

Report to Audit Committee

External Audit Progress Report

Portfolio Holder: Cllr Abdul Jabbar MBE, Deputy Leader and Cabinet Member for Finance and Low Carbon

Officer Contact: Anne Ryans, Director of Finance/ Mazars LLP

Report Author: Mark Stenson, Head of Corporate Governance / Mazars LLP

Ext. 4783

21 July 2022

Reason for Decision

To present to the Audit Committee, the Audit Progress Report for July 2022 (attached at Appendix One) produced by our external auditor Mazars LLP.

Executive Summary

The report presents to the Council the key information that the external auditor feels appropriate to bring to your attention.

Recommendation

It is recommended that the Audit Committee notes the Audit Progress Report.

Appendix 1

Audit Progress Report

Oldham Metropolitan Borough Council

Section 01: **Audit Progress**

Audit Progress

Purpose of this report

This report provides the Audit Committee with an update on progress in delivering our responsibilities as your external auditors.

Audit progress

2020/21 audit

Our final remaining responsibility in respect of the 2020/21 financial year relates to the Council's whole of government accounts (WGA) return. In May 2022 HM Treasury issued their guidance for councils, and this concluded that they would only require audits of WGA returns for those councils with Income, Expenditure, Assets or Liabilities above £2bn. The National Audit Office (NAO) is in the process of drafting their WGA group audit instructions, and there remains a possibility that those instructions may require us to carry out some work on your WGA return. Once the NAO has issued their group instructions, we will liaise with officers to complete any required testing.

In addition, before we issue our certificate to close the 2020/21 audit, we consider whether there are any matters arising since we issued our audit opinion on the financial statements that impact on our opinion. In this regard we will need to consider the Council's response to the forthcoming resolution to the national technical issue on accounting for infrastructure assets, which is highlighted in more detail on page 7.

2021/22 audit

During February and March 2022 we completed our initial planning work, and early testing for the 2021/22 audit. We presented our Audit Strategy Memorandum to the March Audit Committee meeting, setting out the audit risks we identified in respect of the 2021/22 financial statements. There has been no significant change to our risk assessment since issuing our Audit Strategy Memorandum.

We received the Council's draft financial statements and annual governance statement on 31 May 2022, in line with the timetable agreed with officers. Our fieldwork visit commenced in June 2022, and is due to continue until mid-August. We plan to report the findings from our audit to the September Audit Committee meeting. However, this is subject to the resolution of the national technical issue in respect of accounting for infrastructure assets. Further information on this issue is included on page 7 of this report.

We plan to present our commentary on the Council's value for money arrangements at the September 2022 Audit Committee meeting. Although our work on value for money is not yet complete, we have not identified any risks of significant weakness to draw to your attention at this stage.

1. CIPFA LASAAC issues urgent consultation on Code of Practice – Infrastructure Assets – May 2022

The issue of accounting for infrastructure assets is a technical accounting one, and arises principally because of information availability relating to these assets.

Accounting for infrastructure in local government has not historically been considered to be an area of significant audit risk, due to the inalienable nature of the assets and the use of a historical cost basis of accounting. However, concerns have been raised that some authorities are not applying component accounting requirements appropriately. The issue raised is in relation to the derecognition (removal of the carrying amount) of parts of infrastructure assets when replacement expenditure is undertaken. There are also related issues for the reporting of gross historical cost and accumulated depreciation. Infrastructure assets are one of the few categories of property, plant and equipment assets measured at historical cost rather than at 'current value'. The valuation process for these assets was deemed to be too costly and, therefore, infrastructure assets are held in local authority balance sheets at depreciated historical cost.

Normal custom and practice for (highways) infrastructure assets is that derecognition does not affect asset balances because the assets are expected to have been fully used up before the replacement expenditure takes place; this does require that assets are properly depreciated in line with the requirements of the Accounting Code. This issue arises in part because of limitations on historical information relating to when the assets were first recorded on balance sheets in the early 1990s, and where there have been transfers of assets because of local authority reorganisations. It is also extremely difficult to clearly identify the parts of the assets which are being replaced.

The CIPFA LASAAC Local Authority Code Board has released temporary proposals to update the Code of Practice on Local Authority Accounting in the United Kingdom for infrastructure assets. An urgent consultation on these proposals closed on 14 June 2022.

The temporary proposals address the above issue regarding the derecognition of parts of local authority infrastructure assets as they are replaced. CIPFA LASAAC and CIPFA established a Task and Finish Group to find a solution to this issue and consider the outcome of any proposed changes to the code. Following advice from the Task and Finish Group, CIPFA LASAAC has now issued temporary proposals for changes to the code relating to how these issues are reported. They include:

- confirming the accounting consequences of derecognition, e.g. that the effect on the carrying amount is nil (on a presumption that the replaced parts are fully depreciated);
- temporarily adapting the code to remove the reporting requirements for gross historical cost and accumulated depreciation
- providing extra guidance on how depreciation may be applied for infrastructure assets
- CIPFA LASAAC will consult on a longer-term solution later in the year.

2. Updated statement on the deferral of IFRS 16 leases – April 2022

Following its emergency consultation on exploratory proposals for changing the Code of Practice on Local Authority Accounting in the United Kingdom, CIPFA LASAAC issued its preliminary decision and feedback statement. This preliminary decision was subsequently considered by the government's Financial Reporting Advisory Board (FRAB). FRAB advised CIPFA LASAAC that it agreed with the deferral of IFRS 16 Leases until 1 April 2024. FRAB also advised CIPFA LASAAC that the Code had to allow and should encourage local authorities to adopt the standard before this date should they wish to.

