Report to Audit Committee

Treasury Management Half Year Review Report 2026/27

Officer Contact: Lee Walsh – (Director of Finance & Section 151 Officer)

Report Author: Paula Buckley, Finance Manager (Capital & Treasury)/James Postle (Senior Finance Manager)

25th November 2026

Reason for Decision

In April 2023 the Authority adopted the Chartered Institute of Public Finance and Accountancy's Treasury Management in the Public Services: Code of Practice (the CIPFA Code) which requires the Authority to approve, as a minimum, treasury management semi-annual and annual outturn reports.

This report includes the requirement in the 2021 Code of quarterly reporting of the treasury management prudential indicators. This half year report advises the Audit Committee of the performance of the Treasury Management function of the Council for the first half of 2026/27 and provides a comparison of performance against the 2026/27 Treasury Management Strategy and the Treasury Management Prudential Indicators.

Executive Summary

This report includes the requirement in the 2021 Code of quarterly reporting of the treasury management prudential indicators. and review and outlines:

- An economic update for the first half of 2026/27 (External Context)
- Net Borrowing and Investments (Local Context)
- A review and update of the Council's current treasury management position;
- Council Borrowing;
- Treasury Investment Activity;
- Treasury Performance for the half year;
- Treasury Performance for the half year;
- Compliance
- Treasury Management Prudential Indicators;

The report is presented to the Audit Committee to enable it to have the opportunity to review and scrutinise the Half Year Treasury Management report.

Recommendation

That the Audit Committee

a) considers and comments upon the Treasury Management Half Year report and the Treasury Management activity and projected outturn for 2026/27.

b) Commends the report to Leaders Consultative Committee and supplementary meetings thereafter

Treasury Management Half Year Report 2026/27 25 November 2026

1 Background

1.1 The Council operates a balanced budget, which broadly means cash raised during the year will meet its cash expenditure. Part of the treasury management operation is to ensure this cash flow is adequately planned, with surplus monies being invested with low-risk counterparties, providing adequate liquidity initially before considering optimising investment returns.

1.2 The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing needs of the Council, essentially the longer-term cash flow planning to ensure the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans, or using longer-term cash flow surpluses, and on occasion any debt previously drawn may be restructured to meet Council risk or cost objectives.

1.3 As a consequence, treasury management is defined as:

"The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

2 Current Position

2.1 Requirements of the Treasury Management Code of Practice

2.1.1 In April 2023 the Authority adopted the Chartered Institute of Public Finance and Accountancy's Treasury Management in the Public Services: Code of Practice (the CIPFA Code) which requires the Authority to approve, as a minimum, treasury management semi-annual and annual outturn reports.

2.2.2 This report includes the requirement in the 2021 Code of quarterly reporting of the treasury management prudential indicators. This half year report advises the Audit Committee of the performance of the Treasury Management function of the Council for the first half of 2026/27 and provides a comparison of performance against the 2026/27 Treasury Management Strategy and the Treasury Management Prudential Indicators.

2.1.1 The Authority's treasury management strategy for 2026/27 was approved at the budget Council meeting on 4 March 2026. The Authority has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk remains central to the Authority's treasury management strategy.

2.1.2 This Half Year report has been prepared in compliance with CIPFA's Code of Practice, and covers the following:

- An economic update for the first half of 2026/27 (External Context)
- Net Borrowing and Investments (Local Context)
- A review and update of the Council's current treasury management position;
- Council Borrowing;
- Treasury Investment Activity;
- Treasury Performance for the Half year;
- Compliance

- Treasury Management Prudential Indicators;

2.2 External Environment Half Year 2026/27

Economic background

2.2.1 The key story remained the conflict in the Middle East and its impact on global energy prices and inflation, while on the UK politics side, Andy Burham became the new Prime Minister. Although energy prices had shown signs of moderating towards the end of (calendar) Q2, the continuing conflict pushed oil and gas up sharply once again in Q3. Around mid-September, Brent oil and UK gas prices were over 30% and 70% higher respectively compared to the period preceding the Bank of England's (BoE) July Monetary Policy Report (MPR).

2.2.2 Given the inflationary impact of the previous energy shock from the Russia/Ukraine war, central bank policymakers remained alert to higher energy prices feeding into wider price and wage-setting behaviour ('second-round effects'). In the UK, higher fuel and energy prices were evident in headline inflation, but there was limited evidence of material second-round effects. At the same time, underlying wage pressures continued to moderate, and the labour market remained relatively loose.

2.2.3 The BoE's Monetary Policy Committee (MPC) maintained Bank Rate at 3.75% throughout the period. In April the MPC voted by 8-1 to leave rates unchanged, with one member wanting a 0.25% increase. The voting subsequently became more hawkish, moving to 7-2 in June and 6-3 in both July and September, with all dissenters preferring to increase Bank Rate to 4.00%. The change in voting patterns reflected increasing policymaker concern over the persistence of the energy shock and the risk that higher headline inflation could become embedded in domestic prices and wages.

2.2.4 At the September MPC meeting, the Committee judged the inflation risks were further to the upside compared to its July MPR. Energy prices had risen again and borrowing costs were materially higher than before the US/Iran conflict. Despite expecting inflation would rise further in the near-term, most members believed that a soft labour market, spare capacity and restrictive monetary conditions would reduce inflation over time. Moreover, the data showed there was still little evidence of material second-round effects, although the MPC emphasised that the risk of these effects would increase the longer elevated and volatile energy prices persisted.

