Work in the community

This has been my first year as a ward councillor and I am proud and happy to represent the residents of Royton South.

From the start of my appointment the amount of historical casework that had been previously unresolved was phenomenal. Residents contacted me with old issues, new issues and to simply say 'welcome, congratulations and thankyou' which was really touching.

Throughout the year I have worked all out to meet the needs of local people. Helping them with an enormous range of issues and supporting those who needed it. Each month I have donated to local charities and organisations in Royton South. Funding is hard to get for smaller groups, so donating £100 of my council salary to support them has been high priority for me, simply giving a little bit back to my community.

A local community champion asked for my help and assistance in raising awareness and bringing more life saving defibulators to Royton. I then raised along my volunteers all the money required through various fund raising initiatives. It was then followed up with defibulator training which was accessible for Royton residents. I will continue with further training it is paramount that Royton residents have access to free training, and help save a life.

What has been really heartwarming is the welcome I have received from local people, as well as the countless words of appreciation. I will always work hard for my community, I will always go above and beyond to improve the lives of residents in any way I can.

Casework I have dealt with during my first year has been extensive and has included the following

Fly tipping

Parking issues

Flooding

Anti social behavior

Pot Holes

Speeding

Rats

Firework nuisance

Planning applications

Noise

Road safety
Housing issues
Landlord issues
Property damage
Trees
Poor street lighting
Dog fouling
Nuisance neighbours
Drop kerbs
Social problems
Safe crossings
Vandalism
Off road bikes
Littering
Damage to fences
Grit and grit bins
Mobility access issues
School placement
Uneven/ damaged footpaths
Child safety
Transport
And even medical emergencies and issues

But my most important casework has been simply just listening and being there for people when they have needed someone to talk to. I will always respond and I will always do everything I can and more to help.
