot be certain that development will affect deprived areas. The policy makes reference to the delivery of affordable housing which will contribute to opportunities for improvements in a range of inequalities				O/+		No change has been made to scoring.	It is considered that reducing levels of deprivation is integrated into an appropriate Thematic policy.