2.2.5 UK headline consumer price inflation (CPI) initially declined, suggesting the initial energy shock was not spreading into a wider range of goods and services. However, later in the period inflation picked up again, with CPI rising from 2.6% in June to 3.1% in August due largely to higher transport costs. Core CPI was 2.6% in July and August, suggesting the divergence between that and headline inflation was due to energy rather than a broad increase in underlying inflation.

2.2.6 UK economic activity was somewhat stronger than initially anticipated over the period. GDP expanded by 0.6% in the first quarter of the calendar year and 0.5% in the second quarter, slightly stronger than the initial estimate of 0.4%. Monthly activity was more volatile, with a contraction of -0.1% in April, followed by gains of 0%, 0.3% and 0.4% in May, June and July respectively.

2.2.7 Labour market data continued to show softening employment conditions. The unemployment rate fell to 4.9% in April and remained at that level to July, against expectations it would tick up. Job vacancies also continued to decline, to 702,000 in the three months to July. Earnings growth moderated, with regular earnings at 3.5% in the three months to July and total earnings at 3.9%, suggesting weaker labour demand was

continuing to restrain domestic wage pressures.

2.2.8 Arlingclose, the authority's treasury adviser, expects Bank Rate will stay at 3.75%. However, higher energy prices due to the ongoing conflict(s) and uncertainty around the government's upcoming Budget have increased the near-term upside risks. Moreover, stronger inflation projections, which accompanied the September MPC decision, shifted market expectations for Bank Rate higher. In addition, despite little evidence of second-round effects to date, the changing tone of the MPC minutes suggests it may not need something seismic to tip the Committee to increase Bank Rate.

2.2.9 The US Federal Reserve held the Fed Funds target range at 3.50%-3.75% through to July. However, inflation pressures rose during the summer, pushing headline CPI to 3.4% in August, with higher petrol prices accounting for much of the increase. This led the Fed to raise its target range to 3.75%-4.00% in September. The move reflected increased concern over inflation at a time when US economic activity and labour-market conditions were relatively resilient.

2.2.10 Following a 0.25% increase in June, the European Central Bank raised its three key policy rates by a further 0.25% in September, taking the deposit facility rate to 2.50%. Inflation increased from 2.9% in July to 3.2% in August, and an initial estimate suggested a further rise to 3.8% in September, with energy prices the principal driver. The ECB emphasised the uncertainty around the duration of the energy shock and the risk prolonged higher inflation could feed into wider price-setting.

Financial markets

2.2.11 After the sharp deterioration early in the period, financial market sentiment improved somewhat as there were ongoing hopes that the US/Iran war would be resolved. However, towards the end of the period, signs of any potential resolution appeared premature and oil prices rose alongside inflation and bond yields while equity market volatility increased as investors weighed conflict-related as well as AI-related concerns

2.2.12 Bond yields in both the US and UK increased markedly over the period, with the gap between gilts and US Treasuries tightening towards the end of the period. While term premia are still embedded in gilt yields given the relatively uncertain fiscal outlook, a more hawkish Fed alongside persistent US inflation and fiscal concerns have pushed the yields on US Treasuries to their highest levels in years.

2.2.13 Some relatively market-friendly announcements were made by Andy Burham in his speech at the Labour Party conference, but it will be the Budget at the end of October that will hopefully provide some clarity on what the UK's fiscal position might look like going forward.

2.2.14 Over the period, the 10-year UK benchmark gilt yield started at 4.86% and ended at a high of 5.43%. The 20-year gilt yield starting at 5.45% and finished at 5.93%, another high for the period. The Sterling Overnight Rate (SONIA) averaged 3.73% over the period to 30th September.

Credit review

2.2.15 Arlingclose maintained its advised recommended maximum unsecured duration limit on the majority of the banks on its counterparty list at 6 months. The other banks remain on 100 days.

2.2.16 During the period, Fitch upgraded numerous banks due to a rating methodology change, as well as the reference obligations used for Issuer Default Ratings and introduced more

differentiated notching between deposits, senior preferred, senior unsecured and senior non-preferred debt ratings.

2.2.17 Later in the period, Moody's changed the outlook on HSBC to Positive from Stable, while also affirming its long-term deposit rating. This follows a similar action from S&P on HSBC's outlook a few months prior to this.

2.2.18 After spiking in April following escalation in the Iran war, credit default swap prices on UK banks declined during most of the period but started to pick up again in September. They ended the period well below levels that may give cause for concern but remain under constant monitoring.

2.2.19 European banks' CDS prices followed a similar pattern to the UK, while Canadian bank CDS prices rose early in the period and then remained at similar levels, while Australian and Singaporean banks tended to trend downwards.

2.2.20 Overall, at the end of the period CDS prices for all banks on Arlingclose's counterparty list remained within limits deemed satisfactory for maintaining credit advice at current durations.

2.2.21 Financial market volatility is expected to remain a feature, at least in the near term and, credit default swap levels will continue to be monitored for signs of ongoing credit stress. As ever, the institutions and durations on the Authority's counterparty list recommended by Arlingclose remain under constant review.

