No mitigation needed. Policies within PFE and the Local Plan such as those on housing mix and tenure, communities and design aim to address this objective.	None

The policy scored a mixture of neutral, positives and significantly positive scores. Some effects were cross boundary but the majority were local. No mitigation or enhancements to the policy were required as a result of the IA.

The HRA has screened the policy in as there may be possible impacts on European sites arising from air pollution effects (increased traffic flows). There may also be possible direct impacts on the Rochdale Canal SAC from development within 200m of the Canal.

In addition, a number of Business Employment Areas (BEAs) that form part of this policy have been screened in as they could result in increased road traffic resulting in increases in air pollution. Hollinwood Business District; Wrigley Street and Greengate / Broadgate BEAs are also close to the Rochdale Canal SAC (within 200m) and development could result in direct impacts on the Canal.

The HRA identifies measures to offset any likely significant effects.
