## **Equality Analysis Form**

The following questions will document the effect of your activity on equality, and demonstrate that you have paid due regard to the Public Sector Equality Duty. The Equality Analysis (EA) guidance should be used read before completing this form.

To be completed at the earliest stages of the activity and before any decision making and returned via email to GMSS Equality Diversity Human Rights Business Partner for Quality Assurance:

Rosie Kingham: rosie.kingham@nhs.net

Rosie Kingnam: rosie.Kingnam@nns.net								
			Section 1: P	esponsibility				
2 3	Name & role of person construction  Service/ Corporate Area  Head of Service or Direct		the EA:	Aleksandra Houghton, Advanced Medicines Optimisation Pharmacist, NHS Greater Manchester Shared Services (hosted by NHS Oldham CCG) Medicine Optimisation Nigel Dunkerley				
4	Who is the EA for? (Name of other organisat			Oldham CCG				
		S	ection 2: Ain	ns & Outcomes				
5	What is being proposed? Please give a brief description of the activity.	On 29th March 2018, NHS England issued guidance to CCGs titled: Conditions for which over the counter items should not routinely be prescribed in primary care: Guidance for CCGs. This guidance proposes that certain medications will not be routinely commission at NHS expense. These medicines are for conditions that:  •may be considered to be self-limiting, so they do not need treatment as they will get better of their own accord, or  •are suitable for self-care, so that the person suffering does not normally need to seek medical advice and can manage the condition by purchasing Over The Counter (OTC) items unless there are clinically exceptional circumstances.						
6	Why is it needed? Please give a brief description of the activity.	This guidance was considered and approved for adoption as CCG policy at GMMMG Clinical Standards Board on 9th August. GM Medicines Optimisation CCG leads decided to take a GM approach on delivery and implementation of the NHS England policy.  It was decided that, as per NHS England recommendation, CCGs will have to carry out local E&D assessments before implementation and mitigate any issues identified.						
7	What are the intended outcomes of the activity?	Potential to save approximately £4.5M per annum across GM, approximately 500K across Oldham (saving if prescribing at level of Bury CCG per population).						
8	Expected Implementation Date	June 2019						
9	Who does it affect?	Population	Population of Oldham

What will the likely overall effect of your activity be on equality?  Implementation of this advice will help reduce unwarranted variation in prescribing rates of medicines that may be used to					·				

		treat self-limiting illnesses.				
	What recommendations are in place to mitigate any negative effects identified in 10.1?	The GMMMG Proposed Commissioning Statement includes a list of exemptions when OTC treatment can be prescribed at NHS expense. The BMA also provide advice to GPs to use their clinical judgment when deciding on the availability of the treatment.				
	What opportunities have been identified for the activity to add value by advancing equality and/or foster good relations?	Implementation will support CCGs to use their prescribing resources effectively and deliver best patient outcomes from the medicines that their local population uses.  It will support the NHS to achieve the greatest value from the money that it spends.				
	What steps are to be taken now in relation to the implementation of the activity?	The next step of the project will be to engage with the population of Oldham.