2.3 The Oldham Council Treasury Position

2.3.1 On 31 March 2026, the Authority had net borrowing of £211.007m arising from its revenue and capital income and expenditure. This had fallen to £188.48m by the end of Quarter One and as at presented in Table 3 had increased to £203.095m at the half year. This is largely due to increased cashflow in the early part of the year invested which has reduced without replacing any matured temporary borrowing.

2.3.2 The actual and planned level of capital expenditure are the drivers of borrowing for capital purposes. **Appendix 1** shows the actual level of capital expenditure at the end of 2025/26 and includes the forecast as at 30 September 2026/27, 2027/28 and 2028/29 forecast for 2026/27, 2027/28 and 2028/29. It also shows the financing including the level of prudential borrowing.

2.3.3 The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while balance sheet resources are the underlying resources available for investment. These factors are summarised in Table 1 below and show the 2026/27 forecast as at 30 September compared to the closing position for 2025/26.

Table 1 - Balance Sheet Summary

	31/3/2026 Actual £000	31/3/2027 Half year review Forecast £000
General Fund CFR	581,037	601,914
Total CFR	**581,037**	**601,914**
Less: *Other debt liabilities PFI/Leases	211,360	215,423
Borrowing CFR	**369,677**	**386,492**
External borrowing	259,957	247,042
Internal borrowing	109,718	139,449
Less: Usable reserves	(151,091)	(146,091)
Less: Working capital	(7,577)	(37,306)
Net Investments	**(48,950)**	**(43,947)**

2.3.4 Table 1 shows the forecast CFR for 2026/27 is £601.914m, an increase of £20.877m compared to £581,037m at the end of 2025/26. The CFR excluding other debt liabilities relating to Private Finance Initiative schemes and leases (Borrowing CFR) is forecast at £386.492m an increase of £16.815m compared to the position at the end of 2025/26.

2.3.5 The table clearly highlights that the Council borrowing is well below the CFR and the Council is currently maintaining an under-borrowed position. This means that the capital borrowing need (CFR) has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. The Council will continue to analyse and assess the market to determine the optimum time to externally borrow.

2.3.6 The treasury management position as at 30 September 2026 and the change over the quarter is shown in Table 2 below.

Table 2 - Treasury Management Summary

Borrowing/Investment	31.3.26 Balance £'000	Movement £'000	30.09.26 Balance £'000	30.09.26 Average Rate %
Long-term borrowing				
- PWLB	114,195	(2,931)	111,264	4.06%
- LOBOs	75,500	(5,000)	70,500	4.32%
- Other	40,002	(2)	40,000	4.03%
Short-term borrowing	30,260	(4,982)	25,278	4.45%
Total borrowing	**259,957**	**(12,915)**	**247,042**	
Long-term investments	13,610	(433)	13,177	4.74%
Cash and cash equivalents	35,340	(4,570)	30,770	3.80%
Total investments	**48,950**	**(5,003)**	**43.947**	
Net borrowing	**211,007**	**(7,912)**	**203,095**	

As can be seen from the table above, borrowing has been reduced by circa £12.915m in the first half of the year. However, borrowing will increase during the year in line with planned capital expenditure. Overall, the level of investment is £5.003m lower than at the end of 2025/26, principally due to capital grant funding being received in advance of it being spent and council incomes are generally greatest at the start of a financial year.

2.4 Borrowing

2.4.1 As outlined in the treasury strategy, the Authority's chief objective when borrowing has been to strike an appropriately risk balance between securing lower interest costs and achieving cost certainty over the period for which funds are required, with flexibility to renegotiate loans should the Authority's long-term plans change being a secondary objective. The Authority's borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio.

2.4.2 Gilt yields have been volatile, reflecting expectations of tighter monetary policy compared to previous expectations due to the war. Long-term gilt yields are very high, with investors lacking confidence in UK fiscal plans.

2.4.3 The PWLB certainty rate for 10-year maturity loans was 5.62% at the beginning of the period and 6.17% at the end. Rates for 20-year maturity loans moved from 6.13% to 6.61% during the period, and 50-year maturity loans from 6.01% to 6.37%.

2.4.4 The cost of short-term borrowing from other local authorities has been above Bank Rate during the period at 3.8% to 5.5%: costs have risen throughout the period. This is primarily due to many local authorities avoiding more expensive long term rates and relying more heavily on the short term market. Low cash levels and the non-receipt of SEND grants are also likely to have contributed to a high borrowing demand.

2.4.5 CIPFA's 2021 Prudential Code is clear that Local Authorities must not borrow to invest primarily for financial return and that it is not prudent for Local Authorities to make any investment or spending decision that will increase the capital financing requirement and so may lead to new borrowing, unless directly and primarily related to the functions of the Authority.

2.4.6 Public Works Loan Board (PWLB) loans are no longer available to Local Authorities planning to buy investment assets primarily for yield unless these loans are for refinancing purposes.

2.4.7 Oldham Council has not invested in assets primarily for financial return or that are not primarily related to the functions of the Council, and it has no plans to do so in future.

Loans Portfolio

2.4.8 On 30 September 2026 Oldham Council held £221.764m in long-term loans. There has been no new borrowing undertaken in the first six months of the year. One LOBO loan of £5.000m was called in the period. This, and a proportion of EIP interest on PWLB loan, has resulted in long term borrowing being lower by £7.932m than on 31 March 2026. Outstanding loans on 30 September (borrowing position) are summarised in Table 3 below.