CIPFA LASAAC has therefore followed its preliminary decision with its formal decision: to defer the implementation of IFRS 16 until 1 April 2024 (and therefore in the 2024/25 Code). However, both the 2022/23 and the 2023/24 Codes will allow for adoption as of 1 April 2022 or 2023. CIPFA LASAAC would note that the 2022/23 Code has not yet completed its due process so local authorities should follow the CIPFA LASAAC pages of the website for further updates. Formal due process for the Code by LASAAC and by CIPFA's Public Financial Management Board is anticipated to be complete by the third week in April.

3. CIPFA Local Authority Controlled Companies: a good practice guide, May 2022

In recent years, the potential risk associated with local authority trading companies and joint ventures has increased. Nothing is risk free, but it is important to learn lessons from others and access support.

This guide aims to assist local authorities by setting out and highlighting existing best practice. It focuses on identifying organisational goals, the process to find the right option to achieve that goal and how to structure the organisation for success.

4. Creation of the Audit Reporting and Governance Authority – May 2022

Plans to ensure councils and local bodies are delivering value for money for taxpayers, strengthening council finances and reducing risk to public funds have been published by the government.

The government consultation response confirms plans to establish a new regulator, the Audit Reporting and Governance Authority (ARGA), as the system leader for local audit within a new, simplified local audit framework.

Ahead of ARGA's establishment, a shadow system leader arrangement will start at the Financial Reporting Council (FRC) from September 2022. This will be led by Neil Harris, who joins as the FRC's first Director of Local Audit to start up a dedicated local audit unit.

The Department for Levelling Up, Housing and Communities has been acting as interim system leader since July 2021, when it established and took the chair of the Liaison Committee of senior local audit stakeholders.

Work has already begun to address the challenges facing local audit with the government announcing a series of measures to improve local audit delays in December 2021.

The consultation response also announces plans to make audit committees compulsory for all councils, with each audit committee required to include at least one independent member. This will create greater transparency and consistency across local bodies.

The announcement comes as government today set out its wider plans to revamp the UK's corporate reporting and audit regime through a new regulator, greater accountability for big business and by addressing the dominance of the Big Four audit firms.

The government continues to work closely with stakeholders, including local bodies and audit firms, to refine proposals for implementing our commitments around system leadership, as well the range of other commitments we have made in response to the Redmond Review.

5. Audit and Risk Assurance Committee effectiveness tool – May 2022

Audit and Risk Assurance Committees (ARACs) play a crucial role in supporting the effective governance of central government departments, their agencies and arm's-length bodies.

ARACs are operating in a highly challenging context. Government organisations are managing many short- and long-term risks and are required to be resilient to a number of pressures. This has created an environment where ARACs need to be dynamic and responsive to the changing risk profiles and demands of their organisations. ARACs can see this as an opportunity to work out how they can most proactively work with the Board and accounting officer.

Against this background, NAO's effectiveness tool provides a way for ARACs to assess their effectiveness against more than just the basic requirements. It provides aspects of good practice to give ARACs greater confidence and the opportunity to meet the requirements of their role.

The effectiveness tool is a comprehensive way for ARACs in central government to assess their effectiveness on a regular basis.

6. Annual Quality Monitoring Report 2019/20 – April 2022

This covers the work of local auditors appointed by PSAA for the 2019/20 financial year, which was undertaken during a difficult time for all concerned. The systemic issues that were highlighted in Sir Tony Redmond's Review continued and were compounded by the pandemic.

In September 2020 Sir Tony Redmond's review of local authority financial reporting and external audit was published. The report highlighted the significant challenges and turbulence within the new system of local audit, emphasising that at present local government audit is under-resourced, undervalued and is not having impact in the right areas. The report made a number of recommendations in relation to external audit regulation, smaller authorities' audit regulation, the financial resilience of local authorities and the transparency of financial reporting.

In December 2020 the Ministry of Housing, Communities and Local Government (MHCLG) delivered its initial response to the Redmond Review setting out proposed actions to implement the majority of the recommendations made in the report. This was followed by a further announcement in May 2021 which proposed that the Audit, Reporting and Governance Authority (ARGA) would carry out the hugely important role of the local audit systems leader. ARGA is the new regulator being established to replace the FRC and will contain a dedicated local audit unit which will play a key leadership and coordination role in the local audit framework. MHCLG consulted in Summer 2021 on how the new arrangements would function.

The next year is likely to continue to be very challenging for all involved in local audit, but DLUHC (formerly MHCLG) will take forward and refine its proposals in its role as interim systems leader until ARGA is created, and the FRC will create a local audit unit in shadow form.

The problems that Sir Tony Redmond reported on continue to impact significantly on the timely completion of local government audits. Only 45% of audit opinions were completed by the publishing date of 30 November 2020, compared with 58% in the previous year. This has now fallen even further with only 9% for 2020/21 audits of financial statement opinions completed (noting the reversion to a 30 September publishing date). Delayed audit opinions have a real public-facing impact, undermining the ability of local bodies to account effectively for their stewardship of public money to taxpayers. It is imperative that the whole system works together to restore timely completion of audits in order to rebuild public confidence and trust, especially as the lack of a statutory deadline for the audit opinion means that co-operation is essential to make the system work as the public has the right to expect it to.
