

Report to HEALTH AND WELLBEING BOARD

Life Expectancy Update

Portfolio Holders:

Councilor Chauhan, Cabinet Member for Public Health

Officer Contact: Katrina Stephens, Director of Public Health

Report Author: Emily Baylis-Tunney, Public Health Data, Insight & Intelligence Analyst

Date: 09/03/2022

Purpose of the Report

This report provides an update on latest data on life expectancy in Oldham, which has been produced for Oldham's Joint Strategic Needs Assessment.

The report does not currently include information on the key contributors to the life expectancy gap between Oldham and England, as we are waiting for national data on this to be updated. If this information is available in advance of the meeting an updated report will be provided.

This report is closely related to the Health Inequalities Plan which is also on the Board's agenda, as the focus of the plan is on reducing inequalities in life expectancy and health life expectancy.

Requirement from the Health and Wellbeing Board

Board members are asked to consider the data presented and the implications for policy, planning and delivery across the Oldham system.

The Board are also asked for feedback on the future inclusion of similar extracts from the JSNA on the agenda for Board meetings.