Table 3 - Borrowing Position

Borrowing Sources	31/3/2026 Balance £'000	Movement £'000	30.9.26 Balance £'000	30.9.26 Weighted Average Rate %	30.9.26 Weighted Average Maturity (years)
Public Works Loan Board	114,196	(2,932)	111,264	4.06%	10.52
Banks (LOBO)	75,500	(5,000)	70,500	4.32%	42.43
Banks (fixed term)	40,000	-	40,000	4.03%	44.02
Local Authorities (short term)	30,000	(5,000)	25,000	4.45%	0.00
Local Bonds (long-term)	1	0	1	3.76%	0
Local Bonds (short-term)	25	-	25	4.66%	0
Local Charitable Trusts (short-term)	235	18	252	3.76%	1
Total borrowing	**259,956**	**(12,914)**	**247,042**	4.38%	

2.4.9 The Authority's short-term borrowing costs have increased over the course of the first half of the year. The average rate on the Authority's short-term loans as at 30 September 2026 of £25m is 4.45%, this compares with £30m 5.08% at 30th June and 4.84% on £30m of loans at 31st March 2026.

LOBO Loans

2.4.10 Oldham Council currently holds £70.500m of LOBO (Lender's Option Borrower's Option) loans where the lender has the option to propose an increase in the interest rate at set dates, following which the Council has the option to either accept the new rate and terms or to repay the loan at no additional cost. This a reduction of 5.000m from the position as at 31 March 2025 due to one of the lenders, Dexia, exercising its option to revise the rate payable on the loan in April. The revised interest rate offered was 6.70% and the Council exercised its option to repay the loan in full, utilising available cash balances.

2.4.11 Currently, Oldham Council has £39m LOBO loans with call dates during the remaining six months of this financial year. Of this sum, £19m is held with Dexia Finance, £10m is held with KBC Bank NV and the remaining £10m is evenly split between two other providers, Danske Bank and Just Retirement. At the time of writing no call options have been exercised.

2.4.12 There may be opportunities to repay the Council's historical LOBO borrowing. The Council will investigate all opportunities, including consultation with the council's treasury management advisors, Arlingclose, and will ensure any repayments create revenue savings. If required, the Authority will repay the LOBO loans with available cash or by borrowing from other local authorities or the PWLB.

2.4.13 Council officers will liaise with treasury management advisors, Arlingclose, over the likelihood of the options being exercised for LOBO's within the loan portfolio. If any option

is exercised the Authority plans to repay the loan at no additional cost. If required, the Authority will repay the LOBO loans with available cash or by borrowing from alternative sources or the PWLB, always providing that overall savings can be demonstrated.

2.5 Treasury Investment Activity

2.5.1 CIPFA published revised 'Treasury Management in the Public Services Code of Practice and Cross-Sectoral' Guidance Notes on 20 December 2021. These define treasury management investments as investments that arise from the organisation's cash flows or treasury risk management activity that ultimately represent balances that need to be invested until the cash is required for use in the course of business.

2.5.2 At 30 September, the Council held £30.770m invested funds, representing income received in advance of expenditure plus balances and reserves held. During the first half of year the Authority's Money Market Fund Investment balances ranged between £21.310m and £72.030m due to timing differences between income and expenditure. The investment position is shown in Table 4 below.

Table 4 - Treasury Investment Position

	31.3.26 Balance £'000	Movement £'000	30.09.26 Balance £'000	30.09.26 Income Return %	30.09.26 Weighted Average Maturity days
Money Market Funds	35,340	(4,570)	30,770	3.80%	
- *Property funds*	13,610	(433)	13,177	4.74%	180
Total investments	**48,950**	**(5,003)**	**43,947**		

2.5.3 Both the CIPFA Code and Government guidance require the Authority to invest its funds prudently, and to have regard to the security and liquidity of its treasury investments before seeking the optimum rate of return, or yield. The Authority's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.

2.5.4 As demonstrated by the liability benchmark in this report, the Authority expects to be a long-term borrower, and new treasury investments are therefore primarily made to manage day-to-day cash flows using short-term low risk instruments. The existing portfolio of strategic pooled funds will be maintained to diversify risk into different sectors and boost investment income.

2.5.5 The Council in previous years has invested £15.000m in the Churches, Charities & Local Authorities (CCLA) pooled property fund. As this is a longer-term investment, short term security and liquidity are lesser considerations, and the objectives instead are regular revenue income and long-term price stability. This fund generated an average total return in 2025/26 of £0.626m, and currently yields 4.74% income return. The value is estimated at £13.177m as at 30 September 2026.

Statutory Override

2.5.6 Further to consultations in April 2023 and December 2024 MHCLG wrote to finance directors in England during February 2025 regarding the statutory override on accounting for gains

and losses in pooled investment funds. On the assumption that when published regulations follow this policy announcement, the statutory override will be extended until 1 April 2029 for investments already in place before 1 April 2024. The override will not apply to any new investments taken out on or after 1 April 2024.

2.5.7 The Authority had set up a provision of £2.000m to mitigate the impact of the statutory override not being extended. In view of the fact that the override may not be extended past 2029 the authority has decided to maintain this provision.

2.6 Treasury Performance

2.6.1 The Treasury Team measures the financial performance of its treasury management activities both in terms of its impact on the revenue budget and its relationship to benchmark interest rates, as shown in Table 5 below.

Table 5 – Treasury Performance

	Budgeted Performance Rates/Benchmark SONIA Return %	Benchmark SONIA Return % Plus 5%	30.09.26 Income Return % (Actual)
Budgeted Investment Rates	3.50%		4.08%
Overnight SONIA	3.73%	3.92%	3.73%

2.6.2 The budgeted investment rate of 3.5% above was included within the annual strategy for 2026/27. The actual rate achieved in the first quarter is above this budgeted rate at 3.78%. The total budget for treasury management income for 2026/27 is £1m, to date General Fund income of £0.480m has been achieved.

2.6.3 Previously the benchmark return was measured on the London Interbank Bid Rate (LIBID) which was a forward-looking interest rate. The Bank of England replaced LIBID with SONIA in December 2021. SONIA is calculated differently to LIBID in that it is a backward-looking rate, based on actual results. The benchmark of SONIA plus 5% has not been achieved, however the actual rate achieved for overnight investments is higher than the average SONIA rate over the period.

Compliance

2.6.4 The Director of Finance reports that all treasury management activities undertaken during the quarter complied fully with the principles in the Treasury Management Code and the Council's approved Treasury Management Strategy. Compliance with specific investment limits is demonstrated in Table 6 below.

Table 6 - Investment Limits

Investment Limit	Maximum during Half Year 2026/27	30.9.26 Actual	Maximum allowable in 2026/27	Compliance Yes/No
	£000	£000	£000	
Any single organisation, except the UK Government	10,000	-	30,000	Yes
Any group of organisations under the same ownership	10,000	-	20,000	Yes
Unsecured investments with building societies	-	-	20,000	Yes
Money Market Funds	61,420	30,770	80,000	Yes
Strategic pooled funds	13,343	13,177	15,000	Yes

2.6.5 Compliance with the Operational Boundary and Authorised Limit for external debt is demonstrated in Table 7 below.

Table 7 – Debt and the Authorised Limit and Operational Boundary

	Maximum debt H1	Debt at 30/9/2026	2026/27 Authorised Limit	2026/27 Operational Boundary	Complied? Yes/No
Borrowing	259,957	247,042	390,000	375,000	Yes
PFI and Finance Leases	215,423	215,423	223,500	220,000	Yes
Total debt	**475,380**	**462,465**	**613,500**	**595,000**	

2.6.6 The Operational Boundary represents the expected maximum borrowing position for the Council for the year and was set at £595.000m

2.6.7 The Authorised Limit is the "affordable borrowing limit" required by Section 3 of the Local Government Act 2003 and for 2026/27 was set at £613.500m Once this has been set, the Council does not have the power to borrow above this level although it can be revised if required.

2.6.8 Since the Operational Boundary is a management tool for in-year monitoring it is not significant if the Operational Boundary is breached on occasions due to variations in cash flow, and this is not counted as a compliance failure. No breaches have occurred, and it is not anticipated that there will be any breaches in 2026/27.

2.7 Treasury Management Prudential Indicators

2.7.1 As required by the 2021 CIPFA Treasury Management Code, the Authority monitors and measures the following treasury management prudential indicators.

Liability Benchmark

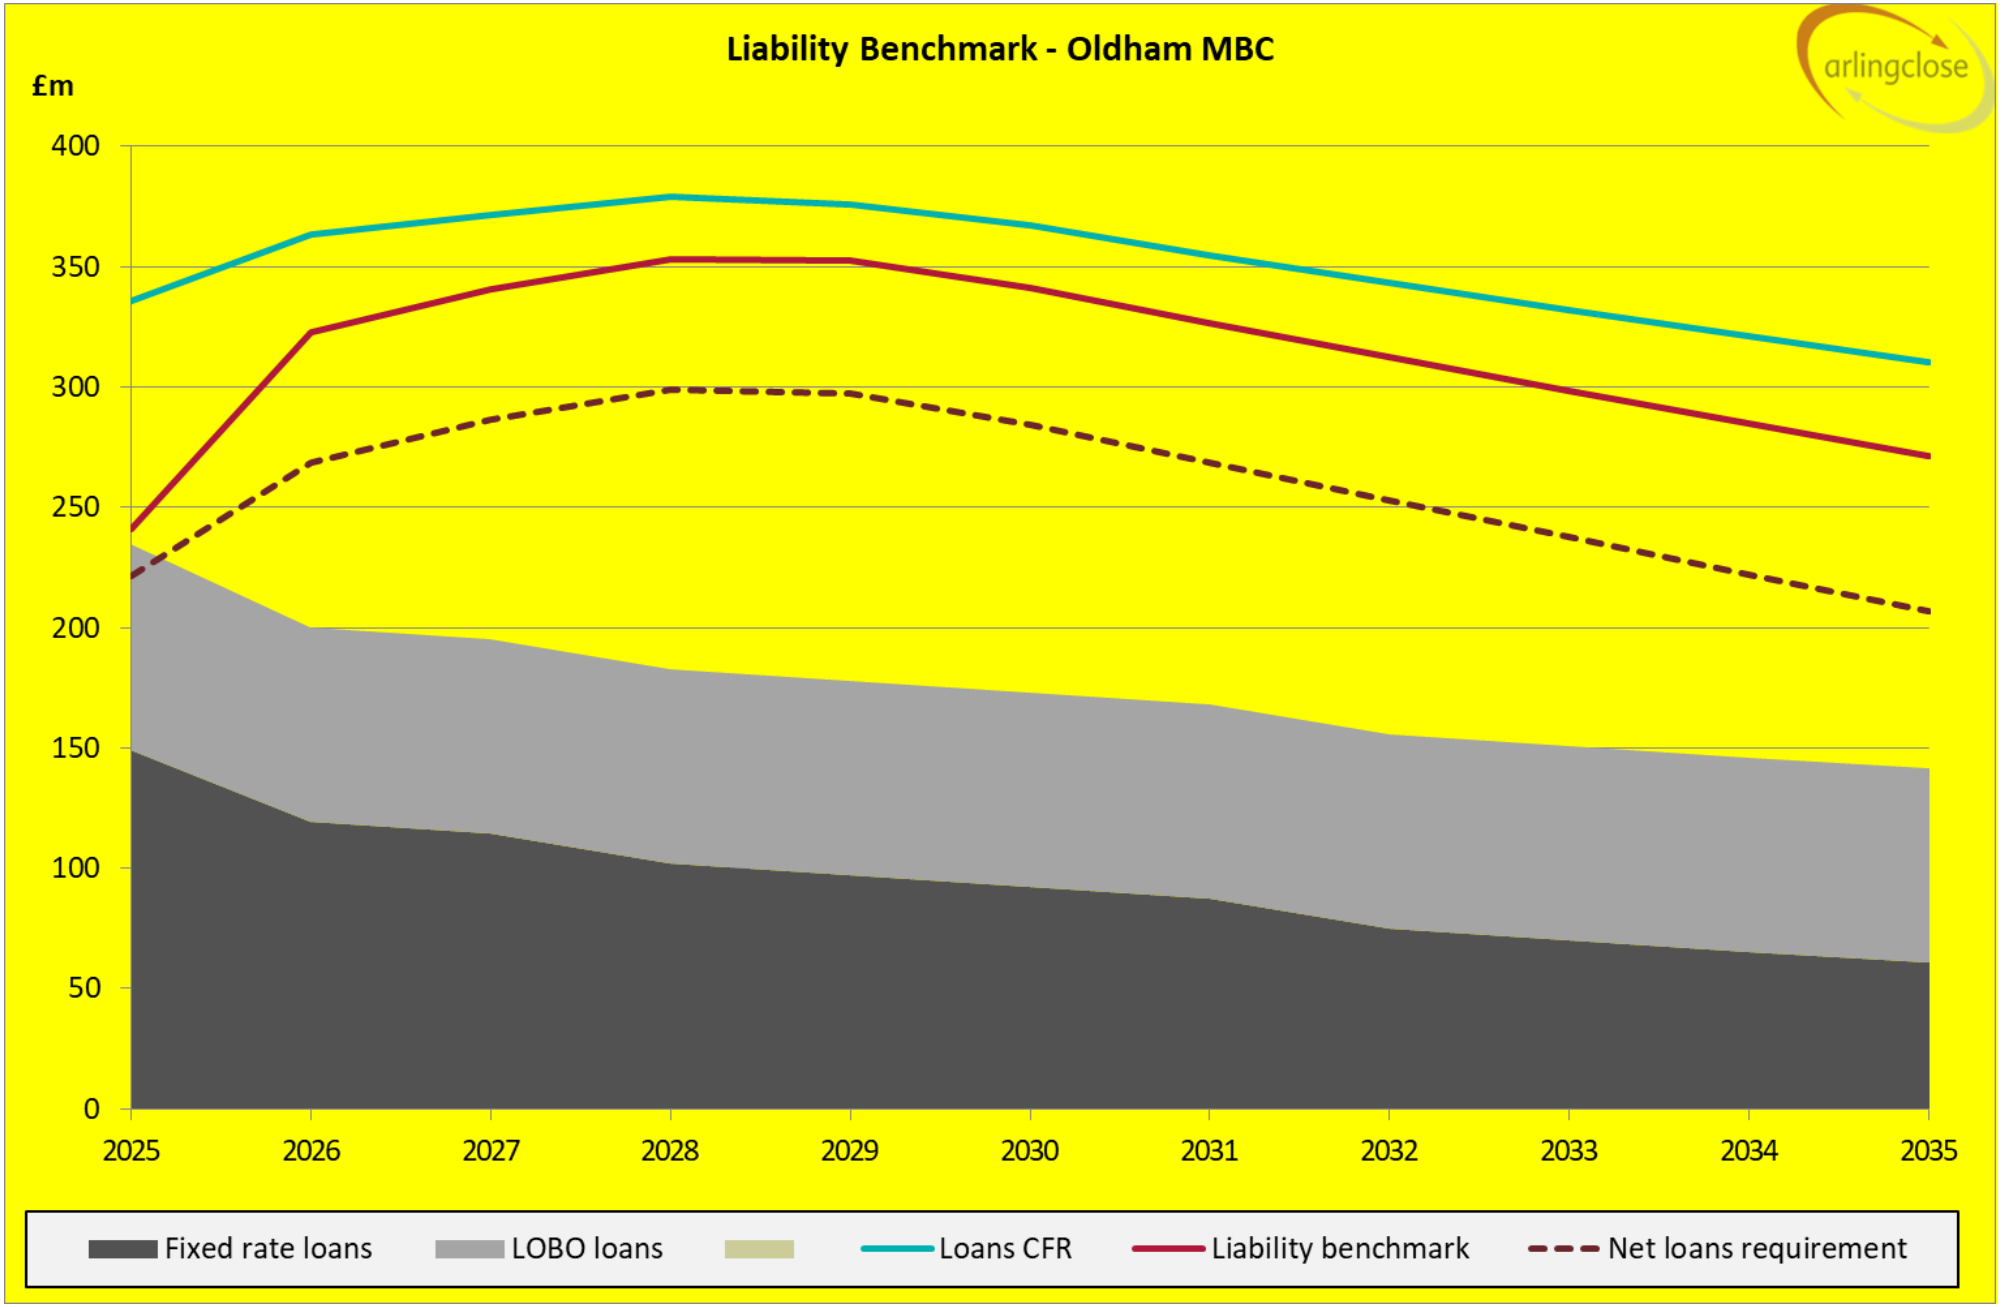

2.7.2 This indicator compares the Authority's actual existing borrowing against a liability benchmark that has been calculated to show the lowest risk level of borrowing. The liability benchmark is an important tool to help establish whether the Council is likely to be a long-term borrower or long-term investor in the future and so shape its strategic focus and decision making. It represents an estimate of the cumulative amount of external borrowing the Council must hold to fund its current capital and revenue plans while keeping treasury investments at the minimum level of £20.000m, the level required to manage day-to-day cash flow.

Table 8 - Liability Benchmark

Liability Benchmark Measurement	31 March 2026 Actual £'000	31 March 2027 Forecast £'000	31 March 2028 Forecast £'000	31 March 2029 Forecast £'000
Loans CFR	369,677	386,492	389,439	384,956
Less: Balance sheet resources	151,091	120,813	115,813	110,813

2.7.3 As demonstrated by the liability benchmark in the table above, the Council expects to be a long-term borrower to finance the expected capital spend. There could be timing differences between when the Council externally borrows compared to when the expenditure is required due to the nature of capital works, but new treasury investments are therefore primarily made to manage day-to-day cash flows using short-term low risk instruments. The existing portfolio of strategic pooled funds will be maintained to diversify risk into different sectors and boost investment income.

2.7.4 Following on from the medium-term forecast above, the long-term liability benchmark assumes capital expenditure funded by borrowing of £35.436 in 2026/27.

2.7.5 Table 9 below sets out the maturity structure of borrowing at the end of the first quarter of 2026/27 compared to the upper and lower limits set in the Treasury Management Strategy for 2026/27.

Table 9 - Maturity Structure of Borrowing

Borrowing Timeframe	Upper Limit	Lower Limit	30.6.2026	Complied?
Under 12 months	35%	0%	31.35%	Yes
12 months and within 24 months	35%	0%	15.14%	Yes
24 months and within 5 years	35%	0%	20.40%	Yes
5 years and within 10 years	35%	0%	8.80%	Yes
10 years to 20 years	60%	0%	2.03%	Yes
20 years to 30 years	60%	0%	4.05%	Yes
30 years to 40 years	60%	0%	6.08%	Yes
40 years to 50 years	60%	0%	4.05%	Yes
50 years to 60 years	60%	0%	8.10%	Yes

2.7.6 Time periods start on the first day of each financial year. The maturity date of borrowing is the earliest date on which the lender can demand repayment. In the case of LOBO loans, the next option date has been used as the measure to determine if it is potentially repayable.

Long-term Treasury Management Investments

2.7.7 The purpose of the Long-Term Treasury Management indicator is to control the Authority's exposure to the risk of incurring losses by seeking early repayment of its investments. The prudential limits on the long-term treasury management limits are set out in the table below.

Table 10- Limit / Actual Investments exceeding one year

Limit/Actual Investments Exceeding One Year	2026/27	2027/28	2028/29	No fixed date
Limit on principal invested beyond year end	£50m	£50m	£50m	£50m
Actual principal invested beyond year end	£15m	0	0	0
Complied?	Yes	N/A	N/A	N/A

2.7.8 Long-term investments with no fixed maturity date include strategic pooled funds. For the Council, this is currently the CCLA Property Fund. Long term investments exclude money market funds and bank accounts with no fixed maturity date as these are considered short-term investments.

3 Options/Alternatives

3.1 In order that the Council complies with the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code of Practice on Treasury Management the Audit Committee has no option other than to consider and approve the contents of the report. Therefore, no options/alternatives have been presented.

4 Preferred Option

4.1 The preferred option is that the contents of the report are agreed and recommended to Cabinet/Leaders Consultative Committee (Decisions) for approval.

5 Consultation

5.1 There has been consultation with the Council's Treasury Management Advisors, Arlingclose, in the production of this report.

5.2 The presentation of the Treasury Management Half Year Report to the Audit Committee for detailed scrutiny on 25 November 2026 will be in compliance with the requirements of the CIPFA Code of Practice. The report will then be presented to Cabinet and then subsequently Council for approval.

6 Financial Implications

6.1 All included within the report.

7 Legal Services Comments

7.1 None.

8 Co-operative Agenda

8.1 The Council ensures that any Treasury Management decisions comply as far as possible with the ethos of the Co-operative Council.

9 Human Resources Comments

9.1 None.

10 Risk Assessments

10.1 There are considerable risks to the security of the Authority's resources if appropriate treasury management strategies and policies are not adopted and followed. The Council has established good practice in relation to treasury management which has previously been acknowledged in both Internal and the External Auditors' reports presented to the Audit Committee.

11 IT Implications

11.1 None.

12 Property Implications

12.1 None.

13 Procurement Implications

13.1 None.

14 Environmental and Health & Safety Implications

14.1 None.

15 Equality, community cohesion and crime implications

15.1 None.

16 Equality Impact Assessment Completed?

16.1 No.

17 Key Decision

17.1 Yes

18 Key Decision Reference

18.1 KDD-26-39

19 Background Papers

19.1 The following is a list of the background papers on which this report is based in accordance with the requirements of Section 100(1) of the Local Government Act 1972. It does not include documents which would disclose exempt or confidential information as defined by that Act.

20 Appendix 1 - Prudential and Treasury Indicators

Appendix 1 - Prudential and Treasury Indicators

The Council measures and manages its capital expenditure, borrowing with reference to the following indicators. The Council has not taken out any Commercial or Service Investments.

The following tables show a summary of the prudential indicators for Half Year 2026/27

Capital Expenditure

Capital Expenditure/Financing	2025/26 Actual £'000	2026/27 Forecast Actual £'000	2027/28 Budget £'000	2028/29 Budget £'000
Expenditure				
General Fund services	71,913	103,620	48,226	15,182
HRA	212	6,189	3,849	0
Total Capital Expenditure	**72,125**	**109,809**	**52,075**	**15,182**
Financing				
Grants & Contributions	(44,744)	(67,159)	(35,780)	(6,358)
Prudential Borrowing	(20,333)	(35,436)	(13,394)	(6,223)
Revenue	(54)	(3,050)	0	0
Capital Receipts	(6,994)	(4,164)	(2,900)	(2,600)
Total Financing	**(72,125)**	**(109,809)**	**(52,075)**	**(15,182)**

Capital Financing Requirement (CFR)

Capital Financing Requirement	31 March 2026 Actual £'000	31 March 2027 Forecast £'000	31 March 2028 Budget £'000	31 March 2029 8Budget £'000
Total CFR	**581,037**	**601,914**	**598,668**	**587,740**

Gross Borrowing and the Capital Financing Requirement

Statutory guidance is that debt should remain below the capital financing requirement except in the short term. The Authority has complied with and expects to comply with this requirement in the medium term as it is shown below

Gross Borrowing /CFR	31 March 2026 Actual £'000	31 March 2027 Forecast £'000	31 March 2028 Budget £'000	31 March 2029 Budget £'000	Debt at 30 Sept 2026 £'000
Gross Borrowing (incl. PFI & leases)	471,317	472,187	480,993	469,278	462,465
Capital Financing Requirement	581,037	601,914	598,668	587,470	601,914

Debt and the Authorised Limit and Operational Boundary

The authority is legally obliged to set an affordable borrowing limit (also termed the Authorised Limit for external debt) each year. In line with statutory guidance, a lower 'operational boundary' is also set as a warning level should debt approach this limit

	Maximum debt Half Year	Debt at 30/9/2026	2026/27 Authorised Limit	2026/27 Operational Boundary	Complied? Yes/No
Borrowing	259,957	247,042	390,000	375,000	Yes
PFI and Finance Leases	215,423	215,423	223,500	220,000	Yes
Total debt	**475,380**	**462,465**	**613,500**	**595,000**	

Since the operational boundary is a management tool for in-year monitoring it is not significant if the boundary is breached on occasions due to variations in cashflow, and this is not counted as a compliance failure. Total Debt has not exceeded either Authorised or Operational Boundary limits in the period April to Sept 2026.

Proportion of Financing Costs to Net Revenue Stream

Although capital expenditure is not charged directly to the revenue budget, interest payable on loans and MRP/loans fund repayments are charged to revenue.

The net annual charge is known as financing costs; this is compared to the net revenue stream (i.e. the amount funded from Council Tax, business rates and general government grants).

Financing Cost/Net Revenue Stream	2025/26 Actual £'000	2026/27 Forecast £'000	2027/28 Budget £'000	2028/29 Budget £'000
Financing costs (£m)	27,027	24,985	27,334	27,550
From Proportion of net revenue stream	7.82%	7.23%	7.39%	7.02%

Impact of a 1% increase in interest rate on debt financing costs

This indicator demonstrates the additional revenue interest costs that would be charged if interest rates were 1% above the current assumptions.

Financing Cost/Net Revenue Stream	2026/27 Estimated £'000	2027/28 Estimated £'000	2028/29 Estimated £'000
Additional Revenue costs (£000)	145	254	246

Treasury Management Indicators

These indicators (Liability Benchmark, Maturity Structure of Borrowing, Long Term Treasury Management investments are included within the main body of the report.
